How many women who are fifty and willing to admit are able to go to the traps and tear off a 98 out of 100 score on their birthday? Mrs. Frank Butler, nee Annie Oakley, did just that down at Pinehurst ,and they do say that Annie will pass for thirty in anybody's crowd . This pioneer woman shooter is in a class by herself, and she, no doubt, found Ponce de Leon's fabled fountain in the fresh invigorating air of the shooting field. Here's to ye, Annie Oakley, and we're hoping that you make it a clean 100 out of 100 when you celebrate your centennial birthday . After all age is a matter of mind and the woman who gets out into the open with a gun forgets her birthdays in pursuit of the keenest pleasure in the world.

Coalinga High Guns.—Dick Reed, the local professional trap shot, was high gun Sunday in the registered tournament held at Coalinga. W. G. Harris took the amateur honors, with 192 out of 200. The high guns on the regular 200-target program follow:

Dick Reed 196, W. G. Harris 192, L. S. Hawxhurst 190, W .E. Savateer 189, H. Ogilvie 189, J. W. Meek 189, Guy Lovelace 188, R. Ostendorff 188, Ed Garratt 187 and W. E. Mullen 187.

✤ ✤ ✤

H. Pfirrmann Sr. With Rifle.—C. Emery was high gun in the monthly medal rifle tournament held Sunday afternoon at Schuetzen Park, Los Angeles, by the Turnverein Germania. His score was 195. H. Pfirrmann, Sr., was second with 186 and Mrs. Kremple third with 176. The results:

Emery 195, H. Pfirrmann 186, Mrs. Kremple 176, L. Brehm 174, Pachmayr 164, A. Maas 136, Max Freese 134, H. Sloan 132, O'Connor 111.

✤ ✤ ✤

Raccoon Straits Fishing.—Pleasing reports have been heard during the past ten days over the good sport enjoyed by striped bass fishermen in Racoon Straits and around Belvedere Peninsular. There has been slack water and the sport has been better than in years. Nearly every one who went out made catches. Trolling with No. 5 Wilson spoon brought results. The S. F. Striped Bass Club, a week ago Friday, landed ten big bass and a 25-pound salmon. Al Wilson, Henry Hellrich and others were among the lucky ones.

✤ ✤ ✤

Phoenix (Ariz.) Dog Show.—The two-point show, held at Phoenix recently, proved a huge success. There were 18 Airedales entered, with one absentee, this being Mr. John M. Williams' Crack Shot. Winners, dogs, went to Mr. C. F. Hood's Tintern Star; reserve, Mr. J. Rendell's Whitebirk of Anokia. Winners, bitches, went to Mr. R. B. Lyman's Tears and Smiles; reserve, Jas. G. Keefe's Crosby's Nobbler's Queen . The best of the local entry, which included some very good dogs, was Hal Nobbler, a big dog around 60 pounds, but all terrier, with nice head and one of the best fronts, fair coat, but light in eye. The balance of the local entry were put down in the rough, which handicapped them very much. Mr. H. M. Robertson's Scottie, Albourne Bombardier, won for the best dog in the show. Robertson had a string o fthirty dogs, all told, one of them being a very good Irish terrier, Lord Demon, by Vickery Demon, owned by Mr. Chas. H. Lowe, of Dayton, Ohio.

✤ ✤ ✤

Los Angeles Club.—The sixth block of 100 targets for the H. R. Everding trophies was held Sunday at the Los Angeles Gun Clubs, with a fair crowd competing. E. K. Mohler, firing from 16 yards, broke high gun. His score was 95x100. Ed Mitchell scored a 95x100 score.

George Tuckett broke 94x100 from 18 yards and was second high amateur . Third high honors were won by Frank H. Mellus. His score stood at 92x100, achieved from 22 yards.

The shooters have two more Sundays to compete for these trophies. The standing to date of the points winners in the different classes follows:

Class A—F. H. Mellus 25, H. Pfirrmann 18, Dodds 13 ,Evans 8.

Class B—Sargent 22, Council 19, Grewell 10, Tuckett 18.

Class C—Melford 24, Wilson 20, Hart 18, Mrs. H. Pfirrmann 16, Betz 10.

Class D—Pool 26, Kennedy 25, Nelson 9, Carnahan 7, Mrs. Mellon 7.

The results follow: Mohler, 16 yards, broke 95; Mitchell 18—94, Mellus 22—92, Cornelius 16—92, Hart 19—92, Teeple 16—92, Pool 18—91, Melford 19—90, Sargent 20—90, Free 18—90, Cline 18J90, Pfirrmann 22—89, Rossbach 16—89, Council 20—87, Hall 19—87, Hartmann 16—87, Hartman 16—86, Long 18—85, Betz 18—83, Mrs. Pfirrmann 17—82, Clement 78, Armstrong 70, Kennedy 68, Bungay 46x50, Towne 42x50, Pedersen 41x50, Cosby 36x50, Vail 30x50, Whitcomb 22x25, Christensen 21x25, Bovee 20x25, Broadbent 20x25, Rude 5x25, Cleveland 17x25.

✤ ✤ ✤

Peters' Pointers.—High Amateur and High General Averages at Bruning, Nebr., April 18, were won by Mr. E. W. Varner, 136x150, using Peters factory loaded shells.

At Riverside, Conn., April 19, Mr. Fred Plum of Atlantic City ,shooting Peters shells, tied for High Amateur and High General Averages, 146x150, and tied first place in the Maplewood Hundred, 98x100, and won with 20 straight in the shoot-off.

At Butte, Mont., April 15, Mr. C. L. Flannigan, using Peters shells, was High Professional, 129x150, including double targets and handicap events.

High General Average at Oklahoma City, April 21-22, was won by Mr. K. L. Eagan, using Peters factory loaded shells.

At a special tournament given at the Interurban Gun Club, Houston, Texas, in honor of shooters attending the Hardware Jobbers' Convention, April 19, Mr. H. A. Murrelle of Houston won High General Average, 93x100, using Peters shells.

Mr. C .O. Carothers of Kenton, Ohio, tied for High Amateur and High General Averages at the first shoot of the Central Ohio Trapshooters' league, Springfield, Ohio, April 24. Mr. R. O. Heikes was High Professional. Both of these gentlemen broke 97x100 and both used the "P" brand factory loaded shells.

Golden Gate Dog Show.—Kennel followers who took in the eighth annual exhibition of the Golden Gate Club at the San Francisco Exposition Auditorium on May 2, 3 and 4th, saw Jack Bradshaw's bull dog, Country Model, proclaimed the best on the bench. Tallac Tailsman, a wire-haired fox terrier owned by Walter W. Stetheimer of Redwood City was the runner-up. Biddy Goldstone, a bulldog bitch was awarded the trophy for the best of the opposite sex. Biddy Goldstone, owned and bred by W. Ballantyne of San Mateo, was also awarded the honor of being the best Pacific Coast bred dog in the show. George S .Thomas, the wealthy Massachusetts man who judged all breeds, gave it as his opinion that Biddy Gildstone is the best bulldog bitch in the country today.

There was a ripple of surprise on the second day when Fol-Del Rol, an airedale owned by Dr. Bilmer of Angel Island, won the highest airedale honors over Tintern Star, a dog that was imported from England at a cost of $1,500. Tintern Star won ribbons in several of the classes but was shown in poor condition and Bilmer Fol-Del-Rol came along and beat him. The airedales were a bitter disappointment to Judge Thomas and the kennel visitors.

The crowds during the three days were up to the standard, showing the interest in the pets, but the show as a whole was not up to the standard of other Golden Gate Club exhibitions.

The hunting dog classes attracted interest. J. S. French, who won the membership stake at the last Pacific Coast Field Trials at Bakersfield with Dixie Chase, had his beautiful setter on the bench and won a blue ribbon.

The special awards were as follows:—

Best conditioned dog in show: Princess Pat, parti-colored cocker bitch, Miss Buford Benentt, San Francisco.

Best puppy owned by exhibitor: Tallac Talisman, wire-haired fox terrier, Walter Stettheimer, Redwood City.

Best puppy in show: Tallac Talisman.

Best dog bred on Pacific Coast: Biddy Goldstone, bulldog bitch, W. Ballantyne, San Mateo.

Best brace: Espeer, from Goldenstate, and Champion Denniston Nugget, parti-colored cocker spaniel, Goldenstate Kennels, Oakland.

Best stud dog: Champion High Geer, wire-haired fox terrier, Walter W. Stettheimer, Redwood City.

Best toy: Rossomoyne Black, imp. Pomeranian, Rossomoyne Kennels, Lamanda, Cal.

✤ ✤ ✤

Thousands Lure Trout.—There were literally thousands out on the streams, lakes and bodies of waters of all sizes last Sunday in quest of trout. Reports are to the effect that trout were plentiful but small, the same as was the case on the opening days. Also there was a complaint that the banks were too crowded for the best of sport. At fish and game headquarters the theory is advanced that larger fish will be taken later on when the streams are fished out of the little fellows.

The anglers who journeyed out to their favorite fishing haunts Sunday in Southern California were forced to return home without limits. Of course many did get limits, but the majority of those who angled in the streams did not come near landing the legitimate number of fish allowed by the law.

Of course the crowd had much to do with this. Along the San Gabriel, Sespe, Ventura, San Dimas and all the other fishing streams there was a man or woman, boy or girl, about every yard, seeking the elusive fish.

Deputy Fish and Game Commissioner George Neale of Sacramento reports trout fishing generally good for this time of the year. Many of the streams are yet high and muddy, making fly biting impossible; there are also many where the water has receded sufficiently to make the season earlier than in 1916. Black bass fishing is also reported good, especially in Yolo County.

✤ ✤ ✤

Fishermen and Their Tales.—These fishermen and their tales! Bobby Cavanaugh, the bright and chipper gent who officiates behind the counter of a Fresno hotel ,told the story of the "biggest fish ever" which he almost snagged at Bass Lake the other day.

It appears Robert was trolling from a boat close to the mouth of the North Fork of the San Joaquin, which feeds Bass Lake. Of a sudden he felt a strike that made him think of U-boats and mines and other warlike things. Then his boat commenced moving with the speed of "Miss Binneapolis," his creel ran out and all sorts of exciting things happened.

To make a long tale short (for Bob tells it with great finish and wealth of detail), the beast got away. "But," exclaims our recounter, "you ought to have seen my spinner! The trout that grabbed at it must have had teeth like a shark, for he crushed it just like a feather when he grabbed it." To back up his statement, Bob says that the spinner is now on exhibition up at the Pines, and any doubting Thomas is at perfect liberty to go up there and behold it.

Bob had other troubles. He grabbed another big fellow, played with him for half an hour, only to see him turn a somersault through the air and snap off the hook. His total day's experience might be summarized:

Won.	Lost.	Pct.
0	2	00

But, he says, others had better luck.

BETTER LIVE STOCK
and Agricultural Topics

Three new sugar factories are announced, Stockton, Tracy and Manteca, all in San Joaquin county, are to be favored.

✤ ✤ ✤

It is estimated that there will be from 30,000 to 35,000 acres of potatoes in the San Joaquin Delta, California, this season.

✤ ✤ ✤

The acreage for cantaloupes around Turlock, San Joaquin Valley, California, is large this year. The Merchants and Growers Association is building packing sheds for the coming crop.

✤ ✤ ✤

O. Harris & Sons Will Sell Entire Herd to Settle Estate.

The announcement that O. Harris & Sons of Harris, Mo., will disperse their entire herd of Herefords at public auction June 26 and 27 will be received with surprise and regret by the thousands of Hereford breeders to whom the words "Harris" and "Herefords" have long been synonymous. Yet this great herd, the home of many grand champions, producer of prize-winners by the hundred, will, to the last animal, go under the hammer on the above dates. No more important event has ever transpired in the history of American Herefords.

The dispersion of the Model Herefords was but recently decided upon, and is the result of the recent death of A. O. ("Gus") Harris, the youngest member of the firm of O. Harris & Sons. This firm consisted of Overton Harris, Wood Harris, A. O. Harris and Gird McCullough, the last-named a son-in-law of Overton Harris. The partnership did not extend to the 3,000 or more acres of fine blue grass land on which the herd was maintained, which presented another problem in connection with its continuance. Clif Harris of this firm attended the D. O. Lively sale, at Mayfield, Cal., last week.

Breeders of Hereford Cattle to Form Association.

A meeting of all the breeders of Hereford cattle in California has been called for May 29 to June 2 at the University of California Farm at Davis, for the organization of a Coast Breeders' Assocaition. Because of the present high prices of market animals of the meat classes, there is a great revival of interest all over the Pacific Coast in better beef cattle. The California Shorthorn breeders have recently organized, and the response of the Hereford breeders to the invitation to meet during Farmers' Week at the University Farm indicates that a strong new organization will result.

To Display to Sheep Men Many Types of Lambs.

A demonstration of market lambs, planned to be of special value to every sheep man in California, is planned as a special feature of "Farmers' Week," to be conducted by the University of California at the University Farm at Davis from May 29 to June 1. There will be a display of the leading breeds of mutton sheep, lambs of the different breeds and classes, and lambs of various kinds all made ready for market.

"Plant Sorghums!"

That is the advice the University of California is giving the farmers of the State. Since two-thirds of what the average American family consumes is of animal origin, the raising of plenty of feed for livestock is one of the great national emergencies. The grain sorghums are better adapted to California climate than corn, and very valuable for feeding farm animals.

With irrigation, sorghums may follow grain hay, and sorghums may be planted on irrigated land as late as June 25.

Full information as to how to grow this drought-resisting forage crop is given in a bulletin on "Grain Sorghums," written by Professor B. A. Madson, just issued by the University of California, and obtainable free by writing to the College of Agriculture at Berkeley.

Hereford Men Meet.

The feature of the Hereford Cattle Breeders' meeting at the Palace Hotel in San Francisco, last week, was the get-together spirit shown by the breeders present. The chief topic of the meeting was organization and it seemed that every man present realized the importance of forming an organization and what could be accomplished by so doing. Every man present was a live wire representative of his community and will be a missionary for the breed in his county. Never, I am sure, has there been a more representative gathering assembled. R. J. Kinzer, secretary of the American Association, suggested that in future arrangements be made by the organization to hold a show the day previous to the sale, and that if this were done the Hereford Association of America will appropriate $200 for prizes. This connection of show and sale, which has proved so successful elsewhere, would, he believed, be found of great advantage here.

The others who addressed the meeting, including Messrs. Duke and Gable, contented themselves with paying homage to the undoubtedly great merits of the Hereford breed.

Professor True, D. O. Lively, W. Madden, H. N. Gable, Dean Duke, Wm. Bremerly and E. L. Harris were appointed a committee to perfect the organization, of which the next meeting will be held at the University Farm, Davis, during "Farmers' Week," which takes place at the Farm at the close of the present month.

The following stockmen were present and will probably become charter members of the new Association, of which the foundations have now been laid:

D. O. Lively, San Francisco; G. H. True, Davis; Dean Duke, Likely; W. R. Madden, Dixon; Wm. Bremerly, Woodland; H. L. Murphy, Perkins; Frank Roberts, W. C. Roberts, S. B. Wright, Santa Rosa; Chas. Rule ,Duncan's Mills; J. N. Colomb, Hollister; H. N. Gabel, Esparto; J. A. Bowling, Mission San Jose; Benj. Quigley, Paso Robles; W. W. Marshall, 111 West 4th, Los Angeles; H. T. Liliencrantz, Hollister; A. S. Nichols, Sierraville; H. M. Barngrover, San Jose; Wm. Clark, Petrolia; Williams Bros., Potter Valley; H. W. Friselle, W. C. Hammon, Tehama; A. McDonald, Davis; Geo. Waterson, Bishop; A. B. Cook, Townsend, Mont.; T. D. Tintinger, Park City, Mont. D. O. Lively was chairman of the meeting.

✤ ✤ ✤

The largest number of sheep grazed on any single National Forest is 315,740, finding pasturage on the Humboldt in Nevada, while the largest number of cattle—75,818 head—is found on the Tonto in Arizona. The value of the average annual meat product of these two National Forests is estimated at two million dollars.

✤ ✤ ✤

The meat supply of the country can be increased more quickly by the "hog route" than by any other. The country's need to augment its supply is great but prevailing high prices alone should be sufficient inducement to farmers to raise more hogs. The prospect of success never was brighter. The high prices ruling in all markets show that the demand for pork is in excess of the supply.

✤ ✤ ✤

"There has never been a time when it was so necessary for America's horse breeders to exert themselves in the production of the right kind of horses as at present. Furthermore, too many of our farmers have been lulled into a false sense of security . I am confident that they need to be aroused to the necessity of breeding every available mare to the right stamp of sires, and whatever is done must be done within the next sixty days, so far as next year's crop is concerned."—Wayne Dinsmore.

✤ ✤ ✤

New Pure-Bred Ranch for Tehama.

A big pure breed farm is being established on the Elder Creek ranch, between Gerber and Tehama, in Tehama county.

W. C. Hammon, son of W. P. Hammon, the dredger king and orange operator of Oroville, is proprietor of the ranch, and H. W. Frisselle is the manager.

Harry Murphy of Perkins, and Frisselle recently brought out from the East eight bulls and fourteen heifers to form the nucleus of a pure breed Shorthorn herd.

Frisselle also bought a Shorthorn at the Carruther sale at Mayfield last week. Some hogs of the Berkshire breed are being raised on the place, but so far only pure-bred sires have been used. The ranch is a well balanced one, being a considerable area of ranch and a large tract of highly productive river bottom land, where feed is raised.

✤ ✤ ✤

Dr. E. J. Weldon of Sacramento, Cal., returned last week from Lake Mills, Wis., with a load of registered Holstein cows. The new additions to the already herd of merit owned by Dr. Weldon were purchased from leading breeders in that great dairy capital; the majority of them coming from the Stevenson & Uneedy Korndyke herd. They add greatly to the influence of the herd now established on the good farm south of Sacramento.

✤ ✤ ✤

Miller & Lux, who are stocking their ranches in California and Nevada with the best sires possible to buy, recently purchased from Henry Thiessen, of Sweetwater, Ida., nine Beau Donald heifers, 14 to 20 months old, at an average of $450 the head, and a ten-months old bull calf by Discretion, out of a Caldo 2d. dam, for $500. The calf had been reserved for a show bull in the herd but was sold on account of Miller & Lux getting the heifers. This load is one of the most valuable additions to California's rapidly growing Hereford herds.

As part of the systematic campaign of the United States Department of Agriculture to increase the country's food supply the National Forest stock ranges are being gone over with a fine tooth comb to discover every acre available for summer grazing and the sheep and cattle to stock them.

✤ ✤ ✤

A trainload of milk lambs left Calapatria, Cal., for Chicago, the first shipment of the kind on record. There are about 12,000 lambs in the Calapatria district of the Imperial Valley, where winter-lambing is becoming a popular industry. In Kern county spring shearing is over and about 20,000 sheep are to be marketed soon. Cold weather in the early part of the year delayed the growth of grain and stockmen are facing a feed shortage. Spring rains came at the wrong time and grass is anything but abundant. Higher prices for both cattle and sheep are obtainable on Missouri River markets than can be had in California, and 1917 will probably hold the record for shipments of market animals . Arizona wool is selling in Boston around 54 cents per pound, the highest price ever known. The Australian shortage of fleeces is one of the principal causes of the strong market. Growers are getting about $4 per head for the fleece. December lambs weighing about 60 pounds are bringing 14 cents per pound f. o.2b. cars.

✤ ✤ ✤

During a hurried trip to the Pacific Coast recently Frank W. Harding, secretary of the American Shorthorn Breeders' Association, Chicago, found time to spend a few days in Los Angeles and San Francisco. Plans for stock shows in both cities are in the making, Los Angeles having gone so far as to do preliminary work on classifications, pending assurance of financial support, which will be forthcoming unless war conditions prevent. Mr. Harding pledged the support of the Shorthorn Association to the Los Angeles show. Eastern breeders are coming to realize that California stockmen may prove ready customers for their surplus animals. There are a few high-class Shorthorn herds in the northern part of the state and one or two sizable herds of Herefords, but 90 per cent of the annual purchase of breeding animals is made outside of California.—[Breeder's Gazette.

✤ ✤ ✤

SUMMARY OF THE LIVELY SALE.

The following list of the sales and prices received for the Hereford cattle sold by D. O. Lively, at Mayfield, May 5, shows the manner in which these splendid cattle were distributed:

Females.

Consignment of A. B. Cook, Townsend, Mont.—

Rare Beauty, sold to J. D. Canary, Saratoga, Wyo., $550; Lizzette, J. D. Canary, $575; Marian C. P., W. J. Bemmerly, Woodland, $800; Lady Kitchner, W. J. Bemmerly, $350; Climax Girl, Benj. Quigley, Linne, Cal., $400; Dreat P. 4th, Chas. Rule, Jenner, $415; Lady Panama, Chas. Rule, $600.

Consigned by Theo. D. Tintinger, Park City, Mont.—

Erna Medal, Chas. Rule, Jenner, $550; Goldie Donald, W. J. Bemmerly, $400; Anxiety Clarice, J. A. Bunting, Jr., Centerville, $590; Lady Mischief, J. A. Bunting Jr., $450; Belle Dimond, Henry Struve, Watsonville, $300; Anxiety Fairfax,, H. H. Gable, Esparto, Cal., $500.

Consigned by D. O. Lively Stock Farm—

Lady Amethyst 18, S. R. Crowe, Hayward, $250; Lady Amethyst 22, S. R. Crowe, $250; Lady Valerie 5th, Benj. Quigley, Linne, $225; Lady Amethyst 19, S. R. Crowe, $250; Lady Valerie 7th, Rancho del Canon, La Honda, $250; Lady Valerie 6th, S. R. Crowe, $250; Lady Valerie 2d, Rancho del Canon, $150; Lady Amethyst 26, Sierra Vista Vineyard Co., Minturn, $230; Lady Valerie 8th, C. W. Burgess, Amador, $200; Lady Amethyst 24th, S. R. Crowe, $250; Lady Amethyst 21st, Benj. Quigley, $225; Lady Amethyst 11, A. T. Liliencrantz, Hollister, $275; Lady Amethyst 17, Sierra Vista Vineyard, $230; Lady Amethyst 16, S. R. Crowe, Hayward, $250; Lady Valerie 10th, C. W. Burgess, Amador, $200; Lady Valerie 3d, C. W. Burgess, $200; Lady Evenho 9th, Sierra Vista Vineyard, $205; Lady Evenho 10, C. W. Burgess, Amador, $150; Lady Evenho 5th, Struve & Son, Watsonville, $175; Lady Evenho 13th, C. W. Burgess, Amador, $160; Lady Evenho 12th, C. W. Burgess, $160; Lady Evenho 4th, Rancho del Canon, $150; Lady Evenho 7th, C. W. Burgess, $160; Lady Evenho 8th, Sierra Vista Vineyard, $205; Lady Evenho 6th, Sierra Vista Vineyard, $205; Lady Valerie 4th, Rancho del Canon, $250.

Bulls.

Consigned by Theo. D. Tintinger—

Satin, Mayo Newhall, San Francisco, $900; Corrector Donald, N. B. McGahan, Stanford University, $165; Tintinger's Cyclone, C. W. Burgess, Amador, $175; Pride of Montana, E. V. Buddecke, Roseville, $200; Armour's Magic, E. V. Buddecks, $200; Carlo 2d, Dean Duke, Likely, $390; Fairfax Model Struve & Son, Watsonville, $250; South America, Sierra Vista Vineyard, $165.

D. O. Lively Stock Farm—

Beau Defender, Sierra Vista Vineyard, $500.

Consigned by A. B. Cook—

Panama 32d, A. L. Liliencrantz, $550; Beau Banner 4th, Mayo Newhall, $750; Prefer 37th, H. Talle, French, N. M., $500; 2 bulls, names and numbers not not secured, H. Talle, at $500 each, $1,000; Panama 33d, Dean Duke, Likely, $750; Lord Kitchner 2d, N .M. Marshall, Los Angeles, $500.

THE FARM

Competitive Live Stock Marketing.

Competition is described in the cold, colorless language of Webster as "the act of seeking or endeavoring to gain what another is endeavoring to gain at the same time—strife for superiority," but touched with the magic colorful brush of the poet it becomes the "sold of trade." President Hadley of Yale, a recognized political economist, has stated that "where competition does not act at all, there is complete monopoly."

Without competition or without the desire or ambition to excel, we would still be content to travel by ox team and till our soil with the crude implements of our forefathers. Every great invention of ages can be attributed to this great driving force. Competition between nations or groups of nations hurls them into the horrors of war; so eventually, will properly guided competition further work for universal peace.

So long as competition is present there can be no stagnation, either in business or pleasure, but the moment competition ceases or is prevented, progress is retarded and it becomes merely a question of the extent to which monopoly will be imposed.

In the marketing of all products of the soil, competition in buying at the time of sale must be the great underlying factor controlling the selling price. In the marketing of livestock, the foundation of our great open and competitive markets was laid upon the bedrock of competition. The very purpose of the system as established was to decrease the harmful competition to be found where thousands of producers clamored to sell to the few buyers and to increase the competition by facing the buyers with a few highly skilled salesmen who knew their goods, the value thereof, and at the same time were conversant with the needs of the buyers.

Out of the universal chaos, the system brought order and at the same time gave the producer absolute protection against the unscrupulous buyers and dishonest salesmen by rigidly enforcing rules designed solely for the protection of the producers and shippers.

The live stock production of this country is actually below the demand and is not keeping pace with our increase in population. There can be no doubt but that every animal produced for slaughter will be eagerly purchased by the packers, who in turn are doing a record business.

Some of the more progressive packers concede that the producers of live stock are entitled to share in the prosperity of the meat industry, but not so the country buying packer who endeavors to evade the competition he must meet upon the open market and prefers to buy direct at country stations where competition is unknown and where prices are fixed to suit his own ideas.

Stand solely and squarely for the competitive method of live stock marketing and force the greedy price controlling, market-raiding country buyer packer to run for cover.

—Rocky Mountain Husbandman.

Good Care of Animals Is Part of Part of Defense Program.

The State Humane Association has issued a circular to stock owners and users, urging upon them the necessity of providing properly for their animals as a matter of economy. Good care of work and farm stock, asserts the Association, is essentially a part of the program necessary to place the nation on a defense footing, as good care means the conservation of animal life and energies and an increased production of food values.

The Association asks for the universal observance of ten rules which have been prepared by the Boston Work Horse Relief Association for the care of animals during the spring months. They are:

1. Do not fail to provide clean, warm quarters in which your cows, ewes and mares can bring forth their young in early spring.

2. It is dangerous to expose young stock, especially foals and colts, to spring rain-storms. A day's exposure, if not fatal, may stop a month's growth.

3. It is bad policy to turn the stock to pasture before the grass has well started—bad for the pasture and bad for the stock.

4. A gradual change from hay to grass is best; but, if you are bound to make the change at once, turn the stock out at night, instead of in the morning. Then they will feed through the night, and not lie down until the sun has warmed the air and the ground.

5. Get your horses into condition for the hard spring work,—the young horses especially. Many a colt has been ruined by being put to hard work without preparation. It is the same with green horses.

6. Look out for sore shoulders and backs, especially when plowing begins. Be sure that your collars fit. A collar too big is as bad as one too small. If the collar rides up, use a martingale, or a girth running from trace to trace, back of the forelegs.

7. When horses are worked on a warm day, lift up the collars now and then, to cool their shoulders, and wipe off the sweat and dirt with your hand or a bunch of grass.

8. Sponge off the harness marks carefully when you stop work at noon and at night ,and clean the inside of the harness ,the collars especially. The salt sweat, drying on the skin and on the harness, is what makes the trouble.

9. If the skin is wrinkled under the collar or saddle, bathe it with witch-hazel. If the skin is broken, bathe it with clean water containing a little salt. Fix the collar, with padding or otherwise, so that it will not touch the sore spot the next day. A little carelessness at the beginning may cause a lot o ftrouble to you and suffering to the horse.

10. Clean your horses at night, give them a good bed, and water them after they have eaten their hay. Let them rest an hour before they are grained. The observance of these simple rules will not cost you a cent, and will make the difference between a horse in good spirits and a lifeless one.

Preserve Sows For Breeding.

A sow is a good investment. This is true even in these strenuous times of high prices of food concentrates, say specialists of the U. S. Department of Agriculture. The quotations on these feeds are controlled to a considerable extent by the price at which meat animals sell. Hence concentrates usually command a high figure when hogs on the hoof at large packing centers sell at more than 16 cents per pound. However, record prices for swine as well as feed concentrates have been a great incentive t ofarmers to "cash in" all the hogs available. That many sows have been included is evident from the fact that on April 1st the correspondents of the Bureau of Crop Estimates reported approximately three per cent fewer sows on farms in the United States than a year before. Further, this is the first year that the supply has not increased since 1913.

At this time the marketing of a sow that can be or has been bred is fairly comparable to "killing the goose that laid the golden egg." Although the fecundity of swine is well appreciated by farmers, at times sows are sacrificed when a little forethought would cause them to be retained. Breeding sows multiply five or six times as rapidly as other meat animals. They have an average litter of five or six pigs and may be bred twice a year, although three times in two years accords more with farm practice. The litters increase in size, on the average, until sows are five or six years old. However, a large proportion of the sows are sold after producing one or two litters and before they have reached the period of greatest usefulness.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

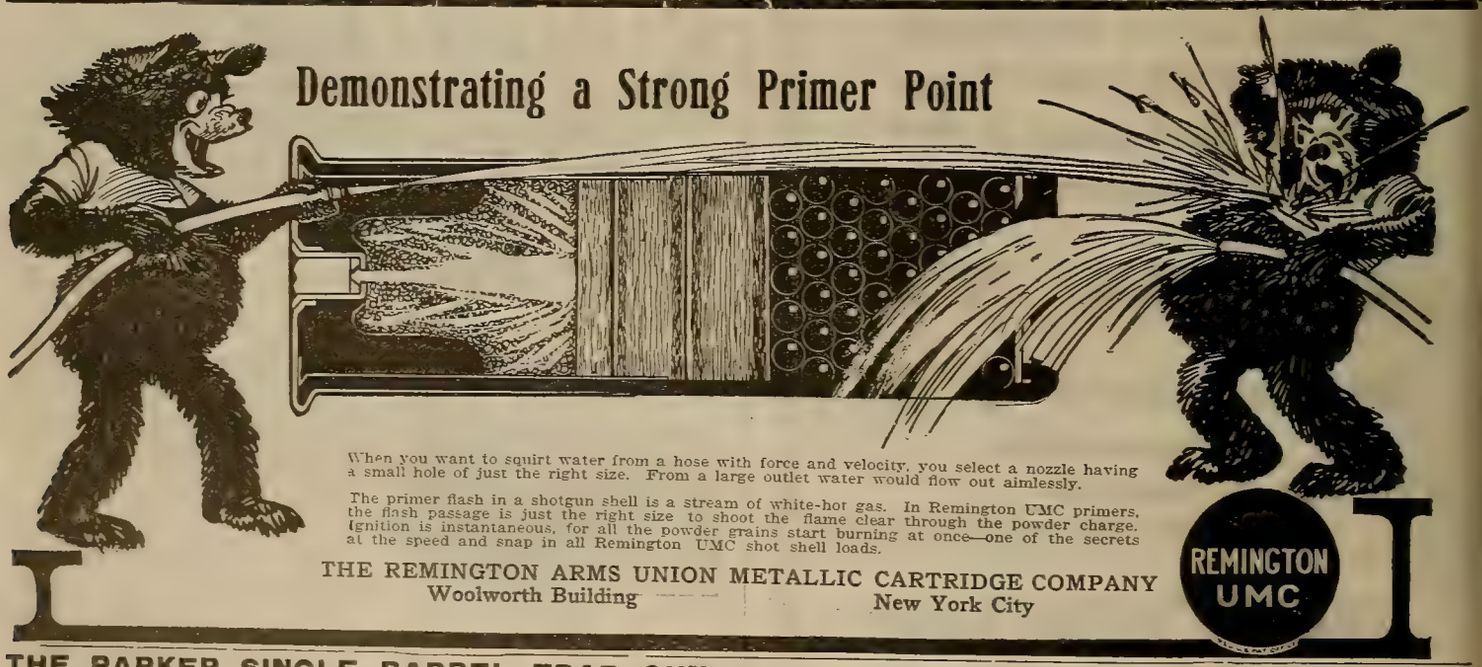
TEACH YOUR BOY TO SHOOT---

Every Boy instinctively loves a gun. Most fathers have had to listen to the plaintive appeal: "Dad! I want a gun!"

WHEN YOU TEACH YOUR BOY TO SHOOT, YOU WILL GET CLOSER TO HIM THAN EVER BEFORE. NOT ONLY WILL THE YOUNG FELLOW ACQUIRE MANLY HABITS AND SELF-CONTROL, BUT HE WILL LEARN TO HANDLE FIREARMS WITH SAFETY TO HIMSELF AND OTHERS.

WHEN YOUR SON ASKS FOR A RIFLE, HE WILL NATURALLY EXPECT A WINCHESTER. HIS BOY FRIENDS WILL SURELY ASK WHAT KIND OF A RIFLE HIS FATHER SELECTED. FIX IT SO HE CAN PROUDLY ANSWER, "A WINCHESTER, OF COURSE!" EVERY MAN AND BOY KNOWS THAT THE WINCHESTER IS THE BEST—THE MOST ACCURATE AND RELIABLE.



A FATHER SHOULD WELCOME THE CHANCE TO BECOME HIS BOY'S "PAL" BY TEACHING HIM HOW TO SHOOT. IT MAY BE VERY VALUABLE KNOWLEDGE SOME DAY.

ASK YOUR DEALER TO SHOW YOU THE COMPLETE LINE OF WINCHESTER .22 CALIBER RIFLES, REPEATERS, SINGLE SHOT AND AUTOMATIC.

Demonstrating a Strong Primer Point

When you want to squirt water from a hose with force and velocity, you select a nozzle having a small hole of just the right size. From a large outlet water would flow out aimlessly.

The primer flash in a shotgun shell is a stream of white-hot gas. In Remington UMC primers, the flash passage is just the right size to shoot the flame clear through the powder charge. Ignition is instantaneous, for all the powder grains start burning at once—one of the secrets at the speed and snap in all Remington UMC shot shell loads.

IT WAS an unusual tribute which Mr. Arthur W. Foster, of San Francisco, owner of Hopland Stock Farm, philanthropist and public-spirited citizen, paid the Marin County Chapter of the Red Cross when he turned his entire stable of registered ponies over to that organization. Miss Margaret Foster, chairman of the chapter, accepted the sixty grandly bred little horses on behalf of the organization. It is given to relatively few men to be so widely popular as Mr. Foster; rarely does a month go by that he does not do something that further endears him to the public. Most men love their horses next to their family and in Mr. Foster's giving this band of ponies those who know him best realize in the gift something more than the mere cash value of the animals.

A WORD TO HORSEMEN.

[By D. F. Houston, Secretary of Agriculture.]

The United States Department of Agriculture is making every effort possible to encourage and conserve crop production and the production of livestock. On account of the great scarcity of farm labor, greater use of horse power will be necessary to economic crop production. Because of this fact and the fact that the war demand will no doubt make large drafts on our horse supply, every good mare should be bred in order to produce stock to replace those which will be used for war purposes. These mares should be bred to the best stallions available, keeping in mind the fact that the market will be good for high-class horses, while the market for inferior horses is very uncertain under the best conditions. Our total supply of horses is adequate for our use at the present time, but there is a shortage of good horses and every effort should be made to increase the supply of good ones. This can only be done by the utmost care in selecting the best stallions to which to breed our mares.

INFORMATION WANTED.

Any information in regard to the breeding of the pacing mare Gene Madison 2:21½, sired by James Madison, dam Miss Sidney, will be greatly appreciated if mailed to this office. This mare was bred by R. E. De B. Lapez and was trained and driven by D. R. Misner; she took her record at Missoula, Mont., Oct. 11, 1906.

Record Lamb Price Received in Missouri.

Kansas City, May 17.—Spring lambs today sold on the Stock Market for twenty dollars the hundred pounds, which is the highest lamb price in the history of the market.

My desk is piled high with a week's accumulation of dope. No other word fits it. Professional organizers have grasped the opportunity which war conditions afford to get for themselves jobs fitted to their peculiar and useless abilities. They are specializing now on farming and handing out words of what they think is wisdom, by the bale. In the anxiety to be of service, many publishers of daily newspapers, unable to distinguish the useful from the useless and misleading, are spreading this bunk broadcast. And it is accepted by the conversationalists in the cities and towns. They talk it over and find in it confirmation of their suspicions that farmers are a lot of loafing ignoramususes. Soon, since "everybody is talking about it," some farmers will be misled and spend their time and money on things that fail. The irresponsible agricultural blatherskite is a real menace at this critical time. He should be muzzled.—[John Field, in Oklahoma Farmer.

CALIFORNIA PERCHERON BREEDERS.

The second annual Percheron Review, issued by the Percheron Society of America, has just been mailed to every member of the association in the country. This number of the Review carries a special message to every breeder of horses in America; not only the breeders of heavy horses, but it should be read by breeders of the lighter breeds. Articles of particularly attractive merit are contributed by Secretary Dinsmore, Secretary of Agriculture Houston, Deans Curtiss, Mumford, Waters, Skinner and Davenport, especially for this number. Several hundred extra copies have been printed and will be mailed to any address free upon request to Secretary Wayne Dinsmore, Chicago. Copies of the list of members of the Percheron Society also have been mailed out and show California well in advance with the great strides being made in the production of better horses. California has 72 members of the society and their names, published below, it will be noted are the same men so often identified with the leading strides of better agriculture in this state. The list:—

California Members of the Percheron Society of America.

Alameda County—Wm. Bond, Newark; University of California, Berkeley; Dunham-McLaughlin Co., Oakland: McLaughlin Percheron Co., Oakland; Thos. D. McLaughlin Imp. Co., Oakland; Wm. McLaughlin, Oakland.

Butte County—Friesleben Estate, Oroville; Llano Seco Ranch; Chico.

Contra Costa County—J. T. Silva, Pinole.

Fresno County—R. C. Farris, Clovis; W. Harry Say, Selma; Mrs. M. D. E. Sherman, Fresno.

Glenn County—Frank S. West & Son, Hamilton City.

Humboldt County—T. G. Atkinson, Metropolitan.

Imperial County—Calif. Mexico Land & Cattle Co., Calexico.

Kern County—Ramina Ranch, Tehachapi.

Kings County—W. D. Trewhitt, Hanford.

Lake County—Mrs. Wm. B. Collier, Lakeport; Oral C. Thompson, Iakeport.

Lassen County—Wm. Brockman & Sons, Susanville; L. E. De Forest, Susanville; Dodge Brothers, Red Rock.

Los Angeles County—Anita M. Baldwin, Santa Anita, San Aneda Ranch; Elliott-Brant Rancho, Owensmouth; August Freese, Los Angeles; E. F. Kleinmeyer Estate, Covina; Ed. R. Maier, Los Angeles; R. B. Young, Los Angeles.

Mendocino County—C. L. Crawford, Ukiah; Wayne L. Crawford, Ukiah; J. E. Holliday, Ukiah; J. Johnson, Ukiah; J. L. McCracken, Ukiah; H. H. Van Nader, Ukiah; F. H. Waugh, Ukiah.

Merced County—James T. Ragsdale, Merced.

Modoc County—J. L. Harvey, Adin; T. M. Harvey, Adin.

Napa County—Henry Wheatley, Napa.

Navada County—Walter Reed, Spencerville.

Orange County—Fred Andres, Anaheim.

Riverside County—F. L. Hall, Perris; C. P. Macy, Elsinore; A. J. Stalder, Riverside.

Sacramento County—Galt Acampo Draft Assn., Galt; Earl S. Porter, Sacramento.

San Benito County—Paicines Ranch Co., Paicines; A. E. Perley, Hollister.

San Bernardino County—C. F. Riggs, Upland.

San Diego County—Pike, Mrs. J. Erwin (Helen Coverdale), San Diego.

San Francisco County—Whitehall Estates, Inc., San Francisco.

PACIFIC COAST BREEDERS' ASSOCIATION IS ACTIVE.

Oakland, Cal., May 3, 1917.

To the Members of the Pacific Coast
Saddle Horse Breeders' Association:

The President and Secretary of this Association desire to give you some understanding of what they have been attempting to do and what they have accomplished in the way of encouragement to our industry. Some time in the early part of the year, Senator Rush introduced a bill in the Senate, making an appropriation for the purchase of a tent such as the the old tent heretofore used at the State Fair, for the use of the District Fairs, as well as for the State Fair. On February 28th, your President wrote to the chairman and members of the Finance Committee of the State Senate, before which said committee said bill was pending, and called their attention to this bill, and, among other things, said to them:

"Those of you who have visited in recent years the State Fair at Sacramento, know how useful is the big tent used there for show purposes. It is used during the day in the judging of many cattle and horse classes, and in the evening for popular 'Horse Shows,' which affords most pleasing and instructive entertainment. The tent which has been in use for a number of years was old when first purchased by the State and will not bear shipping from place to place. The appropriation asked for will not only provide for the tent proposed, but for suitable and comfortable seating.

"I know of no purpose connected with the encouragement of agricultural fairs for which a like sum could be used to greater advantage."

On the same date he mailed a copy of said letter to Charles W. Paine, Secretary of the State Agricultural Society, and requested that he use his influence in securing its passage. On March 3rd, Mr. Paine replied as follows:

"Your letter received with enclosure of copy of letter sent to the Senate Finance Committee and no doubt same will have some weight with the Committee. I will be glad to work for the bill."

On April 25th, a further letter was received from Mr. Paine, in which he said:

"I think the bill will go through appropriating an amount of money for the purchase of a tent by the State Board of Agriculture."

We have not yet learned whether this bill was finally passed or not, but we call your attention to the fact that we are making some efforts to extend the opportunity for horse shows.

On April 23rd, your President also wrote to Mr. Paine in which, among other things, he said:

"I notice that the fair associations of the Middle West have a meeting at which representatives from the several associations attend. The purpose is that they may formulate schedules of premiums and thus form a circuit which will encourage the exhibition of animals.

"I think the State Fair should have a meeting for the purpose of having an understanding with other associations concerning horse shows. You can readily understand that it is not profitable for us to prepare horses for simply one show at Sacramento.

"I met Mr. Ramsey some time since on the Key Route boat and suggested to him that inasmuch as your State Fair Saddle Horse Futurities will terminate in 1918, that the State Association shauld add $500 to the Pacific Coast Gaited Saddle Horse, three-year-old futurities."

And promised him that if this were done it would enlist a much greater interest in making entries in these futurities.

On April 25th, Mr. Paine wrote in answer to this letter that the matter had been taken up by the Board and that they had agreed to add $300 to any three-year-old futurities of the Pacific Coast Gaited Saddle Horse Association.

Later your President wrote to Mr. Paine, asking whether this added money would be available for the year 1917, and we were informed that if the futurity was opened so that a proper showing could be made, that it would be available for the year 1917. We, therefore, announce that entries are now open for the three-year-old five gaited saddle horse futurity to be shown at the State Fair of 1917, upon the following terms, to-wit:

The entries are to close on July 15, payments to be made on each entry as follows:

$10 upon the naming of your horse, which must be accompanied by his name and breeding, and also his markings.

$5 additional on or before the 15th day of August, and

$5 additional starting payment, making the full payments $20 each.

These entry moneys to be added to the $300 given by the State Fair Association above mentioned.

The purse will be divided into five moneys, as follows:

To the winner of first,	35%
To the winner of second,	25%
Tothe winner of third,	20%
To the winner of fourth,	15%
To the winner of fifth,	5%

Please make your entries promptly, as it will encourage others in making entries that may be somewhat not inclined to do so.

Truly yours,
E. A. BRIDGFORD,
President Pac. Coast Gaited Saddle Horse Ass'n.

Harness Horses and Horsemen

A Winner at Hugovale.

When I sent you my "Observations at Tacoma" I overlooked one man who is a real hero in harness horse affairs there. This is Prof. Hugo Schmidt, one of the most noted musicians in the Northwest. Mr. Schmidt and his beautiful and accomplished wife reside on their splendid eighty acre suburban farm, Hugovale. Prof. Schmidt is a "natural born" horseman and has nine head of choicely Standard bred mares andtwo yearlings sired by Almaden D. on his farm.

The pride of the farm, however, is the good, fast and game trotting mare, Sea Waif 2:14¼, win race record on the Eugene ,Ore., half mile track. This beautiful mare is by The King Red and is a Larrabee Ranch production. She was nominated in the P.-P. I. E. $20,000 trot but an accident put her out of training. She has shown two-minute speed in her work on many occasions and proven herself a real race mare in the best of company and on both mile and half mile tracks.

Sea Waif, still a young mare, has not had the harness on for two years but looks to be ready to go the limit now. Prof. Schmidt says he expects to take her East and train her himself or send her to Tommy Murphy. This well known horse-lover declares even the wonderful Uhlan has nothing on Sea Waif when it comes to speed.

The other hay and grain destroyers on Hugovale Stock Farm are all nice ones; some by Burion, Al Boyle's good son of Alcone; one nice mare is by Billy Harper, a son of Mambrino Beamer and another is by Garvin Wilkes. Prof. Schmidt is an expert reinsman and an all-round colt handler. Besides his horses he maintains a small herd of well bred cattle and a flock of Rhode Island Red chickens.

The home at Hugovale is a beautiful one; setting in a most picturesque location. Mrs. Schmidt is a charming and accomplished hostess and her musical husband a real harness horse fan and consequently a true sportsman. C .A. HARRISON.

AT THE MISSOURI STATE FAIR TRACK.

Sedalia, Mo., May 15.—Already the race track at the Missouri State Fair grounds is showing signs of racing activity. A cold backward spring has retarded workouts to some extent but warmer and dryer weather has aided the trainers for the last ten days and some good work is being accomplished.

Secretary E. G. Rylander is working out the speed events for next fall and will soon have them announced, and in the meantime the trainers are hoping for a continuance of warm fair weather.

W. F. Irwin has in training at the State Fair grounds stable and track a promising string composed of Black Diamond, a black three-year-old by Zolock 2:04¼, trotter. This youngster is working very satisfactorily, working miles around 2:30, last quarter in 33 seconds. He was a half last fall in 1:06, last quarter in 31½ seconds. He starts in the Missouri futurity this fall, and gives promise of finishing well up in the money. Ruby Zolock, a three-year-old by the same Zolock, has worked a mile this spring in 2:40, last quarter in 35 seconds. She also starts in the Missouri futurity, in the pacing division. May Lou, green trotter, property of Garnet Garrell, Marshall, Mo., has worked miles around 2:30 this spring and acts like a real trotter. Selpo, gray gelding, 2:23 totting, 2:20 pacing, is working out very satisfactorily this spring on pace, and looks like he would be a good horse in his class. Irwin has some other green stuff.

Mr. Irwin says that the track is better footing this spring than it has ever been in the past, and the State Fair board is taking more interest in working the track and keeping it up in condition than heretofore, and President George W. Arnold has said that the track will be kept up to this standard even if there is but one trainer utilizing its facilities. Irwin contends that the Missouri state track is the best training ground west of the Mississippi, and that good stables and plenty of good grass, with fine water, make it such.

L. E. Edington, another veteran driver, has a fine string working out at the Missouri State Fair track. J. W. Wilkerson, 2:05¼, who started fourteen times last year and got into the money 13 times, is showing up well for Edington this season. Ariola, by Redlac 2:07¼, dam by Expedition, is a very promising and sound young pacing filly. Mike Bright, by Boyd McKinney 2:10¼, dam Calhoun Girl 2:14¼, is a big rugged green five-year-old pacer and is showing up well; in fact, Edington is more than pleased with this fellow . Edington will have a green pacer on the track soon. This horse has already made a mile in 2:16¼ Edington also has a green trotter, sired by Gentry Allerton, dam Calhoun Girl, that is showing great bursts of speed already. Edington confirms every statement made by W. F. Irwin as to the condition of the State Fair track and is immensely pleased with his quarters and facilities.

W. H. Boyd, a California trainer and racer, has the most promising grand circuit stuff that has ever been quartered at Sedalia and the State Fair track. Stocktonian, a two-year-old, sired by Tregantle 2:09¼, out of a dam by Early Reaper, is entered in the Iowa futurity and is certainly promising. Ky F., another Tregantle colt, out of a dam by Early Reaper, is a good three-year-old and is entered in the Lexington and Columbus futurities. Batten, a three-year-old pacer, a full brother to Stocktonian, is showing speed and form. Red Man, a four-year-old green trotter by McGregor Baron, out of a dam by Kankakee, has worked a mile in 2:16¼, and is a valuable addition to the Boyd stables at the fair grounds.

HARRISON BUYS ANOTHER HAL.

Portland, Ore., May 15.

Breeder and Sportsmen,—

Gentlemen: The Seattle horseman, C. A. Harrison, who, as you know, has a fondness for the Hals, was here the first of the week and purchased from Henry Weiss, of Gresham, Ore., the five-year-old bay mare, May Day Hal, full sister to Hal Boy 2:01½, Indian Hal 2:11½ and half sister to Sunny Jim 2:11¼. May Day Hal in her two-year-old form was a very fast filly. She won the Oregon futurity in 2:46. She paced a mile in her work in 2:22½. As a three-year-old, before being shipped from the Gresham half mile track, she paced a mile in eighteen. At Centralia she also was in the money. She was taken sick and while sick was fourth to Bandalin and Rayo Dora, at Salem in 2:09¼. Since her three-year-old form she has been running out in the pasture, where she was bred at Gresham.

Mr. Weiss drove her to Portland where the Seattle sportsman met him at Frasier & McLean's stable and accepted her. In getting May Day Hal, horsemen of Portland believe Mr. Harrison got a real bargain as well as a regular race mare. She was shipped to Seattle last night. Mr. Harrison said he bought her because he had a "hunch" she was as good as Hal Boy. Her dam, Albelena, is now in foal to Cavalier Gale and despite the fact that she is more than twenty years old is one of the best looking mares in the Northwest.

Mr. Weiss still has a brother to Harrison's mare; a bay three-year-old unbroken colt. This youngster is going into the stable of John Kirkland, at Salem.

Another noted Hal B. here is a five-year-old owned by J. J. Cadderly, which looks good for the approaching season. Mr. Cadderly has two other high class prospects and says he is going to have them trained this spring.

Fred Merrill is arranging to put the Rose City track in shape at once, as there are many high class horses owned in and near Portland this year. Horsemen in this section are glad to note Californians have organized and will have such a good circuit.

ED. HANSEN.

At the meeting of the Board of Review of the National Trotting Association, held last week in New York, a resolution was adopted recommending to the consideration of its members a plan for aiding the Red Cross Society. The resolution is as follows:

"Recognizing the merciful mission of the Red Cross Society, we hereby recommend that one day of each meeting of the members of the National Trotting Association be designated and set apart as Red Cross Day and that such portion of that day's receipts as may be determined by the member be donated to that organization."

There is little question that its recommendation will be cheerfully concurred in by all its members. Mr. Gocher, writing from Hartford, states that Mr. Sandles, member of the Western District Board of Appeals, has informed him that the Ohio State Fair Circuit held a meeting in Columbus on Tuesday and that all the members were for it. At the next meeting of the California Fair and Racing Circuit this matter should be brought before the Board and a resolution adopted to render the assistance recommended for this noble cause.

At the same session the Board of Review made a rule which defines more clearly the meaning of Section 2 of Rule 4 which is as follows:

Construction of Rule 4, Section 2.

"Attention being called to the fact that several trainers were entering, under a registered name, horses not owned by them, the Board of Review adopted the following construction of Rule 4, Section 2, the Board of Appeals of the American Trotting Association also concurring in same:

"No trainer may use his name, or any racing or stable name, under which to enter all of the horses entered from his stable; but must enter each horse in name of real owner, or registered stable name of the owner. All entries heretofore made can be corrected by June 1, without penalty."

The rule referred to reads as follows: "All horses must be entered in the name of their bona fide owners, and must so appear in the published list of entries. Horses cannot be entered in the name of a party other than the owner, except in the case of leases, certified copies of which must be registered with the National Trotting Association. Racing or stable names may be used if registered, together with the names of the persons using them, with the National Trotting Association. Nominators and owners shall be liable to a fine of not less than $5 nor more than $50 if this rule is not complied with."

The Board holds that the provisions of the rule have been violated by several prominent stables, and has made the above ruling to cover any cases which were apparent evasions of the requirements of the rule.

LOCKEFORD PICNIC.

The first races of the season in this part of the State took place in the lively town of Lockeford last Friday and Saturday. It was the annual picnic, held yearly for some twenty years past in Locke's grove near the town. There was a large crowd present and the principal feature was a trot and pacing races under the direction of that enthusiastic lover of the horse, J. W. Wakefield.

The races were well contested and in several drive-outs it was difficult for the judges to name the winners. As the races were contested over a flat sand track, with two sharp turns, the time was excellent, better in some cases than that made by the same pacers over the Dixon course two weeks ago. For instance, Directress Mac, driven by Schwartz at Dixon, took three straight, best time 1:04¼ while at Lockeford, driven by Ryan she paced in 1:04.

The following were the results:

Lockeford stake, 2:15 pace:

Billy Bounce	R. H. Brewster	2	1	2	1
Vinnie M.	Al Schwartz	5	4	1	1
Alton S.	Don Greame	3	2	3	4
Harry Mac	M. Leggett	1	5	4	3
John Black	W. W. Gallup	4	3	dr	

Time—1:05, 1:07, 1:05, 1:04,¾ 1:06½.

Lodi stake, 2:30 trot:

Great Policy	J. Broillar	1	1	3	1
Kate Bingen	W. Williams	2	4	1	2
Francis Zombro	Brewster	3	2	4	4
Ginger	M. Smithson	5	5	dr	

Jersey stake, 2:30 pace:

Directress Mac	J. J. Ryan	1	1	1	
Surety M.	W. W. Gallup	3	2	4	
Dorothy M.	Don Greame	4	3	2	
J. C. Simpson	J. Goulart	2	4	3	

Time—1:04¾, 1:04½, 1:04.

Tokay stake, free-for-all pace:

Teddy Bear	Charles Silva	1	1	1	
Happy Dentist	J. W. Wakefield	2	3	2	
Marry Mac	M. Leggett	3	2	3	
John Black	W. W. Gallup	4	4	4	

Time—1:04½, 1:06, 1:06½.

San Joaquin stake, 2:18 trot:

San Felipe	L. B. Daniels	3	1	1	1
Sweet Bow	W. J. Ivey	1	4	2	3
Harold C.	H. Cohen	2	2	3	2
King Policy	W. W. Gallup	4	3	4	4

Time—1:06½, 1:08, 1:06½.

The starter of the races was W. T. Higginbottom of San Francisco. Judges, first day: J. J. Ryan, Dan Lieginger, Jerry A. Aker and C. H. Schemerhord; timers, Fred H. Johnson, Willis Parker and Frank Lieginger. Judges for second day: J. J. Ryan, Fred Lauterwasser and Dr. Weldon; timers, Thomas Holmes, F. H. Johnson, W. H. Parker. Secretary, Frank Lieginger. G. H. T.

Trotters in Agriculture.

An instance of the versatility of the trotter is shown by a plow team that James R. Magowan is working at his farm in Montgomery county, near Mt. Sterling, Ky. They are Immaculate 2:15½ and Nell Worthy 2:22, both among the greatest bred trotting mares in the country and also producers of great speed. Neither was in foal the past season, so thinking they would be more likely to stand they were put to plowing and are making a better team than Mr. Magowan ever worked before, and he has always been the owner of high-class mule teams. Nell Worthy is the dam of Worthy Prince 2:06¾, a frequent Grand Circuit winner; Nell Olcott 2:28, trial 2:09¼, and three others, while Immaculate is the dam of Stainless 2:12½, Unstained 2:13¾, Imperio 2:15, etc., Nell by Estill Eric and the dam of 13 and Ethelwyn 2:33, dam of Immaculate dam of twelve, were voted as among the ten greatest broodmares of all times.—[Jesse Shuff.

Ukiah Citizens Interested in Approaching Fair.

"They're off!" will be the old familiar echo from the grandstand at the Ukiah race track August 8, when Ukiah's races will be restored in their old-time greatness. At a very interesting meeting held there last week, Joseph Waddell, of the California Fair and Racing Commission, addressed a large and enthusiastic gathering of local devotees. They gave assurance of their aid in making this the best program Mendocino county has ever had. Ukiah is about the fourth meeting on the big circuit. The majority of the new towns having half mile tracks, of which the local one is regarded as one of the best and fastest. The purses here will amount to $4,600, and between 100 and 150 horses are expected to contest. Local business houses are being asked to contribute for the success of the meeting, of which only one-third of the purse money is asked. Everyone is enthused over the prospects of the revival of good races here.—[The Ukiah Republican Press.

When the portals of Yellowstone Park are thrown open for the 1917 season on June 20, the thousands of tourists who annually enter this playground of natural wonders will find a complete change in the transportation facilities of the park. More than six hundred old stage coaches, relics of pioneer days and reminiscent of many a western romance, have passed into the discard. Yes, you guessed it—the automobile did it.

Thoroughbred Matters

Lexington Meeting Considers 2-Year-Olds Rule.

A meeting was held on Monday night, May 7, at he Circuit Court room in Lexington, of all breeders, owners, trainers and others interested in the matter, o discuss ways and means of bringing to the attention of the governing bodies, namely The Jockey Club, The Canadian Racing Associations and The Kentucky Racing Commission, the hardship being wrought on the owners of yearlings by the present rule regarding the racing of two-year-olds, by which hey are not permitted to race before April 1, and o ask the repeal of same. To this end the following petition has been circulated, and it is highly probable that when it is presented it will contain the names of mose of the breeders in the locality of Lexington:

"We, the undersigned owners, breeders, trainers and others interested in the Thoroughbred Horse, petition your honorable bodies, The Jockey Club, The Canadian Racing Associations and The Kentucky Racing Commission, to repeal the rule not permitting the racing of two-year-olds before April 1st, and we think it best for buyer and seller of yearlings that this be done before the public sales beginning in July, 1917.

"The Kentucky Association's spring meeting demonstrates that it is impossible to get two-year-olds ready in Kentucky for racing by April 1.

"We believe that the associations that passed this rule thought it was best for horses and racing, but we wish to offer the following facts to the contrary, however: The following good two-year-olds were developed and raced before April 1, namely Hawthorn, Old Rosebud, Westy Hogan, and are successfully racing now, and many others.

"Knowing that winter racing has become an important factor and that the inconvenience to the trainers, the loss to the breeders and the different racing associations should be considered, we feel sure that the governing bodies will see as we do the importance of this matter.

"We respectfully subscribe to the above," etc.

✤ ✤ ✤

Disastrous Fire Visits Pimlico.

Baltimore, Md., May 1.—Not this year or next, on any race track in this country, will there be a race such as was run at Pimlico last night. Imagine 75 to 100 high-strung thoroughbreds crazed by flames racing madly around a mile track. That is what happened at midnight when 200 horses were turned loose at the Maryland Jockey Club's course, after an alarm of fire was sounded. It was the most exciting time that has been had on a race course in many years.

The fire started in a stable occupied by the horses owned by Dr. J. S. Tyree of Washington, and H. W. Sage, a New York turfman. This stable was directly back of the grandstand and clustered about were numerous other barns in which were housed nearly 500 horses. The moment the alarm was struck, stable boys and others rushed to the stalls and turned loose their horses. The horses were mad with fright. For two hours these thoroughbreds were on the track and in the infield, and it was not until the early hours of morning that attendants succeeded in capturing their horses and returning them to their stalls. Some were seriously injured, others were so exhausted by their night's experience that they will not be fit to race for several weeks.

Dr. J. S. Tyree's Carbide, a horse that won at Havre de Grace a short time ago at large odds, was so badly hurt that he will never race again. The horse's hip was fractured and he suffered intense pain, but it is expected that he will be saved for breeding purposes. Battery, a steeplechaser of promise, broke down while racing through the field with the other animals.

The horses that were burned were H. W. Sage's Simon Jones, Dom Moran, Ambrosina and Brotherstone, all steeplechasers; Dr. Tyree's Billy McGee, Miss Sanfara, a two-year-old and a pony; Major William Roberts' Delos.

Mr. Sage was early on the scene and in his efforts to help the bucket brigade, which was quickly organized, he badly sprained his ankle.

The recent race track fires emphasize the importance of keeping halters on horses while they are in their boxes. Without a halter it is almost impossible to save a horse from a burning stable.—[Thoroughbred Record.

Keep Halters on Horses, Says R. E. Watkins.

Washington, D. C., May 5—If horsemen must continue to employ intemperate stable hands, white and black—and it seems that they have no choice, seeing that no other kind are available—they will do well to adopt the suggestion of Richard E. Watkins and keep halters on their charges at all times, and the further recommendation of Sandy McNaughton, that empty feed bags be kept in every stall. If there is one thing more than another calculated to frighten a horse out of his wits it is a fire, and the usually sensible and tractable thoroughbred is as susceptible to this particular kind of terror as is his cold-blooded relative.

The only haven the horse knows is his stall, and it is next to impossible to get a halter on him in the confusion attending a quick-burning stable fire. Fires in stables at race tracks are always quick fires, because racing stables invariably are built of wood, and they are always full of the most highly inflammable stuff. But even when stable fires are discovered in time, which is unusual, because they generally occur at night, and the horses are got out of their stalls, it is difficult to prevent them from rushing back into the blaze. Here is where the empty bag comes in. They may, as McNaughton suggests, be used to blindfold the frightened animals and make the task of leading them from the danger zone easier. Perhaps half of the $200,000 worth of thoroughbreds that have been destroyed in less than two years' time by fires at Benning, Bowie, Belmont Park and Pimlico might have been saved if these precautionary measures had been taken.

Reward of $10,000 Offered.

For the arrest and conviction, or for information leading to the arrest and conviction of the person or persons responsible for the fires which destroyed twenty-eight horses at Belmont Park racecourse Sunday night recently, a reward of $10,000 will be paid, having been subscribed by the Westchester Racing Association, The Jockey Club, Schuyler L. Parsons and Harry K. Knapp, with $2,500 each.

✤ ✤ ✤

Geo. H. Strate, acting for J. H. Rosseter, has purchased the bay mare Mauretania, 11, by Cunard—Tower of Candles, by Candlemas. She has been bred to General Roberts.

✤ ✤ ✤

A transaction has just been completed by which John E. Madden becomes the owner of about two thousand acres of the choicest land formerly incorporated in James B. Haggin's Elmendorf Estate. The land just sold includes Major B. G. Thomas' famous Dixiana Farm, known to horsemen the world over as the birthplace of Domino; afterward owned by Major Thomas J. Carson and home of Ben Strome, where he sired Highball and Roseben; the Rogers, Moore, Tucker, Early, Dairy and Muir Farms. Mr. Madden had previously purchased the tract of land on the Maysville pike known as the Ford place, and this brings his holdings of Elmendorf land up to two thousand acres. The Rogers, Moore, Tucker and Early Farms were purchased with the view of increasing the acreage of Dixiana, which will thus be made into an ideal stock farm and we hope to see it soon stocked with thoroughbreds that will revive the glories of the old days. The Dixiana Farm proper is situated on the Russel Cave pike, nearly opposite the home of Lous Lee Haggin, grandson of the owner of Elmendorf, who recently acquired this land from the Estate. The Dairy Farm adjoins the land now owned by Harry Payne Whitney, and is, as is also the Ford place, ideally located for a stock farm.

The consummation of this deal makes Mr. Madden the largest land-owner in Fayette county, with nearly five thousand acres to his credit, as his Hamburg Place holdings include about twenty-seven hundred acres.

✤ ✤ ✤

OMAR KHAYYAN WINS KENTUCKY DERBY.

Louisville, Ky., May 12.—Omar Khayyam, an Eastern owned horse, with a still farther Eastern name, won the forty-third renewal of the Kentucky Derby at Churchill Downs this afternoon in handy fashion. Ticket, another Eastern-owned horse, was second and Midway, the pride and hope of the central section of Kentucky, finished third. Omar Khayyam, sporting the blue, gold sleeves, sash and cap of Billings & Johnson, and trained by C. T. Patterson, was ridden in admirable form by Charles Borel, the veteran jockey. His victory was far from a popular one, for at the odds of nearly 13 to 1 but few wagered on his chances. The defeat of Ticket, the favorite, with the Macomber entry as second choice, brought heart pangs to the thousands, just as had the defeat of Old Rosebud and Kathleen in preceding races. The victory was no fluke. No ifs and ands entered into the race. It was truly run, as truly run a race as a field of fifteen can run.

Picking up the others one by one, hugging the rail, skirting the corners, Omar Khayyam disposed of all contenders. He passed them in the last half mile and a sixteenth out from home. Only Ticket was left to dispute with him. His disposition of Ticket was as complete as his disposition of all others, and the chestnut colt was a good length and a half in front o fhis nearest rival at the finish, going away at every

Bred in England.

Omar Khayyam was bred in England, being by Marco, out of Lisma, and was imported by Messrs. Johnson and Billings early last year. He ran well in the latter race meetings of the year, finishing second in the Hopeful Stakes at Saratoga. He was prepared for his victory today during the recent race meetings at New Orleans and Hot Springs, and to his careful preparation is due his superb form.

His victory was scored before the biggest crowd which ever saw a horse race in Kentucky. Not only did Louisville pour its race lovers into Churchill Downs, but every nook and corner of the adjoining states sent their representatives. From New York, from Chicago, from St. Louis and dozens of other points visitors who had been fed on the Derby dope for months wended their way to see the conclusion of the big race.

Derby the Thing.

Louisville early was afflicted by a form of Derby dementia. It afflicted nearly every one in the city, and the contagion spread to those who came to see the race and the sights. For days the war and all other subjects were dropped from consideration. The Derby was the big thing and all else was subordinated.

Early in the day it was seen that one of the largest fields which ever went to the post was to contest for the race. Two years ago, when Regret was the victor, 16 thoroughbreds took the issue, and only one less accepted it today. Out of the published entries Diamond, Sol Gilsey and Penrod were withdrawn, and the other 15 took a chance to win fame and fortune for their owners.

Various estimates as to the size of the crowd were made. Conservative persons put it at 25,000, with from 8,000 to 10,000 in the free field. They arrived early in the day and started to leave at the conclusion of the big race. Never before has Kentucky poured forth its fair and gallant sons and daughters to such a gathering. Long before the running of the event, even before Governor Stanley made his patriotic address, the grounds were filled. The abolishment of the paddock fence permitted thousands to find accommodations where the horses are saddled. Without this innovation the betting ring, the grand stand and the lawn would never have held the vast gathering.

It took the starter four minutes to get them in alignment, and then the grand old shout of "They're off!" shot out from the grand stand and was spent on the distant green hills. Star Gazer went to the front, and it was quite evident that the Macomber entry, with three strings to its bow, meant to let one of them either run the others' heads off or die in front and permit one of the others to come along and grab the rich prize in the final eighth. Their first appearance in front of the stands saw Star Gazer leading by a length.

Berlin, second a length and a half in front of Ticket, with Top O the Wave laying in fourth position. Omar Khayyam was in tenth position at this point. On they rushed around the first turn at a pace just a little under a half in 48. At the six furlong pole Star Gazer, Berlin and Ticket were in the first division. Omar was still waiting his chance to move up. That chance did not come at the half, but shortly after passing that pole Borel let out a wrap and the Eastern colt began feeling his way.

Out in front of him was the Macomber entry and just about this time it looked as though they might take down all portions of the purse. Star Gazer had been raced off his feet, however; however, the effort on Star Gazer had used him up. "Here comes Rickety" went up the shout, for it was seen that the light blue colors of Harry Payne Whitney had disposed of Macomber's entry and in a few more jumps would be in front. At the quarter pole Rickety's nose was seen in front and it looked all over. But to paraphrase John Paul Jones, Omar had just begun to run. Creeping along on the inside Borel had moved him up to about fourth place, and then when they went into the stretch, he shot through on the rail, saving a dozen lengths or more, while the Whitney entry lost fully that much by a wide swing. Midway also moved up and came in close.

Ticket, held in slight restraint all this time, soon picked up Rickety, who found the pace too warm, and it was believed by many that the favorite was to be accorded the great honor, for Ticket had now a good half a length advantage. The Miller colt was too far out in the middle of the track to shut off Omar, so in that final heart-breaking stretch run of the last eighth of a mile Omar picked up the favorite, slowly passed him and in the last hundred yards commenced to draw away. Ticked held safely on to second place and Midway moved up into third position, going strongly to the finish. The others were outdistanced. Those who could compete for a time with the leaders soon felt the pace too warm and others never had an opportunity of landing the great classic. The English bred colt was best and the Persian philosopher, for which the colt was named, would have quaffed his cup and contentedly remarked that he was satisfied with the race and the result. Omar Khayyam was bred in England by Sir John Robinson and J. T. Farr and was purchased by his present trainer, Charles T. Patterson, for Messrs. C. K. G. Billings and Frederick Johnson at Newmarket, September 15, 1915, for $1,500. Omar Khayyam's sire Marco was a good stake winner and sire of Neil Gow, Beppo, Marcovil and other good horses. Marco is a son of Barcaldine and Novitiate, by Hermit. Omar's dam is Lisma by Persimmon.

Omar Khayyam is the first foreign-bred to win a Kentucky Derby. His owners are Frederick Johnson, a broker, in New York, and C. K. G. Billings, owner of the famous trotters Uhlan, Lou Dillon and Major Delmar, and it is his second season as a thoroughbred owner. Mr. Johnson saw his colt win but Mr. Billings was unable to enjoy seeing the victory.

Mania, by Cecil Palmer and out of a daughter of Harrison Chief, one of Judge E. A. Bridgford's most highly prized mares, last week foaled a filly by Judge Bridgford's young stallion, LeGrand McDonald, that has this well known admirer of saddle rorses much enthused. "The colt was born with head and tail up and certainly has a lot of action," Judge Bridgford said this week.

Princess Eugenia—Edna Mae's Choice.

The demand for saddle horses of higher quality and the prevailing prices has, no doubt, been responsible for the biggest breeding season in Missouri and Kentucky in many years. Young mares that heretofore would have been trained and exhibited have been sent to the court of the most noted stallions available for service. Astral King, perhaps the best known saddle stallion in America, has enjoyed the most remarkable season of his brilliant career. Some of the best mares in America have been sent to his court; Montgomery Chief, the noted sire owned by Ball Bros., attracted the great daughter of Chester Dare, Undine, from California to Kentucky; Cigarette, champion mare of 1915, has been mated to the champion stallion of 1916, My Major Dare, as have scores of other great mares; Marshall Chief, at Mexico, Mo., has secured some of the greatest mares in Missouri and Iowa; Kentucky's Choice has had the privilege of drawing mares from New York state; and such is the comment wherever saddle horses are discussed. Naturally, the most wonderful saddle horses we have ever known can be expected from these judicious matings. No more notable mating, however, has taken place than at Eaton Farm, Eaton, Colo., where Col. Bruce G. Eaton's sensational mare, Princess Eugenia, daughter of Chester Peavine, has been bred to Edna Mae's Choice, Col. Eaton's grand young son of champions Kentucky's Choice and Edna Mae.

Never has there been a mating of two horses which enjoyed quite the contemporaneous celebrity that marked the careers of Edna Mae and Kentucky's Choice and with the successful result of that mating now being tried with another of equal distinction, the public has much to look forward to. The foal will have everything—breeding, fame, distinction, quality and the admiration of every horse-lover in America, when it arrives.

✤ ✤ ✤

The most notable spring horse show of the year is being conducted at Tulsa, Okla., this week. Fifteen thousand dollars in cash prizes is being distributed between such notable stables as Longview Farm, Jas. Houchin, O. J. Mooers, D. Schilling, John L. Bushnell and others.

✤ ✤ ✤

Oscar Edwards & Son, DeSoto, Mo., proprietors of Hilldale Stock Farm, recently sold to W. T. Schade, of Jackson, Mo., a good bay saddle stallion foaled in 1916. This horse, it is said, probably carries more crosses to Cabell's Lexington than any colt alive. He is by High Chief 2211 and out of Hillsdale Queen 8211.

✤ ✤ ✤

The Governor, John L. Bushnell's supreme Gig horse, promises to repeat his remarkable performances of the last three seasons by winning every class this season. He has won every event so far this year, including four first prizes at the Brooklyn show. The Governor was brought out and sold to the prominent Ohio sportsman by L. T. Anderson, Maysville, Ky.

✤ ✤ ✤

Eaton Farm Breeding Many Mares.

The following communication from Don Reavis, the popular manager of Eaton Farm's show horses, the property of Bruce G. Eaton, will be of interest to saddle horse breeders:

"The weather here has been very backwkard this spring. We are not going to show anything this season. So far ten foals have arrived by Senator Cantrill and five more are due from him and one from Edna Mae's Choice and Frenchdale Rex. Every colt so far as been a chestnut so we will have to hand it to Mr. Eaton; he certainly knows how to breed colors. All the mares are being bred to the young horses this year. Princess Eugenia has been mated to Edna Mae's Choice and if the colt is the sire he should be this mating should produce something remarkable.

"We have several young mares and geldings, top-notchers, that are ready to go. They are not show nor es but good pleasure animals. Frenchdale Rex and Edna Mae's Choice are both racking fine but are being driven exclusively now. As soon as the breeding season is over I expect to work them under the saddle again."

News From James A. Houchin.

Mr. Jump Cauthorn,
The Breeder and Sportsman,
San Francisco, Cal.

My Dear Sir: In reference to that championship stake will say that the idea is all right, but say, Jump, how about coming to California to show for such a stake? If they get up two or three shows en route, that will be all right; in fact, I have been writing about a little circuit of that kind—Denver, Salt Lake and over to Portland and down to Salem, and then to San Francisco, El Paso, Fort Worth and home. I am satisfied that that could be worked out, but it would take some work.

I just want to say that next Saturday we are going to ship to Tulsa, Okla.; and believe we have a good stable for this year. We are short a gelding, that is, a gelding that is ready. I think we have a gelding that will beat the world when he is ready but he is not quite in shape. He is a full brother to I Am King and has more airs than Johnnie Jones ever had; has all the finish at every point, and has that Astral King trot; and you know that must be about right . However, you know Mr. Anderson; he takes time and he will not bring one out until he is ready, and this colt may not be ready before next year.

We are counting on I Am King, of course, to win in the big events this year, and Beauchamp for the junior stakes; then we have bought the C. C. Judy mare, Decoration Lady, for our mare classes, and I think that they are going to have to go some to beat her. For the walk-trot ladies' classes, we have a real one in Catherine Countess. New show stuff is pretty scarce throughout the country but you will notice that our string is largely made up of new horses—that is, stuff that has not been worn out before the public; in fact, nearly every one of them will be new candidates to the public. Those Tulsa people are putting up a big program down there and I hope that they have good crowds ,and I believe they will.

Mr. Lewis was at our place yesterday, also our friend from Chicago, Mr. Schilling, and Mr. Bond from Illinois and Clark from Golconda, Ill. Tom Bass was expected over and it looked a little bit like an auction around our place, even though it was Sunday. We have had a splendid season and only have a few more ready-to-sell horses in our barn. We are selling a lot of stock to old customers, sight-unseen, and they are meeting with general satisfaction. There has not been a great amount of buying in the barn, but Mr. Schilling has bought a few, and some others have bought; but most of our selling has been to our former customers; they write us what they want and we have been sending them out. That is really the satisfactory horse exhibit game.

Yours very truly,

JAS. HOUCHIN.

✤ ✤ ✤

Mary Dick 5441, by Chester Dare 10, has just foaled a very fine bay filly by Kentucky Choice. Mary Dick is now owned by Joseph McDowell, Jr. She is the dam of Blanche Ring, also of Mary Katherine, a very promising three-year-old by Kentucky Choice. Mary Katherine is owned by E. V. Maltby, of Chicago.

✤ ✤ ✤

Geo. Reynolds, of Higbee, Mo., has sold to a Dallas, Texas, horse enthusiast, the saddle colt I'ma Easter Cloud, for a good price. This yearling is a son of Easter Cloud, which as a colt, it will be remembered, made such a splendid show record last year. He made a total of twenty-seven shows and won twenty-five blue ribbons and two reds. Three of these ribbons were for finest stallion, mare or gelding, any age. The dam of I'ma Easter Cloud has been mated to Easter Cloud again this spring.. She is owned by Gaiser Hall, of Madison, Mo., who sold I'ma Easter Cloud to Geo. Reynolds.

✤ ✤ ✤

Holger Rasmussen, of Chicago, writes that the handsomest stallion in that city is the beautiful bay saddle stallion owned by D. Schilling. This horse is one of the handsomest and best bred ones in the United States, perfectly mannered and gaited, and his appearance under the skilled riding of his owner naturally attracts the attention of those who frequent Lincoln Park.

✤ ✤ ✤

The first horse shows in the year have demonstrated that Missouri continues to send her full quota of winners to the front. Despite the fact that the majority of winning saddle horses at the recent Philadelphia, Brooklyn and New York horse shows were produced, trained and exhibited in Missouri, they are being frequently referred to as "Kentucky" horses. "Mebbe so." However, such old Missouri sires as Rex McDonald, Dick Taylor and Grand McDonald are responsible for their appearance and Missourians are satisfied with getting the cash and letting the glory go elsewhere.

✤ ✤ ✤

Revel L. English, of Pasadena, has recently purchased the noted California-bred gelding, San Jacinto, from Capt. Wm. Banning, of Los Angeles. San Jacinto was bred by Mr. English and under his colors won a number of the most important saddle stakes in the West, including the Pacific Coast futurity. He was gelded when sold to Capt. Banning, who used him as a pleasure horse. It is said he has matured wonderfully and is much improved over his youthful appearances which were most successful. Under the care of trainer Tom Jefferson, San Jacinto will have to be reckoned with at future shows here.

BRING 'EM WEST, MR. OPPENHEIM.

[By Ivanhoe Whitted, Supt. Publicity, Iowa State Fair.]

I was highly interested and entertained—if not spiritually uplifted—by reading an account of the appearance of the two Middle West favorites, Johnnie Jones and Jack Barrymore, at the recent Brooklyn Horse Show.

"They came, they saw," but they didn't "conquer" to any noticeable extent. The downeasters didn't take kindly to them, at least the judges didn't. It was the same old, disheartening story of unappreciation by more than one western man who has attempted to popularize the "so-called American type"—that is not my expression, the reader will kindly remember; it is quoted from The Rider and Driver—to popularize the American Saddler in the states east of the Alleghanies.

Both these splendid geldings were given the gate in several classes. Not that it was unexpected, remembering the experiences of the past. It is manifestly impossible to convince an individual or a people who have made up their minds, individually, collectively, and otherwise, that they are not to be convinced. And the East decided a good many years ago that it didn't like the splendid American Saddler, that it never had liked him, and furthermore, that it didn't intend ever to like him in the future, or even make an attempt to. Under the circumstances, what else was to be expected when Jack and Johnnie went into the ring?

There was a time when doings like these cut us to the gizzard. But no more. It no longer hurts or makes us look for our fighting clothes; only serves to produce a great "weariness" and furnish additional evidence that the downeasters are staying put and performing consistently in their oft-repeated demonstrations of dislike of the American Saddler.

Yes, it's a fact; both these great geldings got the gate, not once but repeatedly. The gray, just off the car from the Pacific Coast, did succeed in winning a place in one event, but aside from that lone instance they were outside the going.

Now, it might be argued at long distance that these geldings had suffered a slump from their old-time winning form to such an extent that the gate was all they had coming. Such a contingency is too remote for serious consideration. I saw Johnnie at the International in December, at which time and place he was all to the good. Knowing that he has been under the always efficient and capable handling of Ed Moore since that date, also that he was fitted for this very show, it is entirely safe to assume that he was up to the mark and qualified to start in fast company.

The gray I have not seen for two years or more, but imagination positively rebels when called on to picture Jack Barrymore in any other than prize-winning form, with any sort of handling, so long as life shall animate his magnificent personality. For he is simply one of the most wonderful and glorious animals ever bred in anybody's country. Words fail the average pencil pusher when attempting a pen picture of him. Johnnie Jones is a great gelding, an extraordinary gelding, but aside from the matter of inches Barrymore has all that Johnny ever had and then some. There is a grace, an air of some sort that the dictionary makers failed to take into account when they compiled their list of descriptive adjectives.

Naturally the new owner of these two geldings, Mr. M. H. Oppenheim, of somewhere, was sadly disappointed over the chilly reception given his entries. The Rider and Driver quotes him as saying that he "would not show them again in the East, but confine their activities to Western shows."

We are glad of it. The geldings will be appreciated in the Middle West, anywhere, in fact, from Ohio westward to the Pacific Coast. We sincerely hope their owner will include some of the shows west of the Mississippi River in his itinerancy, our great Iowa State Fair among the rest. Johnnie Jones has visited Iowa on at least two occasions and delighted state fair visitors with his beautiful individuality and sensational performances, but the people of the state have never been favored with an opportunity to get acquainted with the superb gray gelding that was "bred in Old Kentucky." Bring 'em west, Mr. Oppenheim.

✤ ✤ ✤

"Just a Filler"

In speaking of the celebrated stallion, Marshall Chief, the Show Horse Chronicle says in regard to having recently published his picture in that valuable journal: "Nevertheless the picture we published attracted the attention of several residents of Philadelphia and the surrounding neighborhood, not on account especially of his owner being a resident of that city, but because of his very marked beauty and superiority." Now I will admit, the man who sold Marshall Chief to Mr. Wallace is quite noted for his "marked beauty," however, Mr. Wallace is not conspicuous for his "good looks." Only those who know who Mr. Wallace bought this great horse from will "get this."

Notes and News

The best advertised races always fill best.

✤ ✤ ✤

May 26 is the date set for Woodland's first race of this year.

✤ ✤ ✤

Don't forget to give that Wisconsin State Fair program your careful attention.

✤ ✤ ✤

"Billie" Higginbottom, of San Francisco, acted as starter at the Lockeford races.

✤ ✤ ✤

The matinee racers are repeating their Dixon and Lockeford performances at Galt this week.

✤ ✤ ✤

Joseph Waddell visited Eureka last week, his mission being in the interest of their approaching fair.

✤ ✤ ✤

If you haven't bred that good mare, do so at once; there is plenty of time and every producing mare of good blood should "do her bit" this year.

✤ ✤ ✤

Great interest was manifested by visitors at the Lockeford picnic in the races. An excellent program was given and the event was well conducted.

✤ ✤ ✤

California and Southern trainers certainly had the "edge" on all others this year. Tardy spring has delayed trainers' progress everywhere.

✤ ✤ ✤

C. A. Durfee has warned harness horse men in this country to "sit up and take notice" for many years and he says he has some real surprises in store for them this season.

✤ ✤ ✤

Salinas announces four days racing instead of three; and three harness races every day. Purses will be for $500 each. "The money is in the bank," says President Heibert.

✤ ✤ ✤

J. J. Campbell, of Pasadena, well known horseman, is a San Francisco visitor this week. Mr. Campbell will visit Pleasanton and several tracks in this locality before returning South.

✤ ✤ ✤

Friends of A. T. Jackson, well known Stockton horseman, will regret to learn of the death of his wife, which occurred last week. Mrs. Jackson had been in bad health several months.

✤ ✤ ✤

A. B. Kenney, of North Yakima, Wash., one of the leading trainers in the West, has arrived in California with his stable of trotters and pacers and is comfortably located at the Santa Rosa track.

✤ ✤ ✤

Anderson Bros., of Portland, Ore., have recently purchased from Sam Agnew of Centralia, Washington, the beautiful brown pacing stallion, Indian Hal 2:10¼ by Hal B.; dam Altalena by Altamont, making him a full brother to Hay Boy 2:06¼.

✤ ✤ ✤

Remember the closing date of the Milwaukee State Fair, Monday, May 28. More than $25,000 in purses and stakes. Write Oliver E. Remey, secretary, or R. J. White, speed superintendent, West Allis, Wis., for entry blanks and further information.

✤ ✤ ✤

W. J. Miller, of Seattle, is giving his pacer Maud Bond, by The Bondsman, her "prep" work on the Seattle speedway. Mr. Miller is one of Seattle's leading business men, but always has time to keep Maud Bond on edge and he enjoys it immensely.

✤ ✤ ✤

The California Stallion Registration Association, through its secretary, Charles W. Paine, has offered a $50 cash premium for the best stallion and two of his get exhibited at the third annual Butte County Spring Exposition, to be held in Chico May 21-26, inclusive. The stock display at this exposition will be the greatest ever seen in California outside the State Fair and big expositions.

✤ ✤ ✤

Roland Wilson of Seattle has Floradora Z. 2:11½, in the pink of condition. This good trotting daughter of Zombro is getting her first spring work over Seattle's speedway; that great city's half mile track is now closed up and a total wreck. The owner refuses to do anything to keep it up. It seems a shame that a town of 400,000 population, well situated like Seattle and with such a host of harness horse lovers, has not a good track. Seattle should have a fair grounds and race track second to none in the country.

✤ ✤ ✤

Benito B. by Stam B.—Salinas Maid, the property of Robt. Orr and Wm. McLeod, dropped a fine colt at the Orr ranch last Monday. The sire of the new arrival is the famous pacer Warren Dillon, owned by Henry Helman of Salinas. Bob says that the youngster was no sooner born than it started in to pace, and that he expects to win the Occident stakes with him as a two-year-old. And why shouldn't he? The colt is bred in the purple, and if breeding counts for anything the stakes should be brought to San Benito county.—[San Benito Advance.

President George Arnold and his secretary, Ernest G. Bylander, of the Missouri State Fair, are encouraging trainers to make the Missouri State Fair grounds their headquarters. This mile track is one of the best in the West and the fair heads are doing their utmost to keep it in good shape.

✤ ✤ ✤

Directors of the Fresno District Fair Association meet this afternoon to elect a secretary and to discuss general plans for the show next fall. An entirely new outlay of entertainment features are to be secured, as well as innovations in displays and paid amusements. Special attention is to be given to agricultural exhibits.

✤ ✤ ✤

The citizens of Petaluma have rallied to their fair and more money was guaranteed at a recent meeting than was originally asked by the managers. "They will have as many horses and just about as good racing as will be seen west of the Mississippi ricer," said Joseph Waddell, who returned from Petaluma Saturday. They are anticipating a big entry list and more stables and other accommodations are being arranged to take care of the visiting horsemen. There are 120 good stalls on the track already and more are planned.

✤ ✤ ✤

John B. Stetson has sold his green trotting gelding, Joe Wilkins, by Kentucky Todd—Fair Recluse; also the chestnut gelding Chris the Great, by Peter the Great, dam Miss Faribault by Axworthy, to Omaha, Nebraska, horsemen. Mr. Stetson, who recently severed his connection with the Midway Stock Farm, is now making the Benson, Nebraska, track his headquarters and has in his stable the two green pacers, Paline, by Palite and Grey Hal, by Hal B.—Nellie Couvert, by Touchet. Mr. Stetson has made California his home for the last few seasons and horse lovers in this state are wondering if there is any chance to "get him back." It is admitted, however, that he will be successful wherever he goes, for there are few trainers like "John B."

✤ ✤ ✤

Day of Racing at Woodland.

Charles Silva, veteran horseman, has interested a number of other light-harness enthusiasts in a program to be held in Woodland May 26. Among the events will be a free-for-all pace, a 2:20 trot and a 2:14 trot. Some of the best horses in the state will measure paces in the events.

Jack Broillar of Fresno sent his stable of horses up this week. They all arrived in fine fettle. A number of the others are expected almost any day, as Silva has either written or interviewed all of the horsemen of his acquaintance.

The meet will give the new half-mile track a wonderful tryout. It will be the first meet on the two-times-around circle. Many of the stables have been out in preliminary meets and some bang-up time will probably be made on the new circle.

Experts who have seen it say that this track is even superior to the famous mile track on which so many records were made.

✤ ✤ ✤

California's racing program for 1917 is full. It has been many years since so many good tracks have been utilized. It has been seldom that there was such a grand array of starters for every class. However, horsemen are getting anxious; the associations in the East have announced their programs and purses and are inviting the horsemen of California to compete for the rich prizes. These dates are announced to close soon and unless the various fair associations on the coast put out something definite at once some of the best stables here will be entered in the East. The horsemen have spared neither time, expense nor experience in preparing these horses and they want to know what they are to be offered in return. They are prepared to give some reguar old-fashioned horse racing; however, there are only a few of them on the coast who can afford to race for pleasure and if the stakes are not advertised at once they will be found "going east." It is high time the fair managements were giving horsemen something definite.

✤ ✤ ✤

Chas. James Gets a Record.

During the buzz and excitement on Saturday morning at Addington, few of the large number of spectators present had any idea that a great performance was in progress. The local trainer, C. James, after exercising his two-year-old trotter earlier in the morning, brought him on again and the colt, in company with Dubose, found little difficulty in leaving a mile behind in the excellent time of 2 min. 30 sec., which the writer is under the impression is an Australasian record for a youngster of this age as a straight-out trotter. The colt is a well-bred one, being by one of the Santa Rosa Stud Farm's promising stallions, Petereta, from a Young Irvington mare. The colt is owned on the West Coast, and has been an inmate of C. James' stable for less than three months, and the manner in which he has improved during the past ninety days reflects great credit on his trainer, who seems to quite understand young stock of this description.—[New Zealand Referee.

The regular annual meeting of the San Francisco Driving Club at which will occur the election of officers will be held on Tuesday, May 22d, at which time also the program for the first matinee racing at the Stadium will be made up. The season opens on Sunday, May 27, and is being looked forward to with much interest by the general public. Every Sunday during the racing season the San Francisco Driving Club entertains thousands of enthusiastic spectators absolutely free of cost, and their races are the most popular of all the sports which are held in Golden Gate Park.

✤ ✤ ✤

Mr. I. L. Borden, of San Francisco, has purchased from the Valencia Stock Farm the ten-year-old horse Pegasus. This horse took a breeder's record of 2:08½ at the trotting gait last year. He is sired by Zombro 28029 from La Belle 2:16, by Sidney 4770; grand dam Anna Belle 2:27½ by Dawn 6407. He was campaigned on the California Circuit three years ago as a pacer and took a record of 2:07¾ at that gait, and proved to be a more than useful racehorse during that season.

✤ ✤ ✤

Candidate for 2:00 Honors.

Today the 2:00 list of trotters contains four names, two geldings, one stallion and one mare. The list of 2:00 pacers consists of ten, eight stallions and two geldings, as yet no mare having the credit of being officially timed at that mark.

It was the opinion of many horsemen last year that Miss Harris M., by Peter the Great, was reasonably certain to pace a mile in 2:00 or better, but when the curtain fell on the racing year that great filly was short one and a quarter seconds of that distinction.

At present this great young mare is being trained at Indianapolis by Lon McDonald with the intention of starting her at North Randall during the initial Grand Circuit meeting in an effort to gain the honor of being the first mare to pace in even time, and it would seem to us, judging from her racing career last year, that her chances to win laurels through the attempt look very bright indeed.

It certainly seems peculiar that pacing mares have failed, year after year, in gaining such a record, while stallions to the number of eight and two geldings have been successful. Seemingly, to use a slang term, there must be a "jinx" around somewhere that has been responsible for the hoodoo. The same thing seemed to apply to trotting stallions until the advent of Lee Axworthy 1:58¼ last year, and now that only pacing mares lack representation among the 2:00 performers we sincerely hope that Miss Harris M. may be spared any training mishaps and that she is in prime physical condition when she essays her task at North Randall.

Given such condition, it would seem to us that the daughter of Peter the Great will bring to her owner, Mr. S. A. Fletcher, the honor of owning the first mare to pace in 2:00, officially timed.—[American Sportsman.

✤ ✤ ✤

NOTES OF LOCKEFORD PICNIC RACES.

The Breeder and Sportsman is indebted to Stockton's well known harness horse lover, Frank Lieginger, proprietor of the Goodell Transfer Co., for the following notes of the Lockeford picnic-races, which took place Saturday, May 12. Mr. Lieginger acted as secretary.

The picnic at Lockeford was a big success as far as the racing was concerned. Everyone helped by doing their part well and the races were pulled off like clock work, there being no delays; as soon as one heat was over the drivers had their horses on the track ready for the next start.

Wm. Higginbottom, who started the horses, certainly did clever work and gave entire satisfaction. Even the "swipes" were satisfied and did not kick. The contest in every race was keen and the money well divided. Every horseman was satisfied with the conditions of the race. Messrs. Locke and Wakefield had the track in tip-top shape and as there are no horses stabled on the grounds there was plenty of good stall room and lots of good clean straw for all the horses.

Mr. J. J. Ryan's Directress Mac broke the track record three times. Sweetbow and San Felipe each broke the track record for trotters, which formerly was held by Dexter Derby. The appreciation shown by the banner crowd present indicated the people of San Joaquin county, the best county in the state, want racing revived here in its old-time form. Some of the horsemen who attended the meeting were:

From San Francisco—J. J. Ryan, Wm. Higginbottom, Harold Cohen, Fred Lauterwasser, Al Schwartz.

From Sacramento—Chas. Silva, Walter Tryon, Dr. Delano, Dr. Weldon, Tom Holmes, Wm. Ivey.

From Stockton—C. F. Bunch, J. N. Jones, W. H. Parker, Dan Lieginger, F. H. Johnson, Jerry Aker, James Spafford, W. H. Williams.

From Hanford—J. C. Leggett, Moody Leggett, W. W. Gallup, Jake Brolliar.

From Lodi—James Pierano, J. W. Dougherty, Fred Post, Ed Speakerman, Bert Acher.

From Galt—George Orr, Mr. Shimerhorn, R. W. Brewster.

From Acampo—Jess Wakefield, M. Smythson.

From Woodland—L. B. Daniels.

From Dixon—Don Greame.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

May 21, 22, 23—Los Angeles, Cal.—California-Nevada State Tournament, under the auspices of the Los Angeles Gun Club. Fred H. Teeple, Secretary.

May 23, 24—Ogden. Utah—Utah State Tournament, under the auspices of the Ogden Gun Club. A. R. Bain, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24 — Bellingham, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✤ ✤ ✤

Small Trout in Streams.—Fishermen have not been burdened down these opening weeks of the trout season with large catches. Many limits have been reported, but it takes a clear-visioned person to see the little fellows that make up the baskets. The trouble is, all agree, that the season came in a month too late, when the water has receded in the near-by coast streams and the big trout have departed.

Occasionally there is an angler who proudly tells the sizes of his catches. Floyd Judah traveled to Crag View at Castella, on the Upper Sacramento, and he was all smiles on his return. He found conditions just right. Fact is they were like July fishing days there, with the water clear and low. With the improved governor and hare's ear he landed thirty-five beauties. The river was a foot lower than is usual at this time of the year. In the last couple of days warm weather has been in evidence and conditions are not so favorable for fly fishing.

Some whoppers were taken from Big Stoney, according to reports from Fouts Springs, in Colusa county. Six rodsters landed a total of fifty-nine, with a number of thirteen and nine-inch boys among the lot. The water is still a bit high and milky and the trout were taken with spoons and bait. Better fishing conditions will exist on Big Stoney along about June 1.

Ted Riley went to the trouble of packing in from Monterey to the Big Sur, and was rewarded with some fine fish. Several of them measured twelve to fourteen inches, according to Ted, who enjoys a reputation for honesty and integrity.

Dr. Henry Abrahm and his companion Henry Klevesahl, went up to Squaw lake near Cloverdale, but landed only small fish.

With trout running small, some anglers are turning their attention to black bass, which came in on May 1st. They have been having some excellent sport. E. C. Boucher made some nice catches at Lake Chabot last Sunday. Other anglers there landed two five-pointers. Woodbridge, near Lodi, is another spot that has been recommended for black bass.

W. E. Stevens and O. W. Montgomery were down on Pieta Creek trying their luck, and made some catches of small trout. W. E. Plunkett hooked several big ones at San Gregorio Laguna, but they all got away.

The Marin Municipal Water Company has opened up Phoenix Gulch and Lagunitas Reservoir for fishermen who can procure permits. No shore fishing is allowed, and only ten trout per day are allowed to be taken.

ALL READY FOR TRAP CHAMPIONSHIPS.

California-Nevada Shoot at Los Angeles and Coast Handicap Attract Attention.

For the first time in years California trapshooters are looking forward with interest to the staging of the two blue-ribbon events of the Pacific slope in the Golden State. There will be a continual bombardment during the closing days of this month and predictions are freely made that records for the number of entries in both the California-Nevada tourney and the Pacific Coast handicap will go by the boards.

This grand California-Nevada state shooting tournament which is to be held at the Los Angeles Gun Club May 21, 22 and 23 promises to attract all the best tarhawk smashers of the two states. Already Heine Pfirrmann, the president of the Los Angeles club, and Fred Teeple ,the secretary, have received letters from prominent shooters announcing that they will be on hand and expect to annex high honors in the gala event.

Andy Flickinger ,the star Vallejo tarhawk smasher, was one of the first to send his name in as a possible victor. Flickinger is a veteran at the trap sport and is always in the running. O. N. Ford of the San Jose Gun Club is another favorite who sent his name in among the first. Ford is to stage the Pacific Coast handicap shoot at the San Jose club, but vows he is coming south to clean up on the local shooters.

H. Lorenson, who annexed high honors at the recent registered shooting tournament at Fresno, will also go to the Los Angeles tourney. In the Fresno event Lorenson dropped only seven targets out of 400. He hails from the city of Newman. A. P. Haliburton, a veteran target smasher; N. A. Howard, of San Francisco; Tony Prior, Gilbert Hatch, George Stall, W. E. Stanton, Frank Newbert, T. D. Riley, Frank Stall and many others will go from the north.

Fresno will also send a strong delegation of star shooters. Grant Adams will head the stars, while Lee Slocum, Guy Lovelace, Dr. J. L. Martin and Bill Eliet will be among the other Fresno shooters who will take part in the big event.

George Anderson, Louis Baumgartner and others will go south with Ford from San Jose. Harry Ogilvie will travel from Lindsay, and Harry Hine will be one of the Eureka representatives. Fred Baer will also go from the north.

W. S. Pease, who is ranked as the best target smasher in the state of Nevada, has sent in notice that he will be there for the title affair. Harry Garrison expects to go from Modesto. Dr. R. N. Fuller will go down from his home in Tulare and H. D. Blanchard will travel down from Lindsay.

All the best professionals from both California and Nevada are planning on attending the big shooting event. Dick Reed, Len Hawxhurst, Hugh Poston, Clarence Haight, Bill Joslyn, Charles Knight and Al Cook will all be present and will do battle with the southern pros. for high honors. Ed Mitchell and George Oliver, and also Guy Holohan, are the star shooters of the southern pro. ranks.

Besides these few shooters who have sent in their names early there will of course be numerous tarhawk breakers flock from the northern part of the state and from Nevada. San Francisco alone expects to send a delegation of about twenty, while San Jose, Fresno and other clubs are planning on having large parties. San Diego will also be represented by about five target smashers.

The Interstate Association's 12th . Pacific Coast trapshooting tournament will be held on the grounds of the San Jose Blue Rock Club May 28, 29 and 30. The event will be under the auspices of the San Jose Gun Club and a larger attendance than ever participated in a Pacific Coast event is expected.

The regular program events have been arranged for the benefit of the beginner and mediocre shot. With the low entrance fees and the losses paid back each day under the Squier money-back system, it is not possible for the expert shot to enrich himself at the expense of the less skillful contestant.

Special competition has been arranged for women and a cordial invitation extended to them to take part in the tournament. A trophy has been provided for their especial benefit.

A practice shoot will be held on Sunday, May 27, for the benefit of all who wish to try the traps before the contest starts.

The first day of the shoot, Monday, May 28, the Pacific Coast Introductory handicap of 140 targets will be shot, and also a special event at ten double targets.

The second day will open with the Pacific Coast Special handicap at 100 targets, which will be followed by the Pacific Coast Preliminary handicap at 100 targets.

On the third and last day the Pacific Coast Overture handicap at 100 targets and the Pacific Coast handicap at 100 targets, the big event of the shoot, will be held.

The Squier money system will be used, but a contestant will not be obliged to compete in all regular program events to have his losses paid back. The following entrance fees will be charged: First day, $15; second day, $11, and third day, $11 less the price of the targets at 3 cents each. The special fund will be made up from 1 cent for each target trapped in the regular program events, and from the total amount derived from the extra entrance fee of $1, which is included in each day's regular program entrance.

After paying each day's losses out of the special fund the surplus will be divided among the high gun amateurs who shoot through the entire three-days' program for a total of 340 targets. The special event at double targets, the Preliminary handicap, the Pacific Coast handicap and the Optional Sweepstakes will not be included in the Squier money-back system.

A special trap, known as the "Little Joker," with no restrictions as to width of angles, height and distance throwing targets will give contestants an opportunity to try their skill between the events. The "Little Joker" will be true to name and will no doubt cause many heartaches to the shooters.

Shooters all over the state have been notified that San Jose has been chosen owing to "the ideal conditions more favorable for the holding of a successful tournament, with accessories of climate, scenery and other attractions that appeal to lovers of all kinds of outdoor sport and recreation. The sun is at the shooter's back at all four sets of traps, in the distance is the great Lick Obesrvatory and a beautiful view of the Mount Hamilton range. The tournaments held in San Jose in the past have always been well attended and greatly enjoyed, and as the interest in trapshooting throughout the Pacific Coast was never greater than now, it is confidently expected that this will be one of the largest tournaments ever held on the Pacific Coast.

The San Jose club was organized in 1912, and since then many successful local tournaments have been held.

Los Angeles Club.—The final shoot at 100 targets for the H. R. Everding trophies at the Los Angeles Gun Club was held Sunday morning. R. O. Pool, shooting from 18 yards, broke high gun for the day. His score was 96x100. Sargent, Melford, Pachmayr and Pool won gold take-home trophies, while silver take-home trophies were won by George Tuckett, Wilson, Seth Hart, Kennedy. The winners follow:

F. H. Mellus, Class A, 25 points; H. Pfirrmann, Class A, 18; Sargent, Class B, 27; Tuckett, Class B, 22; Melford, Class C, 28; Wilson, Class C and Hart, Class C, tied for second, 23 points; in the shoot-off Hart won; Pool, Class D, 31 points; Kennedy, Class D, 29 points. Second prize shooters were awarded loving cups by the club.

Sunday's scores: Pool, 18 yards, brofie 96; Hart 19—90; Kennedy 18—87, Sayert 20—86, Melford 19—86, Hall 19—85, Pachmayr 18—82, Carnahan 17—82, Nelson 18—81, Tuckett 19—80; Bungay 45x50, Teeple 40x50, Towne 32x50, Christensen 19x25, French 16x 25, Crossman 46x50, Jasper 46x50, Gardner 45x50, Dezert 44x50, Thomson 42x50, Tektenthal 41x50, Neff 38x50.

Seattle Association.—Sunday, May 5th, a strong wind added considerable of a handicap to the shooters gathered on the Harbor Island grounds. Tom Wilkes furnished the high score in the regular program of fifty targets, finishing in this event with a total of forty-seven. C. E. McKelvey went the second man with a total of forty-six.

In the hundred target race, McKelvey shot over Wilkes and the standing was reversed, McKelvey ninety-four and Wilkes ninety-two. Jack Lewis won the prize with the added birds allowed him, this being the first of a series of prize contests that the club will hold. The scores:

50 targets—Tom Wilkes 47, C. E. McKelvey 46, Hugh Fleming 44, *D .Rhodes 44, E. Ellis 43, Ralph Kinzer 41, Fred Landwehr 39, J. B. Lewis 36.

10 0targets—C. E. McKelvey 94, Tom Wilkes 92, *D. Rhodes 92, E. Ellis 85, Hugh Fleming 84, Ralph Kinzer 84, J. B. Lewis 80, Fred Landwehr 80.

Yours,

E. A. FRY, Secretary.

Trade Notes.—Charles Hummell, of La Porte City, hung up a score of 144x150 at a recent shoot of the Davenport, Iowa; Gun Club, shooting a Remington pump gun and Nitro Club Speed shells, winning the shoot by a margin of one clay.

At the Bureau Valley Gun Club shoot held at Princeton, Ill., P. Shifflet, of Ohio, scored 135x150 as high man with a Remington pump gun and Nitro Club shells.

The Mississippi State Championship was won by L. J. Matlock, Pascagoula, scoring 92x100, using a Remington pump gun and Nitro Club shot shells. Mr. Matlock shot off two ties of 25 with T. K. Green, of Natchez.

A. H. Aber made a score of 49x50 at the Thornburg Gun Club shoot at Thornburg, Pittsburgh, Pa., with a Remington pump gun and Nitro Club shells, beating all comers.

J. W. SEAVEY IS OREGON CHAMPION.

F. M. Troeh is High Amateur During Three Days of the State Tourney.

The Portland Gun Club carried off the honors on Tuesday, May 9th, in the statechampionship shoot at the fifth annual trapshooting tournament held by the Oregon State Sportsmen's Association.

J. W. Seavey of the Portland club won the state championship with a score of 98 out of a possible 100, while Frank Templeton, also a member of the Portland club, is runner-up, with a score of 96.

Three, however, tied for the second place and Templeton won in the shoot-off. The three who tied at 96 were Templeton, P. B. Dodele of Albany and Henry Veatch of Cottage Grove.

On the shoot-off, with 20 birds, the score was: Templeton 19, Dodele 19, Veatch 14. Templeton and Dodele again shot off the tie and Templeton made a perfect score, while Dodele missed two.

E. S. Keller of Portland took fifth place, with a score of 95, and Mark Siddall of Salem and M. A. Rickard of Corvallis tied for sixth place. Aickard won the shoot-off, with one miss to two misses for Siddall. Seven trophies were awarded.

The highest total score by an amateur for the two days was made by F. M. Troeh of Vancouver, Wash. He made 389 hits out of a possible 400. Other high scores by amateurs were made by J. W. Seavey, Portland, 388; Frank Templeton, Portland, 380, and Mark Rickard, Corvallis, 378.

High gun among the professionals was held by L. H. Reid of Seattle. He made a score of 393. The next three highest were H. E. Poston, San Francisco, 381; P. J. Holohan, Portland, 378; F. A. Dryden, Spokane, 372. Following are the scores:

State championship—*Tom Wilkes 95, H. H. Veatch 96, O. R. Wilson 90, E. G. Hawman 84, Mark Siddall 94, H. R. Everding 83, F. Templeton 96, E. H. Keller 95, J. G. Clemson 58, J. W. Seavey 98, *P. J. Holohan 92, *F. A. Dryden 94, F. M. Troeh 98, *H. H. Riclefson 66, *J. P. Bull 86, Peter Whitney 85, Chas. Leith 90, W. K. France 89, Dr. O. D. Thornton 86, *L. H. Reid 95, D. Reid 84, *H. E. Poston 94, M. Rickard 94, C. Dodele 89, E. Nickerson 89, C. L. Templeton 89, E. B .Morris 79, W. W. McCornack 89, W. O. Hackert 88, Dr. C. F. Cathey 91, R. P. Riggs 83, John Palmer 86, P. B. Dodele 96, R. P. Knight 92, L. Templeton 87.

Regular program for the day—Wilkes 138, Veatch 129, Wilson 137, Joy 108, *C. Schilling 140, Everding 134, F. Templeton 141, Keller 130, Clemson 104, Seavey 144, *Holohan 143, *Dryden 137, Troeh 148, *Ricklefson 116, *Bull 125, Whitney 138, A. Schilling 130, Leith 142, Dennison 137, *L. H. Reid 149, G. Reid 132, D. Reid 139, *J. Reid 133, *Mike Poston 145, Rickard 143, C. Dodele 138, Ballack 131, Nickerson 136, C. Templeton 141, *Morris 139, McCornack 142, Hackert 129, Cathey 136, Riggs 132, Lewis 129, P. Dodele 133, Knight 137, L. Templeton 142, Pearson 130, Palmer 130. (*Professionals.)

Second Day, May 7.

Improved weather conditions, with plenty of sunshine, no rain, and marred only by an annoying wind, aided the contestants in the second day of the Oregon State Sportsmen's Association shoot to improve their scoring.

James W. Seavey was high amateur for the day, breaking 146 bluerocks out of 150, while L. H. Reid was high professional with the almost perfect score of 149.

The Oregon State Sportsmen's Association trophy, a sterling silver set, went to Short with a perfect score of 25.

In the team shoot Squad 4, including Frank M. Templeton, E. H. Keller and James W. Seavey, all of them of the Portland Gun Club, captured the trophies, shooting 74 for the team out of a possible 75, to each member of the winning team being awarded a gold lead pencil.

C. B. Dodele, of Albany, received the Honeyman Hardware trophy for high score. While he tied with George Scripture, it was determined that no shoot-off was necessary, as Scripture resides without the state and was not eligible to compete for the trophy. The scores for May 7th were as follows:

Mark Siddall 133, H. H .Veatch 137, Arvil Wilson 138, Lewis 127, *Carl Schilling 134, H. R. Everding 132, F. Templeton 143, E. H. Keller 140, John G. Clemson 102, James W. Seavey 146, *P. J. Holohan 143, *F. A. Dryden 123, F. M. Troeh 143, *H. H. Ricklefson 123, *J. P.Bull 139, *L. H. Reid 149, Dennis Reid 136, *J. E. Reid 132, Dr. Linninger 122, Charles Leith 132, W. G. Hawman 129, Short 131, Mark Rickard 141, C. G. Dodele 137, Young 104, L. Templeton 132, Nickerson 130, Mrs. Ada Schilling 132, C. Templeton 130, F. O. Joy 119, *Ed. B. Morris 139, W. W. McCornack 114, Hackert 133, C. B. Cathey 131, Riggs 135, P. B. Dodele 125, W. K. France 132, Pierson 124, Neeley 121. (*Professionals.)

In the shoot for the Oregon State Sportsmen's trophy the scoring was as follows:

Mark Siddall 21, Arvil Wilson 20, Lewis 22, H. R. Everding 15, Frank M. Templeton 22, E. H. Keller 22, James W. Seavey 24, Miss Gladys Reid 22, *H. E. Poston 22, Peter Whitney 24, Dr. Linninger 24, Chas. Leith 23, W. G. Hawman 21, W. M. Short 25, Mark Rickard 24, C. G. Dodele 23, L. Templeton 22, Nickerson 22, W. W. McCornack 16, Hackert 23, C. B. Cathey 23, P. B. Dodele 24, W. K. France 22.

In the team shoot, with seven teams contesting, the scores were as follows:

Team No. 1—Peter Whitney 23, W. G Hawman 19, Charles Leith 21; total, 63.

Team No. 2—Frank M. Troeh 25, Dennis Reid 21, C.Templeton 25 ; total 71.

Team No. 3—H. R. Everding 25, R. P. Knight 25, J. G. Clemson 15; total, 65.

Team No. 4 (winning team)—F. Templeton 25, E. H. Keller 25, James W. Seavey 24; total, 74.

Team No. 5—Mark Siddall 22, Arvil Wilson 23, H. H. Veatch 22; total, 67.

Team No. 6—Mark Rickard 25, P. B. Dodele 22, Dr. Linninger 22; total, 69.

Team No. 7—C. G. Dodele 24, Nickerson 22, L. Templeton 22; total, 68.

First Day, May 6.

Although high winds and heavy, intermittent rains caused ragged scores at the opening day of the shoot of the Oregon State Sportsmen's Association, 50 fans from in and out of the state were not deterred from enjoying their favorite sport.

The shoot for the Honeyman Hardware diamond trophy remained unsettled when the last bird was broken. Dodele and Scripture tied in the shoot for this trophy, Dodele breaking 45 of the bluerocks, with a 17 handicap. That trophy is now held by Pete O'Brien, of Portland, and must be held for three consecutive years for permanent ownership. O'Brien did not appear for this shoot, so it opens the field again.

In the Honeyman shoot the scores and handicaps were as follows: Mark Siddall, broke 39—19 yards; Dr. O. D. Thornton 40—19, Mark Rickard 42—17, Dodele 45—17, *L. H. Reid 40—22, Gladys Reid 34—16, D. Reid 40—16, *H. E. Poston 45—22, Peter Whitney 44—17, Charles Fellers 44—17, Charles Leith 41—19, E. G. Hammond 32—17, E. H. Riches 41—16, B. Morris 35—16, F. C. Jackson 24—16, A. K. Downs 40—16, J. W. Seavey 40—20, A. Wilson 40—17, A. L. Zachrisson 32—16, Al Seguin 34—17Cathey 40—16, A. G. Magers 40—16, W. K. France 38—19, H. R. Everding 39—19, E. H. Keller 42—19, F. Templeton 38—21, L. Templeton 43—16, George Scripture 45—16, Lewis 39—17.

Arvil Wilson of Salem was high gun for the day, excluding professionals, shooting 93 out of a possible 100, but tying with E. H. Keller, of Portland, and winning in the shoot-off by breaking 19 out of 20 birds, against 17 for Keller. He also won one of the Everding silver trophies, four of these being given by H. R. Everding, of Portland.

The second trophy was won by Mark Rickard, who tied with Charles Leith at 88, Rickard winning in the shoot-off. The third trophy went to Ralph Cooley, of Salem, who tied with Cathey and W. G. Hawman, but won in the shoot-off. J. Morris took the fourth trophy. These trophies were shot for under the Lewis class system.

Total scores for the day, shooting for the high gun, were as follows, out of a possible 100:

Miss Gladys Reid 79, D. Reid 90, *J. E. Reid 76, *H. E. Poston 85, Peter Whitney 89, Charles Fellers 86, Charles Leith 88, W. G. Hawman 80, E. H. Riches 89, J. Morris 75, J. G. Kamm 62, F. C. Jackson 71, F. O. Joy 77, A. K. Downs 81, J. W. Seavey 92, R. P. Knight 86, *J. P. Bull 91, *Ed Morris 91, Wilson 93, *P. J. Holohan 91, F. A. Dryden 90, A. L. Zachrisson 77, Al Seguin 77, Cathey 80, E. G. Magers 81, Mrs. Ada Schilling 87, Ralph Cooley 80, W. K. France 82, *Carl Schilling 91, H. R. Everding 81, T. G. Clemson 56, E. H. Keller 93, Mark Siddall 92, O. D. Thornton 79, *H. H. Ricklefson 76, Mark Rickards 88, Dodele 90, *L. H. Reid 91, F. Templeton 91, L. Templeton 79, George Scripture 92, Lewis 78, McIntyre 78, McCrow 56, Whorley 54, Buttrick 91.

Seavey Elected President.—James W. Seavey, of Portland, was elected president of the Oregon State Association succeeding H. H. Veatch, of Cottage Grove, who has held the position for two years, but refused to be a candidate for re-election.

Other officers elected were: E. H. Keller, Portland, vice-president; W. G. Ballack, Albany, secretary-treasurer; directors, Dr. C. F. Cathey, Condon; Mark Siddall, Salem; P. A. Young, Albany; Charles Brown, Astoria; Charles Leith, Woodburn; Dr. Horace Tillman, Pendleton.

Woodburn, Astoria and Condon all joined the State Association. The association agreed to put up a trophy annually and H. R. Everding and J. G. Clemson offered to add $25 apiece for the trophy to the clubs' contribution.

It was agreed that hereafter no one will be entitled to compete for the association trophy who has not shot the entire registered program for the day on which the trophy shoot is held, the trophy shoot to be for 25 birds.

Tacoma's Beginners' Shoot—Twenty-two beginners turned out May 6th for the beginners' day program of the Tacoma Gun Club. The shoot was held on the Manitou grove grounds and good scores were made. Harold Schweinler won the highest beginner's score prize for knocking out 23 of the 25 targets shot at. Mrs. D. H. Bales won the prize offered for highest women's score, with 19 hits. The high score of the day was by E. W. Cooper, who cracked 24 of the clay birds.

J. A. Dague and D. H. Bales are now tied for the leadership in the Majestic Cafe trophy race. Five wins are necessary to gain the prize. The following scores were made by the beginners:

M. A. Howe 17, E. R. Wheeler 21, H. G. Windsor 10, W. Locke 15, J. Van Koten 20, Chas. Palin 10, Chester Humphries 12, O. Wade 9, A. W. Bagley 19, L. Lawrence 21, J. Cooper 22, H. O. Scofield 14, F. L. Griffin 19, Mrs. D. H. Bales 19, F. L. Baker 19, W. C. Harbin 19, Hugo Delin 21, C. A. Campbell 20, F. Griffin Jr. 3, A. Barlow 22, H. Schweinler 23, Jack Lynch 15, A. N. Hatcher 15, A. W. Carr 17, Stanley Bell 2, E. W. Cooper 24, J. Fred Kenworthy 12, H. R. Burg 22, G. H. Richardson 17.

Lewiston, Idaho, Shoot.—F. M. Troeh won the honors of the registered tourney at Lewiston, Idaho, on April 23 and 24th. He had a total of 286 for the two days. On the opening day Guy Chiesman and Charles Hahn tied for high honors with 140 apiece. The next day J. W. Seavey took the lead with 148. The professionals had a close race, Hugh Poston, A. W. Woodworth and F. A. Dryden finishing in a tie. The scores were:

G. E. Beckman 140, 134, Wm. Houser 136, 138, Guy Chiesman 141, 130, R. W. Phipps 132, 127, Chas Hahn 141, 140, W. L. Cochrane 131, 133, C. F. Peden 131, 133, G. V. Kavanaugh 93, 89, Mrs. Chas. A. O'Connor 132, 134, A. D. Mars Jr. 138, 137, B. G. Mann 133, 125, C. M. Hadley 128, 136, F. M. Troeh 140, 146, D. B. Harvison 117, 125, N. M. Ragan 104, 129, O. E. Lynch 110, 128, C. B. Joslyn 138, 138, Fred Held 121, 135, Hugh McElroy 140, 142, B. F. Blosser 94, 92, John G. Clemson 115, 113, F. Friedlander 95, 91, Robert Erb 125, 117, H. R. Everding 131, 128, F. Templeton 125, 144, J. W. Seavey 134, 148, E. H. Keller 138, 131, R. P. Knight 135, 130, Lee Matlock 139, 141, W. Hickman 111, F. M. Robison 134, 132, J. Spence 134, 133, L. F. Robison 124, 130, C. E. Butler 103, 115, D. S. Wallace 129, 131, Norman Wann 138, 126, C. B. Green 113, 134, A. R. Johnson 136, 49x60, C. T. Arland 117, 132, E. C. Johnson 77, 132, Mrs. F. A. Dryden 31x60, J. F. Shriver 44x60, 128, E. W. Miller 122, D. Anderson 131, J. Hickman 135, F. E. Butler 51x60, 141, Geo. W. Murray 123, Dr. E. L. White 42x75, Warren Yates 112.

Professionals—H. E. Poston 137, 146, Gus Peret 132, 136, A. W. Woodworth 139, 144, P. J. Holohan 141, 139, E. L. Valleen 132, 140, E. B. Morris 134, 138, F. A. Dryden 137, 146.

Columbia-Willamette Trapshooters' League—

	W.	L.	Pct.	Shot at.	Broke.
Albany	2	0	1000	250	235
Astoria	2	1	.667	375	324
Woodburn	2	1	.667	375	332
La Grande	1	1	.500	375	346
Salem	1	2	.333	375	333
Oregon City	0	1	.000	250	208
Pendleton	0	2	.000	250	225

Results on May 6th—

Albany 122, Salem 117.

Astoria 113, Woodburn 108.

La Grande 121, Pendleton 116.

Oregon City remaining idle.

The Albany Gun Club is at the top of the club standings in the race for the championship of the Columbia-Willimette Trapshooters League and The Oregonian trophies, with two wins and no defeats. The Albany representatives are the only ones who have not been defeated so far during the competition.

There were six perfect scores turned in during the day, two of them hailing from Albany, one from the Round-up Gun Club, of Pendleton, and the three others from La Grande . H. J. Stillman, of Pendleton, broke 25 out of 25, while P. B. Dodele and Mark Rickard of Albany each turned the trick. Lou Raymond, H. Becker and T. J. Huston, all of the La Grande Gun Club, were good for 25 straight apiece.

High team score of 122 was credited to the Albany delegation, while La Grande was only one bird behind . Salem followed with 117, Pendleton with 116 and Woodburn 108. So far during the campaign the La Grande delegation has broken 346 out of a possible 375, while Salem has snapped 333 out of 375, and Woodburn has broken 332 out of 375.

The tie between the Canemah Gun Club of Oregon City and La Grande will be shot off May 20.

Officials For Marin Show.—The following judges and officials have been appointed to serve at the Marin County Kennel Club's show at Mill Valley May 30:

Bench show committee—J. W. Carey, L. C. P. Robinson, J. C. Bones.

Judges—Irving C. Ackerman: St. Bernards, Great Danes, Newfoundlands, Russian wolfhounds, greyhounds, Scottish terriers, all toys and unclassified specials. S. Christensen: Pointers, English setters, Irish water spaniels, field spaniels. Nathaniel Thayer Messer: Airedales, bull, fox and Irish terriers. Merrit Robinson: French bulldogs and Boston terriers. Miss Louise Hering: Cocker spaniels. Edmund J. Attridge: Collies and all breeds not assigned to other judges.

Veterinarian—A. J. Rydberg, D. V. S.

Show superintendent—T. J. Blight.

Entries close Monday, May 21.

Lou Samish, San Francisco angler, is out with a suggestion that the Coast streams be closed for trout fishing for a year in order to let the fish attain larger proportions. There has been consistent complaint over the small trout but the situation will likely be remedied next season when the bars are let down on April 1.

Sportsmen's Row

C. V. Allen is telling his friends in Tacoma of the 17-inch cutthroat trout he caught in American Lake. The fish was hooked with a No. 8 hook and it took fifteen minutes to land him. The trout weighed 11¾ pounds and is said to be one of the largest ever caught in American Lake.

✣ ✣ ✣

The Alameda Elks' Gun Club has two more shooters that will bear watching. Al Durney is the proud daddy of an eight-pound boy and Charley Linderman has a husky youngster himself. Both declare that they can distinctly hear the familiar "P-o-o-o-o-l-l" any of these summer nights.

✣ ✣ ✣

Inasmuch as the Vernon club's shoot is the first of a series of three taking place on the coast, trapshooters from all parts began shooting Sunday. Among the visitors were Dr. Jack Martin and wife from Fresno, Willam E. Mullen and C. L. Smith of Ray, Ariz.; Andy Flickinger of Vallejo, and Nelson Dunn of San Diego.

✣ ✣ ✣

F. J. McHenry, manager of the Hotel Montgomery, San Jose, Cal., invites visitors to the Interstate Association's twelfth Pacific Coast Handicap Trapshooting Tournament to make this popular hostelry their headquarters. The Montgomery is one of California's best hotels and is on a direct car line to the Gun Club grounds.

✣ ✣ ✣

Les Reid, the crack northwest professional, was a visitor in San Francisco last week on his way to the California-Nevada shoot. Just to show that he is in form to give the Californians a tussle, Les went over to the Alameda traps and broke 152 straight, a record run. He is looking in fine health and his many friends in this neck of the woods were glad to see him.

✣ ✣ ✣

Sheriff Charles J. Taylor and a number of Los Angeles sportsmen have returned from a fishing trip to Arroyo La Cruz. In the party were C. S. Browne, traveling freight and passenger agent of the Salt Lake at Los Angeles; W. L. Dixon of Dixon & Griswold, Los Angeles; M. F. Wright and Clifford Taylor. The six brought back 300 fish. They said they could have brought back more if the limit had been higher.

✣ ✣ ✣

Harry Wright, a deputy game warden, will be careful who he takes into custody for fishing without a license. Mr. Wright, with three trout as evidence, took Otto Martin, an insurance agent, to Sawtelle. Mr. Martin said he had a fishing license, but had left it home. On the way to Sawtelle, the insurance agent talked the game warden into taking out a life insurance policy. When the two men and the trout arrived at Mr. Martin's home the license was produced.

✣ ✣ ✣

Remington UMC Notes.—At the Vernon Gun Club tournament held at Los Angeles, Cal., May 13 to 15, many phenomenal scores were made by shooters using the Remington UMC winning combination.

F. H. Mellus was high amateur with a splendid score of 591x600, using a Remington UMC pump gun.

O. A. Evans and A. Flickinger tied for second amateur average with a score of 583x600. Mr. Evans using a Remington pump gun and Nitro Club shells and Mr. Flickinger using Remington UMC Arrow shells.

R. C. Reed won high professional average with a score of 593x600, with a Remington UMC pump gun and Nitro Club shells. Mr. Reed also made the following long runs: 96, 135, 97, 156, 98, 69.

R. C. Reed also made the high score at Coalinga.

✣ ✣ ✣

"The A. A. T. A. Fifty"—Wednesday, May 30, has been officially selected as "A. A. T. A. Day" at the Pacific Coast handicap to be held over the traps of the San Jose Gun Club, May 28, 29 and 30. On this day, through the courtesy of the Interstate Association, the first fifty targets of the regular program will constitute a special event to be known as "The A. A. T. A. Fifty." To the trophies donated by the Interstate Association and the San Jose Gun Club for the regular program, the A. A. T. A. will contribute a number of sterling silver trophies to be awarded to the A. A. T. A. members who are high guns in the "A. A. T. A. Fifty." These trophies will be awarded for the highest net scores, the number of places depending on the number of entries. One trophy will be supplied by the A. A. T. A. for every twelve members competing in the event. The trophies will be the official A. A. T. A. solid sterling silver teaspoons, each one embossed with the seal of the association and engraved with the winner's name and score.

In the event of ties the scores made on the second fifty targets of the regular program will be counted for the shoot-off. Every member of the A. A. T. A. will be given an "entrance tag" and this is to be worn throughout the shoot. The trophies will be on exhibition on the grounds. There will be no entrance fee required of the members competing in "The A. A. T. A. Fifty." "The A. A. T. A. Fifty" will also be a part of the program of the Western and Eastern handicaps and the Grand American handicap.

F. H. MELLUS WINS VERNON SHOOT.

Andy Flickinger Second With Great Record; Dick Reed Tops the Professionals.

F. H. Mellus won the annual registered shoot and the Interstate Association trophy at the Vernon Gun Club by coming through Wednesday with a score of 197x200 and a total of 591x600 for the three days. But his performance, while praiseworthy in itself, was completely overshadowed by the terrifice battle waged for second place honors between A. Flickinger and O. A. Evans.

Flickinger won the shoot-off, but only after a bitter fight in which a national record for consecutive smashes in a shoot-off was shattered. The winner broke 199x200 against Evans' 198x200. Flickinger's unfinished run of 177 sets a new mark for this form of shooting. Evans also made a run of 160 straight breaks.

Dick Reed continued to hold his two-day lead over the other professionals entered, finishing with the best competitive mark of the tourney, 593x600. Les Reid was next on the pro list with 584x600, Mitchell third with 582x600 and Joslyn and Cook fourth and fifth respectively with marks of 578x600 and 572x600 to their credit.

That old war horse of the traps, Heine Pfirrmann, annexed third place in the amateur ranking with 582x600 cracked, smashed and otherwise demolished tarhawks on his list. S. W. Trout captured the fourth prize, 577x600. L. M. Packard with 573x600 was fifth and J. E. Dodds romped into the last of the prize money with 572x600 smashed. The summary:

E. L. Mitchell 189, total 582; F. H. Mellus 197, 591; H. Pfirrmann 194, 582; H. W. Cline 183, 553; G. E. Holohan 184, 562.

C. E. Groat 110x120; J. A. Cook 190, total 571; J. L. Martin 186, 569; D. K. Mohler 185, 557; H. E. Sargent 191, 385.

R. C. Reed* 196, 593; J. C. Famechon 183, 545; C. W. Fish, 186, 562; J. E. Dodds 190, 572; W. A. Joslyn* 188, 578.

W. E. Mullen 184, total 564; G. H. Melford 184, 568; A. Flickinger 193, 583; L. M. Packard 187, 573; Mrs. C. E. Groat 180, 560.

L. H. Reid* 193, 584; Tom Wilkes 184, 568; S. W. Trout 185, 577; S. A. Bruner 189, 571; Bob Bole 180, 557.

Owen Council 178, total 552; V. A. Rossbach, 175, 542; P. Long 95x100; C. H. Betz 170, 530; P. Peterson 178, 535.

G. E. Oliver 170, total 489; O. A. Evans 192, 582; F. D. Grewell 183, 551; J. R. Arneill 185x200, S. H. Bungay 193x200.

A. L. Hemett 169x200, Tom Drummond 163, H. Justins 184, A. K. Julian 179, K. J. Bush 77x100.

F. Dunn 182x200, J. E. Vaughn 180, W. H. Wilshire 184. (*Professionals.)

High run—A. Flinckinger, 177 unfinished; O. A. Evans, 160; S. H. Bungay 129.

First Day.

Some shooting! Two of the most remarkable trapshooting scores ever made in Western shooting circles were achieved Sunday at the Vernon Gun Club when the first block of 200 targets in the three-day contest of the second annual registered tournament of the Vernon Gun Club was held. The highest score of the day was 199 breaks out of the double century of birds, hung up by R. C. (Dick) Reed, a professional from the Remington UMC Company. The other remarkable score was punched out by "General" Frank H. Mellus, most noted of local blue rock busters. High amateur honors of the day were plastered on his chest, for his score was 197x200.

Squad 4, composed of William E. Mullen of Ray, Ariz.; C. L. Smith, also of Ray, Ariz.; W. A. Cornelius, the shooting Federal officer; Dr. L. M. Packard and Mrs. C. E. Groat, champion woman shot of the country, made a perfect score in the fourth event. Each broke 20 targets, making a total of 100. This kind of shooting is rarely seen.

The high run of the day was made by "Dick" Reed. It topped 135 straight. Reed contended in Saturday's practice shoot, and out of the 300 birds fired at he dropped only 3, breaking 297x300.

J. W. Mitchell and Sam W. Trout tied for the second high score, each squelching 196x200. W. A. Cornelius, Dr. L. M. Packard and Owen Evans tied for third, each with 105x200 scores.

Ed Mitchell broke second high professional with a 196x200 score. Third high professional score was tied for between W. A. Joslyn, Du Pont pro, and L. H. Reid, Peter's Cartridge Company representative. The score was 194. The results follow:

*Ed Mitchell 196, Frank H. Mellus 197, Henry Pfirrmann Jr. 191, Harry Cline 183, *Guy Holohan 189.

L. C. Forrest 189, *Al Cook 192, Dr. Jack Martin 192, E. K. Mohler 184, C. E. Groat 180.

*R. C. Reed 199, J. C. Famechon 182, C. W. Fish 189, J. F. Dodds 192, *W. A. Joslyn 194.

William E. Mullen 184, C. L. Smith 176, W. A. Cornelius 195, Dr. L. M. Packard 195, Mrs. C. E. Groat 181.

*George Oliver 161, Oven Evans 195, C. S. White 183, J. Arneill 179, W. J. Reid 186.

Charles E. Moist 177, Nelson Dunn 180, Fred Grewell 185, William Brawner 186, *John Brauer 102.

*L. H. Reid 194, Tom Wilkes 193 Sam W. Trout 196, Stanton A. Bruner 185, Bob Bole 189.

Owen Council 188, Victor A. Rossbach 181, William H. Wilshire 178, C. H. Betz 184, P. G. Peterson 176.

A. N. Van Nest 150, William Dougherty 191, P. O. Lang 182, J. W. Meek 196, George T. Cline 77x80.

A. L. Rowe 89x100, R. C. Nissen 43x60, Louis R. Mellus 112x120, William Pugh 33x40, George Melford 194x200.

Andy Flickinger 193, E. L. Sargent 77x80.

*Professionals.

Second Day.

Excellent scores continued to feature the Vernon Gun Club's registered trapshooting tournament on Tuesday, the second day. When thirty-three out of thirty-nine contestants in a shooting tourney break better than 90 per cent of the targets there is certainly some shooting being done. This was what happened at the Vernon club on Tuesday.

Six participants in the program had scores of 197x200 smashes to their credit, while one blaster had a score of 198x200 breaks.

Dick Reed, the Remington UMC professional, continued his sensational blasting by dropping only two targets out of 200, which made a total of 198 breaks. This makes Reed's score for the two days 397x400.

Frank Mellus smashed 197x200, and by doing so kept himself in the lead for amateurs for the two days. Mellus' mark is 394 for the 400 targets. Stanton Bruner came back and romped through the 200 targets in great style, dropping only three. Heine Pfirrmann also did a "come back" and broke 187x200. However, Heine is out of the running so far as winning the high amateur prize is concerned, as he broke only 191 on Sunday. Following are the scores:

*R. C. Reed 198, S. A. Bruner 197, F. H. Mellus 197, Heine Pfirrmann 197, Andy Flickinger 197, *Ed Mitchell 197, *L. H. Reid 197, O. A. Evans 196, W. E. Mullen 196, *W. A. Joslyn 196, H. E. Sargent 194, S. W. Trout 193, Tom Wilkes 191, L. M. Packard 191, Dr. J. L. Martin 191, W. M. Brawner 191, George Melford 190, J. F. Dodds 190, *Guy Holohan 189, *J. A. Cook 189, E. K. Mohler 188, Bob Bole 188, H. W. Cline 187, C. W. Fish 187, V. A. Rossbach 186, Mrs. C. E. Groat 185, P. O. Long 185, C. E. Groat 184, F. D. Grewell 183, P. G. Peterson 181, J. C. Famechon 180, C. H. Betz 176, Frank Free 175, White 175, C. E. Smith 171, *G. E. Oliver 158, R. H. Bungay 97x100.

✣ ✣ ✣

S. F. Fly-Casting Club.—Scores set last Saturday and Sunday in the tournament of the San Francisco Fly Casting Club at Stow Lake were as follows:

SATURDAY'S SCORES.

FLY-CASTERS JOIN AMATEUR UNION.

National Association of Chicago Working to Keep Sport a Pastime.

Editor, Breeder and Sportsman:—

For a number of years there has been a very determined and energetic movement among the amateur bait and fly casters of this country to establish a standard of amateur sportsmanship worthy of the name. A standard so really amateur, so tenable in principle, so genuinely sportsmanlike, it could not fail in its appeal to every man who engages in the sport solely for the pleasure and physical, mental or social benefits he derives therefrom and to whom sport is nothing more than an ovocation; which is a part of the definition of an amateur. The pioneers were sturdy, and the cause so pregnant with possibilities for the betterment of the game, they persevered in their efforts until the comparatively little known sport of tournament casting is becoming recognized as the most scientific of all sports. This campaign of education and advancement was inaugurated and carried on by the National Amateur Casting Association, until November, 1916, when the crowning achievement of their splendidly successful campaign culminated in their allegiance with that most colossal of all amateur bodies—the Amateur Athletic Union of the United States. Articles one to eight of this alliance are as follows:

1. The Amateur Athletic Union of the United States and the National Amateur Casting Association mutually recognize each other as the sole governing bodies of athletics and casting in America.

(Continued on page 11.)

(Continued from page 10)

II. It is further agreed that the National Amateur Casting Association and its allied bodies do hereby recognize the Amateur Athletic Union of the United States as the sole controlling body over athletic sports in America, and further agree to recognize the decisions, rulings, disqualifications and suspensions of the Amateur Athletic Union.

III. The Amateur Athletic Union of the United States and its allied bodies do hereby recognize the National Amateur Casting Association and its allied bodies as having sole control over tournament casting throughout America, and further agree to recognize the decisions, rulings, suspensions and disqualifications of the National Amateur Casting Association.

IV. All members of the clubs of the Amateur Athletic Union, or registered athletes of the Associations of the Amateur Athletic Union, entering competitions of the National Amateur Casting Association, shall be governed by the rules of the National Amateur Casting Association, and members of the National Amateur Casting Association competing in Amateur Athletic Union games shall be governed by the rules of the Amateur Athletic Union.

V. The Amateur Athletic Union further agrees that all casting championships and casting competitions of any character open or closed, shall be held under the rules of the National Amateur Casting Association.

VI. Each party of this alliance shall respect and enforce all penalties of suspension or disqualification inflicted by the other.

VII. At all meetings of the Amateur Athletic Union the National Amateur Casting Association shall be entitled to representation by not more than four delegates, or duly elected alternates of such delegates, having, collectively, one vote.

VIII. From among these delegates one shall be chosen to become a member of the Board of Governors of the Amateur Athletic Union, who shall have vote, voice and privilege equal to the other members of the said Board upon all matters coming before it.

From among the membership of the N. A. C. A., the following have been elected to represent them at the next annual meeting of the A. A. U.: Delegates—Dr. C. F. Brown, Dr. C. O. Dorchester, Mr. L. E. De Garmo and Dr. H. J. Morlan. Alternates—Messrs. G. H. Jones, H. W. Hutchins, C. R. Bowie and C. A. Vandersyde. Dr. Halford J. Morlan, president of the N. A. C. A., has been elected as a member of the Board of Governors of the A. A. U.

Anyone who is an amateur, according to the constitution, rules and regulations of the N. A. C. A., may become a member by signing an application blank furnished by the association, having the same approved by the Board of Directors and paying one dollar to the treasurer as an initiation fee. The N. A. C. A.'s definition of an amateur caster is as follows: "Anyone who engages in the sport solely for the pleasure and physical, mental or social benefits he derives therefrom and to whom the sport is nothing more than an avocation. Anyone who has not been, for at least one year, is not and does not intend to be, in any way, financially interested in the manufacture for sale or engaged in any way whatsoever in the sale for profit of any class or kind of fishing or tournament tackle—or employed by any firm, corporation or individual that manufactures any class or kind of tournament or fishing tackle; or employed as a paid guide; or connected with any exhibition casting for pay, either directly or indirectly; or engaged in the teaching of casting for pay; or engaged in the use of angling or tournament equipment for pay; or guilty of any such unsportsmanlike conduct as that of selling any game fishes caught by him, or any trophy he may have won." The spirit of this definition being to eliminate all manner of commercialism from tournament casting and place the association firmly upon the foundation of true amateur sportsmanship.

Casting clubs are encouraged to affiliate with the N. A. C. A., and may do so on payment of twenty-five cents per capita of their membership and providing each club incorporate in its constitution the above definition of an amateur and restrict its membership strictly to amateurs as so defined, and further provided that their club members have the same voting power as individual members.

The association holds an annual tournament and plays the most practical of some twenty games from which it has to select. Special attention is called to rule No. 13 which reads: "Any member who ceases to be an amateur by knowingly competing with a professional, or who sells, pawns or barters a trophy, or competes for money, cannot be reinstated as an amateur."

The records of the members of the N. A. C. A. are the only amateurs records that will be recognized by the A. A. U. throughout America; and only members of the N. A. C. A. will be permitted to represent America in the great Olympic Games.

The officers of the N. A. C. A. are: Dr. H. J. Morian, 30 N. Michigan Boulevard, Chicago, Ill., president; W. O. Holton, vice-president; F. E. Moffett, 225 E. Illinois St., Chicago, Ill., secretary; J. E. Amann, treasurer; Dr. C. F. Brown, Dr. C. J. Spruce and Dr. C. O. Dorchester, directors.

The time and place of the annual tournament has not yet been definitely decided, but it will be held some time during September.

DR. H. J. MORLAN,
Chicago, Ill. President.

BETTER LIVE STOCK
and Agricultural Topics

Homer F. Preston, Tulsa, Okla., has purchased from W. S. Corsa, Whitehall, Ill., a son and a daughter of Carnot.

✣ ✣ ✣

It has been estimated that 30,000 dairy animals have been purchased in California by Arizona parties during the past ten months.

✣ ✣ ✣

Six Hundred Million Dollars.

The statement made at the recent agricultural conference at St. Louis that the poultry products of the United States could be doubled within a year means that if everybody in a position to help did their part six hundred million dollars' worth of food would be added to our supply this year.

✣ ✣ ✣

C. E. Leonard & Son, Ravenswood Farm, Bunceton, Mo., report the sale of a roan September son of Wood Dale Stamp at $2,000 to the Rio Grande Ranch, North Muskogee, Okla., owned by Gillespie & Sons. The dam of this calf is a sister to the dam of Americus. Mr. Hartnett, manager of the Gillespie herd, personally selected the calf, and because of his promise and bloodlines instructed that he be named North Americus.

✣ ✣ ✣

Pigs Pot-Bellied on Alfalfa.

Pigs become pot-bellied when they run on alfalfa alone, is the experience of J. L. Cramer of Tulare county, also Harry Chamberlin of Sutter county. Mr. Cramer has 55 pigs 60 to 140 pounds that run on alfalfa and get 20 pounds of corn twice a day, to keep them from eating too much alfalfa and to strengthen their frames. He expects to increase the grain ration materially for two weeks before putting them into the fattening pen about June 15. Then he can market them before stubble hogs come in.

✣ ✣ ✣

At the last meeting of the Duroc-Jersey Swine Breeders' Association of Stanislaus county, held at Modesto, a talk was given by C. H. Connor, County Farm Advisor, on the "Food Values of Farm By-Products." He showed how by utilizing the waste products, such as sweet potato culls, canteloupes, pumpkins, fruit, etc., we can cheapen our hog ration and increase pork production at a good profit. He showed how the skim milk which is being sold to casein factories at 18 to 20 cents per cwt., if fed to hogs would displace grain to the value of 40 to 60 cents.

✣ ✣ ✣

R. H. Whitten, of the Whitten Ranch, breeders of big-type Poland-China hogs, has sold more than $35,000 in pure bred hogs. Mr. Whitten, who is secretary of the California Poland-China Breeders' Association, has one of the greatest pure bred swine nurseries in the country. It is located in Tulare county. His slogan is "The Greatest Weight in the Shortest Time at the Lowest Cost and the Most Profit." He has placed pure-bred boars and sows on many Western ranches through his business-like methods. His herd is noted for the combination of breeding and individuality in his foundation stock.

✣ ✣ ✣

He Swears by Winter Dairying.

A North Dakota dairyman gives these reasons in support of his belief that winter dairying is more profitable than the practice of drying off cows in the fall and roughing them through the winter:

"Cows that freshen in the fall will produce more milk during the year than those freshening in spring, and the largest production comes when prices are highest and labor the cheapest.

"The drying-off period comes in the late summer when other work is most urgent, flies are the worst, and the pasture the shortest.

"On many farms cows can be milked during the winter without any extra labor, whereas help is required when the heaviest flow is during the summer."

✣ ✣ ✣

SUMMARY OF STEER FEEDING TRIAL.

[Missouri Experiment Station.]

The University of Missouri marketed five lots of two-year-old steers in Chicago on May 8th, which marks the completion of a 130-day feeding test conducted during the past winter. The object of the test was to study the possibility of fattening cattle by the extensive use of corn silage without the addition of corn in the ration. In addition, the value and relative value of cottonseed meal and old process linseed oil meal, when used in rations consisting largely of silage, was studied. This is the second of two tests conducted during two different years on this subject. The cattle used were grade Shorthorn steers which cost $8.25 per hundred pounds on the Kansas City market in December. Their cost in the feed lots at the beginning of the test was $8.45 per hundred pounds, and their average weight 917 pounds.

SPOKANE INTERSTATE FAIR.

A new record for early entries in the Northwest has been established on the receipt by the Spokane Interstate Fair and Live Stock Show of entries from Mr. Julius M. Fisk, of the Fisk Farm, Spring Valley, Washington, which were received at the office of the Fair on May 3d. Mr. Fisk entered 18 head of sheep and four head of horses, and his check for the required stall and pen rent accompanied his letter.

Increased interest in the success of the live stock show held in connection with the Spokane Interstate Fair this year has been greatly stimulated by the holding of a Live Stock Conference in Spokane in February, and also by the highly successful Shorthorn Show and sale recently held at the Union Stock Yards.

To deepen and hold the interest of the stock men, the Fair management has been issuing monthly bulletins entitled "Personal Talks With Stock Men." These bulletins contain information relative to matters pertaining to the Live Stock Department of the Fair and deal with special subjects which are of vital interest to the breeder. The May bulletin, which has just been mailed to 350 live stock breeders of the Northwest, contains a special treatment of the subject of conservation of breeding females. In addition to the regular monthly bulletin for May, there has also been issued a table prepared by Prof. Wm. Hislop, Animal Husbandman of the Experiment Station at Pullman, Washington, giving the scale of weight for age in standard breeds of live stock. The table is the result of careful observations and will undoubtedly prove a great source of benefit to the breeder.

The Spokane Interstate Fair and Live Stock Show is practically sure of not only the largest, but the most excellent live stock exhibition that has been held. The week of September 3 to 8 will undoubtedly show a gathering of pure bred stock whose equals cannot be found at any other point in the Northwest. Inquiries are being received daily relative to the Show and a number of letters now on file contain definite assurance from individuals and stock farms that they will be at the show. Among those who have already signified their intention of making entry are the following:

Shorthorns—Jas. M. McCroskey & Sons, Fishtrap; Alex Morrison, Valley, Wash.; Day & Rothrock, Spokane; Joe Turner, Meyers Falls, Wash.

Herefords—Washington State College, Pullman, Washington.

Holsteins—John L. Smith, Spokane; Munroe Company, Spokane; C. F. Williams, Hillyard.

Jerseys—T. S. Griffith, Waikiki Farm; Chas. M. Talmadge, Newport, Wash.; R. E. Logan, Stevensville, Mont.

Swine—A. H. Poston & Sons, R. D. 1, Spokane; R. H. Gray, Post Falls, Idaho; Chas. Talmadge, Newport, Wash.; W. O. Morrow, Independence, Oregon; R. E. Logan, Stevensville, Montana.

Sheep—Fisk Farm ,Spring Valley, Wash.; Butterfield Live Stock Co., Weiser, Idaho; Wm. W. Niven, Manhattan, Montana.

Horses—Fisk Farm, Spring Valley, Wash.; Richard Allman, Coulee City, Wash.; Leloss Perry, Clarkston, Wash.; B. F. Richardson, Wilbur, Wash.; L. Galbraith, Independence, Oregon.

The country is still crowding yearlings on the market and few are falling into feeder hands. Most of them have had a little corn and packers can use the product. As a result of this deluge the yearling market has lost its stride, 25@50c fluctuations weekly being the rule. Measured by values of weighty steers it is a bargain sale, thousands going over the scales at $9.50@10.50 per cwt., including a considerable percentage of breedy heifers. Yearlings do not usually reach the stock yards in considerable numbers until June and the run of that month is picked unripe. Present liquidation is due wholly to the advancing feed bill and every improvement in market conditions fetches in another run.

✣ ✣ ✣

C. T. Thompson of Inyo county, California, reports purchase of Pilot Defender, Duroc boar, from McKee Brothers of Versailles, Kentucky. Pilot Defender was sired by Defender, a boar that was grand champion at the International Livestock Exposition held at Chicago in 1909 and 1910. Mr. Thompson has also another excellent Duroc boar in California Keen, recently purchased from the University Farm at Davis.

✣ ✣ ✣

A. B. Humphrey of Grapewild Farms, Escalon, Cal., reports the sale of a Berkshire boar and sow to L. K. Smith and H. W. Rice of Hawaii; the boar, Fashion Longfellow 30th, to Miller & Lux; a boar and sow to Loma Rica Ranch, Grass Valley; a granddaughter of Grand Leader 2nd to Arlington Smith of Visalia; a boar to Mr. McDermott, Maxwell; six boars to H. L. Bates, Holt; a bred gilt to D. N. Gilmore, Stockton; a boar to A. A. McCoy of Dixon; and a Grand Leader 2nd boar to Homer Hewins of Calistoga.

THE FARM

Dairy Dollars in California.

[On account of her remarkable progress in dairy production, based partly on abundant green feed, and partly on account of the superior stock introduced, Stanislaus has become the recognized dairy stock market of California.]

Is California a good dairy country? It is. And is there a good market? There is. In 1910 the butter production in the state, considering creamery butter alone, was 46,000,000 pounds, and in 1916 it had increased to about 70,000,000 pounds, with never an interruption in the upward progress. San Francisco has become the leading market on the coast for dairy products, shipping as far north, south and west as the waters of the Pacific extend.

Of the total product of 70,000,000 pounds (in round numbers), the San Joaquin Valley produces over one-third. And in the San Joaquin Valley Stanislaus stands pre-eminent as a butter producer, with a product, in 1916, of 10,850,161 pounds, per report of the state dairy commission. Besides butter, there was 480,000 pounds of full-milk cheese, 9,600,000 pounds of buttermilk and 536,000 pounds of condensed milk. Figuring these at 32.06 cents for butter, sixteen cents for cheese, one cent for buttermilk, and fifteen cents for condensed milk, we get a total of $3,731,466 for the county's revenue for the dairy.

This does not complete the account for, added to the dairy income, should be included calves produced, say, one million dollars; and a large proportion of the value of the hog and poultry products, raised in connection with the dairy. Yet more: there is the continued improvement of the land as a direct result of the dairy and the alfalfa. Thousands of acres in the irrigation districts of Stanislaus county were poor sandy tracts valued at $15 an acre, or less, before dairying began to be the leading industry of the region, and the value of these same lands is now about $250, on a conservative estimate.

I am giving Stanislaus as an example of the dairy industry for the entire San Joaquin Valley, as I have discussed Fresno county as a shining example of the fruit industry. On account of her remarkable progress in dairy production, based partly on abundant green feed, and partly on account of the superior dairy stock introduced, Stanislaus has become the recognized dairy stock market of California, as Wisconsin has come to be recognized as the dairy cattle market of the Middle West. Hundreds of auctions are held in the county every summer and fall, and the sales have been estimated to total $250,000 or more. The dairymen and breeders of thoroughbred stock immediately turn the money over in the importation of more fancy stock, some of which is personally selected in the island of Jersey and in Schleswig-Holstein, or was before the war.

Between 45,000 and 50,000 dairy cows and somewhere about 150,000 acres of irrigated alfalfa, is the tally of Stanislaus county. This is not guess work, but the tally of the irrigation districts. For example, the two districts of Modesto and Turlock alone, in 1914 (I have not the details at hand for 1916), had exactly 111,941 acres of irrigated alfalfa—1,000 miles of emerald green! And there are the Oakdale, Waterford, Newman and Patterson districts additional, for which I have not the exact data.

This brings us to a consideration of the subject of irrigation districts. "Can I not do farming, and keep cows, without going to the trouble of irrigation?" is a question sometimes asked by the eastern farmer. In a way, a very poor way, yes. But it may be noted that, while there is some ranch butter made, it "cuts no ice" in the general calculation, and, similarly, the dry-land farmer cuts but a small figure in the general production. When the land was all in grain, or the greater part of it, it had a valuation, as I have said, of about $15 an acre. Much of it, in pasture, was valued at $2 or $3 an acre. The difference between that and the present value of several hundred dollars an acre, is simply water, not as we say of the stock market, but the water that literally means wealth.

Irrigation financing is really a very simple matter, and is expressed in the simple word: co-operation. The irrigation districts, as distinct from the corporation, are organized and are financed by the people and for the people, and, supported by taxation on land values alone, have furnished a model for the entire country, and for foreign lands also. Commissioners from distant South Africa, Australia and South America, have visited and carefully examined the working of the system, carrying back encouraging reports of its success.

Speaking of the advantages of diversified and intensive farming, as demonstrated in the irrigation districts of Stanislaus county, Superior Judge Fulkerth says: "In no part of California is this better demonstrated than in the Modesto and Turlock irrigation districts in Stanislaus county, in the central and most fertile part of the San Joaquin Valley. These districts are quasi-public corporations, with boards of directors having similar powers and performing similar duties, within certain defined limits, as boards of supervisors of counties. . . . The initial cost of the system was financed by long-term bonds voted by the people, the same as county or school bonds, and the bonded indebtedness at present is small as compared with the selling value of the land. The running expenses and interest is provided for by a yearly levy, collected in the same manner as county taxes, and payable in semi-annual installments. The bonds run twenty and forty years, and after retirement the only expense will be for the maintenance or the extension of the works. There are no 'water rights' separate from the land, as there is in privately controlled systems."

Oh, yes, there is room for some things beside alfalfa. There is a big tonnage of sweet potatoes, cantaloupes, egyptian corn, milo-maize, etc. Beans have been found very profitable in the past two years, on old alfalfa land. There are a couple of hundred thousand acres of grain, and 8,000 or 10,000 acres of fruit and vines. Live stock and poultry products total something over $2,000,000. Stanislaus does not claim to be the richest county of the valley, either. There are others.—[The Earth.

HOG RAISING OUTSIDE OF THE CORN BELT.

The imperative need for an abundant food supply this year demands an increase in pork production. All the agricultural authorities unite in declaring that the live stock holdings of farmers already are too low and that they must not be reduced further in order to obtain greater yields of staple crops. Fortunately this is not necessary. Hog raising can be extended in many sections of the country where it is now of little importance and the total supply of human food increased accordingly.

At the present time a large part of our pork comes from the few States in the corn belt, where it is the common belief that hog raisers possess advantages that farmers in other sections lack. This, however, is not altogether true. The South, the East, and the extreme West possess advantages of their own and there is no reason why the industry should not be developed extensively in those regions.

In the extreme West the alfalfa of the irrigated valleys and the clover of the coast districts furnish a good foundation for successful pork production. In most of these regions there is an abundance of small grain, particularly barley, that may often be fed economically, and corn is successful in some localities.

Hitherto, where corn has been cheap and abundant, it has been used so extensively for feeding to hogs that there is a widespread notion that it is the best feed. Investigations, however ,have shown that it has its disadvantages as well as its advantages. When it is the exclusive grain feed, breeding stock are not as prolific as on a varied ration, and for fattening purposes an exclusive corn diet is not generally profitable. The hog is naturally a heavy and promiscuous eater. He thrives best where pastures are plentiful and grain crops, nuts, or roots are most abundant. He must have water at all times, and shelter in winter. If these conditions are met, hog raising can be made profitable outside of the corn belt as well as in it.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

TUESDAY, SEPTEMBER 11th.

5. 2:24 Class Trot $1,000
6. 2:08 Class Pace $1,000

WEDNESDAY, SEPTEMBER 12th.

7. 2:20 Class Pace $1,000
8. State Fair Futurity No. 6, 3 year old Trotters, Guaranteed $2,600....(Closed)

THURSDAY, SEPTEMBER 13th.

9. Governor's Stake — 2:12 Class Trot..... $1,500
10. Free-for-All Pace $1,000

FRIDAY, SEPTEMBER 14th.

11. Stanford-Occident Stake No. 1, 3 year old Pacers, Guaranteed $2,000 (Closed)
12. 2:16 Class Trot $1,000

SATURDAY, SEPTEMBER 15th.

13. 2:11 Class Pace $1,000
14. 2:10 Class Trot $1,000

Entrance and payments on these stakes will be due and payable as follows: 3% June 15th, 1% August 1st, and 1% on or before five o'clock the night before the race. Two or more running races each day.

GENERAL CONDITIONS.

ALL RACES THREE HEAATS — Money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 15th, 1917.

All purse races 5% to enter and 5% from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and three starters.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry, also if for any unforseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice, and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Member National Trotting Association.

Address all communications to the Secretary.

SLACKER, OR PATRIOT?

The mare owner who fails to breed his mare this year is a Slacker!

More and more the demand for "better horses" is becoming noticeable. Along with the proclamations and appeals to the farmer-stockmen of the country for more and better live stock; for the increased acreage of food stuff and forage, are the warnings sent out from every market of the depletion of better horses. Every breed of horses is now filling a special place in the services of his country, and as in olden days, the repeated story of The Horse: First in war, first in peace," etc., is again being sung from the housetops.

The war demand of the last three years has made large drafts on our horse crop; however, in the thousands that have gone "to the front," they were only a small proportion of our best. Some have been good riddance and saved a vast amount of feed which would of necessity have been fed to them and which has been fed to the better horses left on the farms of our breeders.

The manufacturers of farm tractors, etc., have had the assistance of millions of unthinking people in their claims that the horse must go. Now, however, the people are beginning to think; and even the cartoonist, who has found a great field in portraying the "horseless age," is turning back, and most every day, one finds King Horse leading the procession of preparedness in public thinking.

It is true, because of the vast advertising they have received through boosting the tractor, that many agricultural papers have ceased to mention the advisability of breeding horses. Now, the tide has changed. They want cheaper and better farm labor. Greater use of horse power is highly necessary for a more economic crop production.

Poor horses cost just as much to feed, take just as much time to foal and are only one-third the value to the farm or any other use to which they are put. It is a matter of patriotism now that every mare should be bred. Would one think of planting seed on an acre of fertile land at this time, or for that matter, at any time, which one knew would not produce a crop worth harvesting? No! However, well-thinking mare owners are letting good mares go unbred; some are breeding them to the $10 crossroads stud horse, rather than pay a little more service fee and get the seed that will insure a greater yield. "As you sow, so shall you reap" is an old adage, but true, and it applies to horse breeding much the same as to any other crop.

Investigations show that horses of better class are now selling for more money than they did in former years; they further show that the horse of better breeding is harder to find than ever and these same investigators tell us the country needs horse power.

No matter what type you are breeding, cross them to the best of the same breed; we have no use for mongrels. Our total supply of horses is inadequate at this time and there is no telling how hard it will be to replace them as they go. A mare bred now means a horse of full age and ready to serve the county in any capacity five years hence; when there will be the most notable demand for GOOD HORSES Americans have ever seen. The following statements, made by the leading agricultural authorities, further bear us out in this prediction.

THE FUTURE OF THE HORSE.

[What America's Leading Authorities Have to Say in Percheron Review.]

By C. F. CURTISS
Director of the Iowa Experiment Station.
Dean of the Iowa College of Agriculture.

There is no more vital problem in connection with the European war than the production of an adequate supply of foodstuffs and clothing for the armies and the families at home. It is of so much importance that it is likely to be the determining factor of the war. We are facing the greatest crisis in the Nation's history with a food supply below normal. The supply from South America has been curtailed by crop failure and by a recent embargo. We are under the necessity of increasing food production in the United States in the face of a severe drain on the farms on account of enlistment and employment in munition factories. This can only be done by increasing the motive power on the farms. The farm is already the largest user of motive power in the United States. The total power used on the farms of the United States is estimated at 24,905,000 horse power as against 18,755,000 horse power in all manufacturing enterprises. Of the total horse power used on the farms, 14,230,000 is furnished by horses and mules, and 9,775,000 is mechanical power. The war has drawn heavily on the horse supply of the United States, and further demands will be made in the future. The tractors have not yet been proved to be an economical substitute for horse power on the farm. They can only partially replace horses under any circumstances. There is an exceedingly urgent need for increasing the supply of good heavy draft horses. Every good mare should be bred to the best stallion available, and the colts should have good care and liberal feed. When the war closes it is probable that the demand for horses from the United States will be even greater for a few years than it has been during the times of war."

By F. B. MUMFORD
Dean, College of Agriculture, Missouri.

The limiting factor in American agriculture now and during the continuance of the war is man labor. The problem of the American farmer will be how to increase the efficiency of man labor in order that he may produce maximum crops and produce the maximum number of animals.

One way to increase the efficiency of man labor is to increase the number of draft horses on the farm. There will be a greatly increased demand for powerful draft horses, and the farmer who has brood mares and fails to breed them to the best possible draft stallions will lose a great opportunity. The demand for horses will be greatly stimulated by the industrial activities essential to the successful prosecution of a great war. Farmers should refuse to sell breeding stock at any price. Every breeding animal in America should be bred this year.

By EUGENE DAVENPORT
Director of the Illinois Experiment Station.
Dean of the Illinois College of Agriculture.

Unfortunately experience in this and in all countries shows that the first effect of war is the enlistment of every patriotic man for active service at the front, regardless of his qualifications, to render effective service in the thousand and one things that must be done behind the lines if the nation in the end is to win.

The country is scoured for the most promising horses, regardless of their value for breeding purposes and forgetful of the fact that an indefinite supply may be needed.

In this way both food and fighting material are unnecessarily sacrificed at the very outset, and there goes with this a kind of blind faith that if supplies run short they may be imported. But from where, let me ask, can food or horses be found if the American supply fails? We are the last in the line, and except for a supply of beef that may be had from Argentina, it is up to America to keep supplies coming. We must not break down at any essential point of production, for if we do, we shall never succeed no matter how bravely the first line of defense may be held.

This country has been heavily drained of horses for European service. The farms need power as never before, and every possible effort should be made to increase the output, especially of heavier breeds of horses. This is not yet a horseless age, and no machine has yet been found—and it is doubtful if one ever will be found—to equal the horse on the typical farm of one hundred and twenty to three hundred and twenty acres. The best that may be hoped from the tractor is to supplement the horse.

However, it is not mere numbers of horses that are needed, it is good horses. It is a moral crime and it ought to be a legal offence to use mongrel stallions, especially at a time like this when every pound of grain and every bale of hay has a value not to be measured by dollars and cents.

By H. J. WATERS
President of the Kansas State Agricultural College, Manhattan, Kansas.

Any immediate increase in the number of cattle, sheep and hogs must be accompanied by a corresponding increase in the production of grain, pasturage and forage. Grain and forage production cannot be increased without horse power to do the farm work. Nearly, if not quite all the surplus horses of the United States have been exported. There never was a time when the demand for good horses with weight was as great as it is at the present time, and the price as high. For this reason every farmer who has a sound mare of breeding age, should breed her to the best draft stallion available in his community. This will insure an adequate amount of horse power for taking care of the agricultural work which is bound to increase in the future. It will also give to the American farmers a salable horse to meet the needs of European countries which are being stripped of horseflesh by the war.

STATEMENT REGARDING FIXING OF PRICES.

Washington. D. C.

In response to a letter regarding the fixing of prices of food products, the Secretary of Agriculture today (May 16), sent the following reply:

"Your letter of May 1, with enclosure, has been brought to my attention. Your correspondent expresses apprehension from the talk in the newspapers about the Government setting a price on foodstuffs. He seems to think that it is contemplated to fix a price to producers which would be so low that they could not secure a reasonable return. Of course there has been much confused writing in the papers. Only two suggestions have been made: One is that the Government be given power to fix a minimum price with a view to stimulate production. This price would be sufficiently high to insure producers against loss. It could not have the effect feared by your correspondent, because the very object would be to stimulate production by assuring sufficiently high prices to producers. The other suggestion is that the Government be given power to fix a maximum price, in extreme emergencies, to break corners or to control extortion. It is not contemplated that the Government, if it had the power to fix a maximum price, would announce the existence of such a price in reference to any one or more commodities in advance of the appearance of an acute situation; nor is it contemplated that such a price, if fixed, would be of continuing operation. The single thought in this connection is that the power might be used as a club, to be applied only in individual cases where it is clear that an individual or corporation had established a corner or was practicing extortion. The power, it is suggested, would be used against such individuals or corporations, and when that particular situation was controlled or the abuse eliminated, the incident would be closed. Any further exercise of the power would depend upon the appearance of a similar condition."

Armour Suggests "Meatless Days."

Those who have given the subject serious consideration find that the number of animals available for meat is distressingly small. It would seem that unless we raise more animals the country is likely to find its meat supply woefully lacking.

No less authority than J. Ogden Armour finds that the country has fewer beef cattle, hogs and sheep than the people are likely to need in war and immediately after in case peace is soon declared. He suggests that the people have meatless days to conserve the present supply.

It is hoped that more animals will be raised on small farms and the people will not be forced to substitute for meat since it is such an important article of diet.

Notable Angus Importation.

Edward F. Caldwell, of Missouri, has just returned from the quarantine station in Quebec, where he went to inspect the 70 Aberdeen-Angus cattle purchased for C. D. and E. F. Caldwell in Scotland. Mr. Caldwell is greatly pleased with the lot and refers to the cattle as specially desirable. They are uniform in type and quality. Most of them are of the Blackbird, Erica, Pride and Queen Mother strains. A few good bulls are included. This is one of the largest importations of Angus that have been made to this country in years and breeders will doubtless appreciate the opportunity that is presented for an infusion of fresh blood. The importation will strengthen materially the great collection now owned by C. D. and E. F. Caldwell at Burlington Junction, Mo.

Harness Horses and Horsemen

BREED YOUR MARES.

The versatility of the trotting-bred horse was never more apparent than at the present. They are being demanded for saddle horses, for farm use, for cavalry and for all-purpose farm animals. The trotter has been referred to in former years as a rich man's horse; today he is the acknowledged necessity of the poor man. The rich man's plaything, he is, more than ever, but it is freely admitted on all sides that no other animal will answer so many purposes as the trotting-bred horses of the present generation. In these days of conservation and necessity, when the utmost is demanded from man and beast, the advice of many agricultural leaders is to breed an all-purpose horse. The American trotter, as fleet as a deer, as tough as a mule and with the courage of the American that he is, must fill the bill.

Secretary W. H. Knight, of the American Trotting Association, in a letter to this office has the following comment to make regarding the breeding of trotters:

"It has been my intention for some time past to suggest to you that some active campaign of encouragement should be given to breeders and owners of mares to continue breeding them.

"I imagine that the low prices at which the trotting bred horse has been sold that was apparently not able to win has been so discouraging that many are thinking of giving up in despair, but their attention should be called to the fact that with any commodity 'the time to buy is when everyone wants to sell,' and the good time to breed is when conditions look most discouraging. Just as sure as fate horses will again come into their own and will be sought at prices that will make it remunerative to breed them.

"People have gone so crazy over gasoline propelled vehicles that they cannot see anything else in the future, but anyone who will carefully analyze the cost of motor cars, motor trucks and tractors, will find that it is so excessive that were it not for the unusual period of prosperity through which we are passing seventy per cent of the people who are now indulging in the extravagance could not afford to do so.

"I hope that every paper interested in the breeding of horses will take this question up and thoroughly illuminate it so that our breeders will not lose heart; for the wisdom of it all will surely be developed in the near future."

THE PASSING OF THE WATERING TROUGH.

Let us go to Golden Gate Park, and indulge in a few "Do you remembers?" Here is a good place to sit, opposite the road that used to lead to "Dickey's" and the "Old Bay District Track." A watering trough stood here; under what is now a stately elm, planted March 22, 1880. Captain Sam Thompson, then chief of the Park police, will tell you how he used to measure it every year. The trough was in charge of W. T. Stott, G. A. R. veteran, who also cared for the quail, and rang the bell on "Bell Tower Hill" at 7 a.m., 12 m., 1 p.m. and 6 p.m. By the way: How many of us know "Bell Tower Hill"? or know that the pea fowl nest on its slopes?

Gone is the veteran, gone is the trough, gone are horses and gone are the men whose friendly chats made this halting place so attractive. Their cheery voices rang out, generally in challenge; and the subject, HORSE: "Hello! Is that a new one?" "He's a good looker." "Come on down the road, and I'll show you something worth while"; and on they drove—chatting gaily in hantering fun, horses and driver in full sympathy. In vain we look for a familiar turnout ,or listen for a friendly "How are you?" Autos! Autos! Autos! bewildering, but so cold. No time for anything, only to "get there," to see how many miles can be covered before dinner, which may be a hundred miles distant. Park limit: ten miles an hour! Too slow! "Let's get out on the road where we can go some." I wonder if these serious-looking automobilists would ever have taken the time to plan and build our glorious Park? Would they have had the patience to make such a paradise of the once barren sand dunes? To make roads over and over again, only to have them buried in sand in a night? Does it ever occur to the present generation, enjoying the shade, that every tree and shrub, except a few scrub-oaks, have been raised in the nurseries and set out in their present positions? Do they ever think of the trouble and expense of stocking the animal pens and paddocks? or do they know that many of the beautiful attractions that we are so proud of were made possible by private donations? From out the memories of the past, let us pay tribute to those who builded so well, not only for themselves, but for coming generations. While recalling the many generosities, it may be seen that the horse was the leading inspiration.

I wonder if the automobilist gets the joy out of his hundred-and-odd miles a day, that our park builders did out of a twenty-mile constitutional, varied by an occasional brush—chats with numerous friends; comparison of horses; the putting of a new purchase through his paces; exciting the envy of other owners—and a thousand and one other delights impossible with a cold, bloodless machine.

Unconsciously to the frequent observer, horses and their riders, or drivers, impress themselves on the mind as a combination. Thus we see, looking back, Judge Shafter and "Rob Roy." By the way, "Roy" was speedy, and the Judge could not resist a brush. After repeated warnings, he was one day stopped by an officer, and out of breath sputtered: "I can't hold him." The officer replied, "I haven't heard you say 'Whoa!' yet." The Judge drove off smiling, to repeat this joke on himself. Capt. Millen Griffith with "Flying Jib" and "White Cap"; Reuben Lloyd on Queen; M. J. Burke, ex-chief of police; Solon Pattee, Joe Poheim and wife, all beautifully mounted; George A. Stokey and wife behind the roan and chestnut; Frank M. Pixley driving a pair of small white mules, loom up conspicuously. These are a few of the pictures so familiar, that the man suggested the horse, and the horse his owner.

Here is an incident illustrating this matter of combination: A wealthy citizen wished to buy a horse for his wife, so consulted a friend who was a horseman. After hearing the description of the animal desired, the friend said, "Although you have described that rara avis, a perfect horse, I think that I know of one that will fill the bill." The horse was shown and put through his paces, calling forth the remark: "He is a beauty; I'll take him." As the horse was being led back to his stall the would-be purchaser suddenly said: "Does he not belong to Mrs. ——?" naming a woman of rather shady reputation. Upon receiving an affirmative, he emphatically remarked, "That settles it; my wife can't ride that horse." While willing to concede the advantage that the automobile is to the country at large, we cannot help regretting the loss of that spirit of camaraderie shared by all true lovers of the horse.

"Lest we forget" our benefactors, while enjoying their benefactions, articles bearing on the early history of the Park, and those who made it possible, will appear, from time to time, in the columns of this paper.

BACK NUMBER.

EARLY RECORDS.

First Race Summary of 1917 Furnishes a New 2:10 Trotter and Three New California Performers.

A meeting was held over the Macon track under the auspices of the Georgia State Fair Association last week, and, judged by the report received from a reliable source, it was a regular event and the summary is given herewith because of the interest attached to it as being the first for the new year. Following are the new standard performers of 1917:

To beat 2:30¼, trotting:

Tommy Azoff, ch c (2), by Azoff—Eva Thompson, by J. J. Audubon.....(McMahon) Won
Time—2:29.

Griffden, ch c (2), by Azoff—Gladwyn, by Moko .....(McMahon) Won
Time—2:29.

Neva Azoff, ch f (2), by Azoff—May Neville, by Neville .....(McMahon) Won
Time—2:27½.

Azabele, b f (2), by Azoff—Marabella, by Walnut Hall .....(McMahon) Lost

Miss Azoff, b f (2), by Azoff—Miss Young, by Wilkes Boy .....(McMahon) Won
Time—2:24½.

Dorothy Azoff, br f (2), by Azoff—Dorothy T., by Advertiser .....(McMahon) Won
Time—2:27½.

Teddy Jay, b c (2), by Azoff—Theresa J., by Tregantle .....(McMahon) Won
Time—2:27¼.

Azie Simms, b f (2), by Azoff—Alice W. B., by Simmons .....(McMahon) Won
Time—2:29¼.

Terry Patchen, b c by Joe Patchen II—Zombro Belel, by Zombro .....(McMahon) Won
Time—2:25½.

All of these except the last named are owned by the well known Chicago and New York breeder, John R. Thompson, while Terry Patchen is the property of the Canadian breeder, R. J. MacKenzie.

In this same meeting Driver McMahon gave records of 2:15 to two four-year-olds, Dewey Volo, by Binvolo, dam Katherine Dewey, by Admiral Dewey, owned by Ed S. Cone of this city, and Doris B., by Azoff, dam by Grattan, the property of Asa Danforth, Washington, Ill. Azo J., age not given, by Azoff, dam Thersa J. by Tregantle, the property of R. W. Hunt of Chicago, took a record of 2:22.

Judged by actual performances the fastest three-year-old in Dick's stable is Adazoff, by Azoff, dam Dorothy T. (dam of Adlon 2:07¾), that took a record of 2:26½ at Libertyville, Ill., on October 5 last.

Trainer McMahon also holds the honor of starting the new 2:10 list of 1917, as he marked Belle Alcantarain 2:10 at this record meeting. This is a highly promising four-year-old mare by Sir Alcantar, dam Belle Star, by Renos Baby, and is owned by Mr. Cone. His other contributions to the new pacing list are Merry Vernon, br. f. (3), by Vernon McKinney, dam Merry Widow 2:03¾, and Carl Vernon, ch. c. (2), by the same stallion and out of Eva G. by Carlokin, their new records being 2:15¼ and 2:22¼ respectively. These youngsters are owned by R. J. MacKenzie. His other addition to the pacing list was Don Bunko, a chestnut colt by Peter O'Donna, that gained a record of 2:15½.

FRESNO COUNTY FAIR.

Setting a higher mark for the Fresno District Fair than in all former years, the directors of the association assembled last Saturday afternoon at the Chamber of Commerce headquarters for giving the impetus to plans that have for some time been in the shaping.

With the greater outlook, it was determined to make use of two large tents, giving that excess of space over the efforts of former years. These tents will be used in the housing of the machinery and auto exhibits, something quite pretentious being outlined in this direction, under the spur of interested parties.

In the cattle department, an increase in premiums was voted. For this purpose, $3450 has been appropriated, an excess of $450 over last year.

It was also decided to make use of $8000, nearly double the usual offering, in the harness and running races. This does not mean that there is to be a corresponding cut in the financial returns of the fair project, for the directors have the assurance that with the increase in purses there will naturally be an increase in the entries, thus making the returns secured pay for the increase in the purse fund.

For publicity purposes, E. A. Berg was named as advertising manager and will give his time to making known the plans and purposes of the fair association.

The general impression among the directors is for the showing of a greater interest in the plans and purposes of the annual exposition, particularly along the line of food products, their growth and conservation. From all sections come words of encouragement, with the accompanying declaration of intention of having a part in every line of exhibit.

The cattle exhibit is to be in charge of F. M. Helm and H. E. Vogel, while Fred E. Gatewood, who managed the swine exhibit last year, was given reappointment. Al McNeill and S. E. Williamson have been chosen as managers of the horse show.

The directors present Saturday included F. M. Helm, Al McNeill, H. E. Vogel, J. E. Dickinson, George L. Warlow and H. A. Goddard of Fresno; S. E. Williamson, Riverdale, George Hensley, Clovis, H. E. Dickson, Kerman, and J. A. Poytress, Easton.

POWERS OF RACING SECRETARIES.

Now that the time for advertising the conditions of California Race Meetings is at hand it seems that a word of advice to those framing the conditions for the different races is in order. Much of the confusion and dissatisfaction that has arisen on past occasions has been due to the uncertainty and prolixity of the conditions which were supposed to govern at the meetings where the differences of opinion arose.

Now that the governing associations have adopted a uniform set of rules that are mandatory, matters are vastly improved, but still some secretaries and managers seem to have an idea that they can draw up conditions of their own which will govern.

The parent associations in making the present codes mandatory leave only the following regulations to be made by the individual member in the advertisement of the meeting:

1. Amount of entrance and amount, if any, deducted from winnings.
2. Date upon which entries close and date of eligibility.
3. How many to enter and how many to start.
4. How stakes and purses are to be divided.
5. Notice of meeting is limited to dates fixed in program.
6. Permitting two or more horses owned or controlled by same person, or trained in the same stable to start in race of heats.
7. Notice as to whether events will be mile heats three in five, two in three, or on the three heat plan.

Only on these points can the association make special regulations, but as a matter of fact it is unnecessary in the case of an ordinary meeting that even all these limited subjects be touched upon, for the general rules are perfectly adequate without any change on the part of the member. In fact, the words "Rules of the National Trotting Association, of which this Society is a member, to govern" cover everything for an ordinary meeting except the amount of entrance fee and date of closing entries, and number of heats.

Directum I. to the Block.

As we are almost ready for press, President Tranter, of the Fasig-Tipton Company, came to us over the telephone, all in a flutter, to announce that the mighty stallion Directum I. had been consigned to the special sale of the company to dispose of the Curles Neck offerings on Wednesday, June 6, and would come before the auctioneer immediately preceding the Billings' stock. The announcement is one of immense importance, for it means the sale of the fastest horse by record ever disposed of at auction in the world. Directum I. holds many world's records, including one mile in the open, 1:56¾; one mile, half-mile track, in the open, 2:02¾; one-half mile, :55¾; one and one-eighth mile, 2:16¼; and one and one-sixteenth mile, 2:09¾. This consignment, together with that of Curles Neck Farm, including The Harvester 2:01 and William 1:58½, will make this sale, of one day only, the most sensational held in this country.—[Trotter and Pacer.

Thoroughbred Matters

The defeat of Old Rosebud in the Special Handicap on Derby day was a hard jolt for his host of local admirers. The crack Applegate representative showed all his old-time speed for three quarters, but thereafter he tired, and clearly indicated that he will not prove formidable to good opposition over a route. Andrew Miller did not regard Roamer as quite ready to defeat the sterling opposition he met, and was highly elated over the horse's performance. Roamer appears pounds heavier than he did last season, and will again rank with the top-notch handicap division. Roamer's race is bound to make him a dangerous quantity in the Kentucky Handicap, to be run at Douglas Park on June 2. The horse will stay in that section until after the race.

✤ ✤ ✤

Mr. Whitney regrets now that he did not name Pennant for the Metropolitan and Suburban Handicaps at Belmont Park. The Peter Pan horse, which, at Havre de Grace, seemed to be on the verge of a breakdown, is training sound again. He is not discovering the early speed which marked his performances three seasons back and last year, buthe is running from behind with great courage. He will not be seen under colors at Belmont Park, probably, but he is in the Excelsior at Jamaica and the Brooklyn at Aqueduct. His successful racing in Maryland is pleasantly surprising his owner. When James Rowe sent Pennant to Simons at Havre de Grace, he did not expect the handsome chestnut to stand through two hard races.

✤ ✤ ✤

English Thoroughbred Breeders Still Busy.

Despite the gradual curtailment of racing in England and its final suspension, the falling off in breeding race horses has not yet amounted to anything. This is shown quite convincingly by the number of Thoroughbred foals reported in 1916 to the custodians of the General Stud Book. The total last year reached 3,412 as against 3,567 in 1915 and 3,383 in 1914.

By opponents of two-year-old racing the temporary suspension of the sport may not be regarded as an unmixed evil. It will save at least one crop of foals from the ordeal of meeting the turf test at the usual age and perhaps serve to answer, when racing is resumed, the long-disputed question as to whether the starting of two-year-olds ought to be encouraged, discouraged, or forbidden.

—o—

President Now Owns a Thoroughbred.

President Wilson, taking leaves from the books of the late Lord Kitchner, who made a saddle horse of Democrat, the greatest two-year-old in Great Britain in 1899, and Major General Leonard Wood, who for years rode the Canadian Derby winner, Fort Hunter, has possessed himself of a thoroughbred mount. He is riding a son of Octagon, a heavy topped short-legged chestnut, of first-rate bone and muscular development, of the Hunter type, which was bred at the army remount station at Ft. Royal. Admiral Grayson, like the President, a Virginian and a lover of the thoroughbred, picked this mount for the Commander in Chief of the army and navy of the United States.

The President's mount is a son of the sire of Beldame. Octagon was one of the two stallions—Henry of Navarre was the other—with which August Belmont set the Government up in business as the breeder of its own army remounts. Mr. Belmont presented Octagon and Henry of Navarre to the heads of the army some six years ago, since when they have acquired 40 or 45 other thoroughbred stallions, five of which—Vestibule, Defendum, Belfry, Footprint and Merry Task—were the gifts of Mr. Belmont. The President, who has a first-rate seat and manages a horse well, rides at least three days in each week.

—o—

Baltimore, Mr., May 5.—Owners of the Bowie race track and all who get a livelihood there are "up in the air" because of the Court of Appeals' opinion in the Montgomery county race track betting case. Under this decision it is held that under the general law betting is illegal unless the track has a license granted by the Circuit Court.

Bowie has been operating without such a license because the Court has refused to grant one. So, unless a license can be obtained before the projected fall meeting there can be no betting there without subjecting the bettors to arrest and punishment by a heavy fine.

The race track people, who, by the Court of Appeals' decision, were required to go before the Court for a license for the next meet, can ask for a hearing before the full bench. Then if one judge is overruled by his associates and the betting goes on, any one interested can cause an indictment to be found. Then the Court of Appeals would be given a new opportunity to say whether or not judges can be required to pass on race track licenses.

The tracks in Anne Arundel, Baltimore and Hartford are not affected by the opinion, because each of these operate under a special act passed for their protection.

Now, with the Kentucky Derby out of the way, the turf in the Blue Grass State should settle back in the even tenor of its way until the Kentucky Handicap comes along at Douglas Park on June 2. This race, which is for three-year-olds and upward, brings together the best in the East and the West. Eastern stables which come on for the Kentucky Derby usually enter in this stake and they stick around until it is decided. Then they wend their way back to their old stamping ground. This is quite an unusual race, for in it the three-year-old is asked to meet the best of the older horses. On only one occasion has a three-year-old been successful in pulling down the prize, and that was when Luke McLuke got home in front in 1914, and he was only carrying 100 pounds on his back. The stake has been run four times and its winners have been Rudolfo, Luke McLuke, Borrow and Ed Crump. Rudolfo and Ed Crump were four-year-olds and Borrow was seven when they won the event. A three-year-old has an excellent chance of winning it this year, for there are so many high-class colts of that age out. However, he will have to meet Roamer, Star Hawk and others in the older division. The Latonia Derby will be run on June 16, so that any three-year-olds which participate in the Kentucky Handicap will have just 14 days in which to recover from the effects of that hard race.

✤ ✤ ✤

A comparative table of the foals registered for the past several years in America, England and France is quite interesting. The table follows:

	England	America	France
1913	3180	1731	1911
1914	3383	1879	1820
1915	3567	1985	1709
1916	3412	1954	——

In 1910, 2,415 foals were registered in America; in 1911, 2,403, and in 1912, 1,904, and had adverse legislation not interfered with the growth of the thoroughbred industry it would not have been out of reason to expect a list of foals registered equal to that of England by this time. In the past two or three years there have been many importations to this country; for instance, there are over two hundred imported two-year-olds in America this year, which will make the number of two-year-olds eligible for the 1917 racing over two thousand, while there were 1985 home-bred foals registered.

✤ ✤ ✤

Derby Owner Talks.

"I told Jockey Borel that if he would ride Omar Khayyam to my instructions I would give him $1500, if he should win the race, and if after the race should he lose, he felt my instructions were at fault, I would give him the $1500 anyhow. My instructions were that he should gain the inside rail as quickly as possible, and stay on the rail to the finish, no matter what might happen. He followed instructions. He won, but he came home limping, his mount was three times into the fence. He had his riding trousers torn and the flesh on his left leg was bruised, but he won."

✤ ✤ ✤

Col. Milton Young, one of the directors of the Thoroughbred Horse Association, who suggested the giving of more races for three-year-olds at all distances, is naturally highly gratified at the success with which the adoption of this idea has met during the Lexington meeting here. There were eight races for horses of this age given by the Kentucky Association in the first five days' racing, all filled well and afforded splendid contests. It will undoubtedly add much to the attractiveness of the programs of other racing associations to incorporate in them more races for three-year-olds exclusively, and the result at Lexington demonstrates that this can be successfully done.

✤ ✤ ✤

Jefferson Livingston promised Secretary Sam C. Nuckols, of the State Racing Commission, the gift of a stallion for the Kentucky Breeding Bureau next fall, for service next spring. He did not name the horse, but made it certain that he will donate one from his stable. Livingston is very enthusiastic about this country's having good cavalry remounts. He declared that Governor Stanley's address in presenting the cup to him Saturday afternoon had impressed him more firmly with the duty of every owner of thoroughbred horses ih tne matter of helping the Government with its remount problems.

✤ ✤ ✤

John E. Madden's "War Bit."

John E. Madden, Hamburg Place, whose big string of thoroughbreds are at Belmont Park, preparing for the opening of the season, is doing his war bit down in Kentucky. Mr. Madden has put 1,000 acres under cultivation, as his contribution to defeat famine and high prices

But Mr. Madden will do more. His son Edward, just turned 21, had enlisted, and he has offered his services himself. He said that just as soon as he reduces his stable, he will endeavor to join the colors, and those who know Madden best know that he usually accomplishes what he desires.

With the recent purchase from the Estate of J. B. Haggin, Mr. Madden has most extensive holdings in Kentucky, and the devotion of 1,000 acres of his valuable grazing land to cultivation is of material importance in the general campaign to increase the farming of foodstuffs in the country.—[New York Telegraph.

The Preakness Stake, the blue ribbon event of the annual spring meeting of the Maryland Jockey Club, was run off at Pimlico on May 12th and was won by E. R. Bradley's Kalitan. With E. Haynes up Kalitan stepped the mile and a furlong in 1:54 2-5 and in surprisingly easy fashion defeated a field of the best three-year-olds now in training. Kalitan is a California horse, and was foaled at Comstock and Lawrance's ranch at Lincoln, Placer county. He was sired by Rey Hindoo from Dally, a producing dam now owned by E. Cebrian of San Jose.

✤ ✤ ✤

New York, May 9.—Dr. Carter, superintendent of the Rancocas Stock Farm, New Jersey, reports the death of the old stallion, Locohatchee, at the age of twenty-eight years. Locohatchee was bought by the late Pierre Lorillard in his early career. His first registered name was Curt Gunn, which Mr. Lorillard changed, naming the horse after a river in Florida, over which he hunted and fished.

Locohatchee was a good race horse, and his offspring achieved many successes, notably Caiman, which proved a worthy attendant to the great English horse Flying Fox in both the Two Thousand Guineas and the St. Leger, running second in both classics to one of the greatest English horses ever foaled. Caiman raced in England as a two-year-old, winning the Middle Park Plate and two other stakes. When a three-year-old he took part in eight races, winning six and in the remaining two finished second to Flying Fox as related.

As a four-year-old, Caiman picked up 128 pounds at Lingfield and ran a mile in 1:33 1-5, according to the English records. This record stands today, though it was established seventeen years ago.

In speaking of the achievements of American horses here and abroad, W. H. Rowe intimated that foreign horses would have to show some smart performances here to approach the records and victories of American horses abroad.

"American horses have shown many times that they are nearly the equal of some of the highest class horses in Europe," said Mr. Rowe. "Caiman's two seconds to Flying Fox was an exceptionally good showing. Then look over Parole's doings and Wallenstein, both of which carried the Lorillard colors. After these comes Foxhall, winner of the Cambridgeshire and Cesarewitch, a double feat rarely accomplished.

"Foxhall was universally pronounced by English critics an exceptional horse. We sent Iroquois, too, to Europe, and he won the Epsom Derby in 1881. When all these horses and their records are carefully perused, I think our horses abroad have done far better than foreign horses have done here so far. There is no telling what the latter might do later on, but up to the present Americans have it.

"Many good horses of foreign blood are here now. There are Hourless, Star Hawk, North Star III. and others that may develop, but when we look at the mind pictures of Caiman, Iroquois, Parole, Foxhall, Wallenstein and others, it kind o' puts a broad smile on the face of the American breeder."

✤ ✤ ✤

The Stewards last week issued a ruling barring from the turf C. R. Anderson and R. Holcomb, the former the owner of the horse Mars Cassidy and the latter the trainer. Mars Cassidy died Wednesday morning and an investigation by the officials followed. The horse started in the seventh race Tuesday and when he went in to the post he appeared like a wild horse. He ran a disgraceful race, finishing last beaten off. The ruling is as follows:

"C. R. Anderson, owner, and R. Holcomb, trainer, are ruled off the turf under the provisions of rule 202, Kentucky Racing Commission. Should the owner decide to make a bona fide sale of the horse Bars and Stars to anyone in good standing he can do so."

Veterinarians worked until far into the night with Mars Cassidy, but to no avail. He was a useful horse during his racing career, having a number of stakes and handicaps to his credit, and his most recent good race was when he beat Chalmers on the previous Saturday.

✤ ✤ ✤

Paris, May 7.—Chantilly today resumed its position as the chief training center for thoroughbred race horses when races were re-inaugurated, without attendance by the public and without betting, with the object of determining the best products of the various breeding farms for breeding purposes.

The changes through which Chantilly had passed during the war were noticeable. For the past three years it has been within the war zone, and one of the chief centers of the operations, General Joffre and his staff having had their headquarters there facing the abandoned race course. The entire locality has been given over to military operations and the civic population variously withdrawn. The shift of operations to other points and the removal of general headquarters now permit of Chantilly resuming its position.

The first feature race, which was run today, was won by the American horse, Sandy Hook, owned by F. R. Hitchcock of New York. Baron Rothschild's Pinardo was second.

✤ ✤ ✤

Probably held back by pride, many refused to take advantage of the free admission that was granted to the infield on Kentucky Derby day, and that enclosure held but a scant two or three thousand, while five times that many might have watched the race.

Western Breeder Riled at Lillard's Action.

Breeder and Sportsman:

As President of the Pacific Coast Gaited Saddle Horse Association, I feel it my duty to take notice of a letter bearing date, March 21, 1917, written by Mr. R. H. Lillard in his official capacity of Secretary of the American Saddle Horse Breeders' Association to Mr. Chas. W. Paine, Secretary of the California State Fair. I quote from this letter as follows:

"Dear Sir:

"Beg to advise that the American Saddle Horse Breeders' Association will be pleased to devote to the California State Fair 1917 a $100 trophy for registered stallion or mare three years old or under, provided the California State Fair requires registration in all Saddle classes for stallion and mares, that is, that no stallion or mare not registered in the Saddle Horse register be eligible to compete in saddle classes.

"If the California State Fair will accept trophy, under conditions above-named, same will be donated for above-named class."

What does this mean? It is nothing short of an offer of a bribe consisting of a cup of the alleged value of $100 to cut recognition by the State Fair of the Pacific Coast Gaited Saddle Horse Association.

I dislike newspaper controversies, but I certainly would be a slacker to allow such palpable attempt to obliterate our association.

The Pacific Coast Gaited Saddle Horse Association is alone responsible for the manifest interest now taken in show horses in California. What is the evidence? Within my own knowledge I am able to state that for thirty-five or more years prior to our organization the California State Fair gave annually only one $20 saddle horse premium. Immediately after the organization of our association, through its efforts the State Fair began to offer more and larger premiums, increasing each year, until now one of the leading and most interesting features of the State Fair is the horse show.

The very first Saddle Horse futurity exhibited under saddle in any country was under the auspices of the Pacific association, and I do not hesitate to say, that had it not been for the efforts of our association, there would have been no saddle horses from the East shown at the P.-P. I. E. It was through the interest in an advertisement by the Pacific Coast Gaited Saddle Horse futurity exhibited at the P.-P. I. E. that made the saddle horse show possible in San Francisco in 1915.

Our association has done more for the American Association in California, than the American Association has done for itself. As a remuneration for what we have done for this general interest it is sought to exterminate our association.

I will not charge the American Association, as such, with this design, but some of its misguided officers are guilty of the charge. The breeders of the State of Missouri have on several occasions in the past charged Kentucky with managing the American Association in the interest of Kentucky breeders and against the interest of other communities. Of this charge I have no evidence at hand. Indeed, I have nothing against Kentucky. While I am not a native of that great state, I have always felt a peculiar pride in it, as it is Kentucky blood alone that courses my veins, my father and mother both having been born in the Blue Grass region of that state.

And while I have never been a disturber of the peace of any one, and grow more mellow as I approximate the allotted three score and ten, nevertheless my Kentucky blood quickens to fighting heat when occasion demands. Such an occasion seems to have arisen, when the Secretary of a sister association comes to our very door and offers a cheap trophy as a bribe to obliterate our association.

This attempt throws light on some things that occurred at the P.-P. I. E., and likewise some things which occurred on that occasion throw light on this occasion. Each gets the reflection of the other.

Mr. Lillard, the then and now Secretary of the American Association, was in attendance at the P.-P. I. E. and the constant companion in the show ring of Mr. Railey, the official Judge. When the yearling saddle colts were called into the ring, nine colts showed up, among them my colt "California's Best." As the Judge was looking them over Mr. Lillard came up to me where I was standing in the ring and inquired of me whether my colt was registered in the American Association, stating at the same time that his number would indicate that he was not. I replied that he was registered in the Pacific, but not in the American. Mr. Lillard then replied "that the colt was not eligible to show." I answered that "He certainly was" and called his attention to a rule covering the showing which he had overlooked. Before speaking to me he had spoken of the matter to the P.-P. I. E. Assistant Secretary who was in the ring. This Assistant Secretary came up to us at this moment and the rule was shown him and it was determined that the colt was eligible. Mr. Lillard then started off to his accustomed place beside Judge Railey. I called to him and said, "Mr. Lillard, you should not call this matter to the attention of the Judge, it is no part of his business." I then kept watch on Mr. Lillard and he did not then speak to the Judge. The award was made and "California's Best" was placed second, Mr. R. A. Long's colt being placed first. This was on Thursday. On Saturday morning the same nine colts were again shown in a futurity class with one additional colt, and Judge Railey still acting as Judge placed "California's Best" sixth. I made no comment, until after the work of Judge Railey was finished as Judge at the P.-P. I. E. After his work was completed I casually met. Mr Lillard, and the following conversation occurred:

I said: "Mr. Lillard, I would like to have one thing explained. We live out on this far Western border and do not have the opportunity of learning matters touching saddle horses that those of your locality have. These exhibitions are for the purpose of teaching those who may be interested. We come here with open minds and are desirous of learning. Will you please explain to me how in a ring of nine yearling colts shown to halter, a colt is placed second, and one day intervening later with the same colts and only one additional one he is placed sixth? I can understand how such a thing might be done in a performance class, but not with yearling colts at halter."

Mr. Lillard replied, "Is that so?" I answered that it was the case. He then examined his record which he had been keeping and admitted that my statement was correct and replied, "I can not explain." I said to him, "Mr. Railey is coming, I will ask him." Mr. Railey came up and I put the matter to him in the same way I had done to Mr. Lillard. The reply of Mr. Railey was, "Perhaps they showed differently." I replied, "Yes, I believe that is true to some extent. The colt you placed second the first day was in that show led along close to the rail and acted somewhat frightened, while the second day, when you placed him sixth, he made a perfect show." He attempted no further explanation and walked away.

What is the conclusion to be drawn from the above statement? In reaching a conclusion we can only do so by the preponderance of the evidence.

FACTS.

1. We find that Mr. Lillard in the mistaken interest of the American Association is willing to bribe the California State Fair to practically destroy what he deems a competitor of the American Association, but which in fact is not a competitor but an ally.

2. We find Mr. Lillard at the P.-P. I. E., representing his Association, constantly in the ring by the side of Judge Railey and consulting with him.

3. We find Mr. Lillard making objections to the eligibility of "California's Best" to compete with American registered colts.

4. It is a well known fact that Mr. Railey, who acted as Judge, has had a lifetime experience in handling horses, young and old.

5. This man of lifetime experience on the first day's show in a field of nine colts, places "California's Best" second.

6. This man of lifetime experience at the second comes to the very door of the Association of which I am President in an attempt to destroy it, I decline to capitulate, but resent it as any other man with Kentucky blood in his veins, with an early training in Missouri, and a larger experience in California, would do.

show with the same colts and only one additional one places "California's Best" sixth.

7. These were yearlings shown to halter.

CONCLUSION.

We conclude that Mr. Lillard who, on these two occasions, first at the P.-P. I. E. and second on March 21st, 1917, in his letter to the California State Fair Secretary, is shown to have been desirous of disqualifying all animals registered in the Pacific Association, suggested to Mr. Railey before the second show that "California's Best" was not registered in the American register, and we further conclude that Mr. Railey in obedience to this suggestion changed the placing of these colts.

As against this conclusion is the possibility that Mr. Railey knows so little of horses, notwithstanding his long experience, that he could not remember anything of them over two nights.

I am not willing to believe that Mr. Railey is thus ignorant of horses. One of the above conclusions must be reached. My verdict, in favor of the first.

I have not publicly spoken of these things before this time. My policy has been, as all the California exhibitors will confirm, to take my medicine at shows, whatever it may be, without making a kick. But when the representative of a sister Association has the record of being the only animal to defeat Don Castano in California, prior to the P.-P. I. E. At Fresno in her three-year-old form she was awarded the sweepstake in a class of eight, six of which were Eastern bred horses, including Don Castano.

And let me say, by way of digression, that "California's Best" is now a three-year-old gelding, and, while I will not say he can defeat any three-year-old in Kentucky, I will say that he is able to put up a formidable competition with the best.

It is true that under the present existing rules of the American Association, he can not be registered in the American register, because of his trotting bred crosses, but his breeding even in strictly saddle horse lines is much superior to a thousand of those registered in the American register. Many of the very best show horses registered in the American Association have as much or more trotting blood than has "California's Best." The great sire Peavine 85 was a standard bred trotting horse and was registered in the same register under No. (503). His sire, Rattler, is registered in the same register under No. (501). The great show horses Bourbon Chief, Montgomery Chief, and many others of renown have close up crosses of trotting blood.

I have just examined the first sixty entries in the American register and find among them ten stallions having close up registered standard bred ancestors. Some of them are registered themselves in the standard register, others are sired by standard registered horses, some have dams sired by registered standard bred horses, and some have such great grandsires, etc.

I call your attention to the following register numbers in the first volume of the American Saddle Horse register. Ten stallions represented by them come within the statement last above made, to-wit: numbers 14, 18, 19, 25, 32, 36, 37, 38, 46 and 52.

Do not understand that I am finding fault with the American register. That association has accomplished a great and good work, and I bid them God's speed. I am the owner of a stallion and a number of mares registered therein. But I do demand that the officers of the American Association keep their hands out of our pie; if not, we will try to have the pie red hot.

Yours truly,
(Signed) E. A. BRIDGFORD.

San Francisco, May 18, 1917.

WORLD'S CHAMPIONSHIP STAKE.

The proposed World's championship stake for saddle horses is attracting the attention of horse lovers in every section of the counttry. One would only have to glance over the hundreds of letters which have been received in regard to the stake to realize how popular the shows for five-gaited saddle horses have become. From breeders, exhibitors, owners and just plain lovers of saddle horses letters commending the idea have assured the writer the stake, if filled, will be the greatest event which has ever occurred in the history of saddle horse affairs.

This stake will attract the attention of the publishers of magazines, metropolitan papers, agricultural papers and citizens everywhere who heretofore have not learned the true import the saddle horse plays in America. It will prove most convincingly that the horseless age is truly a figment of imagination. It will create interest in the breed, in riding and in the exhibitions. The saddle horse, America's true product, will be brought before the American people as no other breed ever has through this stake for the World's title and the $10,000 purse.

In a wire to the writer, Commissioner of Agriculture Cohen announces another donation of $200 to our rapidly filling list of liberal donations: "I have a blind friend who believes a ten thousand dollar stake for champion five-gaited saddle horses at the Kentucky State Fair, September ten to fifteen, as outlined in my recent proposition to you, would prove an eye-opener and for that reason authorizes me to pledge you $200."

✚ ✚ ✚

Mongrels in War Service.

One of the most interesting letters brought to the attention of Thoroughbred breeders in many years is the following communication from Major-General Leonard Wood to August Belmont, regarding the incendiary destruction of the grandstand at Belmont Park: "My dear Mr. Belmont: I regret exceedingly to learn of the destruction of the buildings at Belmont Park. I fear this may tend to still further interfere with the development of the horse in which we were both interested (I refer to the Thoroughbred of the right type). I hope the Park buildings will be reconstructed promptly. There never was a time in the history of the country when we were more in need of the right kind of horse for military purposes than at present. If you had seen the horses we bought last summer you would have realized that breeding was a lost art among the general run of our farmers and stock raisers, at least they have lost touch with Thoroughbred blood and gone daft on draft strains. The horses which we got for the cavalry and field artillery were most of them mongrels and would have given poor service in war. Sincerely your, Leonard Wood.—April 10, 1917."

Dr. E. W. Berg, of Minneapolis, Minn., has sold recently many high class saddle horses in that city. They were selected by Dr. Berg in Missouri, where he is a regular buyer.

[Additional Saddle Horse News on page 11.]

Notes and News

The orientals have this saying: "One should be slow to buy a chestnut horse, and still slower to sell one that has proved to be a good one." Apply this to horses of every color and we have one of the safest rules ever thought out.

✤ ✤ ✤

Railey Macey has added to his stable recently a yearling brown colt and a two-year-old bay filly, full brother and sister, by Manrico and out of the good race mare Helen Stiles 2:06¼, that defeated the stallion Anvil in straight heats in a Grand Circuit race over the Detroit track in 1912, driven by W. G. Durfee, of Los Angeles, Cal., who now owns the dam and both colts.

✤ ✤ ✤

"Veterinary Experience."

A valuable book by the late Dr. A. S. Tuttle, founder of the great establishment which manufactures that valuable veterinary remedy, Tuttle's Elixir, which is of great value to horsemen, especially just before the opening of the racing season, has recently been issued and will be mailed free to any address by request to Tuttle's Elixir Company, 19 Beverly St., Boston, Mass.

✤ ✤ ✤

Rags 2:09¼, the trotter from the Pacific Slope now in Geo. McCrea's barn, is one of the biggest, heaviest trotters ever seen on a track. He looks as big as Jay McGregor did when he was racing. In spite of his size he has good action, especially plenty of hock action, and goes along as smoothly and easily as any trotter. Durfee, who made him, always thought he was one of the best trotters he ever had until he was taken sick. His record, taken from the year book, shows he was a good race horse and, when he gets into shape, he will be a hard horse to beat. Nothing seems to bother him at all. He goes along perfectly contented and at whatever rate of speed McCrea wants him to go.

✤ ✤ ✤

Bakersfield, May 22.—Mrs. Jennie D. Kerr, aged 72 years, relict of the late Charles Kerr, veteran horseman, died in Bakersfield Sunday night. Her husband, who died in 1907, was the breeder of many famous horses and stallions at the old Antrim stock farm on the Kern Island road. Kerr had charge of many of the horses of the late James B. Haggin, multi-millionaire, whose widow is a large owner of the stock of the Kern County Land Company. Mrs. Jennie Kerr was a resident of Bakersfield for nearly forty years. She is survived by the following children: Mrs. W. G. Sylvester, William Kerr and Mrs. D. D. Hill of Bakersfield.

✤ ✤ ✤

At Sacramento Wednesday Senator Slater and Senator Rush, the latter of Solano and Napa counties, called upon Governor Stephens and among other things urged His Excellency to sign the appropriation bill which provides financial assistance for counties holding fairs. The Governor will sign the bill if it does not develop that finances will not permit. The Governor stated that he hoped nothing would prevent his being able to sign the measure. "It is only a question of finances now," said he. Agricultural organizations any many stock breeders are very desirous of having the bill approved. A number of Chambers of Commerce and Granges have endorsed the bill and it would be a good idea for the Governor to be apprised of this fact by letter.

✤ ✤ ✤

One of the most wonderful trotting stallions seen on the harness turf in 1916 was the handsome Zomrect 2:03¾ by Zombro 2:11, dam Lilly S. (trial 2:16), by Direct 2:05¾, raced by the Indianapolis reinsman Alonzo McDonald. Zomrect is known among harness horsemen as "The Miracle Horse," his early history having been the cause of much comment. He was bred on the Kleinmayer ranch, near the little village of Covina, in the beautiful San Gabriel valley of California, and was one of a band of 28 stallions that ran wild on the ranch. He never felt the restraint of man until he became four years old, and the following year he trotted in 2:19¾, and as a six-year-old he trotted a trial mile at Lexington, Ky., in 2:03¾. Many critics regard him as a future candidate for the two-minute list.

✤ ✤ ✤

RACES AT STADIUM ARE POSTPONED UNTIL WEEK FROM SUNDAY.

At a meeting of the San Francisco-California Driving Club Wednesday night the opening of the matinee season at the Park Stadium was postponed from Sunday (tomorrow) until the following week. This action was taken to permit the members to go to Woodland this Sunday and engage in the big meet arranged by Charley Silva for the Red Cross. Officers nominated a couple of weeks ago were elected, as follows:

A. Ottinger, president; J. C. Welsh, vice-president; Fred Lauterwasser, Sr., treasurer; W. J. Kenney, secretary; J. M. Kidd, Joe McTigue, Luke Marisch, Dave West and Fred Coltere, directors; J. J. Ryan, starter.

SYDNEY SHOW.

Don Pronto Gets Championship.

The retirement of Mr. Playfair's champion, Ribbonwood, from competition for trotting stallions at the Sydney Show did not cause any increase in the entries of stallions, and as there were a dozen, the number of competitors just equaled those of last year. The parade was of good class, and the Grose Vale (Richmond) breeder, Mr. Richard Skuthorp, who officiated, awarded the blue ribbon and championship to the imported horse Don Pronto, bred in America, and who is by Director General from Silurian, by Wilton, and who has an American record of 2:02, unhoppled. He is a shapely black horse, true to type, and is the property of Mr. R. C. Simpson, of Armidale, New England, and this was his first appearance in the show ring. He has had two seasons at the stud at Windsor, stands 15 hands 1 inch, was foaled in 1907, and has never had straps put on him.—[Amsterdam Trotting Record.

✤ ✤ ✤

The three-gaited saddle mare Madam X, formerly a member of the stable of the successful exhibitor, but now owned by H. K. Devereux, President of the Grand Circuit and one of the members of the Pastime Stable, the owners of the champion stallion, Lee Axworthy 1:58¼, the champion three-year-old filly, Volga (3) 2:04½, and other fast trotters, is now in foal to Mr. Devereux's fast stallion John A. McKerron 2:04½, the former wagon champion. The prospective foal should be a good one as John A. McKerron is a good looking horse and sires good individuals. His son Jack McKerron 2:07¼ in particular was a good looking horse, one of the best that has raced in the Grand Circuit in many years. Mr. Devereux will breed her the coming season to Guided by Love, the famous son of King Lee Rose, just now in the limelight as the sire of Golden Firefly.

The track record for the season for trotters was set the past week at 2:24 by the three-year-old brown colt, Leonard (2) 2:11½. This was done over the half-mile track before the mile track had been completed for working and was a most creditable performance. The colt is a member of the stable of Herman S. Crossman and is being trained by Henry Williams, who allowed the colt to come along the last quarter in 33 seconds. He is a brother to Dr. Elmore (1) 2:24¾ that sold for $4.200 as a yearling last fall in New York.—[Jesse Shuff.

✤ ✤ ✤

Mare Mule Adopts Standard Bred Foal.

The mule has been the object of much criticism. However, the famed hybrid is developing into the smartest of all animals and is fast becoming regarded as such. There is seldom a week passes that one in gleaning the exchanges does not find some freak story of the mule turning the table on man; in fact, giving his master the "horse laugh." Mules have been known to pull stunts which create the keenest admiration for their intellect, and now comes one of the Breeder and Sportsman's best friends, Al J. Boyle, of Tacoma, Wash., with this: "About the prettiest foal that ever saw the light of day in the state of Washington, arrived at my farm last Saturday from Roselle Moon, out of May Moon; a chestnut filly with four white feet, style, action and class enough to make any mare proud to be its mother. There was a mare mule in the pasture where the colt was foaled and when the boys arrived on the scene of its birth Sunday morning they found the mule with the foal, which was trying to nurse its adopted mother—and, by the way, she was perfectly willing. The boys thought all they had to do was to go in and get the baby trotter, but they had another 'thought' coming; its new mother refused and went for the men every time they approached.

"Finally they phoned me to come out. After knocking some bark off the boys and tearing things up in general, we got possession of the future 'race hoss,' but it positively refused to take notice of its royally bred mother, displaying great disappointment in being separated from the hybrid which had adopted it soon after its birth. The mule by this time was about to tear up the place. Don't you know, that d—— old mule nearly brayed her lungs out until Wednesday, and it was a week before we got the colt to nurse its dam. When I saw that filly nurse I was willing to buy the drinks for all of Pierce county, for she certainly is a beauty. Three other foals also by Burion have arrived."

✤ ✤ ✤

Matinee at Woodland Tomorrow.

Woodland, May 22.—To raise money for the Yolo county chapter of the Red Cross, a banner light-harness matinee will be given here Sunday to christen the new haf mile Woodland track. Jim Logan, Teddy Bear, Bondalean, Vera Hal and Bold Harry Aerolite are some of the stars that will go after thte half mile record. A 2:20 trot and 2:18 pace will round out the card arranged by Charley Silva.

An attempt to shatter the world's half mile heat pacing record will be one of the features of the race meeting. Jim Logan, Pacific Coast's fastest mile pacer, Teddy Bear, holder of the State half mile record, Vera Hal, Bondalean and Bold Harry Aerolite are all being primed for the special event through which Charles F. Silva expects to make history for his newly-remodeled Woodland racing plant.

Although Silva's Teddy Bear has paced the fastest heat thus far this season, Elmo Montgomery's veteran campaigner, Jim Logan, is the favorite for the big race. Jim, according to the railbird dopesters, is faster this year than he was when he established a new coast record for the mile. As both Teddy Bear and Jim are stallions, keen rivalry prevails between the Silva and Montgomery stables.

Vera Hal, Bondalean and Bold Harry Aerolite, the other entries in the free-for-all pace, can be depended upon to supply plenty of competition. Vera Hal, in particular, is a speedy mare over the half mile course and it would not create any great flurry of surprise if the San Francisco entry should show the way.

The 2:20 trot and 2:18 pace will also bring out classy fields. Ella M. R., Bold Harry Aerolite, Yoncalla and Directress Mac have been shipped from San Francisco to take part in these events.

Frank E. Wright of Sacramento will do the starting. Walter Tryon, M. C. Delano and E. J. Weldon will act as timers.

✤ ✤ ✤

ATTRACTIVE PROGRAM FOR STATE FAIR.

An unusually attractive program for the racing at the State Fair is advertised in this number of the Breeder and Sportsman. Fourteen trotting and pacing events are on the speed program with liberal purses and liberal conditions advertised by Secretary Chas. W. Paine.

Starting with Saturday, September 8, there will be one trotting and one pacing event for seven successive afternoons. In addition the State Fair directors have announced there will be two or more running races each day. Between the trotters, pacers and the "bang tails" the followers of the sport of kings will have their fill of amusement at the coming state fair.

All pacing and trotting races will be in three heats. The money will be split 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat and 25 per cent to the race, according to the rank in the summary. In each heat the winner will receive 50 per cent, seconds will receive 25 per cent, thirds 15 per cent and fourths 10 per cent.

Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat. The money will then be divided according to the rank in the summary at the termination of the fourth heat. A horse having won the first two heats, but drawn or distanced in the third heat, shall not lose its position in the summary.

Nominators have the right of entering two or more horses in any race by payment of a two per cent additional on each horse. Only one of the horses so entered may be started in the race.

The entries will positively close on June 15.

The society reserves the right to reject any or all entries and declare off or postpone any or all races because of the weather or for other reasons. All entries not declared out by 5 p. m. on the day preceding the race shall be required to start. Declarations must be in writing and made at the office of the secretary at the track.

The society reserves the right to start any heat after the fourth score, regardless of the position of the horses. The trotting and pacing program follows:

Saturday, September 8—Stanford-Occident stake No. 1, three-year-old trotters, guaranteed $3000 (closed); 2:14 class pace, Native Sons' stake, $1200.

Monday, September 10—2:08 class trot, $1000; State Fair Futurity No. 6, three-year-old pacers, guaranteed $2000 (closed).

Tuesday, September 11—2:14 class trot, $1000; 2:08 class pace, $1000.

Wednesday, September 12—2:20 class pace, $1000; State Fair Futurity No. 6, three-year-old trotters, guaranteed $2600 (closed).

Thursday, September 13—Governor's stake, 2:12 class trot, $1500; free-for-all pace, $1000.

Friday, September 14—Stanford-Occident stake No. 1, three-year-old pacers, guaranteed $2000 (closed); 2:16 class trot, $1000.

Saturday, September 15—2:11 class pace, $1000; 2:10 class trot, $1000.

Entrance and payments on these stakes will be due and payable as follows: 3 per cent on June 15, one per cent August 1 and one per cent on or before 5 o'clock the night before the race.

With the large amount of money offered for these races and considering the large number of trotters and pacers possessed of both speed and class in training this year, the State Agricultural Society should secure a large entry list for what should prove the banner meeting of the California Circuit.

✤ ✤ ✤

According to the latest and most available reports on hand, close to 650 dates have been so far claimed for trotting meetings this season, the majority being separate race meets rather than in connection with agricultural fairs, the latter being late in announcing. This means that, under favorable conditions, the Year Book for 1917 will contain more race meeting summaries than the 1,161 published for last year.

✤ ✤ ✤

On another page of this issue, The California Fair and Racing Association announces 18 weeks of continuous racing in California, with a total of $125,000 in purses and stakes to be distributed among the winners. The circuit opens at Salinas, California, July 11, and continues until the Arizona State Fair at Phoenix, which opens on November 17. Full program and classification will appear in this publication next week. Write Joseph Waddell, secretary, Manx Hotel, San Francisco, for further information and get ready for the greatest season of racing California has staged in recent years.

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Elmer E. Shaner, Manager, Pittsburgh, Pa.

May 20, 21—Seattle, Wash.—Washington State Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Secretary.

June 2, 3—Moore, Mont.—Moore Rod & Gun Club. W. N. Sharp, Secretary.

June 3—Alameda, Cal.—Alameda Elks Gun Club. F. E. Hilger ,Secretary.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July2, 3—Vancouver, B. C., Can. Vancouver Gun Club. Chas. Bowers, Secretary. "Old Policy."

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✤ ✤ ✤

Inland Empire Averages.—With the remarkable record of 266 broken bluerocks out of 275, Harry Gayhart of Kalispell won the individual championship of The Spokesman-Review's Inland Empire championship trapshooting tournament. Frank D. Stoop, also of Kalispell, was second, only one bird behind the winner, and L. E. Ovenden of Wenatchee was third. Ovenden was off to a rather poor start, but by consistent shooting worked his way almost to the top during the last half of the competition.

Gayhart shot in remarkable form all the way, never breaking less than 23 out of 25, and only twice missing more than one target.

Edward Johnson of Kellogg and George Arland of Garfield, who were tied with Gayhart during the greater part of the competition, fell down the last week or so and lost their chance for the title.

A glance at the averages will show why Kalispell won the championship, no less than seven members of the Montana club finishing with an average of 90 per cent or better.

Of those who took part in a majority of the matches 28 finished with a percentage of 90 or better, three doing better than 95. The final percentages for the 25 target programs follow:

Harry Gayhart, Kalispell, 24.2; F. D. Stoop, Kalispell, 24.1; L. E. Ovenden, Wenatchee, 23.8; G. Chiesman, Lewiston, 23.7; G. Van Horn, Sunnyside, 23.7; E. Johnson, Kellogg, 23.5; F. Steckman, Kalispell, 23.5; C. Hahn, Lewiston, 23.5; G. Arland, Garfield, 23.5; C. E. Owens, Wenatchee, 23.4; H. J. Robbins, Kalispell, 23.3; Lee Matlock, Pomeroy, 23.3; H. McElroy, Spokane, 23.2; W. J. Houser, Pomeroy, 23.2; J. M. Nurlen, Pendleton, 23.1; R. Houston, Kalispell, 23.1; L. Veldt, Kalispell, 23.1; Sebastian, Kellogg, 23; G. B. Joslyn, Palouse, 23; Fred Porter, Kellogg, 22.8; Flohr, Wallace, 22.7; A. A. Johnson, Lewiston, 22.7; O. E. Lynch, Palouse, 22.6; Lee Kimmell, Kalispell, 22.6; Tobe Arland, Garfield, 22.6; Fred Peden, Garfield, 22.5; E. J. Chingren, Spokane, 22.5; N. M. Ragan, Palouse, 22.4; G. C. Gregory, Spokane, 22.4; R. E. Thomas, Kellogg, 22.4; G. K. March, Spokane, 22.4; G. Murray, Lewiston, 22.3; G. E. Beckman, Lewiston, 22.3; M. Nicholson, Kellogg, 22.3; M. Werkheiser, Wallace, 22.3; H. Roose, Kalispell, 22.1; P. M. Lachmund, Potlatch, 22; H. Van Horn, Sunnyside, 22.4; H. J. Geesey, Spokane, 22.3; R. S. Enlo, Lewiston, 22; D. O. Farthing, Garfield, 22.1; T. B. Ware, Spokane, 21.9; Hadley, Kellogg, 21.9; Ingersoll, Kellogg, 21.9; F. E. Butler, Lewiston, 21.8; H. E. Robbin, Kalispell, 21.8; R. S. Pratt, Sunnyside 21.8; M. O. Lynch, Palouse 21.8; C. A. O'Connor, Spokane, 21.7; E. Gochnour, Sunnyside, 21.7; Turner, Wallace, 21.6; J. B. Adams, Wenatchee, 21.7; T. Scott, Wallace, 21.5; Stillman, Pendleton, 21.5; F. Robinson, Pomeroy, 21.5; D. M. Dudley, Palouse, 21.5; D. Mars, Spokane, 21.4; B. C. Mann, Spokane, 21.5; D. Cowan, Potlatch, 21.4; A. W. Lemon, Garfield, 21.3; Browne, Wenatchee 21.3; N. Wann, Kellogg, 21.3; Kennett, Kellogg, 21.3; Mrs. C. A. O'Connor, Spokane, 21.2; E. Turner, Sunnyside, 21.2; Stier, Wallace, 21; Hadley, Pomeroy, 21.1; H. J. Sawyer, Pomeroy, 21.1; C. France, Wenatchee, 21.2; Boomer, Wallace, 21; R. C. Hill, Lewiston, 21; Walker, Wallace, 21.1; Gilmore, Wallace, 21; C. M. Johnson, Wallace, 21; W. J. Stacey, Wenatchee, 20.9; R. A. Miles, Spokane, 20.8; Ebbley, Wallace, 20.8; W. Cochrane, Spokane, 20.8; A. Hoffman, Garfield, 20.7; Godsey, Pomeroy, 20.7; M. Love, Kalispell, 20.6; Coutts, Pendleton, 20.6; J. Shriver, Spokane, 20.6; Rosenbury, Potlatch, 20.6; B. F. Blosser, Spokane, 20.5; L. Drumm, Lewiston, 20.4; W. Warren. Kellogg, 20.4; C. E. Butler, Lewiston, 20.4; W. McDougall, Kellogg, 20.3; Ingram, Pendleton, 20.2; Venable, Wallace, 20.1; E. Johnson, Garfield, 20.1; R. McCornack, Spokane, 20.1; Jennings, Wallace, 20.

✤ ✤ ✤

N. W. Washington League.—Forty shooters faced the one trap with which the Everett Gun Club nicely handled the third shoot of the Northwest Washington Trapshooters' League on their grounds on May 13th. The Seattle crowd furnished the bulk of the shooters, twenty-eight of the locals going for the event.

Honors went to Dr. Kerr, of Seattle, and George Miller, of Bellingham, who tied for first with 97. In the shoot-off for the interstate trophies Kerr went first and Miller took the second.

Hugh Poston, R. S. Searle and Hi Follrich tied for second position with 95 each. In the shoot-off for third interstate prize Follrich won.

Hugh Poston shot high score among the "pros" with his 95.

The team race was the closest of any other shoot. The Green Lake Club, composed of Follrich, Kerr, Carstens, Van Vleck and Barnes, finished first with 239 points.

Bellingham, with Cooper, Kienast, Converse, Rice and Miller, with 232, second, and the Seattle Trapshooters' Association with Searle, Kinzer, McKelvey, Landwher and Fleming, third, with 226 points.

O. E. McKelvey won the handicap events with a fifty straight, taking the Everett Gun Club trophy. The scores:

E. E. Ellis 94, R. Kinzer 93, F. Landwehr 87, H. Fleming 84, J. S. Ruppe 89, W. H. Carstens 95, D. R. Baker 84, G. B. Baker 77, E. W. Kerr 97, *D. Rhodes 94, W. B. Taft 83, C. E. McKelvey 94, J. H. Davis 81, J. B. Lewis 90, C. L. Templeton 91, J. H. Hopkins 93, J. H. Templeton 86, R. S. Searle 95, Hi Follrich 95, D. Cooper 91, J. Kienast 92, J. Converse 94, E. Brackney 86, George Miller 97, *Geo. Hambright 94, A. E. Hall 72, A. B. Kidd 92, S. W. Giffin 86, L. S. Barnes 91, John Rice 93, W. P. Anderson 89, D. Reid 85, E. K. Van Vleck 94, P. H. Olwell 85, G. E. Dinkelgerber 83, C. W. Bandy 81, E. E. Sarff 90, G. R. Farr 83. (*Professionals.)

Columbia-Willamette League—

	W.	L.	Pct.	Shot at.	Broke.
Woodburn	3	1	.750	500	455
Albany	2	1	.667	375	352
La Grande	1	1	.500	375	346
Salem	2	2	.500	500	451
Astoria	2	2	.500	500	436
Pendleton	1	2	.333	375	342
Oregon City	0	2	.000	375	323

Results on May 13—

Woodburn 123, Albany 117.
Salem 118, Astoria 112.
Pendleton 117, Oregon City 115.
La Grande remaining idle.

Good scores were turned in by practically every club shooting in the Columbia-Willamette Trapshooters' Association on May 13th. The Woodburn Gun Club quintet broke all but two of the 125 birds released to it, and to date it has smashed 455 out of 500 targets in the race for The Oregonian trophies.

The closest match was between the Round-Up Club of Pendleton, and the Canemah Gun Club, of Oregon City. The Eastern Oregon trapshooters broke 117 to 115 for the paper mills town. Charles T. Parker, of Canemah, went straight, while D. C. Bowman and H. J. Stillman each broke 24 out of 25 for Pendleton high gun.

Three perfect scores were recorded over the Woodburn traps, Peter Whitney, Charley Feller and E. H. Riches being the lucky contestants.

Mark Siddall, of Salem, was the only nimrod in the tourney who made a 25 straight, although there were several 24s. He has hope of attending the Pacific Coast handicap at San Jose, Cal., May 27, 28, 29 and 30. Several other Oregonians are going to make the journey, according to present plans.

There are only three more shoots on the regular schedule for The Oregonian trophies.

SMALLNESS OF TROUT EXPLAINED.

W. H. Shebley of Fish Commission Says the Cold Weather Is to Blame.

W. H. Shebley, head of the fish culture department of the Fish and Game Commission, and his field agent, E. W. Hunt, are not puzzling like so many anglers over the alarming smallness of the trout that have been taken in the Coast streams since the opening of the season on May 1. They explain that it is perfectly natural for the fish to be small when existing conditions are taken into consideration.

"We experienced an extra drought, and with the exceedingly cold weather that has been in evidence from last November 20 to March 1, and even up to date, has given the trout but little chance to feed to attain growth," says Shebley. "It is true, too, that the larger trout undoubtedly left the small Coast streams. There is no question about the season being backward, and I am looking for the same conditions in the mountain streams. Cold weather has interfered materially with our egg collecting operations, and it has played havoc with the trout gathering their natural food and growing to some size to give the sport-loving anglers some fun."

The expert, however, looks for the sport to pick up during the coming month. With the coming of warm weather, the land insects will commence to fly, the waters will clear with a chance of making some large catches.

The angling fraternity can look forward to some good work by the Commission in stocking up the streams. Shebley announced that egg collection, which is drawing to a close, will total 20,000,000 for the season. This is the largest take on record, and means that many fry will be planted. Mount Whitney hatchery, in Inyo county, the largest in the world, will soon be in operation.

Another bit of good news is that the bills calling for the trout season to open on April 1st will be signed by Governor Stephens. They passed both houses, and Carl Westerfeld, executive officer of the Commission, was in Sacramento during the week and learned that they would be duly signed, to become a law in ninety days.

Interest in angling is certainly on the increase. Early indications point to the 115,000 licenses taken out last year being beaten. There were approximately 90,000 anglers in 1915, so that the sport is steadily picking up.

Rescuing Trout.—Deputy Fish and Game Commissioners H. I. Pritchard, C. S. Bauder and William C. Malone are detailed by Commissioner Connell to the rescue of the all but land locked trout in Bear Valley's rapidly drying creeks.

Every spring many fine fish, mostly spent trout that have spawned, are trapped in the streams that feed Bear Lake, all of which are short and soon become steep. No one without the experience would believe what these fish will fight their way through to reach the uttermost height they can wherein to deposit their eggs in the gravel beds. The lateness of the spawning season this year, which has dragged past the opening of the angling period, has given many sportsmen a look at the big fellows, among them President Paul Shoup of the Pacific Electric railway, who wrote Commissioner Connell about the number of fish he saw in the creeks.

The state board is making plans to stop the loss of fish by stranding another season. They fairly swarm into the creeks, often crowding each other out on the shallow bars. Channels change over night, and a man could keep busy on every one of the creeks day and night.

Patterson Club.—The bi-weekly shoot on May 13 brought out a small but enthusiastic lot of devotees. The card called for two 25-bird events. In the first of these the shooters were divided into classes with a trophy for high gun in each class. The trophies were won by Edwards, Class A, and Everett, Class B. The second event and five doubles closed the program. Scores in the first event were as follows, at 25 targets:

F. S. Harrison, handicap 19 yds., broke 22; W. L. Ralston 16—16, W. F. Brye 16—14, F. Everett 16—17, R. Edwards 19—23, S. Meisner 16—16, M. Knutson 17—16, H. Sesna 18—18, B. F. Bowder 18—19, F. Cox 16—20, C. Cavallo 16—19, O. J. Smith 19—21.

Among the visiting shooters was Sr. Carolus Cavallo of Valparaiso, Chile. And although Sr. Cavallo was unaware such a sport existed he broke seventy-five per cent of his targets. He left the grounds a regular shoot fan and will organize a blue rock club in Valparaiso on his return.

F. S. HARRISON, Sec'y.

Almost Drowned by Fish.—K. Kawakaki, Japanese fisherman, was fishing for catfish in the San Joaquin river Sunday and as the result of the strong line he used he almost lost his life.

The Japanese hooked something that made the line zip through the water. The line got tangled in the feet of the Japanese and he was pulled into the water. He would have drowned had not a companion rushed to the rescue and pulled him ashore.

The two Japanese fought with the big fish for an hour and finally landed it. The fish proved to be a sturgeon weighing almost 200 pounds.

Sportsmen's Row

Ovie Overall, the famous Cub baseball pitcher, is going in for the bluerock game down at his home in Visalia.

✤ ✤ ✤

All ready for the Pacific Coast Handicap at San Jose tomorrow. Shooters from all sections of the Coast will be on hand. The majority of the stars who participated in the State championship at Los Angeles will come in a special car and a number of the local gunners will add to those from the Northwest.

✤ ✤ ✤

Arthur Wilson of San Jose, Cal., recently returned from the Big Trees with one of the finest steelhead trout caught in that section this season. It was a sixteen-inch fish and a beautiful specimen. He reported fishing very good on the San Lorenzo, where he made the catch. The limit can be had in two hours, he says.

✤ ✤ ✤

Frank Troeh, who is the national trapshooting champion, was the high gun for the day at Los Angeles last Saturday. He broke 99x100 targets from the 20-yard mark and by so doing won first money as well as the diamond stick pin. Troeh certainly was shooting in rare form. He arrived just the day before from Portland.

✤ ✤ ✤

Les Reid, Peters Cartridge company pro., was the real high gun of the day during practice last Saturday. Reid blasted 100 straight targets from the 16-yard mark. He broke every one as cleanly as could possibly be done. J. A. Cook managed to smash 97x100, while L. R. Mellus was the second high amateur, with 96x100 breaks from the 18-yard mark.

✤ ✤ ✤

W. H. Price's pretty daughter had her first trial at the traps on Sunday and succeeded in breaking nine out of sixteen. The fact that Miss Price was able to handle a gun with such success is not surprising as her dad is one of the pioneers of the local trapshooting fraternity and has taught his children the advantages and joys in being able to handle firearms.

✤ ✤ ✤

At the recent annual meeting of the Oregon Field Trial Club the following officers were elected for the ensuing year: President, Dr. C. S. White; vice-president, Carl G. Liebe; secretary-treasurer, L. A. Wheeler. The club also settled on September 16 as the date for the start of the annual field trials.

Portland, Ore. L. A. WHEELER, Sec'y.

✤ ✤ ✤

The largest fish hatchery in the United States will be completed within a year at Riverside Park, Indianapolis, Ind., according to E. C. Shiraman, Indiana state fish and game commissioner. He has leased twenty-five acres of ground from the city park commission and will build ponds sufficient to produce fingerlings for stocking all the lakes and streams of the state.

✤ ✤ ✤

Bears are getting so thick in the State of Maine that four of the northern counties are trying to have legislation enacted establishing a bounty of $10 on Br'er Bruin's scalp. While the farmers may lose a few calves, pigs and sheep, they certainly don't want to see the bears exterminated. Big game is getting entirely too scarce in the country now. We don't want our kids to have to be content with hunting rabbits, do we?

✤ ✤ ✤

Following the Nevada-California state shoot at Los Angeles, May 20, 21, 22 and 23, the Pacific Coast handicap at San Jose, May 27, 28 and 29, P. J. Holohan, E. B. Morris, two Portland professionals; Hugh Poston, the San Francisco professional, and several other Portlanders, will attend the Twin Falls shoot at Twin Falls, Idaho, June 10, 11 and 12. From Twin Falls they will go to Palouse, Wash., June 16, 17 and 18, and will return for the Northwest shoot at the Portland Gun Club, June 26, 27 and 28.

✤ ✤ ✤

Crows, which are said to destroy large quantities of food crops every year, will be used this season as targets by the members of the Grays Harbor Rod and Gun Club. The loss of considerable grain and the eggs of game birds is charged to the crow, and the war of extermination is to be carried on in the interest of food conservation. The shooters will also war on the seals, which destroy large numbers of food fish.—["Conservationist," Aberdeen, Wash.

✤ ✤ ✤

R. H. Siddoway, State Fish and Game Commissioner of Utah, recently returned from Logan, where he completed an inspection of Logan Canyon, with a view to declaring the canyon a game preserve in which shooting will be prohibited, but in which angling with rod and line will be encouraged. The state fish and game department will plant 50,000 rainbow trout in the waters of the canyon and restrictions will be removed from fishing within reservoir areas, throwing the entire canyon stream open to anglers. The stream is considered ideal for fish propagation and special efforts will be made to create a fishermen's paradise there.

Green Lake Club.—In spite of the high wind Sunday three squads of scattergun artists assembled at the Green Lake Gun Club traps and an excellent day's sport was had. J. H. Hopkins finished high man with a score of 48 and others finished close up. The scores:

J. H. Hopkins 48, F. A. Martin 47, D .R. Baker 46, Dr. F. W. Giffin 45, L. S. Barnes 44, Dr. King 44, G. A. Conklin 44, Dr. J. F. Hill 44, Dr. F. W. Case 43, C. B. Fitzgerald 42, E. Chantrell 40, G. Baker 38,

✤ ✤ ✤

The Vivisection bill introduced by Assemblyman Prendergast of San Francisco, and which passed the assembly, was killed in committee in the senate. Great praise is due Mrs. Walter E. Manchester, vice-president of the Anti-Vivisection Society, for her devotion of time and money to defeat this bill. It is said that petitions, having in all over 100,000 names, were presented against the bill, besides a stream of letters and telegrams averaging 2,000 daily while the bill has been under consideration—and all against this bill.

✤ ✤ ✤

Golden Gate Club.—A number of shooters turned out on Sunday for practice at the Alameda traps. Mrs. George Thomas sprung a pleasant surprise in breaking 14 out of 22 in her first time at the traps. Other scores furnished by manager Pete Ashcroft were as follows:

Al Durney 133x150, R. D. Hart 95x125, Dr. McGettigan 128x140, J. Brickell 142x175, Webber 149x200, Vesper 169x225, J. A. Tillman 42x50, George W. Thomas 66x75, Waldie 32x50, Pop Merrill 62x75, Chichester 43x50, Dr. Hamlin 32x50, W. Smith 61x75, W. H. Price 69x75.

✤ ✤ ✤

SPORTING — —TWO ... ...

Tacoma Club.—A. Z. Smith scored a win on the Majestic Cafe trophy at the regular shoot of the Tacoma Gun Club held at Manitou on May 13th. The shooters competed under the Dupont handicap system. About 16 shooters faced the traps. Al Riehl turned in a perfect card. He is a professional. The scores:

D. H. Bales, handicap added, 2, total 45; Mrs. Bales 14—47, Mrs. E. E. Young 15—35, M. A. Howe 16—35, A. Z. Smith 9—50, E. E. Young 41, H. O. Scofield 6—47, E. R. Wheeler 46, Dr. Cameron 16—46, Homer King 4—46, C. Humphrey 3—43, E. Blanchard 11—48.

Portland Club.—Members of the Portland Gun Club are getting in condition for the twelfth annual Pacific Coast handicap and on May 13th nineteen nimrods were breaking the bluerocks over the Everding Park traps. High gun resulted in a tie between Henry R. Everding, secretary-treasurer of the Portland club, and F. B. Morris, professional, each with a mark of 91 cut of 100. Morris and Everding are the only two who shot at the full 100. Following are the scores:

Henry R. Everding 91, John G. Clemson 26x50, *H. H. Ricklefson 67x75, Dr. Otis Akin 26x50, *E. B. Morris 48x75, H. A. Pollock 11x15, E. H. Keller 69x75, W. A. Leith 44x50, J. G. Kamm 40x50, A. L. Estes 38x50, Charles R. Frazier 51x75, F. Friedlander 55x75, H. B. Newland 54x75, W. R. Howe 17x25, J. C. Morris 65x75, M. Turner 38x50, W. J. Derthick 37x50, F. C. Griffin 26x50.

✤ ✤ ✤

'Don'ts' For Anglers.—Don't begin fishing until a half hour after sunrise, which was 5:13 o'clock May 1st.

Don't fish a half an hour after sunset.

Don't fish within 500 feet of the mouth of any stream flowing into a lake.

Don't catch more than fifty trout or ten pounds of fish, or one fish weighing ten pounds or over.

Don't forget your license.

Don't refuse to show your license to any game warden o rpeace officer when requested to do so.

Don't ship more than fifty trout or trout weighing more than ten pounds in one day.

Don't ship trout without labeling it with your name and address.

Salmon are running fine at Mendota, according to reports brought to Fresno by successful fishermen. In two hours a party of six fishermen secured a two-hundred pound catch of cat, shad and salmon.

✤ ✤ ✤

Paul Lewis won the DuPont trophy at the Stockton Gun Club handicap shoot Sunday. Lewis broke 202 out of a possible 234. Melvin Leffler was second with 197 out of a possible 200. Leffler shot from scratch while Lewis had a handicap of thirty-four. Dr. S. F. Priestley was third with 189 out of 208. C. Rothenbush was fourth with 188 out of 204. Balkwill busted 186 out of 200.

✤ ✤ ✤

What the Experts Say.—Experts will tell you that it is almost impossible to shoot too far ahead of a target unless you intentionally try to do so. In other words, very few targets are missed by beginners by being "led" too much. The natural tendency is to hold too close to a target, even if they have "led" it a bit. Another reason for allowing enough lead is the fact that a load of shot does not get out to the mark in a "bunch." It comes stringing along to a certain extent, and consequently, if the "lead" has been a trifle more than necessary, the chances are that the tail end of the load wil often break the target—the buk of the shot having crossed the line ahead of it.

PREVIOUS HANDICAP WINNERS.

When the shooters gather at San Jose tomorrow for the Pacific Coast Handicap it will likely be of interest to show the previous winners with their scores. They are as follows:—

Year.		Yds.	Sc.
1905	San Francisco, Cal., G. E. Silvester	16	97
1906	Los Angeles, Cal., F. B. Mills	19	89
1907	Spokane, Wash., M. E. Hensler	18	93
1909	Seattle, Wash., John H. Noel	18	96
1910	Seattle, Wash., J. J. Law	17	97
1911	Madera, Cal., E. L. Mitchell	17	93
1912	Portland, Ore., M. M. Bull	19	93
1913	Sacramento, Cal., George E. Ellis	17	95
1914	Portland, Ore., P. H. O'Brien	19	93
1915	San Diego, Cal., H. Pfirrmann, Jr.	18	98
1916	Portland, Ore., F. Templeton	20	91

Golden Gate Club.—There were some lively doings at the monthly tournament of the Golden Gate Club at Alameda on Sunday, in spite of the fact that a number of the local shots went down to Los Angeles for the State championship. Ed Garratt turned up high gun of the field of forty with a score of 49x50. Toney Prior and Ted Handman were right behind with 48 apiece. "Onion" Jones was too strong for the professionals on the ground, topping the bunch with 47. The scores were:—

Events—	20	20	10	Total
H. A. Ray	17	16	10	43
C. A. Merrill	17	17	9	43
George Thomas	20	18	9	47
A. Gearhart	17	17	7	41

Trade Notes—With the trapshooting season hardly more than started reports of two State championships already held indicate that shooters who have placed their reliance in Remington UMC guns and shells are on a jamboree of winnings for the 1917 season of trapshooting.

J. H. Hopkins of Seattle, Wash., with a cracking good score of 97x100, won the Washington State championship last week shooting a Remington UMC pump gun and Remington UMC Uitro Club shells.

After an exciting shoot-off in which two 25 straights were made, the championship of the State of Mississippi was won by L. J. Matlock of Pascagoula, Miss., on a score of 92x100. The high professional average for the Mississippi State Tournament was made by H. G. Gibbs on a total of 480x500. H. M. Bellinger won high amateur average, 456x500. All of the winners shot Remington UMC pump guns and Remington UMC Nitro Club shells.

C .H. Newcomb won the Amateur Trapshooting Championship of America (Travers Island, N. Y.) quite recently. His score was 191x200. He used Arrow shells.

The Southern Handicap, that classic of trapshooting in the South, held at Roanoke, Va., last week, was won by Dr. L. G. Richards, Roanoke, Va., with a score of 92x100 targets shot at. T. T. Todd of Staunton, Va., tied the winner but lost out on the shoot-off.

San Mateo Elks' Club.—The newly-organized San Mateo Elks' Gun Club is keeping busy practicing up to take on some of their brother Elks at the traps. At Easton on Sunday a tourney was held. Harry Pinkham is showing up well among the novices. The scores on fifty targets were:

Houpt 32, Moore 40, Hoag 39, Doak 34, Shawhan 31, Toepke 20, Morrison 22, Pinkham 25. Others that shot were: Stark, Patterson, Wisnom, McCurdy, Manley and Mason. Frank Houpt has charge of the trap tourneys.

Frank H. Mellus Is State Trap Champion.

FRANK TROCH FINISHES HIGH FOR THE TOURNEY WITH GREAT SCORE

Los Angeles, Cal.—That grand California-Nevada trapshooting tournament is now a thing of the past. On Wednesday the three-day affair was ended and no other than Frank Mellus was crowned the Califrofnia-Nevada champion. Mellus smashed 99x100 targets despite the gloomy weather conditions and the slight drizzle that hindered some of the tarhawk smashers during the morning.

C. H. Nash, one of the grand old men of the traps, was the runner-up with a score of 98x100. Nash tied with Owen Evans and H. Lorenson with the 98 smashes, but in the shoot-off was victorious with 25 straight. Stanton Bruner, Seth Hart, Fred Grewell and Andy Flickinger all tied for third with 97x100 breaks, but in this shoot-off Flickinger was the victor, breaking 25 straight birds.

Frank Troeh also broke 99x100, but as he is from Washington the score does not count for the California-Nevada championship. Troeh had the high mark for the tourney. He broke 492x500, which is quite remarkable. Pfirrmann had second high, which was 488x500. Pfirrmann did not shoot so well Wednesday, making a score of only 96 in the title event.

W. A. Joslyn and L. H. Reid tied for high professional score in the title shoot, each having a total of 98x100 breaks. Hugh Poston was the high professional for the tournament with 489 breaks out of 500, while R .C. Reed was second.

The largest crowd that has participated in any one event of the tournament shot in the 100-bird handicap race. There was a total of ninety-nine contestants. R. N. Fuller, R. Bungay and L. Breer had the high scores, which were 95x100. There was a diamond pin up for the winner from each yardage. Sheriff John C. Cline broke 94x100 and won the pin for the 16-yard shooters, while H. McLachlan, L. Breer, Whitcomb, Bungay, Pease and Mellus were the other winners.

It was discovered that on Tuesday a world's record was broken when ninety shooters broke 92 7-10 per cent of the targets thrown. There was a total of 78,950 targets thrown during the tournament. The entry was the largest that has ever been in any state shoot and the scores were the best.

Heinie Pfirrmann proved rather "hoggish" on the California-Nevada trophies, as he won five of them. J. Weisser captured the other. Mellus, Nash, Evans, Lorenson, Flickinger and Bruner won interstate trophies.

One of the big features of the title shoot was the performance of Mrs. Groat. She broke 95x100 in the championship event. Her shooting all through the tournament has been very good. The scores and summary:

California-Nevada Score for

Shooters. Targets:	Title Event 100	Three Days 500	Special Hdcp.	Special Event 100

Practice Day, Sunday

Ninety-five contestants were out to participate on Practice day, Sunday. The scores made came up to expectations, as fifty-nine of the shooters broke 90 per cent or better of their targets in the three events which made up the day's program.

H. Lorenson of Newman annexed the high honors of the day in the 100-bird race, which was the feature of the practice day. Lorenson smashed 99x100 targets.

Heine Pfirrmann, the local pride; C. H. Julian, the one-armed shooter from San Diego; George Anderson and W. Ellert all tied for second high amateur score. Their mark was 97x100. In the shoot-off for the diamond prize Pfirrmann was victorious, beating out his opponent with a mark of 71x75 to Anderson's 70x75.

Ed Mitchell was high pro on the 100 targets. He broke ninety-eight out of the 100 targets. J. A. Cook and R. C. Reed tied for second high pro score with a total of ninety-seven smashes out of the 100 targets.

A big surprise resulted in the special fifty-bird handicap event when H. Jewett stepped out and broke fifty straight. Jewett was surprised himself, for he had never run more than twenty-five straight before. J. Arnold of Oxnard was also tied for first with 50x50 smashes, but as he was shooting for targets only his score did not count for a prize.

The closing event of the practice day was the doubles shooting at twenty-five pairs of targets. Frank Mellus and R. B. Whitman tied for the high amateur score in this event, each breaking 43x50 targets. Frank Troeh and T. W. Neel tied for second place with 42x50 breaks.

There were 155,155 targets thrown during the practice day program. Considering that in the afternoon a moderate breeze was blowing the scores made were really better than could be expected. L. H. Reid, Peters professional, had the high run of the day, which was 115. Frank Troeh had a run of eighty-six, while many other shorter runs were made.

Doubles, at Twenty-five Pairs of Targets (Optional Event): *Poston 44, Mellus 43, Whitman 43, Troeh 42, Neel 42, Wilkes 41, H. Pfirrmann 41, Milligan 40, Dr. Packard 40, Curtiss 40, *Holohan 37, Fish 39, Mohler 38, Evans 38, Anderson 38, McLachlan 37, Dr. Fuller 37, Bair 36, White 36, Arneill 31, Dr. Martin 33, Rossbach 33, H. Cline 31, Adams 31, *Oliver 31, Jewett 25.

First Day, Monday.

There were eighty-nine shooters who participated in the program on Monday, the opening day of the tourney. There were 1775 targets thrown, which makes a total of 39,000 for the two days.

Frank Troeh, hailing from Vancouver and bearing the prefix of national trapshooting champion, demonstrated his prowess as a scattergun artist. He smashed 199 out of a possible 200 targets and in doing so hung up an unfinished record of 185. Troeh missed his fourteenth bird in the initial event.

H. Lorenson, of Newman, did some more class shooting and finished the day's program with a scor of 196x200, which won him second place.

W. S. Pease, another visitor who comes from Elk Nev., won third place with 195x200 smashes. Owe Evans, who was the high man of the local tarhaw smashers, and J. Weiser of National City, tied fo third place, but in the shoot-off at twenty-five target for the diamond pin Weiser was the victor wit twenty-five straights to Evans' 22x25. Tom Wilke was the fifth low amateur with a score of 193 200. Hugh Poston was the high professional. Po ton broke 197x200. The scores:

Frank Troeh 199, *H. Poston 197, H. Lorenson 19 W. S. Pease 195, O. Evans 194, J. Weiser 194, Tor Wilkes 193, *L. H. Reid 193, R. P. DeMund 192, L. M Packard 192, H. L Milligan 177, J. Arneill 176, H. W. Cline 176, William Hartman 176, Frank Free 175, T. W. Neel 175, S Hart 174, Fred Hartman 174, William Kennedy 171 J. C. Famechon 172, C. L. Blocksback 168, N. Dunn 160, Nelson 160, C. H. Betz 159, G. Gardner 159, Mrs. C. E. Groat 188, Mrs. Pfirrmann 159.

Second Day, Tuesday.

It is generally taken for granted that, on a dark and dismal day, such as Tuesday, when the clouds hang low and the sunlight is a minus quantity, that it is a poor time to do trapshooting. However, Henry Pfirrmann Jr., better known to all as "Heinie," disproved this idea by shouldering his trusty scattergun and smashing 200 straight targets in the second day's program.

Pfirrmann did some real shooting. He blasted these 200 tarhawks into millions of pieces and not once did he falter. Not only this, but he had an unfinished run of 254.

C. H. Nash took second high honors by breaking 197x200 targets. W. S. Pease won the diamond for the third high gun. However, he was forced to shoot off with R. N. Fuller, H. Ogilvie, J. Weisser and R. B. Whitman, who all made a score of 193x200. Pease broke 79x80 in the shoot-off.

Frank Troeh and H. E. Sargent tied for fourth high in the regular event for the diamond.

Hugh Poston and R. C. Reed tied for high pro score with 195x200 smashes, while Al Cook took second high pro score with 193 breaks. The scores:

Heinie Pfirrmann 200, C. H. Nash 197, H. Ogilvie 195, W. S. Pease 195, R. N. Fuller 195, R. B. Whitman 195, J. Weisser 195, *R. C. Reed 195, Frank Troeh 194, H. E. Sargent 194, Al Cook 194, H. Lorenson 193, W. A. Cornelius 193, F. H. Mellus 193, H. P. DeMund 193, F. Bair 192, Hip Justin 192, W. J. Eilert 192, W. H. Whitcomb 192, L. M. Packard 191, A. G. Flickinger 191, G. Anderson 190, S. A. Bruner 190, J. F. Dodds 190, *W. A. Joslyn 190, J. S. Barto 190, L. W. Slocum 190, R. O. Pool 189, *G. E. Holohan 189, *E. L. Mitchell 189, N. A. Howard 189, V. Rossbach 189, J. G. Merrill 188, H. McLachlan 187, Tom Wilkes 187, C. W. Fish 187, *G. E. Oliver 187, C. H. Julian 186, F. Curtiss 186, Seth Hart 186, R. H. Bungay 186, O. A. Evans 186, J. W. Meek 186, O. Council 186, A. L. Rowe 186, W. H. Wilshire 186, G. H. Melford 185, R. P. DeMund 185, G. A. Adams 185, J. L. Martin 185, G. J. Tuckett 185, F. Hartman 185, G. Gardner 184, F. Burnham 184, E. C. Crossman 184, E. N. Bailey 183, F. M. Newbert 183, Frank Free 183, A. F. Pachmayr 183, Mrs. C. E. Groat 183, C. S. White 182, C. E. Groat 189, J. C. Famechon 180, W. E. Mullen 179, William Kennedy 179, Mrs. A. G. Wilkes 178, H. W. Cline 178, J. M. Arneill 177, W. F. Willett 177, A. J. Vaughn 177, N. W. Wickham 176, B. L. Quayle 176, R. E. Bole 175, W. Hartman 175, T. H. Neel 175, C. H. Betz 174, Mrs. H. Pfirrmann 173, T. N. Dunn 172, A. G. Wilkes 172, E. K. Mohler 171, F. D. Grewell 170, A. Hartman 170, F. S. Jasper 166, L. Hartman 146, N. W. Nelson 141, F. C. Favier 90x100, *L. H. Reid 97x100.

Remington UMC Notes—The California-Nevada State Championship was won by Frank Mellus with a score of 99x100, using a Remington UMC pump gun. Mr. C. H. Nash won the shoot-off for second place, scoring 98x100, using Remington UMC Nitro Club shells. Mr. O. A. Evans also tied for second place, 98x100, using a Remington UMC pump gun and Nitro Club shells.

BETTER LIVE STOCK
and Agricultural Topics

SELECTING THE STALLION.

One of the first considerations in the breeding of live stock is the selection of the proper sire. The influence of the sire is pre-eminent because he directly affects a greater number of offspring than does the single female. There can be no improvement or grading-up process by the use of scrub sires. Horse breeders should recognize the fact that it is not a paying proposition simply to breed mares to any stallion that may be available. A sound, purebred stallion should be used if the best results are to be obtained.

The stallion selected should conform as closely as possible to the breed and type of the mares that are to be bred. Stallions of pure breeding are, by virtue of their unmixed ancestry, possessed of greater prepotency than are grades or scrubs, and will therefore invariably impress their offspring with their breed characteristics and individual merit.

A low service fee is too often the deciding factor with many farmers and mare owners in the selection of a sire. A low service fee ought never to be a temptation but rather should be taken as a warning. A low fee is usually a sign of an inferior stallion. Colts from inferior or scrub sires will sell for much less than those sired by the sound, purebred stallion.

Sound, high-class horses are the ideal farm power, and good mares bred to purebred sires of the same breed and conformation pay good profits, not only in the colts they produce, as has been shown, but also in the labor they perform. Poor horses render poor service and often cost more to keep than they are worth. The loss in feed consumed and lack of labor performed by the inferior and scrub horses of the country is enormous. This expense can be greatly reduced if farmers and mare owners will breed their mares to the right sort of stallions and produce the kind of horses the farm requires and the market demands.

The time to begin is now. All inferior purebred colts and all grade and mongrel colts should be castrated. Only the best mares should be retained, and these bred to sound prebred sires. One of the best ways to stimulate interest in the breeding of better horses is to arrange to hold a Fall Calt Show. A string of promising colts will afford striking evidence of the result of breeding the best, and prove a splendid advertisement for the community.

Fitting Beef Calves for Local Fair Market.

The small beef breeder will usually find it best to give chief attention to young cattle, particularly calves, in exhibiting at local fairs. Special attention in training good calves will ordinarily be found profitable, regardless of prizes won. Often the exhibitor wishes to sell the calves and those which are gentle are more saleable than wild ones. H. O. Allison, of the Missouri College of Agriculture, suggests that the calves selected be about as old as the fair classification permits. Judges feel more certain of the merit of older, well-fitted specimens than of younger or under-developed ones.

It is not possible to train calves for the show ring in a few days. This work should really begin before the calf is a week old, because the sooner it is begun the more easily it will be accomplished and the less it will interfere with the gains in live weight. Calves which are to be shown should not follow their dams in pasture. It is better to keep them up and turn the cows in twice daily to be nursed. The protection of a darkened sanitary shed or barn is a great advantage during hot summer days when flies are bad. They should have access at night to a paddock with pasture.

Nothing will take the place of plenty of milk to put a calf in show form. None of the purebred calves should be weaned under eight months of age, and it is often profitable to provide milk for those intended for exhibition until they are twelve months old. Milk should be supplemented by a ration of hay and grain. Calves should have access to choice hay or pasture at all times from birth. The grain ration should begin when they are two months old. A mixture of two pounds shelled corn to one of whole oats is satisfactory. The addition of one pound old process linseed oil cake to eight pounds of corn and oats is also advantageous after the calf is six months old. Grinding the corn and oats may also be of advantage after the calf is eight to ten months old. Proper selection, careful training, an abundance of choice feed, and regularity in feeding are essential to the best results in showing calves.

The Pig.

Squeal, little pig, squeal all the day
If that's the way you feel;
It isn't very nice, and yet,
Were I a little pig I bet
I'd squeal and squeal and squeal!

"PLEADINGS."

To Whom It May Concern:

I am at present suffering from a period of undeserved unpopularity. You no longer seem to ride me or drive me as you once did.

As a Nation, you are not the horsemen that I used to know. Many of you prefer to take your daily exercise in an automobile, and seem to look down on those who by preference ride or drive me. In fact, I hear many of you say that my day is done; that the automobile and the auto truck will shortly take my place.

This of course causes me to smile audibly, but it also makes me think, and I have decided that it is time for me to give you a plain warning. There is still some doubt as to whether or not I have got to yield my place on the slippery pavements and the hot, dusty, ill-kept roads which you neglect. There is still some doubt as to whether or not my place there was only temporary while waiting for you to invent your auto-vehicles. But I am sure the automobile has taken nothing from me that I do not gladly surrender, and I am not at all afraid of him except occasionally when I meet him unexpectedly. But I am afraid for you, if you continue to disregard the warning which I am about to give.

Have you, by any chance, invented a machine which will take my place in your army? Will it jump ditches and fences or swim streams? Will it carry you safely and silently as I over the mountain trails, through forest brakes and over desert sands? Will it find its food on the desert or in the bad lands, and will it contiue to carry you when both food and water are gone? Will it warn you of the stealthy approach of your enemy, and can you turn it loose at night when you are lost and have it bring you safely to your camp? If you have such a machine in prospect, of course, I yield the point.

Some of you are apparently fond of such sports as driving, riding, polo, hunting, steeplechasing, and I enjoy them immensely myself when my driver or rider gives me half a chance. You cannot replace me in these sports because I was there when they were invented. They were made for me.

Now, then, this present temporary unpopularity of mine is going to result very badly for you, unless you head it off, because it has discouraged my former friends and promoters and I am beginning to disappear. You don't see much of me as you used to, do you? Some day you are going to want me badly and I won't be there, or such of my kind as may be available will be useless, because you won't know how to ride them.

You don't believe this, do you? It is also hard to believe, as you look at me now, that I once had five toes, but I had. However, I have not reached the dangerous stage yet. If you hurry you can revive interest in me, and very shortly you will be surprised at the results you will obtain. There is no country in the world that is more suitable to me than this. My future rests with you.—Horse Show Chronicle.

BREED YOUR SOWS NOW.

Every breedable sow should be bred to bring a fall litter. It is important that all sows be used to increase the food supply, and no sow should be carried over the summer unbred. Fall litters under commonsense management are profitable. The pigs should come in early fall— September and October—so that they may be weaned and have attained sufficient growth to shift for themselves before cold weather arrives. The earlier the pigs come in the fall the cheaper their growth will be made on available pastures and the stronger they will be to withstand the winter. The period of gestation for a sow is approximately 112 days, so that a sow bred on May 15 would farrow about September 5. This means the sows must be bred for fall litters during the months of May and June.

All sows should be bred. Scruples over breeding immature sows should be forgotten. While in normal times most hog raisers do not breed the gilts earlier than eight months of age, sows will breed as early as five to six months of age. There are thousands of young gilts farrowed last fall and winter which will take the boar and should be bred this spring. By breeding them this spring the feed given them through the summer will have been more completely devoted toward food production. It will help to produce a greater meat supply and a supply ready for market six months earlier than if they were not bred until fall. Breeding such young gilts will have no bad effects on the farm herd. Results at the Missouri Experiment Station show that the young pregnant sow continues to grow under proper feeding and that the size of the litter is not appreciably reduced. Suckling the pigs retards the growth of the young sow, but this permanent retardation of growth is small and of minor importance when the sow will produce a good litter of pigs.

Larger litters are obtained by flushing sows before breeding. This is done by feeding in such a way as to have the sows putting on weight at the time of breeding. The suckling sow should have her pigs weaned shortly before being bred. Her udder should be dried up by a reduction of feed. She should then be flushed and in a few days can usually be bred. After breeding, the sow should be watched to be sure she has caught. If she has not, 21 days later she will again show indications of heat and can again be bred.

A good pure-bred boar should be used, preferably of the same breed as the sow or of that breed which predominates the sow. This will result in a more uniform lot of pigs and an upgrading of the breeding herd. For the young gilts and small sows a breeding crate may be necessary if the boar be large.

The pregnant sow should be fed a ration consisting of bone-making and muscle-making feeds. She should gain weight but not be made fat. Pasture with a small grain ration proves excellent for carrying the pregnant sow until she is almost ready to farrow.

The Discovery of Black Squirrel 58.

The history of the famous saddle stallion, Black Squirrel, the greatest sire of all time, has recently been given wide publicity throughout the United States. Whenever one has a saddle horse to sell, if he can trace the animal back to the once noted show horse he feels that enough has been said; and that will sell the animal when all signs fail. In view of the fact that Black Squirrel was "discovered" by a Missourian, it is well timed that the discovery of the horse that has had so much to do with the advancement of saddle horses should be published. The following letter from Lan B. Morris, of the National Stock Yards, who is generally referred to as the "young Missourian who brought Squirrel to Missouri," will be of great interest just now:

"My dear Jump Cauthorn:

"I think the history of Black Squirrel is correct. I went to Kentucky to buy Artist (the horse afterward brought to Mexico by Robt. Edmonston), but I did not like him. A horse that was widely 'touted' there then, with Artist, was Mark Diamond 49, the horse Mr. Tom King, of Callaway county, bought. I went to see him and he was not what I wanted. I went to the Paris, Ky., fair, and was sitting in the grandstand with Russ Railey and Joe Stanhope waiting to see the stallion class. Jim Graves entered the ring on Black Squirrel.

"I watched him for a few moments and said I would give $1,000 for him. When I said that Mr. Railey turned to me and said: 'You can buy that curby—for $500.' 'All right,' I replied, 'if his eyes are good I will give you $1,000 for him and I don't care how much you get him for; go see if I get the horse.' After the show we followed him to the stall and Mr. Graves asked me $2,000 for him. I knew he would be in Lexington the next Monday so I returned there and waited for him. Mr. John T. Hughes knew that I wanted the horse and when Mr. Graves came to Lexington Mr. Hughes, Mr. Adams and one or two others got after Graves to sell him to me, which he did, for $1,200.

"He was to deliver Squirrel the next day; but he did not want to give him up so I had to go out to his place Wednesday, and finally got him to deliver the horse Thursday. I was in Kentucky two weeks and Black Squirrel was the only saddle stallion I saw that I wanted. When I returned to Mexico with him I told your father that I would not give him for all the saddle stallions I saw in Kentucky.

(Signed) "LAN B. MORRIS."

"May 12, 1917, National Stock Yards, Ill."

The above letter shows what Lan Morris' judgment was worth. He bought Black Squirrel against the advice of all his friends. Artist, Mark Diamond and others of that time were being widely "touted" and all turned out to be good horses, but never compared in any way with Black Squirrel 58. When Black Squirrel entered the ring in the stallion class at the Paris fair Morris knew he had found a winner and a sire; said what he would give for him and when one of the most noted horsemen in Kentucky said he could buy "that curby — for half" what he offered, Mr. Morris told him to go buy him and he would still give the thousand dollars. It showed Lan Morris was game as well as a good judge, for in those days that was a lot of money for a saddle stallion and even now, when a horse like Black Squirrel would bring $10,000, few horsemen will sit back in the grandstand and offer a cool thousand for one he has not seen before and one supposed to be "curby." Though Mr. Morris still loves horses he seldom attends a horse show or sale. He is responsible as much as any other individual for Missouri's reputation as a saddle horse state, but the above letter is the first time he has ever been known to commit himself in any way, and he probably will "call" the writer when he finds it has been published. With no bangs in front or bustles behind, Lan Morris still is one of America's best judges of anything that walks on four legs and as such he is recognized by the Campell, Reid and Western Sales Co.

Oscar Edwards & Son, of DeSota, Mo., have purchased what horsemen declare is the best gelding in Southeast Missouri. He is a big full-made 16 hand horse; black with white points and is said to even have Johnny Jones beat when it comes to air and action. The horse is registered as Black Diamond; is by Rex Denmark 2nd. 1541, sire of many good horses, formerly owned by that well known southern Missouri sportsman, M. Linn Clardy Jr., of Farmington.

THE FARM

THE FARMER ASKS A SQUARE DEAL ON PRICE REGULATION.

The idea of starting with the farmer and stock raiser on the experiment of price regulation, is not accepted as a fair one by the men engaged in these important lines of production, says the American Breeder. Everywhere that the writer as been among stock men or farmers since this idea was broached there have been vigorous protests voiced. Nobody questions the possibility of good resulting from a comprehensive system of price regulation. But to the farmer who has seen every other commodity under the sun almost, soar to unpreeedented prices without any effective steps at regulations being taken, the hint that a beginning will be made with the things which he produces brings anything but a pleasant response.

Even at the sensational prices now in effect, the farmer's per cent of profit is perhaps no more than the margin regularly enjoyed in many lines of manufacture. To get in line for selling his products at whatever prices may be obtainable next fall, the average farmer has had to buy his seed at the apex. Thousands of farmers, and thousands of stock raisers who are not farmers, but who do important work in meat production, have had to bring their work stock and meat producing animals through the winter at an enormous expense because of the cost of feeds. That fortunes have been made out of cotton seed products is common knowledge, yet the Government has offered no relief to the farmer or stock man who has had to buy cotton seed meal as one of the means of keeping his live stock growing until grass comes.

It would be far too long a story to go into the dozens of instances known to any student of the subject showing how the cost of operating most farms and ranches has increased at pretty much the same rate as the price which their products sell.

A short time ago the Missouri State Board of Agriculture developed the fact, through a thorough investigation, that at average prices and under average conditions as to cost of land, interest rate, labor, etc., corn making only an average yield had not been profitable to the grower in that state. These investigations cover the whole state, and we are not denying Missouri is a good corn state and can be said to fairly represent production conditions for all the corn growing territory.

Now, does anyone believe that the farmers who have labored and stuck to their land under conditions like these, should be denied this present opportunity to clean up a little money on their corn?

This is but one case. Beef producers can go back two years and show from their records that they furnished millions of pounds of meat to city dwellers at an actual loss to themselves. The history of the cattle business for 40 years furnishes absolute proof of the right of the cattle man, now that he has a safe margin, to enjoy what profit it will bring him.

Three-Year-Old Holstein Makes 40 Pounds Butter in 7-Day Test.

Scarcely a week passes but a new world's champion Holstein springs to fame, and before the ink has had time to dry on one record, another is made which relegates the previous champion to second place. The performance of K K S V Topsy, who first saw the light at Brothertown Farms, Utica, New York, on March 15, 1913, can be classified as nothing short of marvelous, for no other appellation can be applied to a cow which, as a senior 3-year-old, produces in a 7-day official test 40.38 lbs. of butter from a milk production of 568.7 lbs., her average fat test being 5.68 per cent.

K K S V Topsy was sired by King Korndyke Sadie Vale 86215, and is out of King Segis De Kol Korndyke Topsy 146246 (33.10 lbs. butter in 7 days as a senior 4-year-old). At the age of 3 years, 17 days, she dropped her first calf ,a beautiful heifer, and proceeded to make the very creditable record of 24.15 lbs. butter from 454.1 lbs. milk in 7 days, her average fat test showing 4.25 per cent. Two months later she was bred back to her own sire, and at 3 years, 11 months, 24 days, she dropped a pair of twin bulls, weighing respectively 80 and 100 pounds. Six days later, in spite of this handicap, she was placed on test and, in her first 7 days, produced over 36 lbs. butter; and four days later, by increasing her total a pound a day, she entered the charmed circle of 40-lb. cows. Her best day's milk production was 87.5 lbs. and her best day's fat over 5 lbs. She is the only cow that ever approached this phenomenal production after dropping twin calves, but coming of a family that have been consistent world's record makers, it naturally follows that she was destined to become famous. Her sire's dam was that great cow, Sadie Vale Concordia 4th (41.06 lbs. butter in 7 days and 163.11 lbs. in 30 days), who together with her daughter, Sadie Vale Concordia 4th Pietje (38.43 lbs. butter in 7 days, and 150.31 lbs. in 30 days), held the world's 7-day and 30-day records for mother and daughter until a recent date.

K K S V Topsy was fitted for the test with a ration composed of oil meal, molasses meal and bran, with an occasional variation of ground oats in place of the bran. Four supervisors were employed in making the test, during which she consumed 30 lbs. of the following ration per day: 1 lb. Continental gluten; ½ lb. cottonseed meal; ½ lb. oil meal; ½ lb. to 1 lb. bran; lb. to 1¼ lb. yellow gluten; ½ lb. hominy and sufficient Unicorn Dairy ration to make a total of 5 lbs. to a feeding. She was bred and developed by a well-known and successful New York state breeder, and is the second cow in his establishment to make a record of over 40 lbs. butter in one week.

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

Everywhere stockmen and farmers will go the limit to make this country produce as it never has done before, but if anybody thinks they will stand for a restriction of price on what they produce unless commensurate restrictions are applied to the products of every other industry, he should do a little mingling before he chances any money on his own opinion.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Bay Colt by Lord Denmark—Dixie Queen.....Foaled 1915
STANDARD BRED:—
Bay Gelding by Don Sonoma—Chula.
Black Colt by Silkworthy—Sonia.

Anyone looking for some youngsters of either breed will find these colts as attractive as it is possible to breed them. They will be sold at reasonable prices; are in good condition and may be seen at Oakridge Ranch, Sonoma Co., Cal.
The superbly bred stallion, Silkworthy, is also for sale. He has been bred to a limited number of mares and has proven himself a sure foal getter, and we have the quality of his colts to show.

Address W. G. COWAN, OAKRIDGE RANCH, KENWOOD, SONOMA CO., CAL. or BREEDER AND SPORTSMAN, SAN FRANCISCO, for further information.

THE STANDARD BRED STALLION SILKWORTHY 58175 LICENSE NO. 2069

Your Club Needs New Chaps at the Traps!

BOB FOLWELL Univ. of Penn. Football Coach Instructing Intercollegiate Champion Berry in the Art of Trapshooing

Every club needs something to put "pep" into its organization. New chaps at the traps brace up the club, propose novel shooting programs and arouse greater enthusiasm amongst the older members.

Beginners Events get new chaps at the traps. Thousands joined the trapshooting clubs last year because of Beginners Events.

Hold a Beginners Event in May or June

Look for beginners in your office, shop and neighborhood. Invite them to your club to learn to shoot. Get them to try the "sport alluring." The fascination of shooting the clay targets will win them just as it has made you a "gun bug." Round up the beginners to help your club.

TO GET THE HANDSOME TROPHY

we are giving to the club in any State or Canadian Province having the largest number of participants in a Beginners' Event. Sterling silver watch fobs and spoons will be given to clubs for presentation to beginners making highest score.

Send Us Your Club's Application To-Day

Boost Beginners' Events,—they get new chaps at your traps! Pick your day and send your club's application without delay.

TUESDAY, SEPTEMBER 11th.

5. 2:24 Class Trot $1,000
6. 2:08 Class Pace $1,000

WEDNESDAY, SEPTEMBER 12th.

7. 2:20 Class Pace $1,000
8. State Fair Futurity No. 6, 3 year old Trotters, Guaranteed $2,600....(Closed)

THURSDAY, SEPTEMBER 13th.

9. Governor's Stake — 2:12 Class Trot..... $1,500
10. Free-for-All Pace $1,000

FRIDAY, SEPTEMBER 14th.

11. Stanford-Occident Stake No. 1, 3 year old Pacers, Guaranteed $2,000 (Closed)
12. 2:16 Class Trot $1,000

SATURDAY, SEPTEMBER 15th.

13. 2:11 Class Pace $1,000
14. 2:10 Class Trot $1,000

Entrance and payments on these stakes will be due and payable as follows: 3% June 15th, 1% August 1st, and 1% on or before five o'clock the night before the race. Two or more running races each day.

GENERAL CONDITIONS.

ALL RACES THREE HEAATS — Money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 15th, 1917.

All purse races 5% to enter and 5% from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and three starters.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry, also if for any unforseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice, and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

FOR SALE

Offering for sale stock bred in the same lines as the great pacers Vera Hal 2:05, Hal Logan 2:09, Roan Hal 2:07¾, which I bred and whose dams I still own.

A brown mare well broken and shows fast at the pace, six years old, by a well bred and fast son of Welcome, and out of the great double producer Mabel, dam of the world's champion Directly.

A blood bay trotting bred mare, nine years old, sired by Altodown 36254 out of a mare by Hawthorne 10935. She has Nutwood blood on her sire and dam side, stands fifteen and a half hands high and is a fine rider and driver, and would be especially suitable for a lady.

A standard and registered trotting mare with a record of 2:19, by Eros 5326 out of a record daughter of Elmo 891, in foal to the best bred Hal stallion in the entire land.

Also colts and fillies bred in the pacing lines ready to be worked. For sale at reasonable figures. For further particulars address or call.

The Passing Livery Stable.

At a public sale of a livery stable's equipment at Lafayette, a few days ago, says the Indianapolis Star, some fine examples of the coach builders' art, which a few years ago cost more than a good automobile costs today, were knocked down at $2 apiece. A sleigh—who remembers when sleighing was considered the most exhilarating of winter sports?—which cost $500, was sold for 50 cents, and a rubber-tired buggy which cost $1,000 was sold for $10. This does not mean that the buggy had been crowded off the road, for in the rural districts a great many buggies still are sold, it being suspected that for general courting purposes they are vastly superior to anything in the vehicle line yet invented.

But certainly the livery stable must by this time find business dull. Thus passes a great institution, where the wits were wont to gather and discuss horses, men, politics and crops, but especially horses. In many a small town the livery stable office was really the place to get a true insight into public opinion. The traveling men who came to engage a rig were always willing to discuss the affairs of the outside world, the farmers who left their horses to be fed while in town, were as likely as not to loaf about the barn while their wives did the shopping, there to discuss crops and the weather, and, of course, no young man could hire a narrow seated rig without revealing, either by his actions or his speech, the progress of his affairs of the heart.

But it is to be doubted if the real hero of the livery stable—the livery stable horse—will shed many tears over the passing of the livery stable. It was his lot to be driven almost every day by a strange hand. Often he was abused by persons who urged him beyond his powers, and who neglected to water him. Sometimes he was called upon to do his own driving, the lines having been intrusted to the dashboard. And, it must be admitted, he was frequently called upon to make good the promises of his owner, who, upon occasion, did not hesitate to recommend him as being far superior to any horse that ever wore a shoe. This versatile and patient beast has about had his day. It is even possible that after leading such a life he is glad to drag cannon around over a European battlefield.

BUTTE COUNTY SPRING EXPOSITION IS BRILLIANT SUCCESS.

The most remarkable demonstration of the progress of the pure bred live stock industry in California ever staged, was the third annual spring exposition at Chico, Butte county, last week. The Butte County Spring Exposition is a miniature State Fair and International Live Stock Exposition combined. Everything one sees at America's greatest stock shows, on a smaller scale, is presented here. It is the making of one of the greatest annual events of importance to the agricultural and live stock industry in the West. Three years ago it was organized as a small street fair with a few local exhibits; this year more than 300 head of pure bred stock competed for the prizes.

It was recognized by several National breed associations which offered worthy premiums and attracted thousands of people from every county in California, as well as from southern Oregon counties. More than three acres of live stock and farm equipment was displayed. Every manufacturer of farm implements, tractors and automobiles had a meritorious exhibit, and scores of grafters, on the side, were present to lend it the proper color. This alone was significant of the importance it is cutting in the West; however, the management, to make it the success they undoubtedly aim to, must make it a fair for farmers, not fakers.

One of the most attractive exhibits was the Blackhawk Stock Farm's display of Shire horses. These magnificent animals, which were the biggest prize-winners at the P.-P. I. E., were presented as Manager Lovell will only allow them to be seen; and to say it was the most attractive live stock display at the exposition is not exaggerating or detracting from the many other beautifully displayed stables. It would have been the same in a much larger show. The horses, needless to say, won the entire program for their class.

The Shorthorns, which were the only beef breed exhibited, had many notable entries and the herd of H. L. and E. H. Murphy, of Perkins, came out at the head of the class, winning reserve grand champion bull, junior champion bull, reserve grand champion cow, junior champion cow, first aged bull, first and third junior yearling bull, third aged cow, first and second yearling heifer classes. This firm has imported the best Shorthorn blood they have been able to obtain in Missouri and have established a reputation on this coast as a herd of such. Many other winners at the fair were sold by them.

Jesse Bennett, of Chico, won the American Shorthorn Association trophy for best five in herd; also the grand and senior champion bull and cow events.

The Butte City Ranch Co., of Butte City, exhibited Shorthorns, Berkshire hogs, Shetland ponies, poultry and sheep, all being successful in their shows and the winners of the diploma for largest and best exhibit of live stock.

Especially strong was the competition in the swine department. All breeds found keen competition. In the Duroc-Jersey division, the well known Willows breeds, H. P. Slocum & Son, won the lion's share of the ribbons. They received the trophy for the heaviest hog in the show, their Uneeda Wonder, that tipped the beam at 700 pounds, outweighing all contenders. They also won first for senior yearling boar; champion cow class; second senior boar pig; third aged sow; first junior yearling sow; champion sow bred by owner, and the American Duroc Association's trophy. This firm has imported many of the best Durocs ever brought west, annually going to the hog raising centers and swine shows and selecting hogs that have proven winners in show and sales rings and as breeders. The Slocumb herd attracted much admiration from hog men who "knew" and this herd will bear watching at future shows, as will hogs they have purchased in the East for other breeders.

AWARDS.

Shorthorns.

Aged Bull—1st, Senior Champion and Grand Champion, Strawberry Goods, Jess Bennett, Chico.

Senior Yearling—1st, Jr. Champion and Reserve Grand Champion, Sunnyside Chief, G. A. Murphy, Perkins; 2d, Jess Bennett; 3d, Murphy Bros.

Boar two years old or over—H. Smith of Woodland 1st; Maurice Rucker of Fair Oaks, 2d.

Senior Yearling Boar—H. P. Slocum & Sons, of Willows, 1st.

Junior Yearling Boar—H. Smith of Woodland, 1st (champion bred by exhibitor); T. L. Costar, Chico, 2d.

Senior Boar Pig—Maurice Rucker of Fair Oaks, 1st; H. P. Slocum & Sons, 2d; W. V. Bennett of Chico, 3d.

Aged Sow—H. P. Slocum & Sons, 1st (champion sow); W. V. Bennett, 2d; H. P. Slocum & Sons, 3d.

Senior Yearling Sow—H. Smith, 1st; Carl Kiolstadt, 2d.

Junior Yearling Sow—H. P. Slocum & Sons, 1st; H. Smith, 2d and 3d. Champion bred by exhibitor, H. P. Slocumb & Sons.

Sow and Litter—H. Smith, 1st; C. Van Orsdel, 2d. National Association trophy won by Smith; American Association trophy, by Slocumb.

Berkshire Swine.

Aged Boar—James Mill Orchard Company (champion), 1st; Butte City Ranch, 2d; Frank Brush, Santa Rosa, 3d.

Senior Yearling Boar—Frank Brush, 1st.

Junior Yearling Boar—Frank Brush, 2d.

Senior Boar Pig—Frank Brush, 1st (champion bred by exhibitor); Jas. Mills, 2d; Brush, 3d.

Aged Sow—Frank Brush, 1st and 2d.

Senior Yearling Sow—Butte City Ranch ((champian), 1st; Frank Brush, 2d.

Junior Yearling Sow—Frank Brush, 1st (champion bred by exhibitor); James Mills Orchard Company, 2d and 3d.

Senior Pigs—Frank Brush, 1st and 2d.

Butte City prize, for best herd—Frank Brush.

Best Sow and Litter—James Mills Orchard Co.

Hampshires—H. E. Richardson, Chico, all awards.

Chester Whites—H. Huffman, Chico, all awards.

Harness Horses and Horsemen

ADOLPH OTTINGER.

At the annual meeting of the California-San Francisco Driving Club held last week, Mr. Adolph Ottinger was elected president for the ensuing year. No better selection could have been made for this important office, as Mr. Ottinger is one of the oldest enthusiasts in the light harness racing sport on this coast. He has always owned and driven good horses and taken great interest in both the amateur and professional ends of the game. He was for several years identified with the late Thos. Keating in racing a stable of horses; Keating & Ottinger met with great success in the racing business. Their most successful year was probably in 1892, and the writer succeeded in getting Mr. Ottinger to furnish the following reminiscences of their campaign through Montana in that season:

It was in 1892 when Marcus Daly wired Mr. Ottinger to ascertain the lowest price at which Yolo Maid could be purchased from Mr. Hayward. Upon receipt of the wire Ottinger went to San Mateo and called upon Mr. Hayward and looked Yolo Maid over, who was then three years old, and he asked Hayward the price. The latter said to Ottinger: "You don't want to buy Yolo Maid, for I know you don't want her for yourself." But at any rate he said he would take $15,000 for her and there would be $1000 commission in it for Ottinger. Ottinger then wired Daly that the mare could be purchased for $15,000 and that there was $1,000 commission in it, which would make the mare stand him $14,000. Daly wired back to draw a sight draft on him for the above amount, and ship the mare by express in care of a boy to Anaconda, Montana, which Ottinger did. The mare got there all right and Ottinger received a wire from Daly advising him of her arrival. Ottinger then wired Daly that he had a horse which cost $1200 which could beat the mare. Mr. Daly wired him that he would hang up a $10,000 purse for the free-for-all pace and to come up there and get it.

Ottinger and Keating had just then formed a partnership in the horse business; Keating attending to all the training and Ottinger managed the entries of the horses, purchased the feed and managed the betting on the track. They had a stable consisting of the best horses at that time in the United States, as follows: Ottinger, Frank M., Crown Prince, James L., Turk Franklin, Our Dick, Aster, Edith, Nutwood.

We started for Salt Lake City with a carload of the above horses and a Pullman car and carried the bookmakers with us; at that time consisting of Killip & Whitehead and Dave Eisman. At Salt Lake we met De Boise Brothers, who had a stable of horses such as L. C. Lee, and N. W. B. at that time one of the best crack pacers. We started in the free-for-all with the above mentioned horses and won all the silver at that time in Utah, as their horses sold favor for from $300 to $400 in the pool box. Turk Franklin sold in the field for $7 and $8 a ticket.

From Salt Lake we went to Spokane, then to Anaconda; two weeks meeting, and Yolo Maid won the free-for-all pace against Our Dick, Lady H., and Turk Franklin. Daly and Ottinger met in Daly's wineroom that night, drinking over his victory. Ottinger said to Daly, "You invite us to come up here to participate in the races, you have millions where we haven't a dollar, you buy the best horses and win all the races." Daly said, "All right; I will give back the $10,000 and you fellows can fight for it," andso they did, and Ottinger won the $10,000.

"From Anaconda we went to Butte City, Daly starting Yolo Maid and St. Patrick against Lady H., Turk Franklin and Our Dick, and we beat Yolo Maid on account of her suffering with bad corns. Daly and myself started a match race with St. Patrick and Our Dick, and Mr. Daly agreed to close all the mines on St. Patrick's Day. Great excitement prevailed the night before the race; all the miners wore green ribbons with 'St. Patrick' in gold letters. I bought a bolt of black crepe and every time I met one of the miners I cut off a piece and told him to keep it to cover up the name the next day after the race.

There were about 25,000 people on the track that day and on the first heat $75,000 to $80,000 went to the Paris Mutuel box. Our Dick won and there was gloom in the camp. Same date there was a free-for-all trot. Prodigal, Silverbow, Florida, Dan Willax; and Keating won with Florida. She sold $5 in $3000 pools."

Then came the three-year-old stake race between Ottinger and Brown Silk. "The day before the race I met Daly in front of Goldberg's jewelry store, and we got to talking about that stake race. I claimed my horse would win and he claimed his would, and Daly said he thought it would be a good thing to make a little wager between them. He turned around and looked at the jewelry window and saw a diamond necklace with 14 stones, and he said if I could win the race he would give the necklace to Mrs. Ottinger, and if he won then I should give it to Mrs. Daly. The bet was made and I won in two straight heats and Mrs. Ottinger got the necklace."

The betting those days was unlimited, especially in a hot contested race where Daly had entries. It was nothing for a horse race with four or five horses in it to have the auction pools run from $3000 to $5,000.

WOODLAND'S NEW PARK PRESENTED TO PUBLIC.

Crowned with success were the efforts of California's well known sportsman, Chas. F. Silva, owner of the far-famed Woodland Stock Farm, at Woodland, California, whose new half-mile track was formally opened Sunday, May 27, with a matinee program for trotters and pacers; the like of which is seldom excelled on the notable race tracks of the country. The best horses of the West competed in four interesting races before one of the most appreciative audiences ever seen at Woodland. The races were given for the benefit of the Red Cross and had the good will and patronage of every prominent citizen of that section. There was everything about the matinee that demonstrated good racing can be interesting and appreciated without the characteristic ringside gambling and natural squabbles that follow. None of this was in evidence Sunday. Mr. Silva had the new track in the cream of condition. It is a "whiz" and while some of the horsemen who are used to the mile tracks called it a "bull ring," when the season gets under way and the heats are miles, the popularity of the two-lap tracks will be thoroughly demonstrated. The people in the grand stand like to see them go by that point at their best and it is to them we must cater. They make fairs, races and horse shows possible, and no matter how excellent are the entries, the track, the weather and conditions, without an audience it would all be useless.

The horsemen pronounced this one of the most perfect days and tracks they had ever encountered. The crowd caught the spirit of good fellowship and clever rivalry that existed between the horsemen at the start and from the first "GO" they were as eager and excited as were the owners themselves.

The first race was a free-for-all pace and brought out three of the really great pacers of the coast, Jim Logan 2:01¾, Teddy Bear 2:05 and Bold Harry Aerolite 2:07¾. Woodland being the home of both the former named horses, known to every man, woman and child in Yolo county, they were quite naturally the local favorites and it was hard to tell which of the grand old winners was the most popular. Horsemen present, however, would not have been surprised to see Mr. Giannini's horse, Bold Harry, make a name for himself. It was expected that a "whiz" of a race would be given and the expectations came true.

Bold Harry drew the pole, with Teddy in second position, and from the moment they got the word, after the second score, it was a horse race. It was nip and tuck and hard to tell whose heat it would be. Teddy showed his old-time class and Daniels certainly was giving him a careful drive; at the quarter he was in the lead a length and at the last eighth he was giving Jim Logan an awful battle. About fifty feet from the wire, however, Teddy blew up, giving Jim the best of it, and they finished with Jim Logan first, Teddy Bear second and Bold Harry Aerolite third.

Every horse was on his mettle and attracted admiration for his efforts. The audience was on its feet the moment they got away and the first heat of the race proved the best show of the afternoon. They went the first eighth in 15½, the quarter in 30 flat; made the three-eighths pole in 45⅝ and under the wire in 1:01¼.

The second, which proved the determining heat of this race, was Jim Logan's at all times, and while both Teddy Bear and Bold Harry showed plenty of class they could not head off this grand old pacer, who took the lead and maintained a safe margin for the entire half-mile. When the race was over Jim Logan received an ovation in which Chas. Silva's clarion voice could be heard above all, that is seldom equaled at a race track. However, when the drivers of Teddy Bear and Bold Harry Aerolite came before them they, too, received their share of the applase, demonstrating what a fair crowd was present.

First race—free-for-all pace:

Jim Logan	(Montgomery)	1	1
Teddy Bear	(Daniels)	2	2
Bold Harry Aerolite	Schwartz)	3	3

Time—1:01¼. 1:03.

The second race was a 2:14 trot and was indulged in by George Giannini's Ella M. R., Elmo Montgomery's San Felipe and Mr. Silva's Little Jack, a three-year-old son of Teddy Bear and one of the most likely colts seen this year.

The trotters got away easily, with Little Jack taking the lead at once. San Felipe soon closed in on him with Ella M. R. ready to give them trouble at every step. The heat was almost a dead one and the judges alone were in a position to determine just how much Little Jack beat San Felipe. The way they came together from the last pole was something wonderful and furnished a real speed duel by this good pair. The quarter pole was reached in 32¼ and Little Jack eased under the wire at the finish in 1:06½.

The second and deciding heat was a duplication of the first. Little Jank again set a hot clip for the two rivals right from the send-off. San Felipe was right at his hip at the finish and Ella M. R. came in about the same as in the first heat.

Second race—2:14 trot:

Little Jack	(Daniels)	1	1
San Felipe	(Montgomery)	2	2
Ella M. R.	(Schwartz)	3	3

Time—1:06½, 1:06½.

After several bad scores on the part of Yoncalla, the 2:20 trotters finally got away with Ivey and his Sweet Bow in the lead; she went away like a house-a-fire and would have had easy picking—if—she had not broken at the first eighth pole. There, Lon Daniels, who was driving Mr. Broilliar's Great Policy, and who had been pushing from the start, took the lead and had things pretty much his own way to the finish, which was made in 1:09½. Sweet Bow was showing splendid speed and manners by the time she got to the quarter and despite the fact she was far to the rear when she settled she closed on the rest of the entries and finished second. Mr. Burton was doing his best with Jas. Ryan's recently acquired Yoncalla; however, he could not do better than third with W. W. Gallup's King Policy bringing up the rear.

The second heat of this race was made in better time, but on account of Sweet Bow's behavior she beat her driver out of all chances of winning the race, as second was the best position she could make after settling, leaving Great Policy a comparative walk-over. Yoncalla and King Policy also finished in the same positions as in the first heat.

Third race—2:20 trot:

Great Policy	(Daniels)	1	1
Sweet Bow	(Ivey)	2	2
Yoncalla	(F. Burton)	3	3
King Policy	(Gallup)	4	4

Time—1:09½, 1:08¾.

The fourth and last race, the 2:18 pace, proved another victory for Jim Logan and owner Montgomery, as Hal Logan won both heats impressively; easing under the wire in 1:03¼ in the first and 1:04 in the second and determining heat. It was a joyous occasion for the home-folks who think Jim Logan, Montgomery and the colts of old Jim are just about the best in the world; and had a race been staged for the simple purpose of pleasing the spectators it could not have been better made. Schwartz had Directress Mac on her toes but she did not give Hal Logan any noticeable trouble.

Fourth race—2:18 pace:

Hal Logan	(Montgomery)	1	1
Directress Mac	(Schwartz)	2	2
Surety	(Gallup)	3	4
King Pointer	(Campodonico)	5	3
John Malcolm	(Daniels)	4	5

Time—1:03;, 1:04.

The judges were Frank Wright, Frank Ruhstaller and A. C. Stevens. Dr. Weldon, Walter Tryon, Frank Lessinger and Dr. DeLane acted as timers, and Joseph Waddell, of San Francisco, starter.

TOMORROW'S MATINEE AT THE STADIUM.

At a meeting of the Driving Club held Tuesday evening the classification committee, consisting of J. J. Ryan, H. Cohen and Wm. Malough, arranged the following program for next Sunday's races, which will be started at 1:30 p. m.:

Free-for all trot—Petrina (L. H. Gielow), Yoncalla (J. J. Ryan), Harold C. (H. Cohen), Vallejo King (Welsh & Ottinger).

2:20 pace—Geo. W. (Frank Burton), Rodger Patchen (J. McNamara), Little Jack (Wm. McDonald).

2:15 pace—Directress Mac (J. J. Ryan), King Pointer (H. Campodonico), Emma M. (Wm. Malough).

Thoroughbred Matters

Coffroth to Dominate Western Racing.

James W. Coffroth took action last week, through the medium of the Tijuana Jockey Club, to make himself the controlling power in thoroughbred racing affairs in the Far West. Coffroth is ambitious to fill the place left vacant by the death of Tom Williams and to become turf czar in this section.

Thoroughbred meetings in the West at State or county fairs must receive the sanction of the Tijuana Jockey Club or the horses and their owners that enter the races will not be permitted to race at Tijuana. A rule was adopted at a meeting of the club at the St. Francis that is similar to the one that was enforced by the old Pacific Jockey Club, presided over by the former monarch of Emeryville. With Coffroth promoting the only meeting of any consequence in the Far West, he holds the whip hand in enforcing the ruling and making the horsemen walk the chalk line.

The reading of the law adopted at the meeting, with President James W. Coffroth, Director George P. Fuller and Secretary Leon Wing of the Tijuana Jockey Club present is as follows:

"All thoroughbred horse meetings must receive a sanction from the Jockey Club. Failure to do so will bring about the suspension of all horses, horsemen, owners, trainers, jockeys and officials participating in the unsanctioned meeting.

"All thoroughbred horse meetings must employ the services of a steward appointed by the Jockey Club. His decisions must be accepted as final until the Jockey Club meets and indorses or unfolds his verdicts. The salary for this steward must not be less than $20 per day. The price of sanction will be fixed by the board of directors upon application."

President Coffroth explains the stand taken by the Jockey Club on the ground that it is absolutely necessary to secure control of the sport to promote it properly. The Jockey Club of New York runs the sport in the East on the same general lines, and the late Tom Williams followed the example out here.

"The action taken was prompted by the many proposed meetings that are cropping up in many parts of the West," he says. "It is done as a protection for racing. Officials at fairs in particular are weak in the handling of the sport. The race-going public as a rule does not receive the good sport capable of the thoroughbred. It has been brought to my attention of some suspicious races on the fair circuit last season, and it is our intention to stamp it out with a steward in the stand."

The Tijuana Jockey Club was organized in San Diego last November. It controls the racing of the Lower California Jockey Club and the Reno Racing Association.

Just what action the California Fair and Racing Association will take on the new ruling remains to be seen. Eighteen meetings have been mapped out, with thoroughbred races booked for all of them. The State Fair speed program also calls for two running events daily. It will be necessary to secure the sanction of the Tijuana Jockey Club, or there will likely be difficulty in securing enough entries, as the horsemen would hardly take a chance of being ruled off the Tijuana track. At present there are some 200 horses around San Diego and Los Angeles that would likely have been on the circuit.

No one was ever heard to accuse Jas. W. Coffroth of being a comedian, yet he must have been possessed of a keen sense of humor when he promulgated the information that he intended to control the thoroughbred racing at the State and County fairs in the State of California. It may be possible that he takes himself seriously and believes that he can dictate to horsemen and fair officials as to their conduct of their own business. The idea of having a steward appointed by the Tia Juana Jockey Club to supervise the different race meetings in California is a huge joke. An effort was made last year by the different fair managers to encourage the breeding and training of thoroughbred horses, and the different organizations offered small purses for runners at the different meetings; at that time it looked as if there would be a chance for the passage of a bill through the Legislature allowing betting and racing for a limited number of days in each county. The Golden Gate Thoroughbred Breeders' Association were gamer than Mr. Coffroth, as they not only sent an assistant to the State Fair at their own expense but also donated a $500 purse for a handicap. Ther unning races held at the different fairs were an unqualified success and greatly enjoyed by the spectators, although no opportunity was allowed for betting, and under the circumstances why any "suspicious looking" races should have been brought to Mr. Coffroth's notice is not easily explained. The foregoing statement may be slightly qualified, however; there was betting indulged in at the town of Santa Rosa; in fact a betting privilege was sold daily and sublet, and several books were in operation. This privilege was bought and handled by Leon Wing, secretary of the Tia Juana Jockey Club. The State Fair and other associations will probably take no notice of Mr. Coffroth's ruling, the only effect of which will be to prevent some poor owners who have horses that are not good enough to race anywhere except at Tia Juana, from earning a little money during the California Circuit.

LEXINGTON RACING STATISTICS.

The spring meeting of the Kentucky Association at Lexington, comprising eleven days, beginning April 2 and ending May 10, was the most successful ever held at that famous old course. All records for attendance and speculation were shattered. The racing itself was excellent. During the eleven days, seventy-seven races were decided and $57,485 in stakes and purses was distributed among the successful owners. The daily average distribution amounted to $5,225. Jefferson Livingston was the biggest winner, his horses capturing the largest number of races and $6,674 in stable earnings. The following is a list of the owners who won $900 or more:

Owner.	1st.	2d.	3d.	Amt.
J. Livingston	7	4	5	$6,674
J. N. Camden	4	0	0	2,911
E. R. Bradley	4	5	1	2,645
William. Bros.	3	3	5	2,179
K. D. Alexander	2	0	1	2,038
H. H. Hewitt	1	2	1	1,893
J. W. Schorr	3	1	4	1,660
B. J. Brannon	3	2	1	1,600
A. B. Hancock	1	2	0	1,597
J. J. Troxler	2	1	2	1,453
A. Miller	2	0	0	1,350
Wickliffe Stable	1	3	5	1,275
W. H. Baker	2	1	2	1,215
G. W. J. Bissell	2	2	0	1,190
F. J. Kelley	2	2	0	1,155
W. Woodard	2	0	1	1,150
Gallaher Bros.	2	0	1	1,070
Adair & Baker	2	1	1	1,050
J. Umensetter	2	0	1	1,030
T. C. McDowell	2	1	0	1,005
Ross & Looney	2	0	1	950

Colonel Vennie won the Ben Ali and Camden Handicaps, worth $3,514, which placed him at the head of the list of winning horses. Honeydew was second on the list with three victories and $2,461 in money won. The following is a list of the horses which won $900 or more each:

Horse.	1st.	2d.	3d.	Amt.
Colonel Vennie	2	0	0	$3,514
Honeydew	3	0	0	2,461
Escoba	2	0	0	2,013
Embroidery	1	2	0	1,597
Ticket	2	0	0	1,350
Star Maid	1	0	0	1,280
Korbly	2	0	1	1,239
Opportunity	2	0	1	1,150
Eastern Princess	2	1	0	1,090
Bringhurst	2	1	0	1,000
Intone	2	0	1	950
Penrod	2	0	0	900

Albany, N. Y., May 15.—Judgments convicting Joseph Tortora and Morris Hoffman, of New York, of violating the law prohibiting bookmaking without writing on New York race tracks were sustained today by the Court of Appeals.

The convictions were the first in the state under the amended anti-gambling laws, and the Court ruling is considered a precedent which will largely curtail public betting at race tracks. Tortora and Hoffman were convicted of accepting oral wagers at the Jamaica (L. I.) track. They did not dispute the facts in the case, but questioned the validity of the "bookmaking without writing" law under which they were convicted as void "because of indefiniteness and uncertainty."

✤ ✤ ✤

Louisville, May 19.—All of the horses that started in the Kentucky Derby were reported as having come out of the race in good shape. The winner, Omar Khayyam, with others in the Billings-Johnson stable, was shipped at an early hour this morning to New York, where they will take part in the racing at Jamaica. Trainer Patterson accompanied the horses, and Jockey Borel will leave tomorrow. Pleasant Dreams was turned over to Miller Henderson by Trainer Patterson, to be prepared for the Kentucky Oaks.

A verdict of guilty was rendered Thursday, May 17th, in New Orleans against President McDiarmid and directors of the Business Men's Racing Association, as well as against Joseph A. Murphy, Thomas Shaw and Sol Lichenstein, for violation of the Lock anti-gambling bill.

✤ ✤ ✤

"Skeets" Martin in Excellent Form.

The first race in England for two-year-olds of this year was the Ashley Plate, run at Newmarket April 17. It had twenty-four starters and was won by Major R. L. Kildston's Lord Allan, ridden by J. H. (Skeets) Martin, the only American jockey riding in England. Later in the day "Skeets" won the Fitzwilliam Stakes on Lord Londonderry's two-year-old colt Beaufort, making it a fine start for the year. Martin was to ride first jockey for the Freemason Lodge Stable, with the Earl of Jersey and Lord Lonsdale as his principal employers. Now that racing in England has been declared off for this year, it may occur that this capable jockey will return presently to the land of his nativity.

Make Good, the mare owned by Mr. J. H. Rossiter, which won so many races at Reno and on the California Circuit last summer, has been bred to E. Cebrian's stallion Von Tromp.

JOHN HUGGINS DIES AT TEXAS HOME.

John Huggins, who earned a full measure of fame both in this country and in England, as a conditioner of thoroughbred racehorses, died on May 8th at his home in Fulshear, Texas. Mr. Huggins had been in bad health for a considerable time and while he was a frequent visitor at the races in New York last season he witnessed the running from his car, which was given space on the racecourse not far from the finish line. Mr. Huggins spent his summers at his Sheepshead Bay home, while each winter he went to his Texas estate and its milder temperatutre. He was sixty-nine years of age, and until a few years ago was active on the turf.

During his long and honorable connection with the turf John Huggins fitted many a champion for the races and in his varied career as a trainer he had charge of some of the very largest and most important racing establishments for both British and American sportsmen. In 1901 Huggins sent an Epsom Derby winner out when he saddled Volodyovski for the late Hon. William C. Whitney.

Mr. Huggins also trained for the Marquis of Beresford in England, when that sterling sportsman was one of the leading figures of the turf. He also trained for the late A. J. Cassatt, when the "red, white and blue" silks were so popular and successful.

The most recent active connection that John Huggins had with racing was when he so successfully handled the big American stable of the late H. B. Duryea. When Mr. Duryea transferred his racing operations to France, with such signal success, Trainer Huggins retired from his chosen calling. Harry Payne Whitney endeavored to induce him to handle his American string in 1910, but even then Mr. Huggins was not in good health and he declined.

There never was a more thorough sportsman and though he was a looker-on for the past few years his death is a distinct loss to the turf.

✤ ✤ ✤

Macomber May Withdraw from Kentucky.

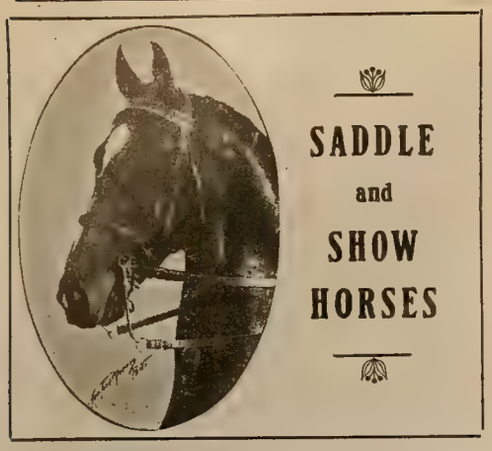
During a chat with Mr. Macomber before the races, he informed me that he was making arrangements to take all his horses and other property out of Kentucky and did not intend to return.

Mr. Macomber had begun to formulate plans for adding to Walnut Hall, with the view of establishing a great breeding plant, using his present great stable of racers as a nucleus, when they had finished their racing days.

The legal difficulties between the State and the Harkness Estate, now pending, are responsible for Mr. Macomber's change of plans, and he states that he has definitely decided to ship the eight mares bred and turned out at Hal Price Headley's farm, and all his horses in training to New York, and race no more in Kentucky.

The loss of the Macomber stable to Kentucky racing would be keenly felt, but more than this would be the loss to the Blue Grass and to Kentucky in general, should this important breeding establishment of the future be located in New Jersey instead of Kentucky.—[Alves, in Thoroughbred Record.

Al Farrell, manager of Edward Cebrian's San Jose stock farm, returned last week from New York, where he took four Von Tromp two-year-olds. He had fair success, finishing second twice with Ashtroth. The filly had knee trouble, however, and Farrell thought best to bring her back along with two others. Bon Tromp, a colt, was sold.



Farrell reports that the local horses in the East are doing nicely. George Wingfield's string got off to a bad start. Scarlet Oaks and Slippery Elm both were out of the money, but they are doing nicely in George Berry's care.

The manager has returned to San Jose to look after the twenty foals that have put in an appearance. One disappointment of the season is that Cloudlight did not deliver tthrough a mating with Von Tromp. The racing game is booming in New York.

✤ ✤ ✤

Charles W. Paine, Secretary of the State Agricultural Society, is the first of the fair association promoters to throw down the gauntlet to President Jas. W. Coffroth of the Tijuana Jockey Club with his plan to control the thoroughbred racing sport in the Far West. Paine declared himself before the horsemen gathered at Woodland Sunday, and says the State Fair race meeting in September will make no application for a sanction to put on running events.

"The State Fair will not put itself in the position of being dictated to, especially from an organization that is not even in this country," he declared. "Only last year thoroughbred races were included in our speed program, and we see no reason for being compelled to consult the Tijuana Jockey Club and pay for the right to go ahead with the races. Our object is to encourage the breeding of thoroughbreds in California. Wagering of any description is prohibited on the State Fair grounds, and we need no steward appointed by the Tijuana Jockey Club at $20 a day to run our races. The two running races daily that we have programmed will remain, and I think we can fill the races despite the blacklist that would be placed by the Tijuana track. If the thoroughbred horsemen do not want to take a chance, we can put on more light-harness features and go back to our od cards of sulky races exclusively."

Stockton Fountain of Centralia, Mo., has received instructions to hold himself ready to depart for Europe as soon as orders are issued. He enlisted in the Quartermaster's Corps. Mr. Fountain is one of the leading young stockmen of Missouri, having bred some of the best stock produced there. He also has judged at leading stock shows in the Middle West.

✤ ✤ ✤

Herbert Reavis, of Hartford, Conn., who for the last five years has been in charge of the stable of horses for D. A. Thrall, died there last Friday. Prior to going to Connecticut he was employed by Lee Bros., of Mexico, Mo., and was one of the best horsemen Missouri ever produced. He was a brother of Don. Reavis, who is in charge of the saddle horse establishment of Bruce G. Eaton, Eaton Farms, Eaton, Colo.

✤ ✤ ✤

CORRECTION.

In Judge E. A. Bridgford's letter, in the last issue of this paper, a bad "pick-up" occurred in the second column, in that part of the letter under "Facts" in the sixth paragraph, and the same paragraph in "Conclusions" below, causing a mix-up. "Fact six" should have read: "This man of lifetime experience at the second show with the same colts and only one additional entry places California's Best, sixth." In "Conclusions" the six lines which appeared in "Facts" should have read: "But when the representative of a sister Association comes to the very door of the Association of which I am President in an attempt to destroy it, I decline to capitulate, but resent it as any other man with Kentucky blood in his veins, with an early training in Missouri, and a larger experience in California, would do."

In making a correction the two paragraphs were mixed and the mistake was not noticed until the papers were in the mail.

Chas. W. Green, of Centralia, Mo., who is regarded as the most successful country buyer in the services of the Guyton-Herrington Mule Co., who have handled the big end of the European War Horse trade, has been recommended to the proper authorities at Washington, as an expert judge of mules and horses as well as a thorough buyer, and in event of a big war-horse demand by this government he probably will be placed in charge of some prominent post in this branch of the service. Mr. Green has judged at

Mrs. Winslow Anderson, of San Francisco, who has been one of the most prominent saddle horse enthusiasts of the Coast for several years, has, on her ranch in Sonoma county, one of the best foundations for a saddle horse nursery to be found in California. The most noted matron, from a breeding standpoint, is Monty Evans, a daughter of Artist Montrose, now thought to be safe in foal to the celebrated stallion, Silkworthy. This mare in event she foals by Silkworthy, will be mated to the best saddle stallion available and the owner justly believes she will have a colt as good as any ever bred in Missouri or Kentucky.

✤ ✤ ✤

Chicago's well known horse lover and sportsman, D. Schilling, has bought so many notable horses this season that it is beginning to be a weekly event to report the purchase by him of some celebrated show horse. Mr. Schilling has the reputation of being one of America's best judges, which reputation was achieved through his "picking winners." Last week he purchased from the Astral King Farm, Jefferson City, Mo., the saddle stallion, The Sultan, a beautiful bay son of Montgomery Gay, the best breeding son of Montgomery Chief; his dam being a daughter of Highland Denmark. This popular cross has never been more successfully blended than in The Sultan. His colts have been raised under the same roof with those of Astral King and some horsemen, including Supt. Anderson, have declared they had even that great stallion's colts hustling to hold their own.

✤ ✤ ✤

In the death of the great jack, Limestone Good Boy, the owners, Judge G. T. Florida & Sons, of Sweetwater, Tenn., not only suffer a great loss but the jack industry also does. This great jack, one of the products of Col. L. M. Monsees' Limestone Valley Farm, was one of the best breeders in the country. He topped the Monsees sale this spring.

OKLAHOMA HORSE SHOW INAUGURATED.

The Mid-Continental Live Stock Exposition and Horse Show, conducted May 15 to 19, in the great oil-boomed town of Tulsa, Okla., attracted many of the leading stables of the Middle West. Prominent winners were the stables of Longview Farm, Lee's Summit, Mo.; O. J. Mooers, Columbia, Mo.; Jas. Houchin, Jefferson City, Mo.; D. Schilling, Chicago, Ill., and a liberal sprinkling of Oklahoma horsemen. The classes were all well contested and would have been a feature at some of the well established horse shows. My Major Dare, Longview's invincible saddle stallion, continued to out-class all contenders and was the champion of the saddle shows. Miss Long's heavy harness horses also were first in the majority of their classes, with O. J. Mooers' stable finishing well up in every event. In the runabout class the Mooers stable defeated Miss Long's entries; Troublesome Tommy proving one of the most troublesome horses at the show. D. Schilling's beautiful Garrard Hunt won his only show, the fine harness class, over the best class seen in many years, second position going to Houchin & Anderson's I Am King. It is said this was one of the best classes of the program. Schilling drove the great looking Garrard as he never drove before. He had everything that belongs to a fine harness horse—action, speed, manners, looks—and, it is said, never made a mistake. Longview's mare, Joan Sawyer, won the gaited mare class over a brilliant field.

The show is said to have been badly mismanaged. No one was in authority, the program was balled up, and when the horsemen arrived nothing had been prepared. It was another case of trying to give a horse show without an experienced superintendent or manager. The attendance was xery bad on account of the location of the show and the weather. There was a big deficite in the proceeds; but exhibitors were paid promptly and in full It was a profitable show for the horsemen as the prizes were liberal and many good sales were made.

The heavy harness stable of Miss Myrene Houchin, of Jefferson City, Missouri, also was one of the feature attractions, but was not as successful as in former years. The judges were Geo. A. Heyl, of Washington, Ill., harness horses, and Ralph Hamilton, Keota, Iowa, saddle horses.

It was decided to make the show an annual affair and the next event will be far in advance of the one just over, in every way. This season's experience will serve as a valuable one for future events there.

TEN THOUSAND DOLLARS AND A WORLD'S TITLE.

The proposed stake for the gaited saddle horses at the Kentucky State Fair this year not only carries with it the largest cash prize ever given, the most liberal terms for exhibitors, but the world's title as well. My Major Dare, retired as champion, has been returned to the shows and his hat is in the ring. In a letter which is published below, Jas. A. Houchin, clothing manufacturer and horse lover, announces if the claims get too strong for the so-called champions, his champion, Astral King, retired two years ago, with sixty days' notice will be shown. This is strictly a performance class and will be the greatest class of performers the world has ever seen. It has attracted contributors from California to Vermont and from Montana to Florida. The Kentucky State Fair will duplicate any amount that is raised and it is our ambition to make them give up $5,000.

Mr. Girard S. Parsons, of Rutland, Vt., owner of one of the greatest bands of saddle horses in the United States, in a letter to Matt S. Cohen, president of the Kentucky State Fair, not only declares we can count on him for one or more entries but gives a cash contribution of $100. Mr. Parsons is setting an example for the other owners who have not declared themselves. He was counted as one of those sure to come in when the stake was first proposed. Anything that is for the betterment of horse shows or of a sportsman's chance is sure to receive this well known amateur horseman and sportsman's support.

The stake must be assured by June 15, however, and those who expect to "do their bit" must not delay in making known their intentions. Mr. Cohen wants to make it the most talked-of show in history and owners who have retired their horses must have at least sixty days' notice for their proper preparation.

The stake as now proposed is for $10,000 in prizes. To be shown in four divisions—stallions, mares, and geldings, and three first winners in the sex classes showing for the championship title; each stake to be for $2,500.

It has been suggested to make the stake for a stallion and his get; but this is absolutely impossible as it has been tried time and time again. In the first place, it would be impossible to get the entries necessary and secondly, this stake is for performance. I must be the hottest, most thoroughly contested show of horses ever given. Every great saddle horse in the country must be entered and visitors from every state in the Union will witness the event. There are plenty of shows where a stallion and his colts have opportunities to show. Every state and county fair of any importance gives such a class. The stake we are trying to establish is to be the manner attraction of the Kentucky State Fair; in fact, the banner attraction of all horsedom.

It will be announced definitely some time in June if the stake is a "go"; in the meantime, we implore every lover of show horses in the country to make known his intentions. If the American Saddle Horse Breeders' Association will give $1,000 for the conducting of the stake, I have been assrred three different states will duplicate it. The state board of agriculture of one great saddle horse state has informed me they will do whatever the American Association will do; but they do not feel like giving a big cash premium for the benefit of the breed which its wealthy association will not get behind and encourage. Wire Mat. S. Cohen, Commissioner of Agriculture, Frankfort, Ky., just what you will give to make the greatest show of saddle horses in the history of the breed a certainty.

Vermont Owner Enters and Subscribes.

DEPARTMENT OF AGRICULTURE,
Labor and Statistics,
Frankfort, Ky., May 21, 1917.

Breeder and Sportsman,
San Francisco, Cal.

My dear Jump:

The enclosed letter from Mr. G. S. Parsons, Rutland, Vermont, is self-explanatory and is sent you for your advice and information, together with a copy of my letter to Mr. Parsons of even date.

Let me hear from you, and remember, we had rather have a $10,000 saddle horse exhibit at the Kentucky State Fair than a $5,000 one. Therefore, know that the Kentucky State Fair stands ready and willing, eager and anxious to match any amount you may send.

Don't you think my suggestion relative to showing stallions for $2,500, mares for the same and the geldings the same, which with the $10,000 show would leave $2,500 for the Grand Championship, a good one? And don't you think, since there is to be no entrance fee and nothing deducted, that the winner of this Grand Championship should have 75% of the $2,500, giving the winner of the Reserve Championship the remaining 25% Sincerely,

MATT. S. COHEN,
Commissioner of Agriculture.

Hon. Matt. S. Cohen,
Commissioner of Agriculture,
Louisville, Kentucky.

My dear Mr. Cohen:—

I have noticed in the Breeder and Sportsman that there is talk of making a big stake for the Champion Saddle Horse of the U. S. A., and your very wonderful offer to take this stake to Louisville. That is certainly where it ought to be held. I will be very glad to subscribe one hundred ($100) dollars and enter one or more horses.

At any time that I can be of service to you or your "Grand Old State" in trying to further the horse industry, believe me, I am at your service.

With kindest personal regards, believe me,
Very sincerely,
G. S. PARSONS.

the leading horse shows and fairs in America.

Houchin Will Show Astral King.

St. Louis, May 22, 1917.

Mr. Jump Cauthorn,
The Breeder and Sportsman,
San Francisco, Cal.

My dear Sir:—I do not know how to advise you to write my future advertisement. With one exception every Astral King colt that we have that is halter broke has been sold. This colt that has not been sold of course is for sale, but we really do not care to sell him before next year because we think it profitable to keep him over until next year.

As to the Tulsa, Oklahoma, show last week, we sold Mr. W. L. Lewis the great show prospect, "I Am King," by Astral King. There was only one condition to this sale and that is, the colt is to remain in our hands and we are to show him for the remainder of the year, and under those conditions we let him go to a new owner. We also sold to Mr. Lewis, a five-gaited saddle mare, a mare which we have only owned a couple of weeks and I have really forgotten her name, but I think she is the greatest mare out this year.

As you know, we retired Astral King from the show ring two years ago; and while he is capable and able to defeat, I believe, any horse before the public today, at the same time we have no idea of re-entering him in any contest; but let some of these fellows who are parading a so-called champion, get to talking too loud, and in that event all we ask is sixty days' time to get the horse ready and we are willing to put up our money to back our judgment. It was interesting at the Tulsa show to see young Astral Kings contending and fighting right at the top for the ribbon. Such representatives as Polly Anna, The Crisis, I Am King, and two or three others. In fact, there was scarcely a ring called that there was not a representative of Astral King in it.

In this connection I want to say that this is a live bunch down at Tulsa, and we can look forward to a great show there in time to come. Those folks have the coin, and they will put on a show that is worth while. Personally, I had a good time and enjoyed it very much. We are well pleased and ready to go again, and look forward to the announcement of their next show. Yours very truly,

JAS. HOUCHIN.

Notes and News

The 1917 race meeting of the Mexico, Mo., Fair nd Racing Association has been called off. The fair ill not be abandoned but plans will be rushed to age a big show in 1918.

Walter Tryon, of Sacramento, is not saying much out his stable; but well informed horsemen who ave seen his horses work declare his will be one of e star strings out this year.

Frank Lieginger, Stockton's enthusiastic harness rse lover, is arranging to take his vacation in re- ys this year. Mr. Lessinger is fixing his business airs so that he can be present at least one day at l the good meetings in California this year.

The California Fair and Racing Circuit has an an- ouncement, in another column of this issue of the eeder and Sportsman, advertising twelve race meet- gs with very attractive purses. The conditions nd rules governing these meetings and also date of osing entries, where they are not announced will e advertised later on.

Some cleverly bred young trotters and pacers, just eady to go into training and with assured futures of uccessful careers, are offered for sale by E. Edstrom, 210—52nd Ave., Oakland, Cal. Horsemen in the arket for some youngsters of good class that can e bought worth the money should communicate with r. Edstrom at the above address at once.

B. F. Lavin of Fresno, who has been confined to sanitarium at Hanford since last January, at which me he suffered amputation of his right leg, the njury resulting from an accidental gunshot wound hile riding with a friend near Corcoran, is now aking a rapid recovery and his friends will be leased to hear that he expects to be out in a week r two.

Charles W. Paine, Secretary of the California Agri- ultural Society, was the first in California to adver- se a program for a race meeting this year. Sec- etary Paine is not only showing his efficiency in he racing department, but under his direction the tate Fair is growing larger and better each year n the educational value of its exhibits and the popu- arity of its amusements.

The Oakland Stadium Club's season of matinee aces will be opened with a banner program July 4, t which time the many good horses in training there vill make their first appearance. There are a dozen ood harness horses now at Oakland's track which re ready for the word and some good racing is as- ured when they come together. One that will be vatched with particular interest is Little Dick, which ecently was purchased by H. Olson and is showing plendid promise.

There are several places on the fair circuit nego- iating with the Pacific Coast Trotting Horse Breed- rs' Association for its annual race meeting this year, t which time the big futurity stakes are a promi- ent feature. Which ever place gets its will substi- ute the Breeders' program of big purses and stakes n place of the program that is now being advertised. t is expected that the matter will be settled within he next week.

The four standard-bred and saddle colts advertised by Oakridge Ranch, the property of Mrs. Winslow Anderson, have, through the medium of this paper, been sold. Mrs. Anderson intends keeping her mag- nificently bred stallion, Silkworthy. He has proven one of the most successful breeders in California. All the mares on the ranch this year have foaled by this good stallion and the yearlings and two-year-olds are showing such class as to cause the owner to take this handsome son of Morgan Axworthy and Clear Silk off the market.

California horsemen are fortunate in having an establishment like that of J. David West, of 1018 Fillmore street, San Francisco, where on short notice they can secure almost any kind of an accessory for their racing stable. Mr. West carries a complete line of Tuttle & Clark's high class togs and can fill any order, large or small. His advice to horsemen is, "Help him do his best by having proper equipment." He has a line of boots and hopples and can "fit" any horse.

John B. Stetson, who went East with the Midway Farm stable early last spring, and as eported in these columns, has severed connections with that farm, has sold his interest there and has returned to Eugene, Oregon, where he has opened a public stable. Of course the first horse he received on his return West was C. A. Harrison's May Day Hal, which he reports as being one of the nicest pacers he ever drove. Mr. Stetson sold Mr. Harrison's Grey Hal, the gelding he took East, to a well known Omaha horseman, who expects him to land at the top before the season is far along.

OBSERVATIONS AT THE WOODLAND MEETING.

Horsemen who have attended the most notable races in the country declared the new track was the best two-lapper they had ever seen. It was built under the direction of Loren Daniels and demonstrates that along with making speed demons he is one of the most capable track builders in America.

Owner Chas. F. Silva, who presented the new park to the citizens of Woodland, was on the job at all times and saw that every visitor was made to feel perfectly at home and as welcome as the flowers in May. More men like Silva would mean a new era in harness horse affairs.

Sacramento was represented by Chas. Paine, secretary of the State Fair, who was "whooping up" the big show; Walter Tryon, E. J. Weldon, Tom Holmes, E. C. Roeder, Dr. Delano and a score of others whose names we failed to get. The well known breeder, business man and booster of Lockeford, J. W. Wakefield, was one of the most interested visitors.

The horsemen's best friend in the State Legislature, Senator Benj. F. Rush, of Suisun, accompanied Secretary Paine of the State Fair and was on his toes from the first go until the finish of the last heat.

Frank Lessinger, J. N. Jones, Frank A. Murray, W. H. Parker and Jerry Aker were among the familiar Stockton visitors.

Every visitor from a distant town was invited to a picnic dinner and some well-to-do horsemen went so far as to accept two or three invitations and do justice at every spread. One of the most noted parties present was Elmo Montgomery's family, who evidently brought all the country ham and chicken Yolo county had to spare.

The San Francisco Driving Club attended in a body and were not only lively but conspicuous for their good-fellowship and enthusiasm. This association postponed its opening matinee in favor of the Woodland program. Among those in the party were: Geo. J. Giannini, Jack Welsh, J. J. Ryan, Frank Burton, J. Ginnochio, H. Campodonico, Bert Edwards, Fred Lauterwasser, F. P. Lauterwasser, S. Brown, J. Burns, Richard Pyle, and secretary W. J. Kenney.

U. A. Boyle, of San Francisco, a regular at race meets, was an interested visitor.

Little Jack, the attractive three-year-old son of Teddy Bear, whose good showing at Woodland Sunday was one of the features of the races, is, in the opinion of many good judges who were present, the making of one of the best horses ever produced on this coast. He is a chestnut of beautiful conformation, good legs and made for wear and tear. That he will be one of the leading winners of junior events this year, barring accidents, is assured.

Wingfield to Supply Cavalry Remounts.

George W. Wingfield, the wealthy and enthusiastic horseman of Reno, Nev., has volunteered to supply remounts for the United States cavalry, in case they are needed for war operations. He has over a hundred head of pure bred thoroughbreds, in addition to 500 mixed breeds at his Nevada Stock Farm at Reno, and they are at the call of the Government.

Wingfield predicts that other horsemen will assist by placing their aristocratic thoroughbreds at the disposal of the cavalry.

"In our appeal for favorable legislation to restore the racing game in various sections of the country we have pointed out the necessity to encourage the breeding industry, so that a high standard of horse would be raised for the cavalry," explained Wingfield. "It has been proved that the thoroughbred strain makes the best type of cavalry horses. Our thoroughbred stock was greatly depleted by reason of the adverse laws that were passed, but we have been building up in the last couple of years, until the breeders and horsemen are in a position now to assist the Government.

"I venture to say that the horsemen will be among the first to respond when the call for horses is issued. I have some 600 head at my stock farm at Reno and they are ready for the saddle."

The Nevada sportsman's offer will doubtless be welcomed. The allies sort of combed this country for horses and mules for the European conflict, and recruiting may prove difficult. Besides the 500 head of coldbloods, Wingfield boasts a string of as finely bred thoroughbreds as can be found in the Far West, if not in the United States.

Such well-known race horses as Celesta, holder of the world's record of 1:42¾ for one and a sixteenth miles; Slippery Elm, winner of four stakes at Tijuana this winter; Square Set, a candidate for the classic Kentucky Derby; Scarlet Oaks, Minnow, Star Shooter, Bank, Gladiola and a number of others have carried his popular colors to victory on the turf.

A Line From Phoenix, Ariz.

Dr. J. G. Belt, one of the foremost fanciers of the light harness horse sport of that section, will be represented at the more important half mile track meetings in Michigan and Ohio and also in the California circuits.

Waynetta 2:04¾, his fast pacing mare, now eligible to the 2:10 class events on the small ovals, and his trotting mare Lillian Van 2:11½, eligible to the 2:20 classes, have just been shipped to Mt. Clemens, Mich., and will be raced by Ted Bunch who last season made such a remarkable campaign with Zombrino 2:06¼, which Dr. Belt solt to Tommy Murphy and that is heavily staked through the Grand Circuit.

Dr. Belt has also sent to Farmer Bunch, at Stockton, Cal., the pacer Kildare 2:14¼, by Zombro 2:11; Jewel Tolus, a very likely four-year-old by Pactolus 2:12¾, and Caddie Russell, by Western Mack. These are to be raced at the Arizona State Fair at Phoenix in the fall.

C. A. Harrison Locates at Eugene, Oregon.

Our cover page this week shows that well known horse lover and hotel man, C. A. Harrison, with his newly aquired mare, May Day Hal, a five-year-old daughter of Hal B. 2:04 and full sister to the famous Hal Boy 2:01½. This picture was made ten days after Mr. Harrison had purhased her in Oregon, where she had been running with the "wild geese" for more than a year. She is raring to go, fresh, game and as sound as a bullet; and will take the place of Grey Hal which recently was sold by J. B. Stetson in the East. Mr. Harrison has recently purchased the Hotel Sneed, at Eugene, Oregon, and has taken possession of that popular hostelry. The hotel is being remodeled and brought up to the well-known Harrison standard, and when completed will be one of the best in the state. Mr. Harrison is one of the most successful hotel men in the West; having been in the business for many years and having established some of the best hotels on the Pacific Coast. Horsemen who wander into the Northwest and feel homesick will welcome this well known horseman back to his chosen profession; they will know where to head for when that dreaded feeling of homesickness overcomes them. Harrison has a way of looking after the "homeless" as well as the hungry.

LEXINGTON NOTES.

[By Jesse Shuff.]

The stable of trotters of W. B. Dickerman arrived the past week from Macon, Ga., in charge of Trainer Harry Fleming, who has the division of Mr. Dickerman's horses that will be sent to the races. The horses included the fast but erratic little stallion Bonington 2:04¾, half-brother to The Abbot 2:03¼, The Abbe 2:04 and The Hugenot 2:07¾, Tacita (2) 2:07¾, one of the fastest two-year-old trotters of last year; her sister Atlantika (2) 2:20¼ that beat 2:10 as a two-year-old in a race; Pony Express (3) 2:12¼, trial 2:10, and a number of others. The fastest work for any of the two-year-olds in the stable to date is 2:29½ for the colt, Willington, by Bonnington out of the great race mare Sweet Marie 2:02, winner of probably the hardest fought Transylvania ever trotted.

John Dickerson, who has charge of all Mr. Dickerman's horse interests, has had a division of the stable at Lexington, late in the winter. He has some nice youngsters, of which he is probably thinking more than any other at present in Jennifer, a bay filly by Bonington out of Zette by the former champion stallion, The Harvester 2:01, second dam Beatrice Bellini 2:08½, a good race mare herself, for Dickerson, and a sister to Carlo 2:09¼, and whose second dam produced Tokio 2:08¾.

Horsemen's attention is directed to the change of advertisement of J. Janson Jr., the enterprising horse goods dealer of Pleasanton, California, who announces something new in a Speedcut. Everything for the harness horse can be obtained in this up-to-date toggery. Mr. Janson also makes a specialty of mail orders for new goods and also for repairing.

Secretary A. L. Sponsler, of the Kansas State Fair, announces two purses of $500 each for 2:17 trotters and 2:17 pacers, on the three-heat plan, for the meeting at Hutchinson, the week of Sept. 17-21. So far as plans have been announced, this is the only meeting in the Kansas and Oklahoma Circuit to add such a feature to the program. Quite likely Oklahoma City will do something similar, as the association at that place has always planned to keep up with the procession.

A NEW EXCUSE.

Varied excuses have been made by mare owners for not breeding; but the following letter is a new one on us. The writer says she does not intend raising any more horses because horse thieves are no longer hung. The fact that horses have been stolen is good evidence they were of some use and value to some one. Some people have gone so far as to declare horses were no longer worth stealing. The letter follows:

"May 26, 1917.

"Breeder and Sportsman,
"City.

"Dear Sirs: It's all very well, you advising owners of mares to breed them; but listen: I traded an Airedale for a mare colt; raised her, had her broken and two months later she was stolen, cart and all, from a hitching post in Mill Valley. That was the last of her as far as I was concerned; but even now, two years after, I look at every bay filly with black points and a white star.

"Last year I bred a big mare to a $25 stud-fee stallion. Result, early in March she disappeared off the pasture, and I haven't located her yet. Some one is probably better off for a well-bred grade colt as she was due April 14.

"I have one mare left and I didn't breed her, and do not intend to do so. Since horse thieves are no longer hung, but do hang together, it doesn't pay to breed your mares unless you can spend the value of the colt guarding them.

"Sincerely
"HELEN P. ROSENBERG."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. ✤ ✤ ✤

Portland Club.—Eighteen nimrods took part in the practice shoot at the Everding Park traps of the Portland Gun Club May 20th. Two 15 and one 20-bird event were on the bill. F. C. Jackson and C. C. Schilling, professional, used 20-gauge guns. The scores:

J. W. Seavey 47, A. L. Zachrisson 42, Dr. O. D. Thornton 46, Gladys Reid 44, *C. J. Schilling 47, J. C. Morris 39, O. Woelm 41, A. L. Seguin 35, Mrs. Ada Schilling 46, J. S. Crane 26, F. C. Jackson 35, J. G. Kamm 39, H. B. Newland 44, *J. Reid 46, T. J. Mamoney 44, Dr. A. D. McMurdo 36, Charles R. Frazier 31, R. P. Knight 46. (*Professionals.)

Columbia-Willimette League—

	W.	L.	Pct.	Shot at.	Broke.
Woodburn	4	1	.800	625	575
La Grande	2	1	.750	500	467
Albany	2	1	.667	500	471
Salem	2	2	.500	500	451
Astoria	2	3	.400	625	553
Pendleton	1	3	.250	500	471
Oregon City	0	3	.000	500	442

Results on May 20—

Woodburn, 120; Pendleton, 113.
Oregon City, 119; Albany, 119.
La Grande, 121; Astoria, 117.
Salem remaining idle.

Woodburn managed to keep in the lead in the race for The Oregonian trophies and the championship of the Columbia-Willimette Trapshooters' Association as a result of the competition May 20th, but the La Grande Gun Club slipped up to second place in the team standing.

Among the individuals, eight managed to break 25 out of the 25 thrown to each. H. J. Stillman, of Pendleton; Oscar Wirkkala, of Astoria; P. B. Dodele, of Albany; Charles Gates, of Oregon City; Lou Rayburn and J. Beaver, of La Grande, and Charley Leith and Peter Whitney, of Woodburn, were the lucky nimrods to scatter 25 out of 25 targets.

Seattle Association.—Only one squad of shooters turned out for the program on Sunday, May 20, many of the club members spending the day on some stream or lake of this locality.

State champion, J. H. Hopkins, furnished the high score in both the fifty and the hundred-target races. Forty-eight and ninety-six were the scores registered for him. Ralph Kinzer and Hugh Fleming finished in second positions with forty-six and ninety-three to their credit.

Jack Lewis captured the second spoon in the series of prize shoots held by the club. Dr. C. L. Templeton finished his three hundred targets on the Hercules trophy race and with the total of 290 that he has this gives him the trophy. The race was held on the added bird handicap system.

Hi Everding of Portland, Oregon, was voted the first honorary membership ever extended any shooter from this club. The scores:

At fifty targets—J. H. Hopkins 48, Ralph Kinzer 46, Hugh Fleming 46, C. L. Templeton 44, J. B. Lewis 43, C. W. Bandy 40.

At one hundred targets—J. H. Hopkins 96, Ralph Kinzer 93, Hugh Fleming 93, C. L. Templeton 90, J. B. Lewis 80.

E. A. FRY, Secretary.

Weight of Airedales.—The following item in regard to size of airedales appeared in one of the daily papers during the recent Golden Gate show, and as it conforms to the requirements called for in the standard, and also gives the actual placings of dogs by well known authorities it should be of some interest to airedale breeders. The writer, who evidently had some knowledge of the breed, says:

"Conforming closely to decisions made a year ago by W. J. Phillips of England, at San Jose, Judge George S. Thomas of Boston sent a thrill through Airedale fanciers at the local dog show. Both men picked the smaller dogs and swept the ring of those many pounds over the weight called for under the standard of 40 to 45 pounds and slightly less for bitches.

With Phillips as an authority in England and Thomas holding a similar position in this country on the terriers, the decisions made hade a wide importance to lovers of this breed of dogs. So closely did Thomas follow the picking of Phillips that Medway Cadet and Medway Admiral, two brothers, whom Phillips placed first and second at San Jose, Thomas put in relatively the same position but put over them Tintern Star.

They were sifted out by Thomas from their several classes and placed side by side as Phillips had judged them a year ago. Medway Cadet weighs 43 pounds and Medway Admiral 47 pounds. Tintern Star weighs in between these two, while the winning bitch, Bilmer Fol de Rol, that was given first place by Thomas, was also well within the standard called for.

Local judges have been stretching the weight until California has two 60-pound champions and the public generally has been led into overlooking the standard and into the belief that 50-pound and 60-pound dogs were the correct type.

Tacoma Fly-Casting.—Members of the Bait and Fly Casting Club held their first home competition at Point Defiance Park on May 20th and some good scores were registered. A good turnout was present, including E. N. Faulk of Aberdeen, who expects to organize a similar club there. Results of the one-half ounce distance bait casting were as follows:

W. J. Bailey, 122 feet 6 inches; E. N. Faulk 117 ft. 10 in.; C. R. Werner 110 ft. 1 in.; B. B. Perrow 105 ft. 6 in.; H. J. Nason 105 ft. 2 in.; Ralph Hutchinson 100 ft. 7 in.; D. E. Gilkey 97 ft., Carl Coon 52 ft., W. L. Richards 41 ft.

The one-half ounce bait accuracy casting results were (per cent): H. J. Nason 98.7, William J. Bailey 97.5. B. B. Perrow 97.2, C. R. Werner 96.9, D. E. Gilkey 95.5, Ralph Hutchinson 95.3, Carl Coon 94.3, E. N. Faulk 91.6, W. L. Richards 91.3.

Accuracy fly, light tackle—C. R. Werner 98.1, W. J. Bailey 97.2, B. B. Perrow 96.3, H. J. Nason 95.3, Ralph Hutchinson 95.4.

Coalinga Club.—Scores at the registered tourney of the Coalinga club on May 6th follow:

W. Hawkins 151, R. E. Boles 178, Guy Lovelace 188, C. O. Barieau 182, H. Ogilvie 189, D. Ostendorff 188, Ed. Garratt 170, W. E. Mullen 187, W. G. Harris 192, E. W. Bailey 182, Roy J. Avery 179, F. E. Boutadelli 165, F. Curtis 186, J. W. Meek 189, E. N. Ayers 163, T. Rutherford 77x100, W. W. Smith 176, C. A. Hively 76x100, L. W. Slocum 182, W. J. Eilert 171, G. A. Adams 182, J. L. Martin 177, C. Yocum 180, F. F. Hostetter 186, R. N. Fuller 186, W. E. Savateer 189, F. Appling 180, J. M. Bateman 119x160, H. Aley 149, Frank P. Louis 149, G. F. Patterson 141, G. T. Mountford 135x180, T. P. Smith 157, E. H. McMahan 186, A. P. Mitchell 159, W. J. Ochs 124, J. Rutherford 186, L. L. McCrea 160, W. H. McKissick 181, M. B. Fink 161, E. W. Rudolph 150, J. McKeon 148, J. C. Jones 79x100, C. E. Haliburton 89x100.

Professionals—J. R. Brennan 164, G. E. Oliver 153, C. McNeil 165, L. S. Hawxhurst 190, R. C. Reed 196, J. A. Cook 173, C. A. Haight 173, W. E. Willett 182.

Eureka Club.—Scores set at the registered tourney of the Eureka Blue Rock Club on May 13 were as follows: Fred S. Bair 138, Geo. K. Coleman 118, J. M. Hutcheson 130, C. O. Falk 125, H. T. Hinman 121, E. V. Falk 142, I. C. Goff 123, H. Kelly 120, P. M. Burns 108, I. A. Russ 130, H. H. Buhne 95x130, W. H. Menchel 113, W. E. Innes 91, C. C. Falk 55x70, H. A. Hine 125, J. M. Carson 48x70, W. S. Clark Jr. 57x95, L. Everding 7x20, E. J. Robinson 33x40, J. E. Locke 16x20, F .A. Cutler 46x80.

Professionals—C. A. Haight 126, M. O. Feudner 134.

YEAR-ROUND OPEN SEASON ON TROUT.

Commissioner Bosqui Tells of the Changes in Law That Will Benefit the Anglers.

Those among local anglers who took delight casting for steelheads in the tidal lagoons at t mouths of the up-coast rivers will rejoice to he that the fish and game commission, after careful co sideration, acceded to the general desire of Ventu and Santa Ynez fishermen by giving them an op season in the winter.

Commissioner Bosqui believes the limit of five fi imposed and the forbidding of all but hook and li methods will minimize the damage incidental to a taking of spawning fish, particularly as the roil condition of the water in most seasons will preve any large catches of steelhead.

"We are distributing fish hatched with the anglin licensees' dollars," says Mr. Bosqui, "and they shou be given a chance to catch them within proper limi when they can be had. This will allow a man to g a fine fish or two for his family, and gives all a mo est chance at these large trout. We do not think an great number will be caught, but a few of such fis go a long way. Catching one is an achievement i the life of an angler, an experience, and the fish a in prime condition."

This virtually gives a year-round open season o trout for the man willing to travel up the coas where he can fish in the winter. The law does nc discriminate between the steelhead and rainbo forms of the native trout, but limits the catch to fiv fish per day during the special so-called "steelhea season."

No change is made in the opening seasonal date affecting the mountain lakes. The present May firs is too early such years as this.

The entire fish and game commission met in Lo Angeles last week with Commissioner Connell an made a definite plan to handle the trying Bear Valle spawning situation.

There actually are too many fish to be able to ge up the scanty creeks tributary to Bear Lake. Th state's plantings have succeeded wonderfully well Nature has become too wasteful and the commissio has planned to make such changes in the mouths o the creeks as will stop the loss of fish experience this year.

It is also decided to take the maximum possibl number of rainbow trout eggs in Bear Valley hence forth. Millions are certain to be lost if the creek are not changed. Many fish cannot enter the creek at all and lose their spawn in the lake, where th infant mortality is enormous. Probably the plan t take all eggs possible will work out in saving to th state the surplus wastage of the present, as all th fish which can spawn naturally will have a chanc to do so, eggs being taken from the remainder, whic are largely a dead loss under existing conditions.

Superintendent of Hatcheries W. H. Shebley is de tailed with Deputy Pritchard to fully survey the sit uation and he will draft a comprehensive plan a once.

S. F. Fly-Casting Sores.—E. N. Borg secured the highest percentage in the medal contests of the San Francisco Fly Casting Club held at Stok lake on Sunday. In the accuracy, delicacy and lure casting events Borg led all the field. Results of the competition were:

SATURDAY, MAY 26.

Judge—W. J. Davis Jr. Referee—W. D. Mansfield. Clerk—H. L. Ellsworth.

Green Lake Club.—While only sixteen trapshooting artists faced the traps at the Green Lake club on May 20th, a very enjoyable program was run off. Dr. King, who led the field at Everett, was the high man for the day, making forty-eight. C. W. Salter won the weekly sterling silver spoon with forty-five to his credit.

A surprise was sprung on the members when Geo. B. and Don R. Baker presented the club with a handsome diamond trophy made into the form of a blue-rock target. The scores, at 50 targets:

Dr. King 48, L. S. Barnes 46, C. W. Salter 45, C. B. Fitzgerald 44, Dr. A. B. Kidd 44, G. A. Conklin 44, S. A. Martin 40, Dr. M. A. Winningham 30, C. Chantrell 39, C. R. McConnell 37, M. A. Rosenfield 35, E. Smith 35, J. W. Geltz 35, Dr. E. C. Lanter 32, George B. Baker 30, F. F. Gearheard 29.

Sportsmen's Row

Eureka and Fresno had a squad of crack shots represented and took part in the entire program.

✤ ✤ ✤

Bill Eilert of Fresno was one of the first on the grounds and he was in the thick of the firing.

✤ ✤ ✤

Frank Templeton, champion of the Portland Club, is a stocky individual, and he shows that he knows how to bust the birds.

✤ ✤ ✤

Denny Holohan, of that family of trapshooters, traveled from Burley, Idaho,—something like 1300 miles—to be on hand for the fun.

✤ ✤ ✤

N. A. Howard motored down on Sunday and gave a good account of himself. He is one of the enthusiastic boosters for the alluring sport about the bay.

✤ ✤ ✤

R. H. Bungay is still trying for a Pacific Coast handicap. Twice he has been runner-up and at all the events he has been right in the running.

✤ ✤ ✤

Melrose Dude, Mrs. A. G. Wilkes' setter that won a series of championships up and down the Coast, died recently. The loss was a blow to his fair owner.

✤ ✤ ✤

George Thomas came down by auto to take in the sport Sunday morning. He was in good form but did not enter the regular events as he was forced to leave early.

✤ ✤ ✤

Mrs. A. G. Wilkes is showing improvement in her shooting. The dainty little lady no longer loses her temper when a dodging target misses her fire but levels on the next one.

✤ ✤ ✤

A. G. Wilkes recovered from the illness that forced him to quit shooting in the state tourney, as he stepped out on Sunday and broke 93. The trip to New York seems to have improved his aim.

✤ ✤ ✤

Mrs. Ada Schilling was given a royal reception to her old home at San Jose, and to show her appreciation stepped to the traps and broke 93 on Sunday. She is certainly the wonder of the world for her inches.

✤ ✤ ✤

While Mrs. Schilling is the champion smallest shot in the world, claims are set forth for G. T. Tuckett for the other honors. He weighs somewhere over 300 pounds. A newspaper photographer present could not resist the temptation to take a picture of the pair.

✤ ✤ ✤

The Alameda Elks' Gun Club is booming the big registered tournament that will be staged on the Alameda grounds tomorrow, June 3. There will be some practice events today. The Elks hope to attract a number of the out-of-town visitors who took part i nthe Pacific Coast handicap.

✤ ✤ ✤

T. E. Doremus, president of the Interstate Association, sent a telegram with the regretable news that his wife was seriously injured in an automobile accident in Wilmington, Del., making it impossible for him to be in attendance at the Pacific Coast Handicap. Coast shooters sympathize with Doremus and trust that the accident is not serious.

✤ ✤ ✤

It is a pleasure to witness Elmer E. Shaner, treasurer and manager of the Interstate Association, handle a tournament. To begin with, he has the confidence of every shooter on the grounds and he conveys the idea that he knows what he is doing. Mr. Shaner was given an enthusiastic reception by the Californians. He is going to pay a visit to Los Angeles to look over the Vernon and Los Angeles clubs and will return to make a short stay in San Francisco.

✤ ✤ ✤

Hi Everding and that live bunch from Portland whopped up affairs all during the tournament. We have heard much of those Northwest boosters and can realize now why the game is going ahead so rapidly up in that section of the country. They shoot for the love of the sport and get plenty of pleasure out of it, at the same time seeing to it that everyone else has the same.

F. C. Riehl, the Tacoma professional who is a veteran at the traps, has a peculiar habit. After firing he takes a funny little duck with his head. They say it is a habit that was left from the days of black powder, when the boys had to look from under the cloud to see whether they had hit or missed.

✤ ✤ ✤

H. R. Everding, who presented the club with trophies recently competed for at the club, strolled in last week, surprising everyone, as it was expected that he would make his appearance Sunday at San Jose at the Pacific Coast handicap tournament. He was given a surprise in turn. After making a speech, that had it on anything Bryan or Rossevelt ever attempted, Secretary Fred H. Teeple presented Everding with a life membership card to the local club, a handsome and beautiful token, a rectangle of gold with inlaid silver engraving.—Los Angeles, Cal.

THE PACIFIC COAST HANDICAP

OVER 100 IN THREE DAY TOURNEY AT SAN JOSE

Practice Day, Sunday.

Practice day on Sunday did not open under auspicious surroundings. There was a dismal day to begin with and in the afternoon the wind blew a young gale to make target-smashing a difficult feat for the eighty-five gunners who entered.

Otherwise the Pacific Coast Handicap was ushered in with a hurrah. The San Jose grounds presented a gala appearance with twenty to thirty machines parked in front of the traps and with the fun-making going on all around.

The competition on the one hundred practice targets brought about a big surprise when M. F. Leffler of Stockton came out with the fifteenth squad and broke 98, after missing two out of his first frame. Two years ago at Modesto Leffler jumped into prominence by winning the Modesto tourney as an unknown. He was in rare form and shot like a good one. Frank Troeh and R. H. Bungay were considered to have the honors won with scores of 97. S. A. Bruner, C. H. Nash and Frank H. Mellus had 96 apiece. Many of the cracks fell down in the gale.

F. C. Riehl, the stocky southpaw from Tacoma, veteran of many a tourney, came down in time to trim a select field of professionals with 98. Hugh Poston and Al Cook were right up there with 97.

One of the sensations of the afternoon was the wonderful shooting turned in by Mrs. Ada Schilling, the fair ninety-pound Diana, who returned to her old shooting grounds to break 93, beating out several scores of the men contestants. Mrs. A. G. Wilkes, the other lady contestant, got 81. The scores:—

W. S. Pease 94, W. A. Cornelius 93, L. M. Packard 95, F. C. Riehl* 98, J. A. Cook* 97, H. Pfirrmann 90, F. H. Mellus 96, R. H. Bungay 97, F. Newbert 91, G. Holohan* 89, R. C. Reed* 96, G. Lovelace 91, C. H. Nash 96, H. P. De Mund 88, S. A. Bruner 96, W. F. Willett* 89, W. J. Eilert 92, L. W. Slocum 94, J. L. Martin 85, G. J. Tuckett 86, L. H. Reid* 95, T. Wilkes 91, F. Troeh 97, A. G. Wilkes 93, Hugh Poston* 97, W. H. Varien 91, J. W. F. Moore* 58, B. L. Quayle 81, G. Gardner 84, F. S. Bair 90, Mrs. A. G. Wilkes 81, V. A. Rossbach 81, H. R. Everding 88, R. P. Knight 81, H. C. Peet 74, B. Worthen 93, F. W. Stall 91, W. J. Higgins* 83, W. H. Whitcomb 94, G. E. Stall 91, F. Templeton 87, E. H. Keller 84, J. W. Seavey 89, Bud Kompp 84, W. McCornack 85, W. Mullen 85, L. F. Mellus 93, F. K. Burnham 85, J. F. Dodds 89, G. H. Anderson 90, J. F. Cowan 84, O. A. Evans 91, G. I. Fleckenstein 82, J. B. Rickey 91, H. W. Cline 86, M. Siddall 93, H. P. Jacobsen 86, C. L. Templeton 92, D. I. Holohan 92, L. Hawxhurst* 95, J. Famechon 82, Ed Garratt 93, H. E. Sargent 90, D. Ruhstaller 79, C. O. Falk 86, H. T. Hinman 74, G. K. Coleman 90, P. M. Burns 77, J. M. Hutchison 83, G. E. Oliver* 75, J. G. Heath* 72, Mrs. Ada Schilling 93, N. A. Howard 84, P. J. Holohan* 98, Dr. Prestly 94, C. A. Haight* 86, H. McLachlan 90, C. M. Arques 85, E. M. Sweeley 94, L. J. Mook 70, R. S. Avery 94, A. B. Jamison 30x 50, J. French* 44x50. (*Professionals.)

First Day, Monday.

Despite a heavy rain, Monday, high scores were made in the official opening shoot. All the expert shots expressed high satisfaction at the results, particularly in view of the rain and a driving wind and the general climatic conditions on the targets.

In the Pacific Coast Introduction, which was the main event of the day, the professional match was won by Hugh E. Poston of San Francisco, who broke 98 out of a possible 100 birds. F. C. Riehl was second with 97, and L. S. Hawxhurst, San Francisco, and P. J. Holohan, Portland, tied for third place with 96.

The amateur title in the same event was carried off by H. Pfirrmann Jr. of Los Angeles with 97. C. H. Nash of San Jose was second with 96. Nash and Halliburton of Lindsay tied for this event, and in the shoot-off Nash broke 19 out of 20 birds and Halliburton 18.

In the ten pairs of double targets (professional) Hugh Poston was winner with sixteen out of ten pairs. L. S. Hawxhurst broke 14 and G. E. Holohan, Los Angeles, 11.

The amateur contest was won by Frank Troeh, Vancouver, with 17; H. E. Sargent, Los Angeles, second with 16, and Frank Stall, Winnemucca, Nevada, third with 15.

More than 10,000 shots were fired. In the 140-target race H. E. Poston won with 138; P. J. Holohan 136, and F. C. Riehl 134. They were the winners in the professional class.

Five amateurs tied for first place in the same event with 134 birds to their credit out of a possible 140. They were H. Pfirrmann Jr., Los Angeles; Harry Ogilvie, Lindsay; W. S. Pease, Elko, Nev.; C. H. Nash, San Jose, and H. Lorenson, Newman.

M. T. Leffler, Stockton; H. P. DeMund, Phoenix, Ariz.; F. M. Troeh, Vancouver, tied for second with 133. C. Yocum, Tulare, and E. M. Sweeley, Twin Falls, Idaho, tied for third with 132.

Scores, at 140 targets:—

V. Rossbach 118, J. F. Cowan 123, Thos. Wilkes 127, W. Becktell 58, Chas. Yocum 132, F. Burnham 121, F. W. Stall 126, *W. J. Higgins 122, F. C. Riehl 134, G. E. Stall 107, C. O. Falk 122,, H. G. Hinman 107, G. Coleman 108, J. Hutcheson 117, P. M. Burns 116, *L. Hawxhurst 131, S. A. Bruner 129, Ed Garratt 126, M. T. Leffler 133, J. Famechon 126, W. F. Willett* 115, W. J. Eilert 127, L. W. Slocum 126, J. L. Martin 105, G. J. Tuckett 111, O. Council 123, O. A. Evans 131, W. Whitcomb 129, H. E. Sargent 128, *G. E. Oliver 114, Mrs. Wilkes 108, H. W. Cline 113, *J. W. F. Moore 96, A. P. Haliburton 131, W. H. Varien 129, *C. A. Haight 120, D. Holohan 129, R. P. Knight 105, C. Templeton 123, E. Sweeley 132, W. McCornalk 125, Bud Kompp 123, M. Siddall 127, Mrs. Schilling 126, J. V. O'Hara 115, A. M. Barker 129, J. G. Clemson 96, G. Gardner 124, Bill Quayle 123, F. Hostetter 116, *P. J. Holohan 136, J. W. Seavey 127, E. Keller 128, F. Templeton 128, H. Everding 125, W. E. Doubles, ten pairs—Charles Yocum 12, F. Stall 15, G. E. Stall 12, *L. S. Hawxhurst 14, S. A. Bruner 14, Ed Garratt 11, M. F. Leffler 13, J. L. Martin 12, O. A. Evans 12, H. E. Sargent 16, H. W. Cline 8, A. P. Halliburton 10, D. Holohan 14, R. P. Knight 10, E. M. Sweeley 14, W. McCornack 14, J. W. Seavey 11, F. Templeton 12, H. P. Jacobson 10, D. J. Ruhstaller 14, G. T. Fleckenstein 12, Guy Loveloce 12, H. Ogilvie 10, H. Pfirrmann 14, F. H. Mellus 13, *G. Holohan 11, F. Troeh 17, A. G. Wilkes 13, *H. Poston 16, H. McLachlan 14, F. Bair 9, L. M. Packard 13, G. H. Anderson 12. (*Professionals.)

Competition started among the two-men teams for the diamond pins set up by Fred Teeples of the Los Angeles club. The scores were:

C. H. Nash 134, H. Lorenson 134, total 268; H. Ogilvie 134, A. P. Halliburton 131—265; R. H. Bungay 130, M. F. Leffler 133—263; H. P. DeMund 133, L. M. Packard 130—263; D. J. Holohan 129, E. M. Sweeley 132—261; F. Troeh 133, James Seavey 127—260; W. H. Varien 129, A. M. Barker 129—258; O. A. Evans 131, Owen Council 123—254; W. A. Cornelius 126, H. E. Sargent 128—254; L. W. Slocum 126, W. J. Eilert 127—253; S. A. Bruner 129, J. F. Dodds 124—253; E. H. Keller 128, H. R. Everding 125—253; A. G. Flickinger 123, W. H. Whitcomb 129—252; C. L. Templeton 123, Frank Templeton 128—251; Charles Yocum 132, V. A. Rossbach 118—250; W. S. Pease 134, F. F. Hostetter 116—250; Mark Siddall 127, Bud Kompp 123—250; Guy Lovelace 130, R. S. Avery 119—249; A. G. Wilkes 122, Frank Stall 126—248; G. H. Anderson 129, L. R. Mellus 118—247; G. Gardner 124, B. M. Quayle 123—247; F. S. Bair 124, C. O. Falk 122—246; F. M. Newbert 120, H. P. Jacobson 123—243; W. E. Mellus 120, George Ellis 119—239; H. Pfirrmann 134, F. H. Mellus 130—234; Tom Wilkes 127, George Stall 107—234; H. Cline 113, F. K. Burnham 121—234; Mrs. Wilkes 108, Mrs. Schilling 126—234; F. Ruhstaller 117, G. Fleckenstein 116—233; H. McLachlan 123, C. Arques 109—232; W. McCornack 125, R. P. Knight 105—230; J. M. Hutchinson 117, J. N. Coleman 108—225; Dr. J. L. Martin 105, G. J. Tuckett 111—216.

Long runs were as follows—M. T. Leffler 85, J. A. Cook 68, Henry Prrmann 67, H. P. DeMund 60, Dennis J. Holohan 56, L. W. Slocum 54, P. J. Holohan 54, S. A. Bruner 50.

F. C. Riehl* 77, W. S. Pease 69, F. C. Riehl* 67, H. E. Poston* 65, 57; C. H. Nash 54, 52.

Second Day, Tuesday.

Colonel H. R. Everding, of Portland, Oregon, took the preliminary handicap in the second day of the Interstate Association trapshoot. He had a handicap of 18 and shot a score of 98. D. McFadden of Salinas took second gun with a handicap of 16 and a score of 95. L. R. Mellus of Los Angeles, handicap 17, and H. P. DeMund of Phoenix, handicap 19, tied for third gun at 94, Mellus taking the place on the shoot-off of 25 with 23 against 21 by DeMund.

The sensation of the day was the shoot-off between R. P. DeMund of Phoenix, Arizona, and A. G. Flickinger of Vallejo in the Pacific Coast Special. O. A. Evans of Los Angeles took high gun in this event with a score of 99. DeMund and Flickinger eliminated a field of six men, all tied at 97, by tieing with 25x25. On the second shoot-off DeMund took second gun by shooting 24 against 23 by Flickinger.

Among the professional shots H. Poston of San Francisco made a perfect score in the Pacific Coast Special, shooting 100x100. F. C. Riehl of Tacoma, Wash., took second gun with a score of 98. L. Reid of Seattle was third with 96, P. J. Holohan of Portland 95, and R. C. Reed of San Francisco followed with a score of 94.

C. H. Nash and H. Lorenson dropped to third place from first in the two-man team contest for the blue rock diamond pins. H. Ogilvie and A. P. Halliburton went into first with a score of 299; H. P. DeMund and L. M. Packard, who were in third place, took second high score with 296. Nash and Lorenson

(Continued on page 10.

(Continued from page 9.)

made a team score of 289 with their totals of the day previous.

In the DuPont long-run series R. P. DeMund holds a score of 113, while H. E. Poston holds an unfinished score of 157.

When Colonel H. R. Everding took first gun in the Preliminary Handicap a wave of satisfied applause swept over the grounds. Colonel Everding is one of the most popular shooters attending the tournament and his win was one of the most popular events of the shoot. Colonel Everding has been one of the most ardent supporters of trapshooting in the Northwest and has put up a number of valuable trophies to encourage the sport.

It was around the Pacific Coast Special that interest centered during the late morning and early afternoon. In this event O. A. Evans took first gun with 99x100. For second place all of the following men tied with 97x100: C. H. Nash, San Jose; A. P. Halliburton, Lindsay; A. G. Flickinger, Vallejo; R. H. Bungay, Ocean Park; F. H. Mellus, Los Angeles; F. Troeh, Vancouver, Wash.; H. Lorenson, Newman, and R. P. DeMund of Phoenix, Arizona.

In the first shoot-off all men were eliminated except DeMund and Flickinger, who tied with 25x25 each. The shoot-off between these two resulted in DeMund winning with 24x25 against 23x15 by Flickinger. The scores:

DeMund 19—94.

Third Day, Wednesday.

The tourney closed in a blaze of glory on Wednesday with one of the closest races ever witnessed deciding the feature, the Pacific Coast handicap. Four tied in the regular program of 100 targets with scores of 95. Then came sensational shoot-offs to determine the winner of the championship.

Charles Yocum of Tulare stepped forward to break 23 out of 25 and the laurels were conferred on him. It was in the nature of a complete surprise, as Yocum along with H. McLachlan, D. C. Davison and Dr. J. L. Martin were not reckoned among the favorites the morning of the shoot. Yocum is well and favorably known among the gunners around Tulare but he has taken part in but few outside events and he was accordingly somewhat of a "dark horse."

No less surprising was the capturing of second place by young McLachlan of San Jose. This lad has been going to the traps but a little over a year and the form he showed was rather remarkable. He was on the 17-yard mark while C. Yocum banged with yards behind. McLachlan and Davison tied at 22x25 and the lad broke 23x25 to win.

D. C. Davison of Modesto was another 18-yard man and he beat out Dr. Martin for the honor of getting third place. Many of the cracks such as Heine Pfirrmann and Frank Templeton, previous handicap winners; Frank Troeh, Frank H. Mellus, A. G. Flickinger and the cracks from the Northwest, were rather out of the running.

H. Ogilvie of Lindsay furnished the sensation of the day by breaking 100 straight targets in the Pacific Coast overture. H. Lorenson was second with 99 and F .Troeh third. Troeh lost the shoot-off.

H. Ogilvie and A. P. Halliburton, both of Newman, won the two-man team championship of the tournament with a score of 1004. A. G. Flickinger of Vallejo and W. H. Whitcomb of Los Angeles were second with 995

F. C. Riehl of Tacoma was high professional in the Coast handicap with 92. H. Poston went a 100 straight in the overture.

The high professional average for the entire tournament was carried off by Hugh Poston, with 338 out of a possible 340 birds.

The second place was a tie between Frank Riehl and P. J. Holohan, 326 each.

L. Reid scored with 321, Al Cook 319, Dick Reed 319 and Len Hawxhurst with 315.

The high amateur average was a tie between H. Lorenson and Harry Ogilvie with 330 out of 340 targets. Frank Troeh was second with 329 and Charles Nash third with 327.

Weather conditions were good for the morning's shoot but in the afternoon a high wind blew, making good scores impossible.

The long run of the shoot was made by Hugh Poston, with an unbroken run of 257 targets. The highest score made in the handicap by a woman shooter was 83 out of 100 targets, won by Mrs. Ada Schilling of Portland, formerly of San Jose. The yardage winners were:

16-yard handicap, G. R. Colman, Eureka, 94.
17-yard handicap, M. Siddall, of Salem, Ore., 94.
18-yard handicap, W. H. Whitcomb, Pasadena, 94.
19-yard handicap, B. H. Worthen, San Francisco, 91.
20-yard handicap, R. B. Bungay, Ocean Park, 88.
21-yard handicap, H. Pfirrmann, Los Angeles, 86.

The scores:—

PACIFIC COAST HANDICAP WINNERS.

Pacific Coast handicap won by Charles Yocum, Tulare, 18 yards, 95x100; H. McLachlan, San Jose, 17 yards, 95x100, second; D. C. Davison, Modesto, 18 yards, 95x100; F. C. Riehl, Tacoma, 21 yards, 92x100. High professional Pacific Coast overture won by H. Ogilvie, Lindsay, 100x100; H. Lorenson, 99x100, second; F. Troeh, 99x100, third; Hugh Poston, 100x100, High Professional.

High for tourney—H. Lorenson and H. Ogilvie, tied with 330x340; F. Troeh, 329x340, second; C. H. Nash, 327x340, third. Hugh Poston, 338x340, high pro.; F. C. Riehl and P. J. Holohan, 326x340, tied for second.

Preliminary handicap won by H. R. Everding, Portland, 18 yards, 98x100; D. McFadden, 16 yards, 95x100; L. R. Mellus, 17 yards, 94x100. H. Poston, 22 yards and R. C. Reed, 22 yards. high pros with 93 apiece.

Coast Special won by O. A. Evans, Los Angeles, 99x100; R. P. DeMund, 97x100, second; A. G. Flickinger, 97x100, third. H. Poston, 100x100, high pro.; F. C. Riehl, 98x100, second, and L. H. Reid, 96x100, third.

Coast Introduction won by H. Pfirrmann Jr., Los Angeles, 97x100; C. H. Nash, 96x100, second; A. P. Halliburton, 96x100, third. H. Poston, 98x100, high professional; F. C. Riehl, 97x100, second; L. S. Hawxhurst and P. J. Holohan tied for third, 96x100.

Doubles won by Frank Troeh, Vaucouver, Wash., 17x10; H. E. Sargent, 16x20, second; Frank Stall, 16x20, third. Hugh Poston, 16x20, high pro.; L. S. Hawxhurst, 14x20, second; Guy Holohan, 11x20, third.

Practice day events won by M. F. Leffler, Stockton, 98x100; Frank Troeh and R. H. Bungay, 97x100, tied for second; F. C. Riehl, 98x100, high pro.; J. A. Cook and H. Poston, 97x100, tied for third.

Teeple Diamond handicap, two men team—H. Ogilvie, 506, and A. P. Halliburton, 498, total 1004. A. G. Flickinger 492, and W. H. Whitcomb 503, total 995. R. H. Bungay 497, and M. F. Leffler 496, total 993.

Bingham (Utah), Shoot.—Scores of the Utah State Sportsmen's Association at Bingham, Utah, on May 6th follow:

One hundred and fifty targets—W. H. Mitchell 141, C. H. Reilley Jr. 134, A. R. Bain 113, G. S. Moffat 136, G. Bishop 138, G. L. Becker 143, A. L. Nelson 141, C. L. Bray 122, E. E. Smith 124, H. W. Heagren 123, E. W. Nepple 99, A. S. Winther 132, E. B. Heagren 136, H. A. Luff 122, O. W. Owen 93, W. H. Siddoway 133, Jos. Ruttle 116, J. S. Neilson 96, J. F. Irvine 140, Pat Anderson 41x75, C. Siddoway 31x45, Robt. Hasolone 97, J. Browning 130, A. P. Bigelow 137, E. Ford 125, W. H. Draney 117.

Professionals—L. A. Cummings 141, F. J. McGanney 109, D. N. Hood 132, W. F. Koch 22x45.

BETTER LIVE STOCK
and Agricultural Topics

The extent of the growth of the live stock feature of the Butte County Fair may be realized when it is stated that last year there were only two hog barns while this year the number had grown to five. Two pens were provided for cattle and horses, whereas last year there was only one.

✤ ✤ ✤

Mayor James Rolph of San Francisco was at the Chico Fair not only to meet old friends and to make new ones, but to stock up his ranch at Menlo Park with some pure-bred animals. Besides buying a Chester-White sow with a big litter of pigs, he purchased two prize winning Jersey cows from S. F. Williams of Orland. These heifers not only were winners at the Chico Exposition but also had taken prizes at the Panama-Pacific Exposition.

✤ ✤ ✤

And rank on rank uprising
The tyrants' wrath to foil,
We see the working army
Of the Soldiers of the Soil!

Without the American farmer, all the fighting that could be done by the soldiers and sailors of this and the Allied nations would be fruitless.

Without the food which his skill and labor this year will add to the world's supply, everyone would have to join forces against starvation, and the things for which men have striven through the ages would go down in the dust.

✤ ✤ ✤

The Packer's Viewpoint.

A treatise on hog raising from the viewpoint of the packer, has been compiled and is being sent out to the swine raisers of the country by Armour and Company. The booklet is the work of E. R. Gentry, general hog buyer for Armour and Company, assisted Dr. R. J. H. DeLoach, director of Armour's Bureau of Agricultural Research and Education. It is not intended to supplant the excellent treatises on swine breeding put out by the government and by other learned authorities; on the contrary it is designed to make those works more valuable to the man who desires to raise hogs for the market.

It describes the various classes and grades which are standard at the various big markets and explains the types which the packers are most anxious to get and for which they will pay the highest prices. The various cuts and the dressing percentages from the different grades are described and their bearing on the market values shown. The booklet is in no sense aimed to induce the farmers to turn toward certain breeds of swine, the intent being merely to acquaint the hog raisers with the needs of the pork packer.

The losses borne by farmers as the result of disease among the droves is dwelt upon and advice is given on how to minimize this loss. A chapter is devoted to the matter of government inspection and another to the interesting by-products phase of the industry.

Sale Averages $209.

The average of sixteen bulls auctioned by the California Breeders Sales and Pedigree Company at the Butte County Spring Exposition Thursday of last week was $209. The total for the sixteen offered to the dairymen was $3,347.

Among the buyers was Richard H. Brown, manager of the Red River Lumber Company at Westwood. Brown paid $350 for Segis Pontiac De Kol Aagie, consigned by the Bridgford Company of Knightsen. This animal was junior champion at the exposition.

The Red River Lumber Company has an extensive agricultural department incidental to its other business. It has a dairy of about 300 cows and the young bull was purchased for the herd. The lumber concern also has about 1,000 head of beef cattle which are ranged entirely to supply beef for the lumber camp.

There was considerable surprise at the price bid on Manteca Glista Pietje of the Henderson herd, Sacramento. George P. Robinson bid $475 on the animal. Charles Little of Red Bluff bought Natoma Camino Korndyke, an animal consigned by Fred W. Kiesel of Sacramento. S. H. Carr of Salinas was an unexpected buyer, paying $245 for the bull Prince Gelsche Walker Mechthilde, consigned by A. W. Morris & Sons Corporation of Wooodland.

J. G. Bartello of Napa paid $145 for Toyon King Pontiac Boskadel, consigned by Toyon Farm of Los Altos.

The sale was conducted by Charles L. Hughes and Colonel Ben A. Rhoades of Los Angeles was the auctioneer. Among the buyers other than those mentioned were the following: Frank Huskee of Chico, O. M. Butts of Modesto, J. H. Linbarger of Orland, George Puetro of Turlock, Maurice Rucker of Sacramento, H. Hale of Chico and J. H. Richardson of Richardson Springs.

Seeks to Abolish Dehorning.

The suffering caused thousands of cattle each year as a result of dehorning has led the State Humane Association of California to make an effort to stop the practice. It is claimed dehorning has been growing in favor due to a popular belief that dehorned cattle graze better, fatten more easily and sell for a higher price than horned cattle. The Association asserts, however, that the lives of many animals are lost through the operation, as not infrequently infection sets in and, unless attention is given promptly, the results are serious. The horn of a grown animal is known to contain a mass of sensitive tissues, the severing of which causes acute pain, and, in every case, suffering of intense character.

The growth of the horn can be prevented, states the Association, by the use of caustic potash applied as soon as the horn starts to grow, when the animal is between three and four months old. As soon as the budding horn can be distinguished by the touch, the hair should be clipped from the skin and the horn moistened with soapy water to which a few drops of ammonia have been added. This dissolves the oily secretion of the skin, so that the potash will more readily adhere to the surface of the horn. The caustic potash may then be applied, repeating the operation at intervals six or seven times until the part becomes slightly sensitive. A slight scab will form and drop off in the course of a month or six weeks, leaving a perfectly smooth poll. The operation is practically without pain and can be employed even with calves that are five or six months old. In such cases the horns will become soft and chalky, and can be scratched away, fresh caustic potash being applied until they disappear.

$70,000,000 Hog Loss in U. S.

Seventy million dollars loss to swine raisers in this country during 1916 through hog diseases—think of it! The hog has contributed as much to the nourishment and profit of humanity as any other animal. Sixty per cent of the meat diet of the one hundred million people in this country is supplied by the hog; besides this, a vast amount of hog meat is exported. There never has been a time in history when the hog has been of greater commercial value, and yet reliable reports from the agricultural department of the government show that there is a tremendous loss—seventy million dollars—resulting from hog diseases. A large percentage of this great waste could have been prevented by simple sanitary methods.

There are several reasons why about three and one-half million hogs have died from disease the past year. The greatest of these is because of unsanitary conditions. One of the most important things to remember in hog raising is clean surroundings. Muddy pounds and pens reek with disease germs and parasites, making places in which to contract disease. During the recent hog cholera epidemic it was proved that even flowing streams carried infectious disease germs, and farmers were cautioned against allowing their stock to drink or wallow in them.

Good, clean pasture and sanitary hog wallows insure against loss and greatly increase profits. A permanent wallow or dipping vat can be built very economically. The hog raiser cannot afford to be without one. Recently the department of animal industry of Parke, Davis & Co., of Detroit, issued its spring literature and among several booklets on farm sanitation and animal welfare, one is devoted entirely to descriptions of inexpensive hog-wallows and dipping vats, supplying specifications, details and suggestions so that any one can very easily build them at small cost. These valuable booklets are distributed free of charge, and we urge all of our readers who are interested in stock raising to write for them.

✤ ✤ ✤

California Breeders Meet.

The annual meeting of the California Draft Horse Breeders' Association was held at the University Farm, Davis, California, Tuesday, May 29th. The association is planning a campaign for more and better draft horses for California.

✤ ✤ ✤

Baby Beeves Popular.

The demand for small, high-quality cuts of meat and the increased cost of producing beef have combined to foster the rapid growth of the baby-beef industry. Baby beeves may be described as well-fattened, finished animals, weighing from 900 to 1200 pounds and marketed when between 14 and 20 months old. It takes less food to produce a pound of flesh with them than with mature cattle; yet they sell as high as the best of other fat cattle and markets for baby beeves have been very stable during the last ten years. The young heifers sell as well as the steers, and the returns from the money invested in the production of such cattle come quicker. On the other hand, it takes more experience to succeed with baby beeves than with mature cattle, a better grade of stock is required, and farm roughage can not be substituted for grain to the same extent.

In a new publication of the United States Department of Agriculture, devoted to this subject, Farmers' Bulletin 811, it is pointed out that the first necessity for the production of baby beef is a herd that has at least a fair amount of beef blood. The cows need not be purebreds, but they should have at least two or three crosses of such blood in them. A preponderance of dairy blood will not give profitable results. The cows should, however, produce enough milk to keep the calves well and growing without much additional feed.

A good bull will do much to offset defects in the cow herd. A good beef form and a strong tendency toward earliness of maturity are essentials; the owner's success, in fact, depends to a great extend upon the bull's ability to transmit the latter characteristic to his offspring. Money spent in acquiring a bull that will do this is likely to prove a good investment, for the whole baby beef industry depends upon speed in finishing the animals for market.

A herd at least large enough to produce a carload of calves a year is recommended in the bulletin already mentioned. Shipping in carload lots is usually the only economical way of getting stock to market, from twenty to twenty-seven baby beeves constituting a carload. Some allowance must of course, be made for loss and for calves that are not suited for treatment as baby beef. Since a well-matured bull can easily take care of fifty or sixty cows, the bull charge per calf also will be greater when the breeding herd is small. On the other hand, great care must be taken not to crowd the pastures. Good bluegrass or cover should carry from 50 to as low as 5. The amount of available roughage is another important factor in determining the size of the breeding herd. Roughage should form the basal portion of the ration for the cows. It can not be bought with profit at the prevailing prices and no more cows should be kept, therefore, than the farmer can feed with home-grown roughage.

The feeding of the calves intended for market depends on a number of factors such as the season of the year they are born in, whether or not any other use is made of the mother's milk before weaning, and the age at which it is planned to sell the beeves. Suggestive rations in which these points are considered are given in the bulletin already mentioned. These are made up of corn, cottonseed meal, corn silage, clover hay and oat straw. If barley, milo, kafir, or similar grains are substituted for corn, somewhat larger quantities should be used. Linseed meal may be used instead of cottonseed meal, and if neither of these is available, a high-grade leguminous hay should be used for roughage.

THE FARM

MORE STEERS AND BETTER BULLS.

There is no herd of so high a standard that it does not occasionally produce an animal lacking in merit, and when male calves of indifferent character are forthcoming they should be eliminated from consideration as breeders. That there are specific instances which furnish argument to the contrary we cannot deny, but these are the exception. With the encouraging range of values for good steers and the convenience in handling them as compared with bulls, breeders may safely and profitably act on this suggestion. It is neither necessary nor desirable to sacrifice the best bulls for steer purposes, as many have advocated doing in order to produce steers of the highest class. The prevailing demand for good bulls does not warrant their sacrifice and the permanency of the breed necessarily depends upon the use of the best sires available.

The present tendency among farmers who are investing in registered Shorthorns is to acquire them for the purpose of producing better commercial cattle. The element of speculation is eliminated. They do not assume the position that once they have obtained registered cattle they are entitled to a share of the breeder's trade. Time was when such an impression was abroad and the man who acquired possession of a few registered steers conceived the idea that the breeding fraternity was under obligation to patronize him. We do not mean to indicate that this was the prevailing attitude, but it was altogether too common. Happily, farmers everywhere inclined to livestock, have come to recognize the advantage in dollars and cents that falls to the producer of registered or purebred cattle, at the beef markets. Today as never before in the history of the improved cattle industry, registered cattle are demanded on the basis of actual intrinsic value. A more wholesome condition has never existed, and in order to maintain this advantage Shorthorn breeders will find it to their interests to see that their inferior bull calves find their way into the feed lot and to the market as steers. The immediate cash returns through either channel are not far apart. There is quite as much inducement from the immediate profit standpoint to develop a good steer as to grow out and market a bull of ordinary merit. With the increasing number of purebred cattle the tendency in this direction should increase. Many a breeder today is converting his whole crop of bull calves into market steers, and with this custom increasing the practical worth of improved blood is more widely demonstrated.

There is an advertising value in the breeding and making of good steers that does not come with the production of bulls of medium quality. That beef breed which does not show superiority in the steers it furnishes the market loses an advantage that it cannot afford to sacrifice.

There is no herd so worthy nor so richly bred that there is not an occasional bull calf that is a more fit candidate for the feed-lot than for the breeding herd; and in many herds the majority of the bull calves should find their way to the shambles as bullocks. As stated above, this does not involve less profit, but it does insure a higher standard for the breed as a whole. The practice should be widely adopted that its benefits may be more widely distributed and as a safeguard against the future. — [Rocky Mountain Husbandman.

If there is any doubt existing in regard to the future prosperity in store for the Poland China breeders of the country it was not in evidence at the W. B. Wallace spring sale of bred gilts held at Bunceton, Mo., April 12. Some 200 breeders and farmers assembled at the home of King Joe and showed their confidence in the future of the business by paying Mr. Wallace an average of $132.34 for his entire offering of bred stuff, consisting mostly of 11 and 12 months' old gilts bred for spring and summer farrow. The buyers were there because they needed and wanted hogs and because of the fact that the big end of the offering was bred to Champion King Joe. After a splendid opening talk, Col. R. L. Harriman introduced W. L. Nelson, assistant secretary of the state board of agriculture. Mr. Nelson said he could not impress upon those present too strongly the importance of increased pork production to meet the very serious shortage that confronted the country at this time.

Everywhere stockmen and farmer will go the limit to make this countr produce as it never has done before but if anybody thinks they will stan for a restriction of price on what the produce unless commensurate restric tions are applied to the products o every other industry, he should do a little mingling before he chances an money on his own opinion.

Gombault's Caustic Balsam

The Worlds Greatest and Surest Veterinary Remedy

HAS IMITATORS BUT NO COMPETITORS!

SAFE, SPEEDY AND POSITIVE.

Supersedes All Cautery or Firing. Invaluable as a CURE for

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who car- es out instructions can easily develop a foxhound, a beagle or a coon dog to the ghest state of usefulness or organize a pack in which each hound will work independ- ntly and at the same time harmoniously with the others. The subjects are: The ound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Devel- ping the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Quali- es of Scent. Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, rming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and earing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The apters on field trial training and handling are alone worth the price of the book, hich is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illus- ated with bloodhounds, various types of English and American foxhounds, beagles id cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, in- —— including ——

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¾, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¾, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE. EVERYTHING AT THE FARM IS TO BE SOLD.

Houghton Racer Bleck Tires.

"Why are you making them black this year?" is the question we have been asked about the Houghton Racer Tires for 1917.

"So they may be distinguished from other sulky tires in looks as they are already distinguished in quality," is the answer.

Houghton Racer Black Tires are constructed from the best para rubber that it is possible to produce in combination with a specially woven fabric. They combine resiliency and speed with a maximum of wearing quality.

Houghton Racer Black Tires are made tough and strong to stand the wear and tear of the track, and the rubber is of such high quality that they will not deteriorate rapidly.

Same old price, $8.00 per pair f.o.b. Marion, Ohio, with 5% off for cash with order. Can be furnished in 26 or 28x1 or 1¼". Order your 1917 supply now.

If you want to know about our other tires, send for booklet No. 205.

Your Club Needs New Chaps at the Traps!

BOB FOLWELL Univ. of Penn. Football Coach Instructing Intercollegiate Champion Berry in the Art of Trapshooting

Every club needs something to put "pep" into its organization. New chaps at the traps brace up the club, propose novel shooting programs and arouse greater enthusiasm amongst the older members.

Beginners Events get new chaps at the traps. Thousands joined the trapshooting clubs last year because of Beginners Events.

Hold a Beginners Event in May or June

Look for beginners in your office, shop and neighborhood. Invite them to your club to learn to shoot. Get them to try the "sport alluring." The fascination of shooting the clay targets will win them just as it has made you a "gun bug." Round up the beginners to help your club.

TO GET THE HANDSOME TROPHY

we are giving to the club in any State or Canadian Province having the largest number of participants in a Beginners' Event. Sterling silver watch fobs and spoons will be given to clubs for presentation to beginners making highest score.

Send Us Your Club's Application To-Day

Boost Beginners' Events,—they get new chaps at your traps! Pick your day and send your club's application without delay.

6. 2:08 Class Pace $1,000

WEDNESDAY, SEPTEMBER 12th.

7. 2:20 Class Pace $1,00
8. State Fair Futurity No. 6, 3 year old Trotters, Guaranteed $2,600....(Closed)

THURSDAY, SEPTEMBER 13th.

9. Governor's Stake — 2:12 Class Trot..... $1,50
10. Free-for-All Pace $1,00

FRIDAY, SEPTEMBER 14th.

11. Stanford-Occident Stake No. 1, 3 year old Pacers, Guaranteed $2,000 (Closed)
12. 2:16 Class Trot $1,00

SATURDAY, SEPTEMBER 15th.

13. 2:11 Class Pace $1,000
14. 2:10 Class Trot $1,00

Entrance and payments on these stakes will be due and payable as follows: 3% June 15th, 1% August 1st, and 1% on or before five o'clock the night before the race. Two or more running races each day.

GENERAL CONDITIONS.

ALL RACES THREE HEATS — Money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat, and 25 per cent to the race according to the rank in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 15th, 1917.

All purse races 5% to enter and 5% from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and three starters.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry, also if for any unforseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice, and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Member National Trotting Association.

Address all communications to the Secretary.

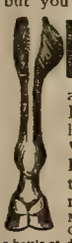
Drawer 447 SAN FRANCISCO, Cal

FOR SALE

Offering for sale stock bred in the same lines as the great pacers Vera Hal 2:05, Hal Logan 2:09, Roan Hal 2:07¾, which I bred and whose dams I still own.

A brown mare well broken and shows fast at the pace, six years old, by a well bred and fast son of Welcome, and out of the great double producer Mabel, dam of the world's champion Directly.

A blood bay trotting bred mare, nine years old, sired by Altodown 36254 out of a mare by Hawthorne 10935. She has Nutwood blood on her sire and dam side, stands fifteen and a half hands high and is a fine rider and driver, and would be especially suitable for a lady.



A standard and registered trotting mare with a record of 2:19, by Eros 5326 out of a record daughter of Elmo 891, in foal to the best bred Hal stallion in the entire land.

Also colts and fillies bred in the pacing lines ready to be worked. For sale at reasonable figures. For further particulars address or call.

THE HARVESTER 2:01 SELLS FOR $30,100.

New York, June 6.—The Harvester 2:01, trotting stallion, in the stable of C. K. G. Billings, which is being publicly auctioned here today, brought $30,100. The purchaser was Paul Kuhn of Terre Haute, Ind.

Peter Dillon 2:11½, stallion, was sold for $3900 to the Eld Pine Farms at Greenwich, N. Y.

Directum I. 1:56¾, holder of fourteen world's harness records, was sold for $3200.

GETTING RESULTS FOR ADVERTISERS.

In any line of human endeavor, the result obtained is in every instance the final "summing up" of the worth of the endeavor. The advertising columns of the BREEDER and SPORTSMAN have been up to the highest standard of achievement for more than a quarter of a century. The readers of this publication are of a peculiar type. They are, in their communities, the most prominent citizens; in most instances the leading business men, ranchers and farmers, with the reputation of being the county's biggest men. Perhaps this has had something to do with the great success our advertisers are obtaining. They are reaching people of the right class: men who are up and doing, in whatever vocation they may be following; who desire the best of everything they go in for and that only the best appeals to. This paper is no medium to get rid of something that is of no account and advertisers have not been long in finding that out.

A glance through our advertising columns demonstrates how true the above statement is. Every advertiser is offering the utmost in quality and they are the advertisers who stay by the BREEDER and SPORTSMAN year in and year out.

Last month was a record-breaker for results for this paper. We know personally of many remarkable transactions having taken place through advertisements placed in this publication. One of the best Shorthorn bulls bronght to California this year was purchased through this paper. The most notable sale of dogs made on the Coast this season was made through a small advertisement which only appeared one time. Four trotting horses were sold the first of the month. Judge E. A. Bridgford sold two fine saddle horses last week through the advertising columns of this publication and the Oakridge Ranch, Sonoma county, writes: "Through the advertisement in your paper the stock advertised for sale has all been disposed of."

Our declaration that this publication is the best live stock advertising medium on the Pacific Coast is not an idle claim but based on facts. Give it a trial.

WISCONSIN FAIR OFFICIALS PLEASED.

The following letter from those live-wires in Wisconsin carries a message to every fair manager, horse show superintendent and horseman in the country. They have accomplished the very thing many prominent officials have believed impossible. READ THIS:

West Allis, Wis., June 2, 1917.

To the Editor:

This issue of your valuable paper presents on another page the list of entries received for our Wisconsin State Fair stake events, and this list is substantial proof of facts we present in the following statement.

In the first place, we desire to thank the horsemen for their appreciation of our efforts in arranging what we believe to be a program which is not only an incentive to racing of high class, but also serves to lend encouragement to breeders of horses demanded for the military service of Our Country.

In arranging the program we present this year, and inducing business men of Milwaukee to assist us, we have taken our eyes off the gate receipts and accepted what we think to be a broad view of racing and the breeding of harness horses.

The program of stake events announced by the Wisconsin State Fair not only will be continued next year, but other large stakes may be added.

To say that the number and class of entries received for our stake events exceeds by far our expectations is giving voice to a sentiment that must be self-evident.

There is something, however, to which we especially desire to call attention of everybody interested in harness racing, and that is this:

How is it that the Wisconsin State Fair has such an unusually strong list, both in numbers and class, of entries when some other racing associations have declared off stake events, "because of a backward season or probable effect of war"?

The answer to this question, we believe, is this:

It pays to treat horsemen fairly; it pays to carry out programs of events as advertised, and it pays to advertise.

The so-called horse papers are the publications which serve as a medium of communication between horsemen and racing associations, and we are of the opinion that those racing associations which do not liberally use advertising space make a serious mistake.

Racing associations also must deal squarely with horsemen. They cannot expect either the confidence or patronage of horsemen when they advertise "catch" programs and start out with the evident intention of declaring off stake events when it is apparent on closing dates that their stake events will not "pay their own way."

To other racing associations in the west we wish to suggest that if next year two or three others will show more liberality in their programs of stake events, it is possible to build up a racing organization in the West of nearly equal importance with the Grand Circuit.

As long as we have anything to do with racing at Milwaukee, we hope to provide the best possible racing for our patrons, and at the same time send every horseman racing here away a living recommendation of our policies and methods.

Yours very truly,

O. E. REMEY,
Sec'y Wisconsin State Fair.

R. J. WHITE,
Superintendent of Speed.

Durfee On the Job.

C. A. Durfee, who has established himself at the Pleasanton, Cal., track, has started the ball a-rolling and was in San Francisco the first of the week for the first time in several weeks. He was justly proud of a good looking tan and a lot of newly developed muscle; in fact, said he wanted to register on Tuesday, as he felt about the right age. He reports the nine horses he is working for San Francisco's well known owner, I. L. Borden, making good progress. He is well pleased with the horses he picked to start this year and while he has not pushed any of them they have shown a disposition and quality to "go yonder." The trotter recently purchased for this stable, Pegasus, is working with a lot of vim and promise. Mr. Durfee thinks a lot of this green horse, which so far he has timed in 2:19½, and says he believes they will have to take their hats off to him before the season is far gone.

Carlos, full brother to Esperanza 2:07¼, has been a mile in 2:25 after only four weeks' work. He has a three-year-old pacer which he has timed in 2:18½ and that he likes a little better, I believe, than any colt he is training. Mr. Durfee lingered over him longer than any of them; and he only gave us a three-minute interview, all told. Another that he praised highly is a three-year-old trotter which he whizzed in 2:32½, and the half in 1:08½ last week. This colt is by Albaloma, is a good headed, nice gaited and clever acting horse.

The two-year-olds, a pacer and trotter, both stake entries, are working without any pushing around 2:40. The trotter is by Major's By Guy, while the pacer is by a full brother to Adam G. 2:06.

The three-year-old trotting stallion by Albaloma, which was recently bought from G. Wempe, of San Francisco, according to the well informed horsemen, is one of the best colts in the state and very likely to be heard from before the season is well advanced. By the way, Mr. Durfee says he has the only two colts in the country by Albaloma; and both are his kind. His pacer, Sheldon B., by a son of Zombro, is ready to show some good miles at a moment's notice. This horse has been going around eight or nine for several weeks.

He reports the stable of Sutherland & Chadbourne full of classy youngsters with a notable array of leaders to top them off. This stable is going good and will be ready for the big season expected here this year.

Two horses owned by T. D. Sexton, of Oakland, and in training by Henry Smith, are amazing the "railbirds" who frequent the track. The aged horse, Future Tramp, which Mr. Durfee worked two years ago in 2:08, is now working withot effort in 2:15 and, Mr. Durfee says, will prove dangerous to all contenders of his class this season. The other, a two-year-old pacer by Vernon McKinney, Mr. Durfee declares is some "pumpkins" and goes on to say whoever beats her will be first this season.

Homer Rutherford has worked George N. Patterson in 2:12.

George Ryan's big stable is also doing good and there are some splendid horses which will be seen under this popular banner this year. There are a score of runners on the gronnds which also are the history-making kind.

NEWS FROM DENVER.

[By Frank A. M'Clelland.]

Colorado Range 2:08¼, the grand little trotter belonging to George H. Estabrook, stepped an eighth of a mile at Overland Park recently in 14½ seconds. This is at a 1:56 gait, and not even the best of the trotters has ever been able to step a mile in that time. Possibly Colorado Range could not go the whole mile at the same gait—indeed, the fact that no performer ever has will be accepted by many as evidence that no horse ever will. But any performer that can go that fast for a short distance has a chance to make the same rate of speed at a longer one. The performance was at the close of a trial mile which was slow in the first half and in which the speed was faster to the last eighth. Three of the horses at Overland Park were in the heat, if it may be so called. Red Wing, the pacer, full brother to Red Rock, and driven by Argo; E-Colorado and Colorado Range in the Estabrook stable, were the three to make the mile. Red Wing and E-Colorado were neck and neck as they passed the last eighth pole, and Colorado Range was some distance back. Mr. Estabrook and W. W. Cowdery were in the judges's stand, watching the horses perform, and as they came down the stretch Mr. Cowdery caught the two leaders, and Mr. Estabrook snapped his watch on Colorado Range. Red Wing and E-Colorado stepped the eighth in exactly fifteen seconds, while Colorado Range, coming faster, made the eighth in a half-second better time.

The trial was a magnificent burst of speed, as the time shows, and was stepped cleanly and evidently within the young horse's powers, for he was not blown when the mile ended. It is a prelude to what the horse will do on the big tracks this year. He has a mark of 2:08¼, but has been separately timed in miles at 2:06. Being the son of the champion, Colorado E., who got a record of 2:04¾ as a three-year-old, and who had speed that was almost at the two-minute mark. Colorado Range has a right to attach a few records.

Ollie Graves is training the Estabrook horses this year. He has of the three-year-old get of Colorado E. the following: E-Colorado, Colorada, Elinor K., Zelorada, Cloudless Colorado and High Colorado. Ethel Skinner, another of the Colorado E. three-year-olds, is owned by W. W. Cowdery, who has entered her down the Grand Circuit and at certain cities of the Great Western Circuit, where the Estabrook horses will start. The entire string is to be taken to Omaha for the races there next month. The Estabrook colts, including Mr. Cowdery's Ethel Skinner,

Mr. Cowdery expects to have a grand three-year-old pacer to send to the races next year. He comes from the A. R. Gumaer stable, which was dispersed by an auction during the winter. The colt is now two years old, and is named All Direct. His sire was Direct Painter, called one of the fastest stallions ever in Colorado; his dam was by Village Hal and his second dam was a Saraway mare. When the colt was taken from the sale ring he was so thin and poor in flesh that he sort of staggered. With a few months' careful handling and some training he has stepped quarters at Overland in 33¼ seconds. He shows good form, stamina and determination. Already those who know good horses predict that the colt is a coming two-minute performer. And it is not difficult to determine that the foundation for the prediction is based on something more than mere railbird talk.

A. C. Dingle, of Moberly, Mo., has succeeded the late Norman J. Colman, editor of Colman's Rural World, as a member of the Board of Appeals of the American Trotting Association. Mr. Dingle served on the board, which met recently in Chicago. Mr. Dingle is one of the best known men in racing circles in the Middle West and o wns and conducts the big Moberly, Mo., fair.

Harness Horses and Horsemen

CONQUERING THE SAND.

In the year 1870, the land which is now Golden Gate Park was a barren waste of shifting sand dunes, that were never still, and gave no promise of fertility; apparently defying all control. Early Californians were not built along the lines that brook defiance; and having made up their minds that they wanted a park, bent all their energies toward its accomplishment. Among them were idealists, and results have certainly justified their ideals. They were ambitious for their growing city, and proud of the glorious ocean, so determined to connect them in a manner befitting the city's future grandeur. In these early days the only means of reaching the ocean was by bus. A line was owned by Foss and Connolly, who advertised to meet the cemetery car every half-hour, an additional lure being the promise to take patrons out to the "Roaring Ocean" and "Surging Breakers" "in buggy time." The Cliff House, and Seal Rock with its barking seals, were the chief attractions, of which the citizens were then a little proud . The pleasure was greatly enhanced (if you were fortunate enough to have a turnout) by flying over the road behind speedy trotters, procurable even in those days. The road used was the old "Cliff House Road," then a toll road. What is the entrance to the Panhandle (then Park Avenue), and continuing four and a half miles to the beach, gave a constant struggle with the greedy sands, that would have discouraged any but the stoutest hearts. Nature was not the only opponent that our pioneers had to contend with. A park decided upon, quarrels arose over the location; strength and influence fortunately were in favor of the present site. This land was included in the "Outside Lands" claimed by a number of leading citizens, who based their claim upon the Mexican and Spanish grants, and were the cause of endless quarrels. For the sake of harmony these claims were given recognition, but at the same time effort was made to save as much land as possible for the city. This was the policy Frank McCoppin, who did great work in the way of pouring oil on the troubled waters, totally regardless of contumely and ridicule. Among the so-called "Squatter Sovereignty" were many brilliant and well known men: John Nightingale, E. Ewald, Eugene Lees, Dr. Beverly Cole, Thomas V. Sweeney, Eugene Sullivan, John B. Felton, and others equally influential. A settlement of the "squatter" claims was brought about by Eugene Lees, in which the Park lands, valued at about three million dollars, were gained, almost without cost, for the city. The proposition offered was, that if these claimants would consent to surrender ten per cent of their holdings for park purposes, the authorities would confirm their titles; thus securing them from future trouble. This proposition was accepted. John B. Felton, who was very public spirited, offered twenty-five per cent of his holdings. Thus was the present park site acquired, together with the Panhandle, 275 feet in width, between Oak and Fell streets, and from Baker street, 3,880 feet to the main body of the Park.

Then came the quarrels concerning the location of the park, cries of "Graft" and "Jobs" for every suggested plan, and only a strong spirit like Frank McCoppin, strongly upheld by such purposeful men as John Nightingale, John Baird and others of like caliber, would have endured the abuse; which instead of discouraging, only made him more firm in carrying out his convictions. Many objections were made, some of them apparently well founded. What the public needed was a park with shade; and the idea of trees being made to grow in that barren sand was held up to ridicule. "Sufficient water could never be found for irrigation, "The building of roads over the uncertain sands would be impossible," etc. The Presidio lands were selected in strong opposition, which raised another cry of "Job." A horrible suggestion was made: To use the steam "paddies" and level the entire surface by shoveling down and filling up, preparatory to laying out the grounds, as in a city square. Thanks to Gen. Alexander this plan was defeated, and the worst job of all fell through. By this defeat a realization of the present fifty miles of broad, beautiful roads, winding over hill and dale, is ours to enjoy.

The park was surveyed, planned, and laid out by its first superintendent—Wm. Hammond Hall. He was greatly hindered by the lack of public spirit; by ridicule, interference, and accusations of graft, but he had the satisfaction of awakening the interest of his most determined denouncers, who, when the success of his plans became assured, voluntarily gave both time and money; glad to help in carrying out the plans of the creator, who "builded better than he knew." One of the most discouraging features our park builders had to combat was the shifting of the sand; however, they refused to be discouraged; what other countries had done to overcome the encroaching seas, they could do with the sand. Many kinds of grass, grain, and lupin were tried, with slight success. These experiments continued long after the park had become an accomplished fact. Leading citizens became interested, among them Frank M. Pixley, then editor of The Argonaut, and one of the city's earliest and most loyal friends. This name brings many pleasant memories to the early Californians, and Golden Gate Park contains many examples of his untiring interest and energy. Through personal solicitation he raised $15,000 to build the first park water works, and the reservoir on Strawberry Hill, 414 feet above sea level. While traveling in France, he noticed a grass growing along the sides of an excavation and on examination found that its roots reach downward, in search of water, several hundred feet. With the interest of the park always in his mind, this gave him an idea, and at his own expense he brought home several sacks of the seed, to be planted in our troublesome sand. The result speaks for itself. Nearly every county in the state owes some reclamation to its steady, persistent growth.

Wm. Bradbury took the contract of finding water, sinking wells—five were found south of Strawberry Hill—and building the reservoir. This contract he fulfilled, thus settling the question of park irrigation. When we think of Bradbury, "Little Albert" and "Little Hope" are at once suggested. Up behind "Little Hope" Bradbury considered himself "Boss of the road." Little Hope's steady, speedy gait almost justified him in this opinion. One afternoon, while taking his usual ante-dinner spin, the patter of speedy hoof-beats behind caused both driver and horse to "take notice." Not that there was any danger of being passed, but just from force of habit. On came the hoof-beats. Can it be possible? Hope is in the air! urged there by a pacer? But M., the innocent-looking gray, is going a good steady trot! One, two more brushes with the same result. "Surely the gray was pacing when he passed." Now he is smoothly trotting. Bradbury must look into the matter. Hello! What's that? A "new one?" Yes, "a Jim Mulvaney, just off the ranch" (Later named White Cap, by Capt. Griffith, veritable gray ghost, instantly changing his gait by a slight twitch of the bit). "A pacer, eh?" "Don't you see that he is trotting?" "Well," said Bradbury, "Hope is not himself today; he's a little off." Bradbury was mercilessly chaffed about his pet being beaten by a horse driven by a woman.

Gone are the good old days, when every one knew every one else, and exchanged greetings.

BACK NUMBER.

DRIVING CLUB'S OPENING MEET A BRILLIANT SUCCESS.

The opening of the San Francisco Driving Club's matinee season at the Park Stadium last Sunday was a peerless affair. The attractive park and track never presented a more beautiful nor more inspiring spectacle; the day was ideal, the track good and the crowd one of the best that has turned out in the state this year. It was estimated by officials present that two thousand persons were present. The stand was well filled while the rail on either side was crowded with eager spectators. The back stretch was lined with automobiles and equestrians and whenever a good finish was made the automobilists lost no time in showing their favor of the sport.

The note of personal enthusiasm was permeated through the air and such remarkable contests as were staged at this, the first coming together of the club's racing, taken with the satisfying beauty of the scene, the soft green of the landscape, the champing horses eager to get away, all had a part in making hearts beat lightly and pleasurably throughout the afternoon's program.

Many of the most prominent business men of San Francisco were present and the old-timers, who have made the equine kings of California famous, were very much in evidence. San Franciscans love good horse racing, and the Driving Club promises to give them their best the coming season. Most of the horses seen here are the same that will be seen at the big meetings of the Coast this year and the classification is much the same. The prizes are usually trophies donated by horse lovers.

The judges of Sunday's event, who will serve for the season are: Presiding judge, George J. Giannini, Jack Welsh and Joe McTigue; timers, J. A. Wilkins, Fred Clotere and F. P. Lauterwasser; Jas. J. Ryan, starter. All races were three-fourths mile, best three heats in five.

The first race on the program was a free-for-all trot for a trophy presented by the Bernard Mattress Company. Four horses started: Petrina, owned by L. A. Gielow; Yoncalla, owned by J. J. Ryan; Harold C., owned by H. Cohen, and Vallejo King, the property of Ottinger & Welsh.

Mr. Ottinger drove his Vallejo King in the first heat but the horse was on bad behavior and Chas. Spencer took charge of him for the remainder of the race. As the race progressed he improved and that he will be in better form and dangerous company after a few races was the prediction of horsemen present. Yoncalla also got better as the rece went on. He was third in the first heat but came in for first in the last two events. He is a good looking scamp and Mr. Ryan hopes to have him right before the season is far along. Petrina showed good in all heats but was outclassed; second being the highest position she attained in the five strenuous heats. The gallant and dependable Harold C. cinched the trophy for owner Cohen by winning the first two heats and coming in second in the remainder of the heats. It was his race after the fourth heat. The summary:

First race—Free-for-all trot:

Harold C. ..... (Cohen)	1	1	2	2	2
Yoncalla ..... (Burton)	3	2	3	1	1
Vallejo King ..... (Spencer)	4	4	1	3	3
Petrina ..... (Gielow)	2	3	4	4	4

Time—1:39½, 1:42, 1:39½, 1:41½, 1:42.

There were only three contestants in the 2:15 pace but every driver seemed to be determined to win the trophy, which was given by "A Friend of the Horse." Al Schwartz was up behind Jas. Ryan's Directress Mac; Frank Burton had H. Campodonico's King Pointer in hand and Wm. Malough had his Emma M. on her toes. Fur flew in every heat of this race, all of which were pulled off without any particular feature. The race seemed from the start to be between Directress Mac and Emma M., both being great favorites with the Stadium crowds. In the third heat Directress Mac's "rigging," according to Schwartz, after getting the lead at the half, pulled her to the center and directly in front of Emma M., who was coming like a streak. It looked like Schwartz was "pulling one" to the grandstand crowd, who lost no time in showing their disapproval; however, the judges were convinced by Mr. Schwartz's statement that he could not help it. Emma M. beat Directress Mac under the wire and won the heat and assured her owner of winning the race.

Second race—2:15 pace:

Trophy—From a Friend of the Horse.

Emma M. ..... (Malough)	2	1	1	1	
Directress Mac ..... (Schwartz)	1	2	2	2	
King Pointer ..... (Burton)	3	3	3	3	

Time—1:36½, 1:36½, 1:37, 1:38.

Frank J. Corr offered a handsome trophy for the third race, the 2:20 pace, and four excellent horses were entered. They were Frank Burton's Geo. W., W. J. McNamara's Rodney Patchen, Wm. McDonnell's Little Jack and J. J. Ryan's Lilly R. This was the only race that was decided in three heats. Lilly R. threw a shoe in the first heat where she finished second and this put her out of the running; as thus handicapped she could do not better than bring up the rear in the second heat, after which Mr. Schwartz withdrew her. Rodney Patchen showed signs of real class on many occasions; however, third position in all three heats was the best he was able to register. Horsemen present liked the way he worked and expressed themselves freely in his favor.

Frank Burton had George W. in splendid form and this horse looks good for the remainder of the season. He won this event in clean fashion and did not make many mistakes during the day.

Third race—2:20 pace:

Frank J. Corr Trophy.

Geo. W. ..... (Burton)	1	1	1	
Rodney Patchen ..... (Cohen)	3	3	3	
Little Jack ..... (Conlon)	4	2	2	
Lilly R. ..... (Schwartz)	2	4	dr	

Time—1:39¼, 1:44, 1:42½.

Harrison Well Established at Eugene, Ore.

The well known horseman and hotel man, C. A. Harrison, who has achieved quite a lot of success in both his chosen professions, has, according to those who know hotel conditions in Oregon, made a wise selection in taking over the Hotel Smeed, at Eugene, Ore., and will make good there as he has in every other experience of his varied career in the hotel business. The following letter from Mr. Harrison, written May 30, is the first communication from him since he left Seattle:

"Enroute to Eugene.

"When I got off the train at Portland, yesterday, John B. Stetson was looking me in the eye. He had just arrived from Omaha, and say, I was some surprised to see him. We had a great visit and I learned all there was to know of activities in Nebraska. He handed me the gelding I sent East by him from Sacramento, Grey Hal, in the shape of an Omaha draft and said that Ed. Peterson, the man who owned Hal Boy and sold him to Stoughton A. Fletcher, had purchased Grey Hal. Mr. Stetson admitted I had sold a wonderful horse cheap; John B. liked that dude, Grey Hal. However, being a gelding and just good for performance, I figured that I could better afford to sell him at the price I received than to keep him. I know that if no harm comes to Grey Hal, Marvin Childs will have real stake horse for next year.

"Well, Stetson and I hurried over to the railroad yards and found May Day Hal in her car enroute to her new home at Eugene; I had loaded her the evening before in Seattle. Stetson was well pleased with her and could hardly wait until he had an opportunity to give her a trial on the track.

"There is a lot of interest around Eugene, a good half-mile track, some good young stuff, and Stetson will soon have a stable which will have to be noticed.

"I want every horse lover in the land who passes through Oregon to come and see me in my new home; and in addition to looking after their comfort I will see that they are entertained in the way all true sportsmen love best—at the training quarters."

At Indianapolis a few days ago Millard Sanders worked the green trotting mare, Peter's Queen, by Peter the Great 2:07¼, a mile in 2:17¼, this being the best mile of the season by a trotter over the track. The bay mare trotted the first quarter in 31 seconds and the last quarter was in 30¾ seconds.

Thoroughbred Matters

THE GENEALOGY OF OMAR KHAYYAM.

As the first foreign horse to win the Kentucky Derby, which now ranks as the richest, if not the most important, race for three-year-olds in America, Omar Khayyam is a runner whose genealogy is of interest to all classes of horsemen.

Bred by Sir John Robinson, in the Worksop Manor Stud, in England, he was the third foal of his dam, Lisma, now only ten years old. As her first was Wolfaline, a winner at Newmarket in his two-year-old form and placed last season in six of eleven races, two of which he won, Lisma looks like a mare that may become as noted as some of her ancestors in the production of speed.

Lisma was bred by Lord Marcus Beresford, and was got by Persimmon, winner of the Derby and St. Leger in 1896, and a full brother to Diamond Jubilee, winner of the same turf classic in 1900; also to Florizel, sire of William C. Whitney's winner, Volodyvoski, the following year.

The paternity of Omar Khayyam's second dam, Luscious, is in doubt, but she was royally bred, whether her sire was Harpenden or Royal Hampton, for the latter was by Hampton, the best long distance runner of his day, and the sire of three Derby winners, as well as Perdita II., the dam of Persimmon, Diamond Jubilee and Florizel, while Royal Hampton was out of a mare by King Tom, sire of the dam of St. Simon, whose sons Persimmon, Diamond Jubilee and Florizel were. Harpenden was by Blair Athol, himself winner of the Derby and St. Leger, and a rare son of Stockwell, from which Ormonde, Cyllene and Rock Sand are descendedein the male line.

Alveola and Ste. Alvere, respectively third and fourth dams of Omar Khayyam, were exported to Germany when young and so lost the opportunity of producing winners on the British turf. Right here it is interesting to note that Ste. Alvere was closely related to the great mare Distant Shore, grandam of Cyllene and dam of St. Hilaire, which got Merry Agnes, the dam of Pommern. Both were by Hermit, the Derby winner of 1864, and each was out of a granddaughter of the noted mare Maid of Masham, with Young Melbourne, the sire of the dam of one and grandam of the other.

Adelaide, the daughter of Young Melbourne, that was the dam of Ste. Alvere, produced Peregrine, the horse that defeated Iroquois for the Two Thousand Guineas in 1881 and was beaten half a length by him for the Derby in the same year. Adelaide also produced St. Mary, a full sister to Ste. Alvere, that was the dam of La Sagesse, winner of the Oaks in 1894.

Through a long line of thoroughbred mares Omar Khayyam traces back in the direct maternal line to the dam of Firetail, one of the first English racehorses imported into North Carolina, and finally in twenty-second generation to the Old Vintner mare, his earliest recorded ancestor, that raced with distinction in the North of England more than two hundred and fifty years ago.

In the direct male line Omar Khayyam traces back to Matchem, grandson of the Godolphin Arabian, which is rather unusual in these days, most of the prominent racing families having been founded by Eclipse, which traced to the Darley Arabian, or by Herod, great-grannson of the Byerly Turk. The Kentucky Derby winner is not quite so fashionably and richly bred on this side of the house as on the other, bnt the lines are noted for stamina and the sterling character which distinguished the old-tine racehorses.

Marco, his sire, commands a stud fee of less than $100, though he is the sire of such good ones as Neil Gow, winner of the $50,000 Eclipse Stakes and the Two Thousand Guineas; Beppo, winner of the $50,000 Jockey Club Stakes; Marcovil, winner of the Cambridgeshire, and Bronzino, winner of the Doncaster Cup. Marco himself was no ordinary performer, having won the Cambridgeshire as a three-year-old and the Champion Stakes as a four-year-old, beating Sir Visto, winner of the Derby and St. Leger.

Barcaldine, the sire of Marco, has been called as fine a specimen of the thoroughbred racehorse as ever was foaled. He was an Irish horse, about 16.2 hands high, and Joseph Osborne says he measured eighty-six inches around the girth, which is more than ten inches larger than Persimmon and eight inches larger than St. Simon. He was one of the few horses that never was beaten, but he took no part in the turf classics, though in other races he defeated some of the best horses of his day in 1883. In the stud he got Sir Visto, Mimi, winner of the Oaks and One Thousand Guineas; also Morion, winner of the Ascot Gold Cup; Barmecide, winner of the Goodwood Cup, and many other noted stayers.

Barcaldine's sire, Solon, was only a fair performer and sire, but he got Arbitrator, whose son Kilwarlin won the St. Leger and was the sire of our own Ogden, futurity winner and sire of many prominent winners. West Australian, the sire of Solon, was the first horse to win the Derby, St. Leger and Two Thousand Guineas, and through imported Australian he was the grandsire of many noted American racehorses, including Spendthrift, whose good son, Kingston, got King's Courier, winner of the Doncaster Cup.

Inbreeding to Melbourne, the stout old cup horse that was West Australia's sire, is a feature of Omar Khayyam's pedigree. This horse got seven winners of the English turf classics, and every one a stayer. His best daughter, Blink Bonny, winner of the Derby and Oaks, was the dam of the great Derby winner Blair Athol, that got Harpenden, the probable sire of the Kentucky Derby winner's grandam, Luscious. Young Melbourne, a son of Melbourne, that got the dam of five winners of classic races; was the sire of Omar Khayyam's fifth dam, and also of Hermione, grandam of Persimmon, the sire of his dam.

There is close inbreeding also to Birdcatcher, sire of the dam of Solon and of the third dam of Barcaldine. This horse was the sire of seven classic winners, one of which, The Baron, got the great Stockwell, grandsire of Stockwell's dam and of Harpenden, sire of Lisma's dam. Again, Birdcatcher's grandsire, Whalebone, a Derby winner, was also the grandsire of Touchstone, St. Leger winner and sire of the St. Leger winner Newminster, whose son Hermit, a Derby winner, got Ste. Alvere, the fourth dam of Omar Khayyam, and also Novitiate, the dam of Marco, his sire.—[New York Herald.

An interesting item of news from Holland, which is worthy of the attention of anti-gamblers, is that the law which was passed five years ago forbidding bookmaking and the use of the totalisator on Dutch race-courses, is to be rescinded. The reason for the removal of the prohibition is that it has caused great injury to horse breeding in Holland. That racing cannot flourish unless accompanied by some form of speculation everyone possessing practical acquaintance with the subject is well aware.

West Chester Spring Meeting.

New York, May 29.—With the metropolitan handicap at one mile as the feature of the card, the annual spring meeting of the West Chester Racing Association began at the Belmont Park race course today. Only seven horses faced the barrier owing to the inclement weather and a heavy track. R. T. Wilson's four-year-old chestnut colt Ormesdale by Ormondale, Madchen, carrying 111 pounds and cleverly handled by Jockey Johnny McTaggart, was returned an easy winner by four lengths.

The public choice, James Butler's Spur, another four-year-old, finished second a length in front of Harry Payne Whitney's gelding Borrow, which finished third. Dick Williams, Celandria, Old Koenig and Fernrock, the other starters, finished in the order named.

The winner's time, 1:39 1-5, w as excellent, considering the condition of the track. The race had a guaranteed value of $5,000.

Coffroth Meeting Opposition.

James W. Coffroth's plan to set himself up as the Turf Czar of the West is meeting with opposition on all sides among the horsemen who are interested in the sport in California. With the California State Fair and the other district fair people bucking on being compelled to secure a sanction from the Tijuana Jockey Club to stage running races at their meets, the Golden Gate Thoroughbred Breeders' Association steps in with a protest.

President Charles W. Clark of the association is at present out of the city, but upon his return a meeting of the executive committee will be called to discuss the action of Coffroth. Individual members are on record as opposed to the attempt to have the game ruled by a club that runs its races outside the jurisdiction of this country.

Last season the Golden Gate Breeders' Association donated a $500 stake at the State Fair meeting to encourage the showing of thoroughbreds. The holding of running races at the other fair meets was considered a boost for the breeding industry. The association may co-operate with the fair people to make their events a success this year.

To Contribute Feed for English Thoroughbreds.

John E. Madden, Hamburg Place, offered to subscribe $10,000 at the Jamaica track Saturday to a fund for supplying grain, if needed, for the specific use of thoroughbred broodmares in England.

Other horsemen expressed an equal willingness to help, if the report from abroad that on and after May 21, all horses in Great Britain would be put on rations and that grain would be limited, does not turn out to be exaggerated.

An effort will be made to learn the facts from Weatherby & Sons of London before any action is taken here. Mr. Madden said:

"We have been drawing on England for our thoroughbred blood these many years, and I believe that we should now do our part to give what help we can to aid the horsemen abroad maintain their stock to the highest point of efficiency. Thoroughbreds, especially the broodmares, demand a certain amount of grain, else there is sure to be a decline.

"We can raise a pretty good sized fund over here, it seems to me, and ship over enough grain ford istribution by Weatherby & Sons from time to time to minimize the danger which thoroughbred stock in England is now facing."

August Belmont, Chairman of The Jockey Club, is in full accord with the above and expressed a willingness to subscribe $10,000 to the fund.—[Thoroughbred Record.

George Wingfield, the prominent Nevada turf patron, was a visitor in San Francisco last week. He had a conference with James W. Coffroth, president of the Tijuana Jockey Club, relative to ways and means of making the race meeting at Reno in September a success. Wingfield told Coffroth that the Reno Association would co-operate with the Jockey Club in making the turf sport clean in the West, but he declined to enter into the argument over whether the State Fair and other meetings must secure the sanction from Coffroth in order to put on running races.

Billy Kyne in the Game.

Billy Kyne, the bookmaker, has purchased four two-year-olds and one three-year-old of the Lawrence & Comstock stock farm at Pleasanton and will break into the game as an owner. The youngsters are:

Reydo, three-year-old gelding by Rey Hindoo—Trinta; Katherine Carey, by Joe Carey—Katherine Ennis; Norfolk Star, by Tim Payne—Cheridah; Chares Geggus, by Rey Hindoo—nirecta; Ben Payne, by Tim Payne—Gottlieben.

George Ryan will get the string ready for the Reno and Tijuana meetings.

The King's Plate for 1917 was run off at Woodbine last week and went to the anticipated quarter, the horses from the stable of President Seagram, the most extensive Canadian breeder, having shown such satisfactory work in their preparation as to indicate that stable as holding much the strongest hand. Three horses carried the black and yellow jacket, but they were not able to repeat the record performance of last year, when three Waterloo horses filled the first three places at the finish. This time they had to be satisfied with first and third money, second place going to Tarahera, a half-sister of Heresy, which won the Plate five years ago for the Messrs. Dyment of Barrie.

Failing to equal the finish of last year, there was still one record reached by the Seagram champion, for Belle Mahone, whose work had been the best ever shown by a plater, equaled the time record for the race, getting home in 2:08 4-5, which also stands to the credit of St. Bass, the winner of six years ago. Nine horses went to the post, just one-fourth of the number of entries when the race closed on the 1st of March.

King Gorin Wins Kentucky Handicap.

Louisville (Ky.), June 2.—The four-year-old Transvaal-Ethel Simpson colt, King Gorin, owned by R. L. Baker and Co. of Lexington, under a masterful ride by Jockey Jack Garner and favored by a light impost of 108 pounds, won by a neck today the fifth renewal of the Kentucky handicap from John W. Schorr's three-year-old Broomstick colt, Cudgel. Half a length back was Andrew Miller's Roamer, which made his third try for the event. Boots, coupled in the betting with Ed Crump, as the A. K. Macomber entry, finished fourth, beaten for the show money by two lengths. Old Rosebud, the 9 to 5 favorite, and Opportunity, finished in the ruck, after setting a terrific half-mile pace.

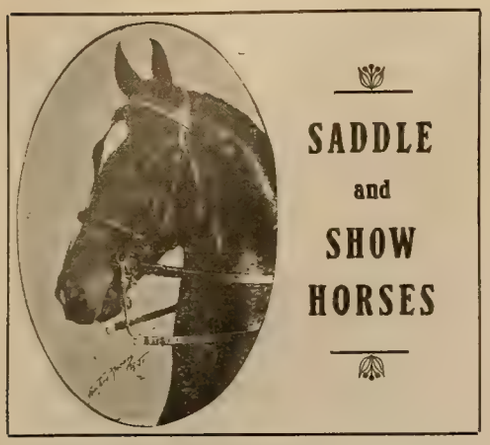
The time of 2:04 1-5 for the mile and a quarter was remarkable, considering the condition of the Douglas Park track, which was lumpy.

King Gorin had to be hard ridden to win. Turning into the home stretch he went into the lead, with Cudgel and Roamer following, heads apart. The 126 pounds apparently was too much for Roamer against the two light-weighted colts. Boots came from ninth into fourth place and behind him finished Hodge, Colonel Vennie, Embroidery, Ellison, Old Rosebud, Opportunity and Ed Cramp in the order named.

King Gorin was only considered as a starter after his stable mate, Piff Jr., had met with a accident preventing him from being sent to the post. He was practically neglected in the betting, a $2 parimutuel ticket on him paying $43.50 to win, $21.10 for the place and $7.50 for show.

The stake was worth $12,200 to the winner.

New York, May 28.—It is no crime to make a friendly bet on the races, according to a ruling made by Magistrate Kochendorfer of Jamaica.



The ruling was made today in the Jamaica Police Court, when John Walters of 308 Clinton Avenue, Brooklyn, was discharged. He had been arrested at the Jamaica race track when former State Senator William H. Reynolds, President of the Queens County Jockey Club, handed him a slip on which was written: "$400 to 500 on Sunrise for place—W. H. Rey."

As he handed Walters the slip Deputy Sheriff Desmond heard him say: "I'll give him a chance to arrest you, John."

Mr. Walters' lawyer told the Magistrate that the transaction was made purposely to test its legality.

The Assistant District Attorney asked Magistrate Kochendorfer to reserve decision, but the Magistrate refused, saying:

"No, I will discharge the defendant. This slip of paper is no more evidence of an illegal bet than would be a slip of paper that I might hand to you bearing the name of a horse, some figures and my initials."

SENSATIONAL SHOW HORSES BEIN G DEVELOPED IN SOUTHERN CALIFORNIA.

Saddle horse activities have been very much on the hum in Southern California this spring and summer. Prospects for a horse show in connection with the great fair now planned for Los Angeles, also, are very bright. There are in that section of California many fine saddle horses. Some of the greatest horses bred in Missouri and Kentucky have found homes there and other "native sons" have come from families that made the great saddle horse states mentioned above famous.

Revel L. English, of the Sierra Vista Farm, Chino, Cal., has made many notable transactions during the summer, having purchased and sold a number of very good horses. Chief among those purchased by him was the great gelding San Jacinto, bred and formerly owned by Mr. English, but the last two years owned and used by Captain Wm. Banning, of Los Angeles. This horse is looking fine and under the skilled hand of that well known young Kentuckian, Tom Jefferson, who is in charge of the Sierra Vista Farm horses, he promises to be a surprise to horse lovers, who have the pleasure of seeing him at this year's shows.

Mrs. Grace Maxwell ,unquestionably the most skilled horsewoman in the West, also, has been riding several of the English horses this year, and those she has had anything to do with are sure to be right and ready when they go under the big tent at Sacramento.

Mr. English recently sold to Mr. Seltzer, of Los Angeles, a white high school mare which will be seen in western vaudeville houses next autumn. Among the horses purchased by him this year of which he is particularly pleased is The Major, a heavy weight hunter that is of great class. English will have a number of Hunters and Jumpers at Sacramento this year.

The futurity colts, Cochise and Tourist Peavine, have rounded out into great big fine horses with the ability to do and will, according to owner and trainer, be hot company for anything which happens to make its appearance at the State Fair this year. Helen Idlewood, the very celebrated daughter of Rex McDonald, has been running out for some time but has again been taken up and will be featured in five-gaited classes this year. She has learned a lot of good common sense, sometimes referred to as manners, under Tom Jefferson's careful and experienced management, and her performance this year will be the best she has ever made.

The walk-trot gelding, Confidence, a son of Rex Chief A, the horse that has produced more Eastern winners of this popular type than any horse in Missouri, has taken on big flesh and looks like a new idol. He is full of spark and class and can do the three gaits very handsomely.

There have been more than a dozen foals at the farm and many of these will be seen in the baby classes at the California shows this autumn. Two by King of the Highlands, which died last winter, and the remainder by the great old show horse and sire, Highland Squirrel King, the undisputed best son of famous Forest King. The Matron, dam of the Missouri futurity winners, which was brought out by Mr. English in 1914, has foaled by Highland Squirrel King and the colt is better looking than anything she left in Monroe county, Missouri, where she was quite noted for her power to produce winners.

The San Vicente Rancho, of Los Angeles, the property of Mrs. Frederick McCormick and which is ably managed by Miss Martha Freeman, has had the most successful season in its history. More good foals have arrived than ever before and the present horses have developed better and come around to show form in a more clever fashion than the owner had hoped for.

The magnificent aged stallions, Don Castano and Highland Monarch, which by the way, would be more appreciated in Missouri than here and where the writer would like very much to see them located, both made satisfactory seasons and have, under the riding of Mr. Rollins, made noted improvements in form and manners. These two horses have produced some magnificent horses in the last two or three years, all of which are now to be seen in actual training at this magnificent estate, and which will be seen in competition with all California youngsters wherever there is anything that looks like a saddle class in California.

Their grand young stallion, San Vicente, which so favorably impressed that noted judge, E. A. Trowbridge, who saw him at the State Fair last fall, has, if such a thing is possible, become a much more handsome horse. He is finer, yet bigger, has more class and tasty ways than his fondest admirers expected possible, and the way he can tromp down yonder and back would cause many a Missouri and Kentucky horseman to sit up and take notice. In fact, if he were in that country, where saddle horses are fully appreciated, streets would be named for him and monuments erected in his honor. That San Vicente will have an opportunity to show the horsemen of that country that California is just one ahead of them, is assured by his owners if no accidents occur; for he will be shipped East this year if the World's championship stake, as proposed by the BREEDER and SPORTSMAN, is assured. In any event, he probably will be seen there next season.

The owners of this section of California are eager to meet the horses owned around San Francisco, which are said to have improved greatly since their last appearance, and that the horse show at the State Fair this season, with all this pent-up class and keen enthusiasm clashing, will be the stellar attraction of the fair is now assured. By the way, the three-year-olds of the state, not entered in the regular futurity, are allowed to enter in the State Fair's three-year-old futurity. Why does not the State Fair management make some announcements regarding this stake? They are advertising their trotting horse stakes and all other futurities. HORSE LOVER.

W. C. Strock, of Des Moines, Iowa, who has owned some of the best show horses in the country and has used them only as pleasure horses, has, according to the well informed judge, Mr. John T. Hook, of Longview Farm, "a very great opportunity to get in the game and will have no trouble keeping out of it." Mr. Hook was referring to Mr. Strock's newest horse, a filly foal from Mr. Strock's great mare, Mabel Whirlwind and by My Major Dare. Mabel Whirlwind was famous as a show mare but achieved her greatest victory when she produced, by Bourbon King, the great show mare Cigarette, which also was mated to My Major Dare this season. In a letter to the Breeder and Sportsman, owner Strock speaks affectionately of the new foal:

"I am not sure that you know that Mabel Whirlwind has a fine fily foal by My Major Dare. The young lady arrived April 11th on the Longview Farm. I have not seen her but expect to leave for Kansas City tomorrow noon and spend the day with the mother and child. My hopes will be badly shattered if I do not see one of the finest colts I ever looked at. I expect to leave them on the Longview Farm until fall."

Breed Mares to Good Sires.

There has never been a time when the sires to which mares are to be bred should be more carefully considered than the present year. The last five years have seen a gradually increasing difference between the price of good and of inferior horses. During the last year those horses and mules which were good enough to do some job well have found ready sale, while others have been a drug on the market, and have lost money for the men who produced them.

Missouri occupies a peculiar place with respect to horse stock. Through Central Missouri, and in some sections of South Missouri, a good stock of horses showing a preponderance of the blood of the lighter breeds is found, while in North Missouri draft blood is evident in the better classes of horses. Besides and beyond this, Missouri still maintains its unique reputation as the greatest mule producing state in the Union.

A good useful draft horse, or a useful horse from among the lighter breeds, or a useful mule, meets a ready demand, but the culls and inferior horses and mules do not. Therefore, to realize the greatest profit, says E. A. Trowbridge of the University of Missouri College of Agriculture, prejudice and wrong conceptions can well be laid aside, and the market demands can be carefully considered when mares are sent to the stallion or jack.

Town May Buy Home of Polo.

The exclusive San Mateo Polo Club home in Hillsborough may become the Hillsborough Town Hall. If it does it will include the town jail, according to custom.

An offer to sell the clubhouse to the town, over the heads of its directors and members, to satisfy an unpaid mortgage of $15,000, was made to the Hillsborough Town Board by Henry P. Bowie of the Bowie estate, himself a member of the club andformer director.

The clubhouse, which is valued at over $25,000, covers much ground. The adjoining field has been the scene of many famous polo games between California and Eastern and British teams. Many of the active local devotees of the game, however, have forsaken the polo mallet for guns and swords and are training for military service.

J. H. Spring, of Berkeley, last week purchased two fine saddle geldings, which will be used for his personal pleasure, from The Bridgford Company, of Knightsen, Contra Costa county. These geldings were sired by the great sire, Artist Jr., a descendant of the greatest family of saddle horses Missouri has ever boasted of. This only leaves two of the horses Judge Bridgford is advertising, for sale.

Enter—A New Type, the Four-Gaited Saddle Horse.

One of our readers who attended the Tulsa Horse Show last month asks the following question, and we will appreciate it if some well-informed horseman will answer for us: "In the Tulsa Stake for five-gaited saddle horses, which class was the feature event of the show, the horses were never called on to rack. Was this not necessary in a five-gaited class; or were the ribbons distributed before the show? I would appreciate some good judge's opinion on this subject, as we used to think, when I exhibited saddle horses, that the rack was a very important gait in a five-gaited class."

NEWS OF THE ASTRAL KING FARM.

[The following letter from Jas. A. Houchin, president of the Star Clothing Manufacturing Co., and owner of the world-famed Astral King Farm, Jefferson City, Mo., which is the home of the champion saddle horse, Astral King, is of interest to all horse lovers.]

May 28, 1917.

The Breeder and Sportsman,
San Francisco, California.

Gentlemen—

I note a news item going around about the success I have had in selling the get of Astral King. The story as I have seen it in some places is not exactly correct. "I have sold everything that is halter broke except one," is the way that I have given out the news. In this connection I will say that I will compare checks as to price that I have gotten for some half dozen Astral Kings with the get of any living sire except his sire, Bourbon King. Any one who knows anything about the game, knows that Astral King has sired some good ones. Those colts that I was showing at the Missouri State Fair and other state fairs some three or four years ago have now matured and they have brought the coin. To my knowledge there hasn't been a price published that I have received for any of these Astral King youngsters. We have adopted the plan of not giving out the prices because there has been so much duplicity about prices that horses were sold for. However, the cancelled checks will tell the story. We would like to compare them with some of these fellows who are advertising "so-called" champions.

In this connection, I want to say that I was out at the farm yesterday and I experienced a little thrill that I have not experienced in all my horse business. I have been away for a couple of weeks—down at the Tulsa Show and at my business in St. Louis—and just went out to the farm to look over the youngsters that had arrived, and there is a bay stud colt, sired by Astral King out of Pauline Moore, and while I looked this fellow over I could not help but saying to myself that there is the finest colt, from point to point, that has ever been dropped on the farm. He is a solid bay with black points—a horse all over. I walked down the line and another one jumped up out of the grass, a chestnut colt with a big star in his forehead, and he looked like the headlight from a hundred horse power engine or something like that, and when I got around to look him over I could not help but exclaim "OH MY!" and I had to repeat it four or five times over as I got a good look at that chap. He is another horse colt out of that good old show mare, Gibson Girl. Mr. Anderson thinks that the Pauline Moore colt is the best that has ever been dropped on the farm but this Gibson Girl colt does look good to me. He is not quite as fine as the other one, but he is a horse all over.

There were numerous others, practically all of them good ones, at least good enough to attract attention, but these two colts look to me like future world champions.

I got a little away from my story. You know, when I was showing my Astral King colts at the Missouri State Fair, out of a possible forty-six winnings in a period of three years, the get of Astral King won twenty-two, one less than half. That made a pretty good show record for the sire, and of course, the sire was winning all the time. It is an awful bother to show colts and it is a very expensive proposition, and after we have made that kind of a record we have quit showing colts and we have also retired Astral King from the show ring. We are expecting these youngsters of his to come on and take their place. Most people think that the greatest young Astral King of his age is the colt I Am King, which we sold recently. While I recognize him as being the champion of his age, I want to say that my choice still remains in our barn; that is the one colt, the one exception that we have not sold. I have told Mr. Anderson not to sell him. He is only a two-year-old and if nothing happens to him I do not know what will prevent him from being a champion. I want to say that he is big enough and stout enough and has the "pep," and I am going to show him myself. That is why I am keeping him.

Yours very truly,

JAS. HOUCHIN.

Notes and News

At the dispersal sale of the horses of the late Col. C. Kirkpatrick a very fine brown yearling colt named Vernon Pointer, by Vernon McKinney, dam Poinsetta by Star Pointer, was bought by J. L. Chandler of Macomb, Ill. Mr. Chandler writes that his colt, now a three-year-old, has been working so well and shows such promise that he has entered him in all the three-year-old paces on the Great Western Circuit.

✤ ✤ ✤

The capital stock of The Houghton Sulky Co. has been increased from $100,000 to $500,000, and the corporate name changed to The Houghton Motor Car Co. W. H. Houghton, president, will retain his office in the sulky factory, of which he will continue to be general manager. The sulky department, representing an investment of over $75,000, will be carried on in the original factory, under the old name of the Houghton Sulky Co., with Arthur C. Thomas as sales manager.

✤ ✤ ✤

The Missouri State Fair this year will have their usual attractive racing program. Secretary E. G. Sylander has just issued the speed program for this year's fair and it shows the management continues to appreciate the value of good racing and that it takes the liberal purses to get the cream of the horses. Col. Ab Dingle is, as has always been the case, superintendent of the speed department, and horsemen who know Dingle will make every possible effort to be at Sedalia this year. Entry blanks and conditions will be sent on request to Secretary Sylander, at Sedalia.

✤ ✤ ✤

Names of Owners Must Appear.

The parent trotting associations do not look with equanimity on the plan of some of the trainers to avoid the rule adopted last winter which required the name of owner or owners of horses to appear on the entry blank when such horses are entered in races. A resolution aimed at those who would dodge that rule, adopted by the Board of Review of the National Trotting Association and concurred in by the Board of Appeals of the American Trotting Association, is as follows:

"No trainer may use his name, or any racing or stable name, under which to enter all of the horses from his stable, but must enter each horse in the name of the real owner or registered stable name of the owner. All entries heretofore made can be corrected by June 1st without penalty."

This seems to make it impossible for trainers to dodge the rule referred to.

———o———

In an article by Marque, written for the Horse Review, he has the following to say about R. J. MacKenzie's horses now in the stable of Dick McMahon at Libertyville, Ill.:

"R. J. MacKenzie's The Pointer Queen 2:10½, like many members of royalty, assumes high prerogatives, and occasionally evidences mental inconsistencies. I think that she has as much natural speed as any living pacing mare, and if her manners continue as they are now, she will prove a real sensation. Fred Sullivan has given her most of her work, and I saw her trail a couple of slow repeats with the reins flapping on her back. However, knowing the regal lady quite well, I am not going to hand her any spinach' until she 'shows me.' I dislike to hurt the lady's feelings, but if she reads this and becomes peeved, I will make an humble apology in event that she displays polite manners in high society.

"Mr. MacKenzie has the largest holdings in the stable, his group numbering seven head, including Miss Perfection 2:07¼, Anvilite (2) 2:22¼, Merry Vernon, p. 2:15¼; black filly (3) by Vernon McKinney, p. 2:01½, dam Merry Widow, p. 2:03¾; Carl Vernon, p. 2:22½, bay colt, two, by the same sire, dam Eva G. by Carlokin 2:07½; and Terry Patch 2:29¼, bay colt, two, by Joe Patchen II. 2:03¼, dam by Zombro 2:11. Miss Perfection has had a lot of slow work, but her fastest mile was in 2:15. She is in rare physical form and you know the daughter of General Watts 2:06¾ has the family trait of doing her best at all times. Anvilite had leg trouble and is turned out, as are all the other colts which Mr. MacKenzie bred and owns, none of them being entered in the futurities. It's a pity, too, that Merry Vernon and Terry Patch are not engaged, for Dick regards them as a pair of stars. Merry can fly and is one of those round-turned, full-made little mares like her noted dam. As for Terry Patch, all the boys who were at Macon proclaim him to be a sensational two-year-old trotter. He had worked only one mile in better than 2:40 before being turned for a record, yet took one handily and later worked in 2:25½. He wears only 5-ounce front shoes and doesn't need a boot, and they say that he is gaited like a veteran. I forgot to mention that Merry Vernon worked in 2:13½, and that Carl did a mile in 2:19. Mr. MacKenzie certainly has reason to feel proud of having bred these precocious youngsters, owning their sires and dams, too."

TOMORROW'S MATINEE PROGRAM.

One of the best matinee cards of the season will be offered at the Park Stadium tomorrow afternoon. C. F. Silva and H. S. Cowell, the Sacramento enthusiasts, are going to bring down a string of trotters and pacers to go up against the local "fun" horses.

The trot is an especially good race, with Harold C., Yoncalla and Vallejo King, the trio that had a duel last Sunday, there will be H. S. Cowell's John Mack and G. J. Giannini's Ella M. R. The entries:

Free-for-All Trot.

Ottinger & Welsh's Vallejo King, Harold Cohen's Harold C., J. J. Ryan's Yoncalla, H. S. Cowell's John Mack, George J. Giannini's Ella M. R.

2:20 Pace.

H. S. Cowell's Mountain Dee, H. Campodonico's King Pointer, C. H. Silva's Lady Silverthorne, Wm. Donald's Little Jack.

Free-for-All Pace.

J. J. Ryan's Directress Mac, William Malough's Emma M., G. J. Giannini's Bold Harry Aerolite, C. F. Silva's Bondalean.

2:25 Mixed.

J. J. Ryan's Lilly R., J. McNamara's Rodney Patchen, L. A. Gielow's Petrina.

———o———

MISSOURI STATE FAIR NOTES.

Despite a heavy track and continued wet weather the Missouri State Fair track training stables have been able to secure some pretty good workouts on the few days available. Continued work on the track has kept it in better shape than at any time in its history.

W. F. Erwin has been better than 2:30 with every one of his horses except one. Special mention should be made of Big Boy, a three-year-old, 60 days in training, who has gone the mile in 2:29¼. May Lou, Erwin's fine mare, has negotiated the track in 2:26 and the last quarter in 35 seconds. Selpo, a gray gelding, has a track record of 2:25¼.

L. E. Edgington has J. W. Wilkerson working out satisfactorily. Edgington's Mike Bright, a green pacer, has made the mile in 2:27, last quarter in 34½ seconds, in the last few weeks. Ariola, his trotting mare, is showing up well.

W. H. Boyd, the veteran trainer and shoer, is rounding W. R. Fausett's horses into shape grandly. Ky Mo, a Tregantle colt, a three-year-old pacer, has done the mile in 2:26¼ already. Batten, another Tregantle colt belonging to Mr. Fausett, has done the mile in 2:30, last quarter in 56 seconds, right lately. Stocktonian, named by Mr. Boyd for his old home town in California, a full brother to Batten, only a trotter, has a last quarter in 40 seconds to his credit, a pretty good showing for a two-year-old.

Johnny Singleton, St. Louis, Mo., has a promising string of runners working out on the State Fair track.

SEDALIA.

✤ ✤ ✤

RACING ENTRIES FOR CLOSING EVENTS AT WISCONSIN STATE FAIR.

The classiest entries in the sixty-seven years of the Wisconsin State Fair and Tractor Demonstration at Milwaukee have been received this year, despite the fact that these entries closed on May 28, the earliest in the history of the fair.

A total of 152 entries were made to seven events, as follows: The 2:12 pace, 38; the 2:12 trot, 26; the 2:06 pace, 21; the 3-year-old pace, 15; the 3-year-old trot, 14; the 2:25 pace, 19, and the 2:25 trot, 19.

Many of the horses entered will be seen on no other tracks outside Grand Circuit courses, and the calibre of entries in each event makes them compare favorably with those of any Grand Circuit meeting.

The Wisconsin State Fair officials, assisted by the business men of Milwaukee, are endeavoring to place harness racing on a high plane in the west. The entry list received to their stake events this year should open the eyes of officials of other western racing associations to possibilities. The complete list of entries follows:

2:06 Pace. Stake $2,000.

Colleen, F. B. Luchsinger, Monroe, Wis.; Little Prince, Haley & Jordan, Madison, Wis.; Auto Zombro, John Ryan, Minneapolis, Minn.; Dr. Burns, Jr., W. P. Luck, Cleveland, Ohio; Hal Plex E., Robert Pringle, Chicago, Ill.; Peter Look, S. A. Fletcher, Indianapolis, Ind.; Margot Hal, Peter Holmes, Minneapolis, Minn.; Adioo Guy, John G. Heyman, Sandusky, Ohio; Thomas Earl, J. Crouch & Son, LaFayette, Ind.; Knight of Strathmore, George Bleiler, Monroe, Wis.; Flora Strathmore, George Bleiler, Monroe, Wis.; Princess Margaret, Allen Bros., Cedar Falls, Ia.; Jessie Direct, Randall & Dean, Palatine, Ill.; Dr. Oliver, James McManus, Chicago, Ill.; Rilla E., Aronson & Dean, Palatine, Ill.; Hollyrood Mack, Chas. E. Dean, Sr., Palatine, Ill.; Columbia Fire, E. G. Bohanan, Lincoln, Nebr.; Pat Carmody, D. S. Gordon, Columbia, Tenn.; Major Ong, J. R. Walters, Bismarck, N. D.; Homer Mc., California Stock Farm, Nobleford, Alta., Can.; Hal Edo, Thomas McKay, Williston, N. D.

2:12 Pace. Stake $5,000.

Dan H., Longfellow & Pugh, Windfall, Ind.; Dan Hedgewood, Hal Oatman, Fond du Lac, Wis.; Clipper Jr., A. B. Hunter, Jr., New Madrid, Mo.; Peeping Tom, P. Gemmell, Henderson, Ky.; Peter Nash, John Ryan, Minneapolis, Minn.; Dr. Gano, Dr. F. A. Dodge, LeSueur, Minn.; E. J. L., G. N. Weise, Chicago, Ill.; Jay Mack, Geo. McKinney, Wabash, Ind.; Baxter Lou, Edw. Peterson, Omaha, Nebr.; Greatness, Edw. Peterson, Omaha, Nebr.; Tiowa, J. C. Bates, Independence, Ia.; The Pointer Queen, R. J. MacKenzie, New York, N. Y.; The Aim, George Castle, Chicago, Ill.; Power Patch, Int'l 1:55 Horse Farm, Savage, Minn.; Hal J., E. J. Curtin, Decorah, Iowa; Sun Burn Pointer, Frank Cairl, Monroe, Mich.; Arkancello, J. B. Fair, Janesville, La.; Rose Direct, Charles G. Westcott, Orlando, Fla.; Sandy Patch, J. W. Ford, Cedar Falls, Ia.; G. C. W., A. F. Ruthven, Cleveland, Ohio; Walnut Grove, A. F. Ruthven, Cleveland, Ohio; Dude Highwood, Miss L. H. Bernhardt, Kansas City, Mo.; Hal Direct, Farnsworth & Dean, Palatine, Ill.; Jessie Direct, Randall & Dean, Palatine, Ill.; Dr. Oliver, James McManus, Chicago, Ill.; Rilla E., Aronson & Dean, Palatine, Ill.; Hollyrood Mack, Chas. E. Dean, Jr., Palatine, Ill.; Drift Patch, A. L. Derby, Eldorado, Kans.; Stanley L., Freas & Gillen, South Pittsburg, Tenn.; Peter G., Goodison Farm, Sarnia, Ont., Can.; Red Wing, George Bloom, Longmont, Colo.; Hal Actor, U. S. Horse Shoe Co., Erie, Pa.; The Black Bass, W. F. Sanderson, Owatonna, Minn.; Trampquick, W. H. Grosch, Milverton, Ont., Can.; The Aul, White & Oddy, St. Marys, Ont., Can.; Dan W., W. H. Dugan, Omaha, Nebr.; Patrick De Oro, California Stock Farm, Nobleford, Alta., Can.; Calgary Earl, S. H. Roe, Calgary, Alta., Can.

2:25 Pace. Stake $1,000.

Bonnie Hal, Everett Beckwith, Aurora, Ill.; George W., G. N. Weise, Chicago, Ill.; Jay Mack, Geo. McKinney, Wabash, Ind.; Rambling Jim, Edw. Peterson, Omaha, Nebr.; Belle Alcantar, Ed. S. Cone, New York, N. Y.; Makotean, A. Gibson, Birmingham, Ala.; Earl Patch, H. J. Brockhaus, St. Paul, Minn.; Wood Patch, C. A. Bergsing, Minneapolis, Minn.; Peter Marque, John Ryan, Minneapolis, Minn.; Vernon Pointer, J. Lyman Chandler, Macomb, Ill.; J. E. C., J. E. Crosbie, Tulsa, Okla.; Allah Directum, Omer Amundsen, Beloit, Wis.; S. L. Pointer, George Bleiler, Monroe, Wis.; Hal Direct, Farnsworth & Dean, Palatine, Ill.; Hollyrood Mack, Chas. E. Dean, Sr., Palatine, Ill.; The Aul, White & Oddy, St. Marys, Ont., Can.; Garland Mc., California Stock Farm, Nobleford, Alta., Can.; Empress Togo, and Steline Bell, Midway Stock Farm, Kearney, Neb.

Three-Year-Old Pace. Stake $800.

Hal H., M. J. Hickey, Antigo, Wis.; Russell De Forest, A. J. DuBeau, Sauk Centre, Minn.; Lord Abbe, G. N. Weise, Chicago, Ill.; Wellington Direct, S. A. Fletcher, Indianapolis, Ind.; Don Bunco, J. M. Kavanaugh, Harrisburg, Va.; Betty McNeil, Charles G. Westcott, Orlando, Fla.; Princess Strathmore, George Bleiler, Monroe, Wis.; Grover E., A. F. Ruthven, Cleveland, Ohio; Orphan Boy, L. E. Randall, Palatine, Ill.; Hollyrood Alice, Chas. E. Dean, Jr., Palatine, Ill.; Hollyrood Darling, Chas. E. Dean, Sr., Palatine, Ill.; William Patch, O. M. Powell, Wagoner, Ind.; Calgary Lady, S. H. Roe, Calgary, Alta., Can.; William Manager, A. G. F. Stice, Mt. Pleasant, Ia.; Larkspur, Mrs. W. D. Forrest, Omaha, Neb.

2:12 Trot. Stake $5,000.

Early Dreams, Jno. B. Halsall, Greenfield, Ind.; May Harriman, Everett Beckwith, Aurora, Ill.; Philip Axworthy, Chas. S. Harris, Galesburg, Ill.; Dame Haggard, S. A. Fletcher, Indianapolis, Ind.; Abu Taleb, W. M. Parsons, Minneapolis, Minn.; Jauntfast, Eli Weeks, Rockford, Ill.; Alice Arion, Geo. S. Davis, Tulsa, Okla.; Billy Mead, W. H. Emerson, St. Paul, Minn.; Par McKerron, John G. Heyman, Sandusky, Ohio; David Look, H. C. Spratt, St. Joseph, Mo.; Gay Patch, Charles G. Westcott, Orlando, Fla.; Heir Reaper, E. C. Warren, Shelton, Neb.; Alma Alquilan, Omer Amundsen, Beloit, Wis.; Eva Bingen, James T. Boyle, Chicago, Ill.; Dolly Dixon, Aronson & Randall, Palatine, Ill.; Elvivello, M. I. Aronson, Palatine, Ill.; Anzonetta, G. M. Cotton, Auburn, Nebr.; The Woodman, Jno. Whitfield, Franklin, Tenn.; Brownie Watts, A. Albright, Jr., Newark, N. J.; Colonel Riser, U. S. Three-Year-Old Trot. Stake $800.

California Patch, E. C. Best, Minneapolis, Minn.; Doug Pendleton, Skaife & Livingston, Livingston, Wis.; Bird Maxey, Midway Farm, Kearney, Nebr.; Bellini Worthy, A. T. Cole, Wheaton, Ill.; Azo Jay, R. W. Hunt, Chicago, Ill.; Lillian B., C. A. Niles, St. Paul, Minn.; Hillbrook Sage, Clyde C. Lammlein, Louisville, Ky.; Donna Fay, S. F. Guttenstein, Milwaukee, Wis.; Princess Robey, W. L. McCarty, Concordia, Kans.; Hattie Forbes, Chas. E. Dean, Sr., Palatine, Ill.; The Object, A. L. Derby, Eldorado, Kans.; Miss Peter Gilbert, W. H. Grosch, Milverton, Ont., Can.; Dusty Girl, Midway Stock Farm, Kearney, Nebr.; Dinty Moore, Robert Miller, West Allis, Wis.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July2, 3—Vancouver, B. C., Can. Vancouver Gun Club, Chas. Bowers, Secretary. "Old Policy."

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Elaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

✤ ✤ ✤

Utah State Champion.—Ogden, Utah.—Shooting from the sixteen yard mark C. H. Reilley, Jr., of Salt Lake, won the Interstate Association amateur championship at the third annual state tournament of the Utah State Sportsmen's Association here on June 4 with a score of 97 out of 100.

C. F. Nelson, Laramie, Wyo., was awarded the Becker trophy in class A, breaking 190 clay pigeons. The Reilley medal for class B was won by L. E. Riter, Salt Lake, scoring 174 hits. A. P. Bigelow, Ogden, took the challenge shoot for 25 straight. In addition to the medals, cash prizes were awarded to the high men.

The Joker Trap.—They call it the joker trap, and never was a name more appropriate. To casual glance it looks just about the same as any other well-behaving automatic trap for throwing clay pigeons. It has the same graceful lines—the same fine balance and innocent appearance.

In repose there is nothing to distinguish it from the ordinary trap save for two little electric wires that lead from the traphouse back to the small battery box at which the operator sits. For the joker trap is sprung electrically. The press of a button sends it into action. The "puller" and the lever which is familiar to almost all trapshooters is eliminated.

It is in action, however, that this unobtrusive little equipment gets in its fine work. Once the button is pressed then it is time to beware, for never did more elusive or more difficult targets ever cleave the air. In flight they are much swifter than the swiftest bird. Sharp angles are their middle names. In fact, the variable courses they take through the air—their sudden flips and turns—are most disconcerting.

Verily, the joker trap is no place for even a fair shooter, for it is dollars to doughnuts that its targets will elude his aim. It's not the easiest thing in the world to "bust" a target that's flying straight up in the air, at better than express train speed. And, incidentally, it's no easy matter to pulverize a quartering bird that just about clears the grass. Grass cutters they call them for want of a better name, but the way they go scudding out of the trap would put the most nimble jackrabbit to shame.

During the Grand American Handicap at St. Louis two of these jokers were installed for the entertainment of the shooters. There were some great shots present. A man has to be a pretty good shot to stand anywhere near the head in this greatest of all trapshooting classics. But—there were very few crack shots who were able to produce any startling results at the joker.

A few of them, it is true, ran up some pretty fair scores, but as a usual rule, the hits and misses were more in favor of the latter. It may seem like exaggeration to say that six out of ten targets was a pretty high score, but such was the case. And only in one or two rare exceptions was this record exceeded.

FLICKINGER HIGH AT ELKS' SHOOT.

W. S. Pease of Elko, Nev., Takes Interstate Trophy With 99 Out of Hundred.

All sections of the Coast were represented on Sunday when the registered tournament of the Alameda Elks' Gun Club was staged on the Alameda grounds. Seventy-nine were out at the traps and they just about represented the cream of the Far West shooters.

A. G. Flickinger of Vallejo had a long run of a hundred straight and incidentally led the field for high average honors with 196 out of the program of 200 targets.

W. S. Pease of Elko, Nev., and H. Lorenson of Newman tied for second with 195, and then came O. N. Ford of San Jose, with 192, and C. H. Nash of San Jose with 190. George Thomas was the only local shot to get in the money and he registered 188.

Among the professionals Fred Willett and Hugh Poston were dead-locked with 193 apiece. J. A. Cook scored 190 and Len Hawxhurst 187.

Interstate trophies which were awarded on the first 100 birds were won as follows: W. S. Pease, 99, first; H. Lorenson, 97, second; A. G. Flickinger and Bud Havens, 96 each, divided third and fourth; O. E. Evans and H. Pfirrmann, both of Los Angeles, divided fifth and sixth after winning shoot-offs from C. H. Nash and R. P. Knight, all of whom had 95.

Mrs. Ada Schilling, the diminutive 90-pound shooter from Portland, the only woman contestant at the traps, scored 184 and beat out many of the men. The scores:—

*R. C. Reed 187, *J. A. Cook 190, *L. S. Hawxhurst 188, W. S. Pease 195, B. Worthen 187, *H. F. Poston 193, Dr. J. L. Martin 179, N. A. Howard 187, H. Pfirrlian 185, *W. F. Willett 193, W. E. Mullin 183, *C. A. Haight 170, S. A. Bruner 165x180, Ed Garratt 179, E. B. Thorning 156, W. J. Eilert 183, H. R. Everding 170, A. A. Durney 172, J. R. Arthur 185, Mrs. Ada Schilling 184, O. N. Council 175, O. A. Evans 186, *G. E. Oliver 186, *O. N. Jones 173, *W. A. Joslyn 174, F. Bair 186, G. Coleman 179, *M. O. Feudner 181, H. T. Hinman 171, P. M. Burns 161, W. J. Terry 171, *J. G. Heath 173, H. Martine 152, L. L. Fuller 155, H. Stelling 155x180, Pop Merrill 46x60, H. Kuhlman 70x100, P. G. Herrlein 64x100, G. Morrison 90x100, J. H. Walker 34x60, H. C. Peet 86x100, C. H. Lancaster 184, H. R. Phinney 175, M. Siddall 180, H. Lorenson 195, O. N. Ford 192, C. H. Nash 190, A. G. Flickinger 196, J. O'Hara 171, *Capt. DuBray 54x60, Chas. Stamper 84x100, F. Webster 77x100, R. T. Boyd 55x60, George Waldie 71x100, H. B. Vallejo 54x100, George Thomas 188, W. L. Koch 169, F. H. Teeple 130x180, B. L. Quayle 186, C. Linderman 100x120, R. P. Knight 175, J. Nelson 182, G. Vesper 160, J. B. Brady 185, Ted Handman 187, W. L. Webber 107x140, *J. W. F. Moore 163, B. Havens 96x100, F. D. Barclay 90x100, J. W. Trainor 6x60, W. H. Price 88x100, F. J. Croll 50x60, F. A. Stall 48x60, H. A. Ray 85x100, Ned Williams 78x100, H. Meinecke 83x100, A. E. Stoneberger 84x100. (*Denotes professionals.)

Practice Day, Saturday.

Ed Garratt, who is doing a come-back at the traps this season, took the honors of the practice day on Saturday when he broke 96 out of the program of 100 targets. H. R. Everding, the Portland booster, was second one bird behind. Fred Willett and Len Hawxhurst went to a 97x100 tie for the professional laurels. The weather was windy which made the rocks flip aid flop in the breeze, which interfered with the following scores:—

H. R. Everding 95, B. Worthen 90, *J. A. Cook 96, T. C. Peterson 89, A. A. Durney 86, F. Bair 82, Geo. Coleman 94, *M. O. Feudner 83, H. T. Hinman 90, P. M. Burns 83, F. H. Teeple 74, W. E. Mullen 94, *Fred Willett 97, E. B. Thorning 76, Ed Garratt 96, O. Council 91, H. Pfirrmann 84, O. A. Evans 87, Dr. J. L. Martin 88, *H. Poston 93, N. A. Howard 92, *G. E. Oliver 86, *O. N. Jones 85, W. S. Pease 91, *C. A. Haight 81, *R. C. Reed 94, *L. S. Hawxhurst 97, W. H. Hine 59x80, *J. W. F. Moore 85, J. R. Arthur 87, Mrs. Ada Schilling 54x60, T. Wilkes 18x20, A. G. Wilkes 17x20, *W. A. Joslyn 54x60. (*Pros.)

Poor Truckee Opening.—Fishing on the Truckee river is only fair, with the streams high and the melting snow discoloring the water and making fly-casting out of the question. This was the report brought back to San Francisco Monday morning by a party of rodsters from the San Francisco Fly-Casting Club, who took in the sport at their lodge at Union Mills.

The anglers made some catches, bnt it was hard work and a little unpleasant in the cold weather with a high wind blowing. It will likely be a couple of weeks before better conditions prevail, although a warm spell will make quite a difference.

Among the fly-casters who made the trip were President F. J. Cooper, Dave M. Sachs, Walter D. Mansfield, C. P. Pomeroy, Ed Everett, F. H. Reed, Dr. Otto F. Westphal, Frank Noyes and W. J. Davis Jr.

HOW ABOUT THE PACIFIC COAST LEAGUE?

Northwest Shooters Are Enthusiastic Over Getting Organization Launched.

At the occasion of the Pacific Coast handicap at San Jose the subject of the formation of a Pacific Coast Trapshooting League was broached and created no end of discussion of ways and means of getting it launched. H. R. Everding, the Portland booster, was strong for the idea and he was supported by others from the Northwest. Local shooters like the idea and those in Southern California took a hand and lifted a voice in talking over the possibilities.

At present there are three leagues flourishing in the northern states. The Northwest Washington League, The Portland Oregonian's and the Spokesman-Review's organizations have been booming along. California shooters have been backward in getting leagues under way but the day is not far off when some leader will come along and get the boys to fall in line so as to have some fun. There is no reason why there is not a league in Northern California and another in the southern part of the state. Certainly there are enough clubs and the enthusiasm is not lacking. All that is needed is for some one to get the movement started.

"It would certainly be great if we had a trapshooting league that would rival that of the Pacific Coast Baseball League," spoke one enthusiast. "The day of leagues in our sport is coming and it is not too early to commence right now booming it along."

"The trouble, however, is that trapshooting is not conducted on the business basis of baseball," cut in one of the conservative. "The baseball people have the wherewithal to transport teams up and down the Coast, but trapshooting is a sport for the contestant with no revenue or means of revenue being derived. You must realize that it would be an item of some consequence to keep a trapshooting league a-going."

The suggestion was then forthcoming that an inter-club competition could be staged at the same time the Pacific Coast handicap is held. The winners of the different leagues could be pitted in a contest and the Coast team championship settled.

Shooters are giving the matter some thought but in the meantime the California clubs should wake up and get some leagues in operation. The Northwesterners who have had a taste of the sport declare that the local gunners do not know what they have been missing.

S. Christenson had the misfortune to lose his beautiful setter bitch, Orange Blossom, that did such sensational bird work and classy ranging in the last Field Trials. California fanciers have been hard hit this year in losing many of their dogs.

Secretary Hip Justins, of the San Diego Gun Club, announces that hereafter the beginners at the game will be given added advantages at his playground. A series of Beginners' Days will be staged and everybody invited. That is what helps the game.

Pocket-Knife Revolver.—A new weapon has found its way into the hands of "bad men" in New York. The thing looks like a two-bladed penknife, but in reality, it is a pistol, capable of inflicting a fatal wound. This new type of weapon is, too all appearances, a silver pocket-knife containing two blades with a rather heavy handle, a spring on the side of which can be moved by the thumb and the front part of the handle turned around, in which can be inserted a 22-caliber rim-firing cartridge. This part of the knifs can be turned back and the clasp on the side of the handle can be raised, which cocks the pistol. The weapon can be held close to a person and a fatal wound inflicted by simply pressing this side attachment, which lets the firing pin hit the cartridge and explode it. The police commissioner believes that many of the miniature weapons are now carried by the "stick-up men." He has notified the cops to frisk every knife found on lawbreakers.

✤ ✤ ✤

New Periscopic Rifle.—A new periscopic rifle is the invention of a Los Angeles man. The weapon at first sight looks like an ordinary rifle, but the stock is hinged at the fore end hand-guard and lower end of the barrel—it is difficult to explain the thing without an illustration—but, briefly, when a button is pressed, the stock falls down from the barrel, as when a shotgun breechloader is opened, and then a miniature periscope appears projecting vertically from the dropped stock to some inches above the line of the horizontal barrel. A man in a trench can poke the barrel of his rifle over the parapet and take a sight from the dropped stock without any fear of being spotted by the enemy. A periscopic rifle has already been used in the trenches, but that weapon had a rather clumsy attachment which rendered it impossible of handy handling. This latest invention can be instantly converted into a periscopic arm, or vice versa, merely by pressing a stud, and in appearance, when closed, looks just like an ordinary rifle, except for a steel plate showing here and there . The weight is increased by one and one-half pounds. It is said that the inventor has received the support of the American War Department.

NEW FISH AND GAME DISTRICTS.

Anglers and Nimrods Complicated Over Changes in Opening of Seasons.

With the state of California divided into 26 fish and game districts, and with many of these subdivided into smaller units, sportsmen this year face the problem of prolonged study of new laws and conditions before hunting and fishing can be pursued without danger of infraction of the law.

According to the new provisions, several counties are divided among different districts and the whole thing is so complicated that it is almost necessary to study a copy of assembly bill 759, introduced by C. W. Lyon, before venturing forth with rod or gun.

The changes affect closed seasons in many things, and to alleviate the complications, the fish and game commission has digested the law according to districts. But a complete understanding of this digest can hardly be obtained without study of the original bill.

District number one, which contains portions of nearly every county in northern California, as well as Yuba, Calaveras, Tuolumne, Mariposa, Madera and Kings counties in their entirety, is divided into twelve sub-districts. The greater portion of Sacramento county is in district number one.

One of the liberties of this district during the coming two years will be an open season for cottontails, which have become somewhat of a pest throughout the northern part of this state. Owing to the high price of meat, it is expected that this animal will be hunted for commercial purposes more than before.

District number 23 includes Lake Tahoe and the Truckee river, as well as all lands within the drainage basin of the lake and the river, situated in California. District 24 includes Silver Lake, Twin Lakes, Blue Lake, Meadow Lake and Wood Lake.

The following summary shows the open season, limits and other details regarding the various districts. For accuracy, this summary should be studied with a copy of assembly bill 759:

Sacramento Perch, Crappie, Sunfish:
All districts; open season (both dates included), May 1-Nov. 30.
Limits—25 per day. No sale.

Catfish:
All districts; May 15-Aug. 15.
No closed season hook and line for own use. No sale between these dates.

Salmon:
Districts 1, 2, 3, 4, 10, 11, 12—Sept. 25-Nov. 14.
Hook line and spear—12b, 13—June 6-July 31; 5—Dec. 1-Aug. 31; 6—Dec. 1-April 14, June 1-June 30, Sept. 6-Sept. 19; 7—Dec. 1-July 31; 7a—Dec. 8-Oct 7; 8 and 9—Dec. 1-Sept. 30; 12a—May 15-Dec. 31; 16, 17, 18, 19—Sept. 25-Nov. 14. All districts 3 per day these dates. No sale.

Striped Bass—Shad:
All districts, Sept. 25-Nov. 14, July 6-July 31. No closed season hook and line, 5 per day only between these dates. No shipment. No sale.

Crabs—(No Females):
All districts, Nov. 15-July 30. Not less than 7 inch. No shipment from districts 5, 6, 7, 7a, 8, 9.

Lobsters—Crawfish:
All districts, Oct. 15 to last day of February. Not less than 10½ inches or lore than 16 across back.

Salt Water Eels:
Not less than 12 inches. Not more than 15 in one day.

Deer: (No Does, Fawns or Spiked Bucks):
Districts 1, 23, 24, 25—Aug. 15-Oct. 14. 2 and 3—Aug. 1-Sept 14. 4—Sept. 1-Sept. 30, Nov. 15-Jan. 31. 2 per season.

Cottontail—Brush Ralbits:
Districts 2 and 3—Nov. 25-Jan. 31. 10 per day; 30 per week. No closed season dists. 1 and 4.

Ducks, Geese, Mud Hens:
All districts—Oct. 16-Jan. 31. 25 per day; 50 per week. No limit on mud hens.

Black Brant—Honkers:
All districts—Oct. 16-Jan. 31. 1 per day; 4 per week.

Wilson Snipe:
All districts—Oct. 16-Jan 31. 15 per day, 30 per week.

Valley and Desert Quail:
All districts—Nov. 15-Jan. 31. 15 per day, 30 per week.

Tree Squirrels (Bill not yet signed by Governor):
All districts—Sept. 1-Dec. 31. 4 per day, 12 per season.

Mountain Quail:
All districts except 2, 3 and 4—Sept. 1-Nov. 30. Dists, 2, 3 and 4—Nov. 15-Jan. 31. 10 per day, 20 per week.

Grouse:
All districts—Sept. 1-Nov. 30. 4 per day, 8 per week.

Sage Hen:
All districts except Dist. 4—Aug. 15-Sept. 30. 4 per day, 8 per week. District 4—Closed.

Doves:
All except Dist. 1—Sept. 1-Nov. 30; Dist. 1—Aug. 1-Oct. 31. 15 per day.

Trout, except Dolly Varden and Golden:
Districts 2, 2a, 3, 3a, 3b, 3c, 3d, 10, 11, 12, 13, 15, 16, 17, 18, 19—April 1-Oct. 31. 5 per day only from Dec. 15 to last day of February. Districts 1e, 1, 1a, 1b, 1c, 1d, 1f, 1g, 1h, 1i, 1j, 1k, 11, 5, 6, 7, 7a, 8, 9—April 1-Oct. 31. Districts 4, 4a, 4b 4c, 4d, 4e and 21—May 1-Nov. 30. 50 trout or 10 lbs. and 1 trout, or 1 trout of 10 lbs. and over.

Trout—White Fish:
Districts 23, 24 and 25—May 30-Oct. 31.

Golden Trout:
All districts—June 30-Oct. 1. 20 per day. Not less than 5 inches.

Black Bass:
All districts except Clear Lake in Dist. 2—May 1-Nov. 30. 25 per day, no sale. Lakes of 75 sq. miles in Dist. 2 (Clear Lake)—No closed season.

Vernon Club.—Bob Bole was the victor in the weekly trapshooting program held at the Vernon Gun Club Sunday. Bole smashed 58x60 targets in the trophy event and also broke 38x40 in the practice shooting. E. K. Mohler, Echdale and White tied for second high, each breaking 55x60, while C. E. Groat was fourth with 54x60 smashes.

A good sized crowd turned out and all the scores made were very good. One of the most sensational things of the day was when E. K. Mohler broke 25 straight targets from the 23-yard mark. Following are the scores made:

Toley, practice 37x40, trophy 48x60; William Pugh 36x40, 50x60; Van Ness 13x20, 46x60; E. K. Mohler 59 65, 55x60; H. E. Sargent 46x40; Echdale 15x20, 55x60; White 58x65; Bob Bole, 38x40, 58x60; Munzhuber 33x40, Kimble 37x40, Funk 34x40; Mrs. C. E. Groat (trophy) 53x60, C. E. Groat, 54x60.

Seattle Association.—After the regular Sunday shooting had been discontinued for the past two weeks, owing to the various tournaments and special shoots held in the locality, two squads turned out for the day's sport with ideal weather conditions on June 3rd.

C. E. McKelvey finished in the high score position in the 50-target race, with a total of 48, Hugh Fleming running second with 47.

Fred Landwehr and D. Rhodes, professional, shot into the high scores in the 100-target program, they each finishing with 94. McKelvey and Ralph Kinzer went second with 93.

Jack Lewis won the silver spoon with the added bird handicap allowed him, this being the third that he has taken in succession.

J. B. Adams of Leavenworth, Wash., was a visiting shooter with the club. The scores:

At 50 targets—C. E. McKelvey 48, Hugh Fleming 47, C. L. Templeton 47, Ralph Kinzer 46, *D. Rhodes 46, J. B. Lewis 45, Frend Laudwehr 45, J. B. Adams 45, W. B. Taft 38, J. L. Templeton 37.

100 targets—*D. Rhodes 94, Fred Landwehr 94, Ralph Kinzer 93, C. E. McKelvey 93, Hugh Fleming 92, C. L. Templeton 91, J. B. Lewis 85, J. B. Adams 85, W. B. Taft 79.

Yours,
E. A. FRY, Secretary.

Some Trapshooters, These.—For the past sixteen months, from sunset to sunrise, the electrically operated trapshooters on the world's largest, most attractive, realistic and spectacular electric sign—located on the Million Dollar Pier, Atlantic City, New Jersey—have fired at 10 targets a minute and recorded a hit every time.

Human trapshooters are not equal to the task of breaking every target thrown. Mechanisms, of course, can be made almost infallible, but from now on the electrical trapshooters are to be more realistic and more human than ever. They will miss at irregular intervals. Irregular is the proper word.

Thousands of persons seat themselves on the spacious hotel verandas and many more mass on the board sidewalk every night trying to figure out when the shooter will miss. Sometimes the misses are as many as two or three in thirty seconds—while at other times the misses are not more than two in the same number of minutes. Therefore it is difficult to work out a system and play it.

Figuring out "when the shooter misses" has become quite a game in Atlantic City and every one is playing. You cannot help but enthuse and get into the game after watching the electrical display. It is only human to try and solve the puzzle—and ascertaining just when the shooter misses is a puzzle. Thousands check up the misses each night, keeping tabs by the hour, but on no two nights thus far has the rotation of misses been the same.

It took five months to perfect the scheme of having the shooters miss and the changes had to be made so as not to affect the operation of the sign. The iron work was extended ten feet and several hundred additional lights are now in operation.

There are 4,000 lights in the entire sign which is 50 by 100 feet. The figures of the shooters are 21 feet high. The trap puller is 18 feet 6 inches tall. The target is 15 inches in diameter. The sign cost upwards of $100,000.

There are six operations to the sign, each one taking about one second. First the green lights come on, producing a lawn effect, and then in order appears the trapshooter, who places his gun to his shoulder and aims as the trap pulier raises behind him. The puller throws the lever, which releases the target. You soon learn whether the target is hit or missed. When hit the target bursts into hundreds of small lights, looking for all the world like the fragments of a target. When the target is missed it travels the length of the sign and disappears into the night.

.....LOCAL CLUBS JOIN THE A. K. C.....

Oakland and Alameda County and Coast Pekingese to Give Exhibitions.

That there will be no abatement of dog shows because of war conditions was the opinion expressed by most of the delegates at the quarterly meeting of the American Kennel Club, which was held last Tuesday. Two organizations flunked to the extent of giving official notification that they had called off their fixtures, but it has been rumored that more than one other event will be indefinitely postponed. Mr. Vredenburgh, the Secretary of the A. K. C., said he thought it was a case of hysteria, and that if the baseball parks, race tracks and theater were to be kept open, there was no reason why the sport of showing dogs should not be indulged. Southampton, probably the biggest outdoor affair of the Eastern circuit, and Memphis, a big thing in the South, called everything off in spite of the fact that actual warfare is several thousand miles from the United States. Most of the delegates expressed the opinion that it was a case of "cold feet." The two clubs under which these shows were to be held requested the return of their license fee, but this was not granted. It was voted that either of the clubs might hold a show any time during the calendar year without repayment of the fee.

The meeting was a very well attended one and proved that the dog game is going to thrive during the war crisis. Most of the business done was of a routine order. Two new clubs were admitted to membership and eight new delegates and two new directors elected. Reports of the trial boards were confirmed. The by-laws governing the controlling of shows, field trials and clubs were adopted, to go into effect July 1.

The new clubs admitted were the Oakland and Alameda County Kennel Club of California and the Pacific Coast Pekingese Club. The eight new delegates, with the clubs they represented, are the following:

F. G. Taylor, English Setter Club; C. Halstead Yates, German Shepherd Dog Club; H. M. McAdoo, Gwynedd Valley Kennel Club; John G. Bates, Irish Terrier Club; G. M. Wharton, National Beagle Club; J. G. Horsfield, New Bedford and District Kennel Club; M. S. Adler, Queen City Kennel Club, and Henry Bixby, Scottish Terrier Club. The two new directors chosen were John G. Bates and Q. A. Shaw McKean.

The wins of Faux Pas, the French bull dog winner at the New England Show, were reinstated. It may be recalled that Faux Pas was disqualified by the A. K. C. on the report of the veterinarian, whom Charles G. Hopton, the judge, overruled.

Mrs. L. C. Vogel, of Detroit, Mich., is the best woman amateur trapshooter in America and a great deal better than many of the sterner sex. In the recent Amateur Championship of America contest she broke 185 targets. The champion broke only six more.

Mayor Woodman of Los Angeles is a good fellow, a good sportsman and a good shot. Last week the Seven Hills Revolver and Rifle Club notified "His 'onor" that he holds the 300-yard record as a marksman in that organization. On top of that, "Dad" Skinner, manager of the Pine Knot Lodge in the Big Bear Valley, sent him the first catch of trout of the season. One of the lake beauties registered 22 inches over all, and Mayor Woodman has been licking his chops ever since.

✤ ✤ ✤

Trade Notes.—The recent Pacific Coast Handicap held at San Jose May 27th to 30th inclusive finished in a blaze of glory for Remington UMC guns and steel-lined shells.

The Pacific Coast Handicap event resulted in a tie of four shooters and in the shoot-off Mr. Chas. Yocum was found to be the winner with Nitro Club shells; Mr. H. McLachlan second with Arrow and Mr. D. C. Davidson third with Nitro Club.

The Preliminary Handicap was won by Mr. H. R. Everding at 18 yards with a score of 98x100 with Nitro Club shells. Mr. Dave McFadden was second with his Remington Autoloading Shotgun with a score of 95.

The Pacific Coast "Special" was won by Mr. O. A. Evans with a score of 99. Mr. R. P. De Mund and Mr. A. G. Flickinger tied with 97. Mr. Evans and Mr. De Mnnd used a Remington Pump gun and Nitro Club shells and Mr. Flickinger Arrow shells. In this event Mr. H. E. Poston made a score of 100 straight with the same load.

The Pacific Coast "Overture" was won by Mr. Harry Ogilvie with a score of 100 straight with Nitro Club shells and Mr. Poston duplicated this winderful score with the same shell.

Mr. Ogilvie also tied for High Amateur Average with a score of 330x340 and Mr. Poston won High Professional Average with a score of 338x340.

Four runs were made of over 100 straight, all with Nitro Club shells: H. E. Poston, 261 straight; Harry Ogilvie, 147 straight; R. P. De Mund, 113 straight; C. H. Nash, 108 straight.

At the tournament of the Alameda Elks' Gun Club June 3, Mr. A. G. Flickinger won High Amateur, making a score of 196x200 using Remington UMC Arrow shells, also making a long run of 100 straight.

Mr. W. S. Pease was tied for second Amateur with 195x200, nsing Nitro Club shells.

Sportsmen's Row

Practically all the local trap fixtures have been run off but there are still several registered events that should attract interest.

✤ ✤ ✤

The Grand American handicap in Chicago in August will see a number of Coast shots on the line with the best in the country.

✤ ✤ ✤

Mrs. A. G. Wilkes was surprised on her recent visit to New York to find so few of the fair Eastern Dianas at the traps. She declares that Coast ladies take much more interest in the sport.

The Alameda Elks can now claim the Elks' trapshooting championship of the country. The Wilmington, Del., boys have held the title but were out-shot in the telegraphic match on Sunday.

✤ ✤ ✤

There were 143 entries for the handicap, which is a new record. One hundred and thirty-nine actually shot and more would have been at the traps save that it was 7:30 p. m. as it was before the last squad finished.

✤ ✤ ✤

Idaho trap shooters will settle their grudges and fight for the state honors at Twin Falls on June 11 and 12th. Several Colorado gun pointers have announced their intentions to be on the spot when the shooting fest comes off.

✤ ✤ ✤

It is estimated that close to 90,000 targets were trapped during the progress of the tournament. There was some heavy firing during the four days.

H. Lorenson is showing some great form this season and takes rank with the best shots on the Pacific Coast.

✤ ✤ ✤

Sacramento, Cal.—There will be no more issues or sales of rifles or ammunition to rifle clubs affiliated with the National Rifle Association, according to advices received from the War Department by Adjutant General Borree, who is the California State Secretary for the rifle association. California has more than 100 rifle clubs.

✤ ✤ ✤

Jack Howard, fishing at Wingo last Sunday, pulled up the prize striped bass of the season. The fish was forty-seven pounds, and as a result of the catch Howard is high man of the San Francisco Striped Bass Club. There was plenty of fine bass fishing at Wingo Sunday, Howard getting a twelve-pounder and a four-pounder in addition to the prize catch. William Reimers got a six-pounder, Billy Cnmmings a ten-pounder and J. Barrallis an eight-pounder.

✤ ✤ ✤

Charley Shaw, an old-time blue rock buster, dropped in at San Jose to see the sport. He started watching one of the squads at the traps and before many minutes he was marvelling. Not a shooter dropped a bird in the twenty-five targets. "Whoop, what's wrong here?" he inquired of Bill Price. "Gosh, when I was in the game, they didn't do these things, and nobody here seems to think it is anything out of the ordinary." It's the shooters on the improve.

✤ ✤ ✤

A record is claimed for Hugh E. Poston, the San Francisco professional, for his performance at the Pacific Coast handicap. Out of the entire program of 660 targets he missed only 26 targets, which is said to be the best performance ever made at an Interstate Association handicap. He lost but five targets out of 440 at 16 yards; four out of ten doubles; seven out of 100 from 22 yards and ten out of 100 from 21 yards. Add to this that he had a long run of 261 and you can appreciate that Hugh was doing some shooting.

✤ ✤ ✤

Light tackle salmon fishermen are now having some real sport along the Willamette River, near Oregon City and Jennings Lodge. Howard C. Berrian of Portland, Ore., recently landed a thirty-four-pound chinook while at the Jennings Lodge fishing grounds. Mr. Berrian's catch was made with heavy tackle and because of this fact he is not entitled to any recognition from the Salmon Club of Oregon. He is now negotiating for a light rod and tackle. Clifford Spooner captured a twenty-six and one-half pounder with light tackle, which won him one of the silver buttons awarded by the Salmon Club. Jerome Madden took one of thirty-one pounds.

✤ ✤ ✤

Hundeds of deer, says Fred Groom, forest ranger, perished the past winter in Umatilla and adjoining counties in Oregon, because of the deep snows and severe weather. He estimates that between 150 and 200 deer have died along the north fork of John Day River. Mr. Groom bases his estimate upon the fact that he has found 25 carcasses along the limited trail he takes. Snows have been of unusual depth and of long duration, shutting off the food supply of the animals, and, weakened by lack of food, they were unable to make their way through the deep snows. Mr. Groom says that deer have been very numerous along the John Day dnring the last two years. One day last winter he counted 47 at one time feeding within his pasture.

Trapshooting has come along so well as a sport that the American Amateur Trapshooters' Association, formed a little more than a year ago, has more than 60,000 members.

✤ ✤ ✤

There was a time when there was nothing in the city parks except benches. Then some one worked in tennis courts, then golf links were made, and now 12 cities have installed traps for trapshooters.

✤ ✤ ✤

The Spanish Kennel Club, of which King Alfonso is honorary president, had 188 registrations last year. The Queen and Dowager Queen are strongly interested in the sport. The dogs are divided as follows: Dogs as guards and utility, foreign sheep dogs, dogs for tracking and hunting, greyhounds, dogs for shooting, retrievers and spaniels, working terriers, dogs "de luxe" and toy dogs.

✤ ✤ ✤

T. S. Bellin, of Albany, N. Y., has sold the well-known bull terrier Southboro Sapper to John n. Stelling, of San Francisco, Cal. Southboro Sapper has won more than forty first prizes and specials at the circuit of shows closing at Montreal, including Cleveland, Canton, Chicago, Detroit, Newark, Baltimore, Washington, Cambridge and Wilmington. Mr. Bellin still has the English champion bull terrier, Allfire Alive, and expects to exhibit him at Mineola.

✤ ✤ ✤

Persons who desire to brand their dogs with identification marks inside the ear might take a tip from C. A. Evans, of Newbery, Ore. He says all that is necessary is to obtain a tattoo needle from any rabbit supply house, and he thinks that they should work just as well on the ear of a dog as a rabbit. These needles are used to brand a rabbit's pedigree number or an owner's name inside the ear. The tattooing system is of benefit to owners of gun dogs in case they are lost in shipping.

✤ ✤ ✤

Elks' Telegraphic Match.—The Alameda Elks' Gun Club won the telegraphic trap shoot, according to advices received from the East. The local shooters tallied 456 breaks out of 500, as compared to 418 by Wilmington, Del., Elks. Camden, N. J., defaulted. The scores of the men of the Alameda teams were as follows:

*Geo. E. Oliver 50, *Fred Willett 49, Ed Garratt 48, Al Durney 47, H. B. Vallejo 47, H. C. Peet 45, R. T. Boyd 45, H. G. Meinecke 42, J. Croll 42, Charles Linderman 47. (*Pro.)

✤ ✤ ✤

Columbia-Willamette League—

	W.	L.	Pct.	Shot at.	Broke.
Woodburn	5	1	.833	750	686
La Grande	4	1	.800	750	713
Albany	4	2	.667	750	716
Salem	2	3	.400	750	692
Pendleton	2	4	.333	750	662
Oregon City	1	5	.167	750	672

Results on June 3—

Woodburn 111, Oregon City 110.
Pendleton 110, Albany 121.
Salem 123, La Grande 123.
Albany 121, Oregon City 110 (shoot-off).
Astoria idle.

As a result of a tie shoot between the La Grande Gun Club and the Capitol City Gun Club of Salem, the championship series of the Columbia-Willamette Trapshooters' Association for The Oregonian trophies must go into extra innings.

The Woodburn Gun Club leads the league with five wins and one defeat, but La Grande still has a chance to tie by defeating the Capitol City nimrods. The tie will be shot off and if La Grande loses to Salem, Woodburn will have undisputed rights to the title.

Woodburn had a close shave in its final match of the schedule, defeating Oregon City.

The Albany marksmen finished with the high average of the tournament, with 954 per cent total, just .003 per cent better than the La Grande contingent.

✤ ✤ ✤

Green Lake Club.—Excellent weather conditions greeted a rather small turnout at Green Lake on June 3, but some mighty good scores were turned in.

Dr. King made a "straight," breaking every target in the program of fifty, and there was not a scratch in the lot. This is the best run turned in in a single day since the state tournament, when Frank Troeh established a new Coast record with 284 without a miss. Out of a field of seventeen ten scores of 90 per cent and better were made.

Five tied for the sterling silver spoon with their added targets, and the race is not yet decided, ending with George E. Baker and Dr. A. B. Kidd still neck and neck.

Owing to so many of the Green Lake members having decided to take in the Bellingham tournament next Sunday, the traps will not be opened. This is the fourth tournament in the Northwest Washington League, and Seattle is sure to do herself proud in the way of returning the many courtesies which the Bellingham boys have placed the local clubs in debt for in attending all the tournaments held in their home city this spring, as well as in years past. The scores follow:

Dr. King 50, George B. Baker 47, E. K. Van Vleck 47, W. H. Carstens 47, Dr. J. F. Hill 46, D. R. Baker 46, Dr. A. B. Kidd 46, J. H. Hopkins 46, Dr. C. E. Lanter 45, G. A. Conklin 45, nr. S. W. Giffin 44, C. B. Fitzgerald 43, Dr. R. V. Mills 42, Dr. M. A. Winningham 42, M. A. Rosenfield 40, C. Benbow 31, P. B. Clark 29.

Al G. Field, the minstrel man, is the latest convert to the trapshooting game. He likes it so well that he has purchased a trap and had it installed in his private grounds in Cincinnati.

✤ ✤ ✤

Tacoma Fly-Casting—Scientific fishermen from Seattle, Everett and Tacoma were guests of the Tacoma Bait & Fly Casting Club on June 3 for fly casting events at the Point Defiance casting pool. The wind was unfavorable for good scores. The Tacoma club will be guests of the Seattle club July 1st.

Results of the quarter ounce accuracy cast were as follows: R. B. Nason 98.4 per cent; B. B. Perow 97.8, J. W. Monnett 97.6, H. J. Nason 97.5, W. J. Bailey 96.4, C. R. Warner 94.4, D. E. Gilkey 59.1, R. E. Lyttaker 59.1, R. Hutchison 92.1, J. H. Byer 90.5, P. C. Palmer 89.5, H. E. Rosenfeldt 86.4, W. L. Richards 82.2.

Distance cast, ¼-ounce bait—J. W. Monnett, 118 ft. 5 in.; R. B. Nason, 105 ft. 10 in.; W. J. Bailey, 95 ft. 6 in.; H. J. Nason, 65 ft. 1 in.; A. M. Flamont, 61 ft. 2 in.; B. B. Perrow, 59 ft. 9 in.; C. R. Warner, 57 ft. 4 in.; D. E. Gilkey, 55 ft. 9 in.; J. H. Byer, 32 ft.; R. E Lyttaker, 28 ft. 7 in.; R. Hutchison, 19 ft.

Fly casting, light tackle, accuracy (per cent)—B. B. Farr 98.8. E. A. Wisen 98.5, W. J. Bailey 98.3, B. B. Perrow 98, L. M. Hays 98, R. S. Hays 97.14, R. B. Nason 97.13, R. Hutchison 97.8, R. E. Lyttaker 97.4, C. R. Werner 96.2, Butler 96.2.

Distance fly casting, light tackle (feet): B. B. Parr 72.6, E. A. Wisen 72, R. S. Hays 72, Butler 71, L. H. Hays 70, B. B. Perrow 68.4, R. B. Nason 63, R. Hutchison 61.

Fishermen's contest, unrestricted line and rod: Flammont, first, Monnett, second.

AN OWL HUNT ON A FOGGY NIGHT.

[By M. A. Howe.]

Did you ever go on an owl hunt on a foggy night?

No? Well, the writer has, and, believe me, I'm telling you the truth when I say that for real sport and excitement an owl hunt on a foggy night has anything I have ever experienced backed clear off the deck into deep water.

My home is just outside the city of Tacoma, in a game preserve which contains upward of two hundred thousand acres, and it is usually provided with plenty of birds. However, the last winter was unusually severe and, as a result, quails are not as plentiful at this time as might be desired. I am therefore just a little jealous of the dozen or so bevies that are to be found within a half mile of my home—especially as I am very much interested in the education of a pair of Comanche Frank—Miss Cash youngsters that need the birds to work on.

It is not to be wondered at that my ire was aroused one night last week, after I had retired to my downy couch, on hearing at regular intervals, the long, mournful Who-o! Who-o! of an owl.

I was just a little more than half asleep and, as the who-o! who-o! continued, I realized that Mr. Owl was very likely enjoying a feast off of one of the quails that I and my puppies are so greatly interested in.

My anger rose higher and higher, and I soon found myself at the window with my head out and my ears open.

Who-o! Who-o! came to me from the direction of a clump of young firs about a quarter of a mile distant. This clump of trees, covering a couple of acres, usualy holds my prize bevy and is nearly always good for a "point."

Realizing that my little feathered friends were being pursued by an enemy against which they had no defense, I resolved to remove the enemy, if possible, and at once began to don my clothes.

I then took the old gun which I had so carefully greased at the closing of the duck season only the Sunday before, hastily wiped off most of the grease, slipped in a couple of shells and, grabbing my spotlight, was off on the wildest hunt I ever had the good luck to experience.

Who-o! Who-o! came to me through the foggy night as I shut the front door of my home and made straight for the firs.

Who-o! Who-o! at regular intervals as I hurried along, wondering whether I would be successful in locating and bagging this thief of the night. I could plainly hear his mournful cry upon entering the thicket; the sound came to me as though it was very near, and my every sense was alert as I began casting about among the tree tops with my flashlight, hoping that I would "shine" his eyes and thus locate him. Who-o! Who-o! This time apparently just a rod or two in advance. I stole forward with quickening pulse and all the stealth at my command, only to hear the call just a little farther ahead.

At last I came out on the other side of the thicket, and I again heard the call, which now seemed to be near the top of the high hill—invisible in the fog—some two hundred yards away. I plunged into the brush and began to climb.

Upon reaching the crest, I sat down on a windfall to await the next call of the owl. Presently it came: Who-o! Who-o! But there was something about it that puzzled me, and I sat with ears alert for its next repetition, which came to me out of the fog and night: Who-o! Who-o!

I broke my gun, pulled out the shells and slipped them into my pocket with the remark: "You darn fool!" Then I lit out for home by the shortest route. Who-o! Who-o! said the fog horn on Robinson's Point, some twenty miles away.

BETTER LIVE STOCK
and Agricultural Topics

The Wasco farmers' community center, Kern ounty, California, has organized a brass band—said o be the only band in the United States made up xclusively of farmers. The Wasco organization sells ts production in carlots, and also it buys what it has o buy in carlots.

✤ ✤ ✤

T .S. Glide, of Davis, whose herd of Shorthorns is ne of the best west of the Mississippi, last week old a young bull of his own breeding for the reported price of $1,000. The bull is a strict representative of the Glide herd, having come, it is said, from sire and dam also bred by this prominent breeder.

✤ ✤ ✤

Chester G. Starr Promoted in Purdue University.

Chester G. Starr, of Centralia, Mo., has been promoted to the head of the Animal Husbandry Department of Purdue University, LaFayette, Ind. Mr. Starr is a graduate of the Missouri College of Agriculture, and one of the leading young stockmen of Missouri.

✤ ✤ ✤

The dates of the Pacific National Dairy Show for 1917 are November 16 to 23d, inclusive, at which time a general exhibit of dairy stock, dairy machinery, and dairy products in general will be displayed at Portland, Oregon. The Directors of the above organization are planning for a very large show, and much interest is being taken in the Pacific Northwest in dairy stock breeding and general development in connection therewith.

✤ ✤ ✤

The Bridgford Company, of Knightsen, is taking the lead among the Holstein herds of the United States, and that this herd soon will be as famous throughout the entire land as it recently has become in California is predicted by those who are in a position to know. It is another great herd which is making California discussed as the leading live stock producing state of the Union. Judge E. A. Bridgford, of San Francisco, is president of the company.

✤ ✤ ✤

Rice Expensive Hog Feed.

That rice, as an economical feed for hogs, even in normal times when the price is less than one-third what this staple is now bringing on the market, is not a success, was the expression of Professors Thompson and Royce, of the University Farm, at Davis, who were in San Francisco this week with several rice-fed hogs. The hogs marketed by the University were fed rice that cost $1.85 and the cost of feeding them was something like $18 per hundred pounds. The college will issue a detailed statement of this experiment, which, according to swine men, will save the hog men of California many thousand dollars during the next season, as many had arranged to feed their hogs on rice, who now will use some other ration.

✤ ✤ ✤

Emmons & Chapple Shorthorn Sale Is Notable Event.

The Shorthorn sale of S. P. Emmons & Son, Mexico, Mo., and George Chapple & Son, Bowling Green, Mo., which was conducted at the Emmons home in Mexico Tuesday afternoon of last week, was one of the most notable events in live stock circles in the State this spring. Forty-five head of Shorthorns were sold at prices that ranged to $330.

R. H. Scott, representing the Lespedeza Farm, of Hickory Valley, Tenn., paid the top price for a yearling cow, Sweet Victoria, bred by Emmons & Son and owned by Charles Prescott, Jr., of Bowling Green.

Four of the offerings went to Oklahoma; ten to Arkansas; two to Tennessee and four to Illinois.

✤ ✤ ✤

CALIFORNIA IN THE WAR.

Of California's prospective contributions of food for the armies of the Allies in the great war, this year, a writer for the Los Angeles Times says:

"Beef is one of the first of the great food staples to be considered. In round numbers there are, today, on the ranges and ranches of California 1,000,000 head of beef cattle which will average 1,200 pounds per head on the hoof. In addition to this the state has 2,500,000 head of sheep, which, in addition to the tremendous meat supply represented, will contribute 11,590,000 pounds of wool, one of the most important elements in the clothing of an army.

"The number of hogs in the state is hard to determine at this date, because of the rapidity with which these animals increase, but there are at least 2,000,000 head of hogs in California and the average weight of a marketable hog is 200 pounds.

"California's butter and cheese production is enormous in normal years, and the coming year will be away above normal. She exports great quantities of both these products. In addition to its beef, pork, butter and cheese the state is also one of the heaviest producers of such staples as beans, potatoes and alfalfa and barley hay, all products that are vitally essential to the rationing of an army, and, except butter, are all products that permit of being put up so as to be easily transported."

HEREFORD BREEDERS ORGANIZE.

Hereford breeders of California organized the nucleus of the Pacific Coast Hereford Breeders' Association at Davis, on Tuesday of last week, at the office of Professor Gordon H. True, chief of the animal husbandry division of the University Farm.

H. H. Gable, of Esparto, Yolo county, was elected president. W. Dean Duke of San Francisco, whose herd is at Likely, Modoc county, was elected vice-president, and Winfield Madden of Dixon was made secretary-treasurer. Under the constitution and by-laws adopted, members of the executive committee will be appointed later by the president.

Some discussion was had on the question of whether the organization should incorporate or not, and it was decided to defer decision on this matter until later, when breeders from other states shall have joined the organization and an opportunity to express their views on this matter is afforded. It is the intention of the organizers to include the states of Oregon, Nevada, Washington, Idaho and California within the scope of the association.

Everything will be done for the promotion of the interests of the breed, and it is probable that later on, annual or semi-annual breeders' sales will be held under the auspices of the association. The next meeting probably will be held in Sacramento during the State Fair.

The breeders were notified largely through Congressman Curry that their appeal made at the San Francisco meeting for the opening of national parks to grazing of cattle this year, because of the great shortage of feed, has been answered favorably. At least a portion of the parks will be thrown open to cattle.

William Kavanaugh, exhibit superintendent of the State Fair, urged the members to exhibit at the coming fair in September. He pointed out that last year only four Hereford cattle were shown, and that $800 in prize money went begging.

Among those who attended the meeting were: H H. Gable of Esparto, Noyes of Sutter City, Dean Duke of San Francisco, William Bemerly of Woodland, Dean H. E. Van Norman of the University Farm, Professor True, Winfield Madden, C. R. Crow of Pleasanton, J. H. Bunting of Mission San Jose, D. O. Lively of San Francisco, and E. B. Morton of Placerville.

OTHER BREED ASSOCIATIONS MEET.

California Swine Breeders gathered at Davis last week from all parts of the state. A general discussion of the pure bred swine industry and its development was indulged in.

The former incumbents were continued in office: C. B. Cunningham of Mills as president of the body; W. W. Evertt of Calistoga, vice-president; and Prof. J. I. Thompson of the University Farm was re-elected secretary-treasurer.

The directors were elected as follows: Harry Murphy of Perkins, W. S. Guilford of Willows, M. Bassett of Hanford, R. H. Whitten of Los Angeles, H. P. Slocum of Willows and A. E. McCarthy of San Francisco.

It was decided to hold a donation sale for the breed and the following committee was named to handle it: H. E. Richardson of Chico, W. Bernstein of Hanford, George Murphy of Perkins, Maurice Rucker of Fairoaks, R. L. Robinson of Fairoaks, A. L. Tubbs of Calistoga and W. O. Pearson of Woodland.

Rice does not make a very good hog food, as shown by preliminary results of an experiment conducted at the University Farm and explained to the breeders by Prof. J. I. Thompson. The experiment has not been concluded, but the preliminary showing is not a good one for rice.

The beneficial results of the farmer-banker movement, as shown by the interest aroused among pig club boys, was a fascinating topic of discussion. H. C. Carr of Porterville, a banker, told of his experience in financing farm boys for the purchase of pure bred gilts and his talk excited much interest.

C. B. Cunningham of Mills, president of the association, talked on the purposes of the association. The market side of the hog industry also was discussed. Papers taken up in the afternoon were: "The Educational Value of State and County Fairs," William Bernstein of Hanford; "Advertising," by R. B. Whitten of Los Angeles, and "The County Unit Plan of Hog Cholera Control," by Dr. B. J. Cady of the United States bureau of animal husbandry.

Poultrymen Convene.

Poultrymen of California were in session at the Poultry Division headquarters and heard a series of talks by Prof. J. E. Dougherty.

✤ ✤ ✤

California Jersey Breeders' Association.

Members of the California Jersey Breeders' Association held a lengthy meeting Wednesday at the Farm, and talked over publicity and breed advancement matters with E. C. Voorhies and J. M. Roberts, field agent for the American Jersey Cattle Club.

NOW PAYS TO DRY WINE GRAPES AS FEED FOR HOGS AND COWS.

With this year's abnormally high price for grain, many vineyardists may find that the most profitable use of their wine grapes would be to dry them and feed them to hogs or cows.

Feeding tests made by the University of California at the University Farm at Davis have shown that dried grapes may be successfully used to replace half the grain of the ordinary ration for hogs. They are best fed in connection with grain, alfalfa, and similar feed. While the acidity of the raisins is wholesome they may produce digestive disturbances in live stock if they form too large a proportion of the ration.

The grapes should be allowed to ripen as much as possible before drying as this will not only make the drying more rapid, but will much increase the yield per acre and the nutritive value of the dried grapes.

Eleven varieties of wine grapes grown by the University on a two and one-half acre plot at the Kearney Experiment Vineyard, owned by the University near Fresno, produced the following average yields: 3-year-old vines, 2.6 tons to the acre; 4-year-old, 6.2 tons; 5-year-old, 10.6 tons of fresh grapes to the acre. This was equivalent to .83, 1.98 and 3.98 tons of dried grapes respectively per acre. These crops, harvested last fall, if dried and now sold as feed for livestock in competition with the preent price of $60 a ton for ground barley, would represent a gross return per acre of $49, $112, and $200 respectively.

Figuring on a yield of five tons of fresh grapes to the acre as a reasonable average crop for wine grapes in the San Joaquin valley, and estimating $40 a ton as a selling-price for dried grapes to be used as feed for hogs and cows, the gross returns would be $64 an acre.

Such use of dried wine grapes as feed for live stock would not be profitable at normal prices for wine grapes and normal prices for grain, but is one of the vagaries of wartime prices for farm products.

$1,650 PAID FOR HEIFER AT SACRAMENTO SALE.

There was a goodly crowd present when Secretary Chas. L. Hughes, of the California Sales Company, opened the annual Holstein sale at Sacramento last Thursday, when 80 registered Holsteins, consigned by the leading breeders of California, sold for a general average of more than $300. As has proven the case in every pure-bred sale conducted in California this year the best stock was by far the most demanded and brought better prices comparatively. The Bridgford Company of Knightsen had the honor of making an average of $445 a head on eleven head consigned by them. They also sold the top of the sale, receiving $1,400 for the two-year-old heifer, Spring Farm Cornucopia Ormsby, which sold to Gion Gibson of Williams. Immediately after the sale Mr. Gibson resold the heifer to the contending bidder, Carl Gotshall, of Ripon, for $1,650, a profit of $250. To Mr. Gotshall the good heifer Princess Korndyke Sadie Vale, of the Bridgford herd, was sold.

The sale was held in the poultry pavilion at the State Fair grounds, where Secretary Charles Paine had fitted up an auction box, ring and seats most conveniently. In fact, the accommodations at the State Fair grounds, as fixed up by Paine for a sale, are the best that have been arranged for any sales in the State.

Some of the Buyers.

One of the extensive buyers, however, was H. E. Cornwall of Modesto, who recently sold out his old herd. Gotshall & Magruder bought a good deal of quality stuff. J. P. Phillips of Fresno bought several head of animals, as did also W. H. Calhoun of Healdsburg.

Owen Duffy, manager of the Napa State Hospital, bought the Bridgford heifer Attica Rag Apple Korndyke Alice.

A considerable number of animals went to George P. Robinson of Sacramento, who got in on the low bids. Charles Yocum of Tulare bought the cow, Josephine Creamelle, from Henderson Company for $300. Boneta Stock Farm of Lodi, represented by J. F. Schofield, was a heavy buyer of Henderson stock. Kaiser Bros. of Modesto bought extensively of the Fred Hatch offering.

After some of the Henderson stock had gone below expectations, C. C. Lester of Gilroy stepped in and bought the young bull, Mantica Gelsche Segis Lyons, for $450. Lester bought several other animals at the sale. A surprisingly low price of $100 was paid for the young bull, Mantica Tritonia Segis Inka, by A. E. Green of Hood, Sacramento county. Other purchasers were R. C. Gruhlke and A. C. Hally of Dixon and C. F. Silva of Sacramento.

Ten million hogs could be raised in the United States every year with the grain and cereals used in making distilled liquors and beers, according to Prof. M. E. Jaffa, Consulting Nutrition Expert of the State Board of Health. If these products were used for feeding cattle or dairy cows, they would satisfy about one and one-half million animals for one year. The by-products from the manufacture of these liquors and beers will feed about 5,000,000 hogs.

THE FARM

These Cows Give Four-Fold the Average Cow's Production.

A cow that produced six times as much butter-fat in a month as the average for all the dairy cows of California won last month's honors in the State Dairy Cow Competition now being conducted by the University of California College of Agriculture. She was "Imported President Doris of Lewiston," owned by the Palo Alto Stock Farm, of Palo Alto.

How extravagantly and wastefully inefficient the odrinary dairy cow is, as compared with what she ought to be, is shown by the fact that the 812 cows entered up to May 1, when the list closed, in this ten-months competition, averaged last month a monthly production of 55.3 pounds of butter-fat, or nearly four times the average for the dairy cows of California as a whole, which is fifteen pounds of butter-fat a month. It costs little more to feed a good cow than a poor cow. The University is aiding the farmers of the state to get rid of "boarder cows" which do not produce enough milk to pay for their feed by urging the dairymen to form co-operative cow-testing associations, and by providing official testing for dairy cows for owners who wish to obtain Advance Registry records.

With this year's shortage of feed, it is doubly important that every dairyman should have in his herd only cows that are worth their keep.

The average for the month for the cows in the University's competition was 1347 pounds of milk, or, at 16 cents a gallon, $25; or, with butter-fat at 40 cents a pound, $22.12 plus $2.50 for a thousand pounds of skim milk.

The reason these cows gave about four times as much as the average California dairy cow is that they were bred right, fed right, and handled right. Most of them are pure-bred, of one or the other dairy breeds. However, while it was a pure-bred Guernsey that made the best record for the month—96 pounds of butter-fat—a grade Holstein produced 93 pounds, a grade Jersey nearly 92 pounds, and four other grade cows produced over 82 pounds of butter-fat.

A Humboldt county farmer, G. E. Trigg of Ferndale, won the Pacific Rural Press prize for the highest production by five grade cows during April, with an average production of over 82 pounds of butter-fat.

F. Stenzel of San Lorenzo won the McAllister and Sons prize for April for the highest production by a grade cow—93 pounds.

In spite of the present high prices of feed, cows such as the 812 in this competition are large money-makers. The first step for the farmer to take to build up a herd of such animals is to find out whether each of his cows earns her own board and to get ride of a cow if she does not. Heredity must be studied, and calves raised from parents of generous milk-producing quality.

Clean Dairy Utensils Necessary For Clean Milk.

Most of the bacteria which get into milk come from the dirty cow and from the utensils, such as cans, pails, strainers, coolers, and separators, which have not been properly cleaned. In winter the cows are likely to become dirty from confinement in the barn, but in summer they are easily kept clean so that they are then of little relative importance in contaminating milk. On the other hand, a far greater number of bacteria get into milk from dirty utensils in summer than from a dirty cow in winter.

A bacterial count recently made from some of the rinsing water left in an eight gallon can, which had been washed twelve hours before, showed the can to contain more than three billion bacteria. Eight gallons of milk placed in this can would have received a contamination of nearly 100,000 bacteria for each cubic centimeter. This can had been thoroughly rinsed and left covered in a room where the temperature was about 70 degrees F. An experiment made during the winter when the temperature was below 50 degrees showed fewer than 3,000,000 bacteria in a can similarly treated, which would mean a contamination of fewer than 100 each for each cubic centimeter of milk.

A can which was rinsed, subsequently heated with steam and then turned right side up with the cover off until dry, contained approximately 200,000 bacteria or a contamination of about 7 for each cubic centimeter.

Experiments of this sort which have been carried on at the University of Missouri College of Agriculture indicate that the point of chief importance in the care of dairy utensils, especially in warm weather, is thorough drying after cleaning. Cleaning will remove a large per cent of the bacteria and much of the food for their growth. Application of steam for thirty seconds kills very few, but it will supply heat to dry the utensils which prevents bacterial growth, so that there will be practically no more present twelve hours later than five minutes after washing the utensils.

Much emphasis has been laid upon thorough cleaning of utensils, and rightly so, but the process of drying is equally as important in warm weather. Drying should not be done with a cloth, but by heating the utensils in hot water, steam or oven, sufficiently to evaporate moisture.

General recommendations for the care of utensils are: 1. Rinse in lukewarm water as soon after use as possible. 2. Wash in hot water containing washing powder which will remove grease. 3. Rinse in clean hot water and place in live steam 15 seconds, drain and place right side up until steam evaporates. On the farm where steam is not available sunning will give effective results. 4. Invert in a clean, protected place when dry.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

HIGH-CLASS FILLIES FOR SALE.

BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

FOR SALE.

The classiest rig in the city, pacing gelding and road buggy. Horse with very little amateur training won matinee races in 2:16 last year over the poorest half mile track in the State. Buggy made to order by Houghton Sulky Company. Also McMurray cart and a sulky.
G. Schreiber, 1816—12th St., Oakland, Cal.

LIST OF HORSES FOR SALE.

No. 1. Beautiful Bertha, by Moormont, grandson of Electioneer and Beautiful Bells; 1st dam Abbie McNutward (dam of Greatness (3) 2:10¼, Derby De Oro (3) trial 2:19, by that most elegantly bred son of McKinney 2:11¼, Guy McKinney, sire of Vernon McKinney 2:01½ and others; 2d dam Lady Irene 2:14½ (dam of a young family of extreme speed, though none have raced as yet), by Diablo 2:09¼; 3d dam Geraldine 2:16½ (dam of Leata J. 2:03, Lady Irene 2:14½), by Mount Vernon 2:15¼ by Nutwood; 4th dam Edith C., by Gen. McClellan 144 (sire of Nancy, dam of Mack Mack 2:08 and of 2d dam of Vernon McKinney 2:01½, Leata J. 2:03, Lynwood W. 2:20½, sire of Sonoma Girl 2:04¼); 5th dam by Rifleman (sire Col. Lewis 2:18¼) by imp. Glencoe. She is as elegant in individuality, conformation and style as in her bloodlines. Black; 1150 lbs., and a trotter, as are all her foals. She is a regular breeder and never requires a second service. She is unquestionably in foal now, having been bred to Mr. Borden's great trotter Major's By Guy 2:11¼, trial 2:08, April 30.

No. 2. Derbertha Bells 60907, a dark bay or brown trotting stallion, 6 years old, 1200 lbs.; very handsome, the best disposition in the world and a sure foal-getter. Never trained but a magnificently gaited horse, and all his colts are of splendid size, style, color, and show speed, though none have been developed as yet. He is by Derbertha Derby, son of Stellwell, out of Beautiful Bertha No. 1, as above.

No. 3. Louniska Berbells, a top notch 2-year-old black trotting stallion, as good an individual as California can show. By Rappallo 2:17¼, trial 2:07 trotting, by Greco B., trial trotting 2:12, son of McKinney 2:11¼ and Aileen (dam of 4), by Anteeo 2:16, by Electioneer out of Columbine. Brecco B.'s 2d dam is Lou Milton (dam of Lou Dillon 1:58½ trotting, present world's champion mare. Rappallo's dam is Oniska (dam of San Francisco 2:07¼, trial 2:04¼ trotting) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½ trotting, Copa de Oro 2:01), by Guy Wilkes 2:15½ trotting (sire of the dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼, present world's champion trotting stallion. —No pen, brush or camera can properly portray this elegant young horse. "He must be seen to be appreciated." The first man that sees him who really wants to buy a good colt and has the money to pay for him will buy him. Nothing but sickness and consequent financial straits would induce me to dispose of this stock.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, in-

—— including ——

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE. EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

ADVERTISING HOGS.

By R. H. Whitten, of Los Angeles.

[Extracts from his paper before California Swine Breeders' Association at University Farm, Davis, last week.]

Remember this: You cannot expect a paper to get the inquiries for you. True, some publications have larger circulations than others. But no matter how good a paper may be, it can only act as a distributing medium for advertisements. It merely takes what you have to offer and places it before several thousand persons. The effect that the advertisement has upon those persons depends upon you, not upon the magazine.

What the Reader Sees.

But a reader does not answer every advertisement in a magazine. . . . He very seldom notices the commonplace, conventional advertisements; he practically never answers them. Consequently, no matter if your stock is better than that of some other breeder, you must not expect a magazine reader to buy it in preference to his unless your advertisement also is better.

Advertising is simply salesmanship in print. And salesmanship is an exact science, governed by unalterable laws. Success comes from working in accordance with these laws; failure comes from disobeying them. There is no luck or chance about it.

Attention; Desire; Resolve.

Thus, in writing an advertisement you should aim to first secure attention, then create desire, and finally inspire the resolve to order your stock or to send for your literature.

Don't use general statements, either. Such headlines as "For Sale," "Notice," "Attention" and "Announcement" don't connect with a reader's needs; they don't strike a point of contact; they don't hit him in a vulnerable spot. Start your ad with some such expression as "Make Hogs Pay," "Breed Up Your Herd," "Money in Hogs," "Do Your Hogs Pay?" or "Hogs For Profit."

Amount of Advertising.

How much money should be spent in advertising? That, as well as the size of your advertisement, should be determined largely by the quantity and value of the stock you have for sale. As a general rule, however, your advertising expenditure should amount to one-tenth of the value of the stock which you expect to sell through the advertisements.

Advertise Persistently.

But don't put all of your money into a few big advertisements. Persistent advertising is the only kind that pays. An advertisement may not bring satisfactory returns for three months, six months, or even the first year. But it is doing its work right along, and if you keep everlastingly at it you will be fully repaid in the long run for every dollar invested.

It has been found by repeated tests that even a small advertisement appearing every month will bring more replies than a large one appearing irregularly. The classified columns, which are carried by nearly all agricultural and livestock magazines nowadays, afford an opportunity to do effective advertising at a low cost. But even in these columns don't run more announcements than you have stock for sale. Give reasons why your stock should be considered, and if you do your part properly, the readers will do theirs.

The Right Kind of Letters.

Too many persons—yes, intelligent persons, too—feel that advertising itself will prove the panacea for all their selling troubles. They think that if they succeed in writing advertisements that pull they simply will need to sit back and watch the business roll in. They think that every inquiry is as good as an order—that the answering of the inquiry and getting the actual order back are simply matters of routine.

But what a mistake! An advertisement is an opener for business, but not a closer. An inquiry gives you an opportunity, not an order. And your success depends, not upon the number of inquiries you receive, but upon the way you handle them. A dozen inquiries properly handled will result in more business than a hundred that are given only mediocre attention.

The Result.

Do I hear you say that you are going to put eve one of these suggestions into practice? Good! about two months Uncle Sam will have to put extra mail carrier on your route, and your expre agent will have to get more help to handle the sh ments you will be making.

HOGS ON THE GENERAL FARM.

Swine are profitably grown in practically eve locality and on almost every type of soil in t United States. Although the most heavily stock region is found in the corn belt, the East and t West are increasing the number of their swine a rapid rate, very largely because of the use of p ture crops to replace part of the grain ration. fact, hogs are grown under many different metho of farming, and fed upon a great variety of cro showing that they are well adapted to almost a condition found upon the farms of this country.

An ideal location is on a well-drained farm posse ing a rich soil that will produce grasses and oth forage, as well as the grains needed for fattening t hogs. This does not mean, however, that only tho farmers holding rich, level lands should raise ho for, as a matter of fact, hogs are most easily handl on farms that are somewhat rolling. For the prod tion of forage crops, the rolling farm is often as go as the level one, and it often has the added adva tage of shade and a better water supply. The h farmer does not have the best of it in all things, t in many instances he has certain advantages whi he does not appreciate.

In locating, the question of a market also must cosidered and the facilities for reaching it. Mo communities are connected with the large centi livestock markets by the railroads, but these will of little avail if the roads to the railroads are po Good roads are of inestimable importance, for, amo other things, they enable the farmer to market h products at any and all times.

NEED OF TEACHING THE YOUNG STALLION TO TEASE.

With the opening of the breeding season, there will be a great many young stallions brought into service. It is the tendency with a great many stallion men to simply use the young stallion for service. These stallion men neglect to teach these young horses to tease, with the result that when they are sold later on in life, the new owner does not feel justified in paying full value for a horse which he must practically re-break.

It is desirable that one of the first things to teach the young horse is proper teasing. The horse which is taught to tease quietly, will be easier to handle and control while serving. In teaching the young horse to tease, the owner should endeavor to teach him to do this work without an erection. This may be done by leading the horse away from the mare when he reaches this point and keeping him there until he is again quiet. If the young horse is taught this he will be quiet and under control when led up to a mare preparatory to service.

Another point in teaching the young horse to tease is that he learns to watch for kicks, and to guard his own safety. The horse which has never been taught anything but service many times does not seem to realize that the mare may kick. The result of this is often a kick that permanently ruins the stallion from a service standpoint.

While breaking the young horse to tease and to serve, the owner should use a bridle that is sufficiently severe to insure control. While it is a nice thing to have a horse that can be handled with a halter, this should be taught after the animal has been broken with a bridle. If a halter is put on the colt and he once gets beyond control, he never forgets that he has been master, and it is practically impossible for the average man to handle this horse with anything but a severe bridle. On the other hand if the colt is trained with a bridle that insures control, when he endeavors to have his own way, he will learn that the man is master, and will later be the horse that can be handled with a halter.

In teaching the young horse to serve, always teach him to come up from behind and to the left, rather than from directly behind the mare. An approach of this kind guards against a possible kick that would be unavoidable were the horse directly behind the mare.

WEDNESDAY, SEPTEMBER 12th.

7. 2:20 Class Pace $1,000
8. State Fair Futurity No. 6, 3 year old Trotters, Guaranteed $2,600....(Closed)

THURSDAY, SEPTEMBER 13th.

9. Governor's Stake — 2:12 Class Trot..... $1,500
10. Free-for-All Pace $1,000

FRIDAY, SEPTEMBER 14th.

11. Stanford-Occident Stake No. 1, 3 year old Pacers, Guaranteed $2,000 (Closed)
12. 2:16 Class Trot $1,000

SATURDAY, SEPTEMBER 15th.

13. 2:11 Class Pace $1,000
14. 2:10 Class Trot $1,000

Entrance and payments on these stakes will be due and payable as follows: 3% June 25th, 1% August 1st, and 1% on or before five o'clock the night before the race Two or more running races each day.

GENERAL CONDITIONS.

ALL RACES THREE HEATS — Money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat, and 10 per cent to the horse standing best in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 25th, 1917.

All purse races 5% to enter and 5% from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and three starters.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry, also if for any unforseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice, and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

Member National Trotting Association.

Address all communications to the Secretary.

(7)	2:14 Pace	$ 500
(8)	2:12 Trot	2,000

TWO RUNNING RACES EACH DAY

Entrance fee, harness races, five per cent of purse with 5% additional from money winners, entrance fee payable as follows: No entry will be received unless accompanied with 1% of purse, balance of 4% due on or before night before the race.

All races three heats, money divided 30% to each heat, and 10% to horse receiving winrace record. A horse drawn or distanced in any heat shall not lose position in other heats or summary. Money in each division 50, 25, 15 and 10%.

Nominators may enter two or more horses in any race by payment of 1% additional WITH ENTRY, but only one horse may start in race, and starter named by 5 p. m. day before race.

Number of starters required in each race as follows: Races Nos. 2, 3, 6, and 7, four starters; races Nos. 5 and 8, six starters; races Nos. 1 and 4, five starters. When less than this number, horses will race for entrance money paid in. The Association reserves the right to start any heat after third score regardless of position of horses.

The right is reserved to reject any or all entries and declare off or postpone any race on account of weather or other sufficient cause. Further right is reserved to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address shown in entry.

All races shall be called promptly at 1:30 p. m.

Other regulations according to National Trotting Association.

J. E. DICKINSON, Pres. C. G. EBERHART, Sec'y.

"Hartford" Race-horse Insurance--

"HARTFORD" policies are broad and liberal in their terms and are offered at lower rates of premium than have often been charged in the past.

You race either for pleasure or profit—possibly for both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Any race-horse is subject to the serious hazards of transportation, training, and racing, as well as the greater danger of death from fire, lightning, or disease.

If good judgment prompts you to insure your buildings against fire, you certainly will admit the necessity for race-horse insurance.

In the past it has been practically impossible for many owners to secure satisfaction and complete protection. "Hartford" policies furnish real race-horse insurance.

Horsemen will find the announcement of the program of the races of the Fresno County Fair in another column of this issue. The events are eight in number for the harness horses and two running races will be given each day. The classes for the standard breds are as follows: Free-for-all pace, $1000, 2:08 trot $1000; 2:20 pace $500, 2:20 trot $500; 2:08 pace $2,000, 2:12 trot $2,000; 2:14 pace $500, 2:16 trot, $500. Especial attention is called to the substantial increase in purses this year; and as the Fresno Association ranks with the best and carries out promises to the letter, it is deserving of the horsemen's support.

HELPING THE FARMER.

Some of the schemes proposed by the uplifters for the benefit (?) of the American farmer are ridiculous in the extreme, and a robust sense of humor is needed by the tiller of the soil to enable him to preserve his equanimity against the well-meant efforts of some of his fool friends. To begin with, he has been literally deluged, swamped and submerged by advice of every kind and description from every point and corner of the compass. What the most of us—editors, lawyers, bankers, doctors, preachers, poets and paupers—don't know about farming would fill volumes to approximate the dimensions of the congressional library; but every mother's son of us has rushed in where angels had no business to tread and advised, instructed and in other ways told our farmer friends what to do, when to do it and exactly how. If the farmer wasn't so all-fired busy he would probably laugh his head off.

The limit seems to have been reached by an enthusiastic individual in Chicago. His proposition is for the authorities to round up all the bums, hobos, tramps, ragtag and bobtail ends of humanity, give them a bath, a dose of physic and a sermon or two and distribute them among the farmers of the Middle West to "help" put in the crops. It is freely admitted that this class of human derelicts aren't worth a tinker's swear word to the city whose hospitality they enjoy, but it is proposed to dump them into the home of the farmer to associate with his women folk and children. Nor does the fact that the average individual of this class would not know which end of a horse to buckle the crupper on appear to be entitled to any consideration.

The farmer needs help, needs it as he never needed it before; but needs efficient help, capable help, the sort that has gray matter in its head and is urged and dominated by a willing spirit. The farm is no place for time killers and the bonehead type. This idea of conscripting an army of labor from the streets of the city and forcing it into the fields is bunk. There is nothing to it. If the professional idlers and shirkers are to be forced into anything, better by far force them into military training. It would prove the making of thousands of otherwise worthless pieces of humanity.—[Ivanhoe Whitted in Greater Iowa.

FACTS REGARDING HORSES NOW DEMANDED FOR WAR.

Advice, wise and otherwise, to the American farmer since the beginning of the war, has taken up the majority of the news columns of many leading newspapers. What the farmers and breeders need is more help and less advice. When advice is offered, however, it should come from some one who has gone into the matter from all angles and has gotten the facts as they truly are.

In no other branch of stock-farming has advice been so freely and promiscuously given as to the breeders of horses. It is, therefore, refreshing to have a genuine authority come out and state, as nearly as possible, the absolute facts regarding the kind of horse now needed and which will in the future be needed on the battlefields. Like every other equipment, the horse for use there, has changed, too.

Wilf P. Pond, editor of The Spur, New York, is the first writer to come out flat-footed to tell the actual fact as to the visible horse supply here and his being acknowledged and recognized as one of the best posted, all-round horse men and writers in the country—his words carry considerable weight. Mr. Pond's proposal to establish one central board to purchase all stocks for the American, British, French and Italian forces, so as to wipe out "bidding up" and other antagonisms and thus maintain horses at a reasonable cost to the Government and a profitable price for the breeder, is sane and sound, and what might be expected of him. He states there are plenty of suitable horses in the country, for two reasons: one being that the 1,000,250 animals already sent abroad were from six to eight years old, and that there is, consequently, still in this country any number of six and rising six. He speaks of an organization that stands ready to supply no less than 2,000 to 2,500 horses a day for a whole year; this being the maximum that the Army can at present receive and transport. Also that the future is ensured because the annual foal crop is over one million.

It will come as a surprise to many to learn that the type of horse demanded for service in Europe is totally different to those employed in any previous war and instead of the smaller horses favored by the U. S. Army there is needed, over there, cavalry mounts standing 15.3—16.1, because the aeroplane now does the scouting, there is no aggressive charging over a trench shattered area, and so the sole use of cavalry is to harrass a retreating enemy; then the troop mounted on the big horses is estimated by experience at TEN TIMES the value of the same number on the smaller horses, which have been ideal for long forced marches and fast dashes against the Indians, and on the border. The artillery horse now needed are animals of 15.1—16.1, weighing 1200—1600 pounds, grade drafts, to take the big guns when the motors cannot drag them further than the end of the road. Commissariat is moved mainly by auto trucks until the roads end, and then vast numbers of horses—and mules—weighing 1700-1800 pounds, are needed. In European warfare the smaller horse is useless. Prices today are $140 for light cavalry, $160 for heavy; $160 for artillery "leaders" and $180 for "wheelers."

ALASKA FOOD FINDS READY MARKET.

Alaska farmers have no difficulty in marketing their produce. A co-operative exchange system has been evolved by the Land and Industrial Department of the Alaskan Engineering Commission, and markets are assured for every particle of food that can be raised.

At the beginning of the season, there is sent to each farmer a blank form, containing a list of questions for him to answer. First he is asked for a description of his land and for a statement showing the acreage under cultivation.

Then follows a long list of products, both farm and stock, with blank spaces where the farmer fills in his report on the crops he expects to raise. Here he states how much of the crop he will sell, when it will be ready for market, and how much he expects to get per pound, per bushel, or per ton.

In addition, other questions are asked. How far is your farm from water transportation? How far is it from the Government railroad? How far from the nearest town where your produce can be sold? How can you get your produce to market? Have you any prospect of being able to market all you can produce, if so, where? What are your crop prospects this year? Will the crops in your vicinity be early or late? Are you now in need of a road to enable you to haul your produce to market; if so, state how many miles of such road and to what point it should be built?

Corresponding information is asked from mermerchants and dealers . They are sent lists of supplies and after the name of the product they fill in the quantity desired, the place and date of delivery, and the average price now paid for goods delivered at the store.

Through this system, the grower is assured of a market, and the dealer knows he will have something to sell. It is a mutual guarantee of prosperity that is drawing many new settlers to Alaska, and it is a plan that might offer some suggestions of relief from the food embarrassments that threaten us on a larger scale here in the States.

CALIFORNIA'S GREATEST PONY SALE, JUNE 23.

There has never been a public auction of any kind of live stock in California which has created quite the all-round interest as has the Red Cross Pony Sale, which will be conducted at the San Francisco Riding Academy, on Seventh Avenue, near the Park, at eleven A. M., Saturday, June 23.

This sale will embrace the entire herd, of all animals over three years of age, without reserve, of the Hopland Stock Farm's famous Hungarian ponies, which have been given the San Francisco chapter of the American Red Cross by this great institution in Mendocino county. An able corps of horsemen are preparing the ponies for the sale at the farm's expense; and when they are presented for sale they will be perfectly safe for any child to ride or drive. This gift includes the foundation of the greatest pony establishment in California, some of which were imported by the owners of the Hopland Stock Farm at a cost running to $500. They have been sold and shipped to many sections of America and the average price for the using pony at the farm has been $150. No pony has been sold for less than $100.

There will be about 60 head offered and among them are many ponies of show class; others of excellent type for children's use and some which should be bought for breeding purposes. Good ponies are always in keen demand and the rancher who attends this sale, and buys at his own price, some of this stock for breeding purposes, will be making as safe and profitable an investment as is possible. The parents of children, however, should bear in mind that horsemanship awakens the inherent qualities of courage, strength and alertness; it adds grace and carriage, it freshens the mind of young and old, and is a most healthful recreation.

The child that has a pony has a companion in which it puts all trust; a fond recollection of youth which will be carried through life. Parents who spend $100 or whatever the ponies will bring for one of these ponies, will make their children happier than by waiting until they are of age and presenting them with a car which costs several thousand dollars.

There are ponies for every use. There are white ones, blacks, duns, creams, bays and spotted ponies. Ponies with the class and style of show horses, and all ready for immediate use.

To residents of the city, we wish to impress the fact that there are miles of beautiful equitation paths in Golden Gate Park where the children may ride in all safety, as vehicles are not allowed thereon. Also, the riding academies are located at the entrance, where the ponies may be kept at a very moderate cost.

Use of the San Francisco Riding Academy has been given without charge by manager S. M. Kramer, and it is an ideal place to conduct the sale. The big pavilion is well lighted and has comfortable seats and rest rooms for women and children; in fact, the seating capacity is about 2,000, and it is expected that the Academy will be filled, as the entire Red Cross organization will turn out for the occasion.

Wm. Higginbottom, of Sacramento, one of the best known and most able auctioneers in the State, has offered his services to the Red Cross absolutely free of all cost, and will sell the ponies. Further information in regard to the sale and the ponies will be immediately forthcoming on request to A. W. Foster, 1210 Flood Building, or Curtis P. "Jump" Cauthorn, of the Breeder and Sportsman.

URGES HORSE SHOW EXHIBITIONS.

Reginald C. Vanderbilt, president of the American Hackney Horse Society and of the Association of American Horse Shows, has taken the initiative in a movement to safeguard the country's horse supply by inducing all breeders to continue their operations despite the present high cost of hay and grain.

At a special meeting in New York, called by Mr. Vanderbilt to consider the situation, the following resolution was adopted and ordered sent to every live stock organization and agricultural society in the United States and Canada, requesting their cooperation:

"Whereas, the largest export movement in horses ever known having taken from the United States approximately one million head in the last two years, and now threatening to assume still greater proportions in the near future, the American Hackney Horse Society urges its members and the members of all similar organizations to use every means of keeping up the future supply of horses in the United States by continuing and, if possible, increasing the breeding of their stock. Abundant harvests are not more vital than an adequate supply of horses, whether in war or peace, but while a single season's preparation can produce a harvest, at least five years are required to produce a serviceable horse. It is therefore of the utmost importance to replace the millions destroyed in the present war, and to this end this society urges upon agricultural associations everywhere the need of continuing their exhibitions as a means of encouragement to breeders."

Among the directors of the society who are cooperating with Mr. Vanderbilt in the movement are Fred Pabst, of Oconomowoc, Wis.; Samuel Insull, of Chicago; W. D. Henry, of Pittsburg; John L. Bushnell, of Springfield, Ohio; Charles E. Coxe and Thomas G. Ashton, of Philadelphia; William du Pont, of Wilmington, Del.; Daniel J. Driscoll, of Reading, Pa.; Paul Moore and William Ziegler, Jr., of New York, and Colonel J. Wesley Allison, of Canada.

Harness Horses and Horsemen

THE DRIVING CLUB'S BANNER MATINEE.

All superlatives fail in an attempt to properly describe the races of Sunday afternoon at the Stadium, in Golden Gate Park. It was the second program of the Driving Club's 1917 card and it was the banner program of the club, according to old-timers present who have not missed a meeting here in more than 20 years. In fact, it would have been well to have advertised it either as Banner Day or Record-Breaking Day; for there was a banner attendance, banner weather and banner races. Records of many years' standing were literally smashed to smithereens. No sooner would one record be broken than another, and another, until it got to be a joke with the crowd when Starter Jas. Ryan, in announcing the results of every heat, said: "This is a new record for the track." No matter how good a contest after several announcements like the foregoing, the crowd seemed disappointed whenever he failed to make such a statement.

In every heat of the entire four-race program the crowd, which filled the big Stadium and every nook and corner in sight of the beautiful course, was brought to its tiptoes. There was a continual craning of necks and whooping, and the man that did not get a regular "thrill" there belongs in the first trenches "somewhere in France." There was one continual cheer from the rise of the curtain until the final heat was decided, which took up the entire afternoon, and even then hundreds left reluctantly.

San Francisco enthusiasts owe it to the Sacramento horsemen, H. S. Cowell and Chas. F. Silva, for this brilliant meeting, as it was the battles staged between their horses and the best of the local owned horses that furnished the "thrillers"; and it was the Sacramento horses that broke the track records. In addition to taking the records home the Sacramento horsemen took two beautiful silver trophies back to the Capital city. Only hard luck prevented them from annexing another, as John Mack was well in line to take the three necessary heats in the Free-for-All trot, when a bad spill in the second heat prevented driver Tryon from going on with his horse after both Cohen and Spencer had been smeared all over the back side of the track; and in the last heat a piece of newspaper which hit him squarely in front caused him to break and allow that grand little trotter, Ella M. R., which had been after his bacon all day, to take the necessary lead and win.

Chas. Silva's Bondalean took the track record in the pace, finally getting it down in the fourth heat to 1:34¾. The record had been held several years by Happy Dentist with a mark of 1:35¾. The pace fared well in popularity and excitement with the trot and it took clever teaming on the part of every one of the well known drivers to hold their own. Bold Harry Aerolite came under the wire first in the second heat and was on his toes in all other events; however, second position in the remainder of the heats was his final register.

In the 2:20 pace, the four horses looked evenly matched, and at the beginning no one was confident enough to come out and say whose race it really was. Lady Silverthorne did not work well at first but settled soon enough to come in at the head in the last two heats. However, she could not overcome Mountain Dee's two first, two seconds and third.

Despite the fact that Rodney Patchen won the 2:25 pace in three straight heats, the good looking Lilly R. made a wonderful impression and the horse of more experience had to be on the job at every step. The summary:

First race—free-for-all trot:

Ella M. R. .....(G. J. Giannini)	5	1	1	2	1
John Mack .....(H. S. Cowell)	1	3	4	1	2
Yoncalla .....(J. J. Ryan)	4	2	3	3	ro
Harold C. .....(H. Cohen)	3	*	2	4	ro
Vallejo King .....(Ottinger-Welsh)	2	*	5	5	ro

Time—1:36½, 1:42½, 1:37½, 1:35½, 1:36½.

*Accident.

Second race—2:20 pace:

Mountain Dee .....(H. S. Cowell)	2	1	1	2	3
Lady Silverthorn .....(C. F. Silva)	4	4	3	1	1
King Pointer .....(H. Campodonico)	1	2	2	3	2
Little Jack .....(W. McDonnell)	3	3	4	4	ro

Time—1:39, 1:37¾, 1:39½, 1:38½, 1:39.

Third race—free-for-all pace:

Bondalean .....(C. F. Silva)	1	2	1	1
Bold Harry Aerolite....(G. J. Giannini)	2	1	2	2
Emma M. .....(W. Malough)	4	3	3	3
Directress Mac .....(J. J. Ryan)	3	4	4	w

Time—1:35½, 1:36½, 1:34¾, 1:35¾.

Fourth race—2:25 pace:

Rodney Patchen .....(J. McNamara)	1	1	1
Lilly R. .....(J. J. Ryan)	2	2	2

Time—1:43½, 1:39, 1:39½.

Notes of the Meeting.

That it was the best card ever seen at a matinee meeting was the opinion of every horseman present.

* * * *

C. A. Durfee, who is training at Pleasanton, was accompanied down by a number of enthusiasts and boosters from that track.

The judges Sunday were Thos. Curley, H. S. Cowell and George J. Giannini.

Leon Wing, the representative of the Tia Juana Jockey Club, renewed old acquaintances.

D. J. O'Keefe, of Woodland, one of the well known shoers of that section, was an interested visitor.

D. W. Wallis, of Los Banos, who is the manager of the Miller & Lux properties, was at the ringside.

The trophies Sunday were presented by S. Stanley Dollar, Claremont Hotel, Admiral Line S. S. Company and Jump Cauthorn.

Geo. Vice, of Sacramento, enjoyed every heat and can be counted on as among those present for the remainder of the season.

A. Mendenhall, prominent Oakland attorney, who has always been interested in the game, was one of the most interested visitors.

Walter Tryon, the Sacramento horseman, who had the Cowell string, was congratulated by the veterans for the good appearance of his horses.

Chas. Paine, secretary of the California State Fair and one of the best friends of high-class horse racing in the state, was an interested visitor.

That they had visited races on the Grand Circuit which did not furnish the contests Sunday's matinee did, was the statement of many noted horsemen present.

Schuyler Walton, who formerly trained and had such good success with George M. Warlow's horses, was up from Pleasanton, where he is now training a good stable.

The extreme speed shown by the horses Sunday indicates there will be something doing when they get a few more weeks' work under their belt and hit the big tracks.

Ella M. R. made friends by her consistent work, and it was the prediction of many horsemen who are in a position to know, that she will be one of the best trotters out this year.

The track was much improved over the previous Sunday and if it continues to get better, and the officials declare it will, it will be better than it has been since established.

J. N. Colomb, of Hollister, one of the state's leading business men and breeder of pure-bred stock, did not miss an incident during the day. Mr. Colomb has one of the select herds of Shorthorns in the state and is improving them rapidly.

When the mounted policeman, George Merchant, caught Vallejo King, in front of the grandstand after the sensational spill, the crowd got a thrill that no "movie" has ever been able to duplicate. In fact, had the club announced this was to take place they might have realized several thousand dollars from the "movies." One horseman said the crowd seemed to be dissatisfied because no one was killed.

THE CURLES NECK FARM SALE.

The special sale of the Fasig-Tipton Company, embracing about 60 head offered by other consignors, took place at Madison Square Garden June 6 and attracted an enormous crowd, especially in the afternoon, when Mr. Billings' horses were sold. The result is laid before our readers in the complete report below, and each may judge for himself as to its success.

It is undoubtedly true that many are disappointed at the result, but it is more than possible that these had fixed their anticipations too high, considering all the conditions. We believe that a majority will concur in the opinion that it was a very good sale, after full reflection. The Harvester did not fetch the $50,000 or more which many expected, but he did bring more than any other horse ever sold in the Garden, and that is quite significant in view of the fact that every person in the country is at the present time being reminded that it is a ptariotic duty to spend all the money he has for war bonds. It is a satisfaction to know that the ex-champion was bought by a man who will provide him with every opportunity to enlarge his sphere of usefulness and perpetuate his fame. Mr. Paul Kuhn, his new owner, is one of the oldest and most experienced breeders in the country, and his establishment at Terre Haute, Ind., has turned out many famous horses. The other main contending bidders were Walter R. Coxe and the proprietor of Brook Farm, Chester, N. Y., the latter carrying the price to $30,000, from reasons of sentiment only, as he has no aspiration to become prominently or extensively identified with the breeding business, but was unwilling to permit such a stallion to be sacrificed.

It is understood that the pacer William will go back to A. E. Vanatta, of Otterbein, Ind., the man who bred him, the bidder to whom he was struck off having been acting for Mr. Vanatta, according to report. J. H. Dillon, of New Haven, Conn., and Mike McDevitt, acting for Capt. David Shaw, were strong bidders for the stallion. We have not time for further comment upon the sale this week, but more details will be given in our next issue. The complete report is herewith presented:

The Harvester 2:01 (12), br s by Walnut—Notelet, by Moko; Paul Kuhn, Terre Haute, Ind.....$30,100

Peter Dillon 2:11½ (4), b c by Peter the Great—Adioo Dillon, by Sidney Dillon; Elm Pines Farm, Greenwich, N. Y. 3,900

Adioo Dillon 2:24¼ (13), b m by Sidney Dillon—Adioo, by Guy Wilkes; C. M. Morand, New York City 750

Arielle (12), b m by Bingen—Narion, by Arion; F. G. Le Roy, Newtown, Pa. 125

Baby Axworthy 2:25¾ (7), b m by Axworthy—Ham Bird, by Jay Bird, and bay colt, by The Harvester; A. C. Hall, Stamford, Conn. ....

Balta 2:21¾ (10), b m by Bingara—Karna, by Kremlin; M. H. Oppenheim, New York City.... 300

Baracalla (8), b m by Barongale—Caracalla, by Patron, and bay or brown colt, by The Harvester; T. J. McManinon, Houlton, Me. 300

Barbara Wise 2:26¼ (5), ch m by Peter the Great—Mokomo, by Moko, and bay filly, by The Harvester; Jas. Snell, Lexington, Ky. 1,000

Baroness Evelyn 2:12¾ (10), rn m by Baron Review—Virginia Reynolds, by Jay Bird, and bay filly, by The Harvester; Lewis F. Castor, Philadelphia, Pa. 400

Baroness Jay 2:29¼ (10), b m by Jay McGregor—Baroness Electra, by Baron Wilkes, and bay colt by The Harvester; M. J. McManinon, Houlton, Maine 250

Baroness Setzer 2:15¾ (5), b m by Henry Setzer—Red Tape, by Prodigal, and bay colt (1) by The Harvester; Jules De Gieter, Paterson, N. J. 400

Baroness Virginia 2:08¼ (11), r m by Baron Review—Virginia Reynolds, by Jay Bird; J. R. Magowan, Mt. Sterling, Ky. 300

Bernice R. 2:07¼ (13), b m by Dexter Prince—Dione, by Eros; C. W. Lasell, Whitinsville, Mass. 400

Brown Filly (w), by The Harvester—Bernice R. 2:07¼; Chas. Tanner, Cleveland, Ohio..... 425

Berta Bellini 2:15 (10), by Bellini—Portrait, by Alcantara, and foal; Geo. R. Ford, Hartford, Conn. 225

Berta Mac 2:08 (15), by McKinney—Alberta, by Altoona and brown colt by The Harvester; E. B. Maclin 260

Betsy Bingen 2:19¾ (7), by Bingen—Betsy Todd, by Oro Wilkes; J. P. Warren, Townsend, Va. (and foal) 375

Caracas (19), by Bingen—Houri, by Onward; Henry Levy, Detroit, Michigan 260

China Worthy (4), by Axworthy—China Silk, by Prodigal, C. W. Lasell, Whitinsville, Mass..... 400

Clarie Toddington (7), ch m by Toddington—Fruity Worthy, by Axworthy (and bay colt by The Harvester); J. R. Magowan, Mt. Sterling, Ky..... 550

Darrah (5), ch m by Peter the Great—Ethel Rice, by Dr. Hooker; W. R. Cox, Dover, N. H..... 325

Ethel Toddington (7), b m by Toddington—Ecstatic, by Oratorio; Buzrr Hinhe 250

Eve nSheet (6), b m by Mainsheet—Eveworthy, by Axworthy, and bay colt by The Harvester.. 300

Gazelle McKinney (7), bl m by McKinney—Gazelle, by Gossiper, and filly by The Harvester; D. R. Hanna, Cleveland, Ohio 500

Gretchen B. (19), b m by John A. McKerron—Lou Dillon, by Sidney Dillon, and foal; E. J. Tranter, agent, New York 400

Kingston Belle 2:10¾ (10), b m by Prodigal—Zaraida, by Stamboul, and brown colt by The Harvester; C. Coyne, Albany, N. Y..... 550

Lady Henrietta 2:21¾ (6), b m by Peter ODonna—Town Lady, by Wilton, and bay colt by Guy Axworthy; L. Oettinger, New York City..... 500

Lady Roma (5), ch m by The Abbe—Voniaworthy, by Axworthy; Moe Hottinghean, Francetown, Pa. 325

Lettie Lee (9), b m by Moko—Leetell, by Axtell; J. D. Callery, Pittsburgh..... 2,300

Lottie Sherbet 2:14¼ (11), b m by Sherbet—Lilly Maid, by Sir Knight 175

Lou Billings 2:08¾ (10), b m by John A. McKerron—Lou Dillon, by Sidney Dillon; C. Capa, New York City 775

Louise Wilson 2:10¾ (10), b m by Prodigal—Miss Edgar, by Bourbon Wilkes; A. J. Furbush, Boston 335

Lucile Bingen 2:08½ (6), b m by Bingen—Lucile Marlow, by Prodigal; Jas. Snell, Lexington, Ky., and bay filly, by The Harvester..... 2,500

Lucile Marlow 2:09¼ (13), b m by Prodigal—Miss Edgar, by Bourbon Wilkes; J. O. Schmitt, Jersey City 400

Margaret Preston 2:10¼ (10), bl m by The Director General—Paronella, by Parkville; Jas. R. Magowan, Mt. Sterling, Ky., and bl. or br. fillyNNN 725

May Guy (9), ch m by Guy Axworthy—Kinglyne, by May King, and bay filly by The Harvester; E. J. Tranter, agent, New York City..... 550

Memories (12), b m by Bingen—Fanella, by Arion; Patchen Wilkes Farm 250

Myra Prodigal 2:20¾ (9), br m by Prodigal—Grecca, by Artillery, and bay filly by The Harvester; E. L. Featherston, agent 400

Nancy Royce 2:06¼ (14), bl m by Allerton—Black Alice, by Strong Boy, and brown filly by The Harvester; E. B. Macklin 410

Nell Olcott 2:28 (10), r m by Olcott Axworthy—Nell Worthy, by Axworthy, and bay colt; Geo. Hoeme, Pittsburgh, Pa. 500

Nelly Worthy 2:25¾ (15), r m by Axworthy—Nell, by Estill Eric; E. D. Gould, Kearney, Neb..... 500

Nonnie (11), b m by Moko—Nanni, by Director; Harry Levy, Detroit, Mich. 160

Queen Abbess 2:03¼ (7), b m by The Abbe—Queen Regent Ideal, by Mambrino King, and bay filly; Wm. H. Leese, Brooklyn, N. Y. 1,525

Queen Olcott 2:28¼ (7), b f by Olcott Axworthy—The Queen, by Chimes; L. A. Hobbs, Portsmouth, Virginia 135

Queensland 2:19¼ (14), b m by Bingen—Ollie K., by King Wilkes, and brown filly by The Harvester 425

Poinsetta 2:11¼ (7), b m by Barongale—Anella, by Bingen, and bay filly by The Harvester; John H. Coggeshall, Providence, R. I. 650

Roberta Bingen 2:13¼ (6), b m by Bingen—Oratrix, by Orator, and bay colt by The Harvester; J. O. Schmitt, Jersey City, N. J. 700

Ruth Irons (5), b m by Bingen—Betsy Todd, by Oro Wilkes, and bay colt by The HarvesterN.N.NN. 410

Ruth Toddles (6), by Kentucky Todd—Baronia, by Directum Boy; Schwarz Bros. Co., Kearney, Neb. 800

Patchen Maid, by Patchen Wilkes; E. L. Featherston, agent 325

Setzer Girl 2:27 (4), b m by Henry Setzer—Nowaday, by Lockaway; Geo. Howard, Boston..... 400

Setzer Maid 2:27¼ (6), b m by Henry Setzer—Red Tape, by Prodigal, and brown filly by The Harvester; E. J. Tranter, agent..... 350

Solola 2:24¼ (9), bl m by Todd—Caracas, by Bingen, and brown colt by The Harvester; C. Capa, New York City 750

The Gloaming (5), b m by Moko—Twilight Maiden, by Peter the Great, and bay filly by The Harvester; C. W. Lasell 400

The Lark 2:11¾ (6), b m by Carlokin—Subite, by Steinway; Geo. Howard, Boston, Mass. 2,500

Thisbie McKinney 2:26¼ (9), b m by McKinney—Lady Thisbe, by Milroi; Don Waldo, Crittendon, N. Y. 210

Violett A. 2:18¼ (10), b m by Red Medium—Nancy Reed, by Gambetta Wilkes, and bay colt by The Harvester; B. A. Bulkley, Goshen, N. Y. 325

Yosan J. (21), bl m by Herschon—Stellaida, by Romeo; M. J. McManinon, Houlton, Me..... 150

Zarrine 2:07¼ (9), b m by Silent Brook—Lady Brusse, by Wilton, and bay colt by The Harvester; Thos. W. Murphy, Poughkeepsie..... 1,600

Bay Filly, by The Harvester—Lou Dillon, by Sidney Dillon; A. C. Hall, Stamford, Conn..... 1,700

Belle of the James 2:20¾ (3), b f by Axworthy—Kingston Belle, by Prodigal; J. Healey, Lyndel, Pennsylvania 500

Lady of Curles 2:08½ (3), ch f by Guy Axworthy—Lucile Marlow, by Prodigal; E. L. Featherston, agent 300

Judith Deane (3), b f by Justice Brooke—Caracas, by Bingen; B. A. Bulkley, Goshen, N. Y..... 250

Silent Nancy (2), bl f by Silent Brigade—Nonnie, by Moko; C. C. James, New York City 425

Bion 2:21½, g s by Ratnick—Atlasneyah; John H. Coggeshall, Providence, R. I. 450

William 1:58½ (7), b s by Abe J.—Lizzie C., by Jaywood; Crouch & Son, Lafayette, Ind. 8,000

McCloskey 2:06¼ (12), b g by Theodosius—Maggie C., by Odd Socks; John H. Coggeshall, Providence, R. I. 1,000

Josephups (prompter); Thos. Hinds, Jersey City.. 200

Sligo (Irish hunter); G. H. Lynch, Hoboken, N. J... 175

Jeff (polo pony); John J. Brown, Trenton, N. J..... 170

—Trotter and Pacer.

Thoroughbred Matters

SUNBONNET WINS KENTUCKY OAKS.

Louisville, Ky., May 25.—Proving her worth as a high-class three-year-old filly and coming from behind after being subjected to all kinds of interference as well as getting away from the barrier last, Sunbonnet, A. K. Macomber's imported daughter of Sunstar—Marian Hood, won the Kentucky Oaks, the stellar offering of the closing day of the spring meeting at Churchill Downs this afternoon. Second to her and two lengths back was Diamond, which beat Battle a head for the place position.

Ten three-year-old fillies accepted the issue in the Oaks, H. H. Hewitt being represented by an entry, Star Maid and Avis, and the race had a net value of $3,040. Thesecond horse received $500 and the third $300.

The victory of Sunbonnet marked the first victory this year of the extensive Macomber racing establishment, which has forty-two thoroughbreds. It also gave the East a clean sweep on the big stakes at the Downs meeting, as the Oaks was the next event of importance to the Kentucky Derby, which fell to Omar Khayyam, also an Eastern-owned horse.

Although Sunbonnet went to the post an over whelming favorite at odds of 1 to 2, she gave her many backers plenty of scares during the running of the race over the route of one and one-sixteenth miles, as it seemed as though she could not keep out of trouble. Jockey John Loftus' good judgment helped her considerably, however, and when she got off badly he did not rush her off her feet, but instead let her get settled in her stride before he made his move. The field had turned for home before she got in the clear and there were five horses in front of her, but she picked them up one by one and just galloped the last seventy yards.

Jockey Roscoe Troxler hustled Battle into the lead when the barrier went up and she remained on top the greater part of the way, but one and one-sixteenth miles is just a trifle farther than she wants to go and she weakened in the final driveKoh-i-Noor, also an Eastern representative, being owned by Schuyler L. Parsons, and making her first start of the year, hung on gamely until after rounding the stretch turn, but tired as if dead short. Diamond showed a lot of gameness and stood a hard drive to get the place position. Believe Me Boys quit to a walk after showing high early speed. The Hewitt entry did not cut much figure in the running of the race.

—o—

Charles W. Clark of San Mateo, president of the Golden Gate Thoroughbred Breeders' Association and one of the most active patrons of the racing game on the Coast, announced on his return from Arizona that he has given orders to have all his horses in the East in charge of John Lowe sold. The familiar and popular colors of Clark's El Palomar stable will not be seen on the turf again until after the war is over.

Clark explains that he does not think it patriotic to participate in the sport while this country is involved in the serious operation of making war for the democracy of the world. He will continue the breeding operations at El Palomar stock farm in San Mateo, to try and assist in furnishing the ideal type of remounts for the cavalry that are so badly in demand at present.

El Palomar stable consists of some well-known performers that have won stakes and honors in many sections of the country.. Last December John Lowe conditioned fourteen head at San Mateo and took them to New Orleans. They included Brynlimah, that was the feature of the exposition meeting; Rose Marion, Pleasureville, David Craig, El Palomar, Eatham, Duireer Roberts, Birdie, Gun Powder, Taesor, Zip and Wow, the last two being two-year-olds by Chantilly that have each won two races this season.

—o—

Golden Gate Association May Secure Charter.

The Golden Gate Thoroughbred Breeders' Association is considering the advisability of applying to the Jockey Club of New York, the parent turf body, for a charter. The objectof this move ostensibly is to block the plan of James W. Coffroth, of the Tijuana Jockey Club, to set up himself as the turf czar of the Far West.

The Golden Gate Association, which took the lead in reviving the thoroughbred breeding industry and racing game in California, is evidently not going to sit idly by and see the Tijuana Club dictate to the California State and district fairs in promoting the running races that will be a side feature of their events.

If President Charles W. Clark favors the plan to apply for a charter, and it is granted, the breeders will be given the right to give sanctions and to encourage racing at the fairs. Should Coffroth still stick by his rule, threatening to bar horses from racing at Tijuana if they compete at the unsanctioned fair meetings, the Golden Gate Association would be in a position to retaliate by having the New York Jockey Club, which controls the turf sport in the East, bar out the horses that run at Tijuana.

Since Coffroth announced his latest plans of enforcing the rule a large-sized row has been brewing, and the fair promoters have appealed to the thoroughbred breeders for help.

McTaggart Suspended; Other Rulings.

New York, May 26.—Jockey Tommy McTaggart's license was revoked and he was placed under indefinite suspension at a meeting of the Stewards of The Jockey Clug held yesterday.

The charge against McTaggart is that he violated Rule 213, which provides that no jockey shall bet on any race except through the owner of and on the horse he rides. It also fixes the penalty of having the license revoked should it be proved to the satisfaction of the stewards that the rider had an interest in any race horse or to have engaged in any betting transaction except as set forth.

McTaggart was convicted of having operated in various races, and M. F. Sheedy's name was associated with the charge. Sheedy was barred at Pimlico as a result of the charge.

With the suspension of McTaggart action was taken against Sheedy, Dan McTaggart, a brother of the rider, and George Phillips. The ruling in the case of these three was that in the future they will not be permitted to make any jockey engagements.

Tommy McTaggart is one of the foremost riders in the country, and he very recently signed a contract to ride this season for John Sanford at a big retainer. On one previous occasion he was suspended for a considerable time on a charge of rough riding.

At the same meeting of the stewards Jockey Harry Woods' application for a license was denied. He was banished for his handling of Buckhorn at Belmont Park some seasons ago.

Of the applications that were acted upon favorably, the most important was those of S. A. Clopton, who has been without a license for some seasons. It has been intimated that he will train a division of the Harry Payne Whitney horses. Jockey "Willie" Knapp was also reinstated, and L. J. Reinheimer, whose application was held up at a previous meeting, was granted his license to train.

The full list of licenses granted follows:

Trainers.

Frank M. Bray	J. E. Nash
Pete Coyne	Thomas R. Queen
W. C. Daly	C. Reed
Matthew Feaks	L. J. Reinheimer
Wililam Hurley	Wm. L. Schaefer
S. Judge	Henry Shields
K. K. Karrick	John I. Smith
W. H. Karrick	J. H. Stotler
Edward Leibert	Silas Veitch
Joe Lewis	William Walker
J. W. May	Maurice Welsh
Walter Miller	George Zeigler
Richard Mulhern	

Jockeys.

Willie Knapp	Thos. E. McKnight
C. B. Brady	Arthur Pickens
Guy Burns	Francis Stirling
G. Byrne	B. Warscher
Eugene A. Francis	C. Watson
Herbert Griffith	K. P. Weathersley
Chris Kirschbaum	S. Woltsenholm
James Longo	Paul Louder

This meeting of the Stewards was presided over by August Belmont, and there were also present, F. K. Sturgis, H. K. Knapp, F. R. Hitchcock and Andrew Miller.

—o—

Australian Breeder After More Thoroughbreds.

For the purpose of securing thoroughbreds to take to Australia, Andrew Robertson, a prominent horseman of Melbourne, arrived in San Francisco Wednesday. He is going to England to select some highly-bred yearlings. That it is going to be a difficult matter to ship the horses once they are purchased, Robertson fully realizes, as he makes the trip two or three times every year, and is well acquainted with the conditions brought about by the war.

The expense is an item that illustrates the steps the Australians will take to get high-class thoroughbreds. The freight rates per head are $500, which, with the high cost of feed, insurance rates, and the attendants that are necessary to look after the horses, stands the owners a pretty stiff figure when the thoroughbreds are finally landed in the Antipodes.

The racing game is flourishing in Australia, despite the war. All the clubs donate their profits to the war fund, and the authorities are encouraging the sport, says Robertson. Hundreds of horses with the thoroughbred strain are also used to equip the cavalry with mounts, and the game is in popular favor.

"It is surprising to note the crowds that have been turning out to the races," says Robertson. "With some 300,000 young men gone to the war, you would expect to detect some falling off of the spectators, but conditions are running along as in years gone by."

F. Herbert, the English jockey that Robertson brought with him when he was last here seven or eight months ago, was set down for six months for striking another rider with his whip, but he is up again and riding well.

—o—

Pop Shortell, veteran horseman, left Sacramento last week after a brief stay, during which he has been working several of his horses preparatory to an invasion of the Canadian tracks during the summer months. He has had his fliers at the State Fair race track following a season at Tia Juana. The veteran took a couple of his fastest runners to the Canadian tracks with him and expects them to do well during the next few weeks. He reports that his horses had improved very much during their sojourn at the Sacramento track.

James W. Coffroth has gone to Tijuana to look over the situation relative to launching the fall meeting. He will likely decide upon a definite date of opening on Thanksgiving day when he returns in a couple of weeks.

—o—

Geo. F. Ryan, Superintendent of the Pleasanton Driving Park, who has the last of the Comstock and Lawrence thoroughbreds in training there, has sold to C. W. Chappell of Emeryville the two-year-old chestnut colt Doc Vaughn by Rey Hindoo—Sula H. by Rubicon. Ryan has among other horses he is training a two-year-old full brother to E. R. Bradley's Preakness winner, Kalitan, a brown colt named Alf Vezina; he has also a sister to Sal Vanity, a two-year-old filly named Pleasanton Belle by Salvation—La Reine Empress by Emperor of Norfolk; a sister to Salon, Naomi Walton, chestnut filly (2) by Salvation—Alondra by Emperor of Norfolk, and a half-brother to Rhymer, a chestnut colt by Tim Payne—La Poeta by Honduras called Tom O'Day.

—o—

Good Luck to Macomber.

Local followers of thoroughbred racing are jubilant over the successes achieved by A. K. Macomber's select string after a disappointing start this season. The wealthy Burlingame turf patron owns fifty head of the finest thoroughbreds in this country, and it was expected that they would make a sweep of the fixtures. A series of misfortunes to the candidates put in an appearance just before the running of the Kentucky Derby, and it looked as if he was going to have another tough time of it.

Sunbonnet, the classy three-year-old English filly, came through to annex the Kentucky Oaks, the classic of the year for fillies, and Boots carried the Macomber colors to an impressive victory in the Suburban Handicap. Macomber was so delighted with winning the turf feature that he wired his San Francisco friends of the sensational finish of the gelding, and the grand ride put up by Jockey Loftus. J. O. Tobin, among Macomber's many other friends, wired his congratulations and wishes for victories in the other stakes that will be contested on the New York tracks this summer.

—o—

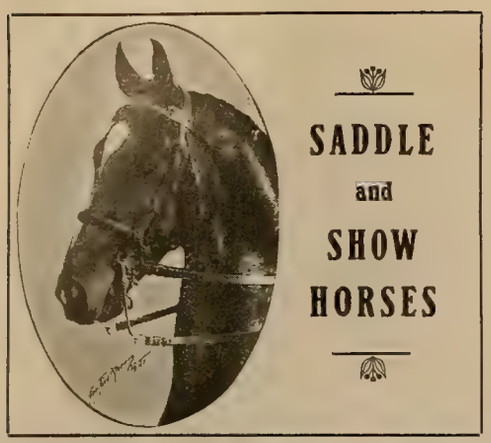
Macomber Wins Suburban.

New York, June 9.—With the weather and track conditions as if made to order, a great crowd witnessed the 31st running of the historic Suburban handicap at one mile and a quarter over the Belmont Park race course today. A. K. Macomber's six-year-old gelding Boots, by Hessian—Little Flower, carrying 122 pounds, and piloted by Jockey Loftus, was the winner, three-quarters of a length in front of H. P. Whitney's gelding Borrow, which finished second, half a length ahead of the favorite, The Finn, owned by H. C. Hallenbeck. The race was worth $4500 to the winner.

Nine horses started. Starter Cassidy sent them all away to a good break and at the first quarter Airman, Stromboli, Boots, Chicklet and Borrow were bunched only heads apart.

Just as they reached the turn out of the back stretch Pickens let The Finn down and he quickly rushed into the lead. The favorite drew farther away as he neared the turn into the home stretch, with Boots, Borrow, Stromboli and Spur racing as named within striking distance.

As soon as The Finn was straightened out for the home run he began to show the effects of the earlier run and a quarter of a mile from the finish he was plainly beaten.



It was a drive to the wire, but Boots was never in danger, winning in 2:05 1-5. Spur was fourth, Stromboli fifth, Ed Crump sixth, Chicklet seventh and Daddy's Choice and Airman were the tailenders.

—o—

Despite the fact that with nearly half a million dollars' worth of thoroughbreds in his stable, he won only one race in Kentucky this spring, that being the Kentucky Oaks with Sunbonnet, A. K. Macomber has not given up hopes of getting on the honor roll in the Blue Grass State by capturing one of its biggest stakes, as his purchase of Al M. Dick for $20,000 shows. Macomber bought the son of Dick Finnell—Martha Palmer to run him in the Latonia Derby, and previous to his acquiring him he had only one horse named for this race, Seminole King, a chestnut colt by Star Shoot—Belle of Glendale.

Turfmen who had seen Al M. Dick in training all winter pronounced him a colt of the highest type when he was taken East by Trainer J. W. May, and he bore out their prediction by the way in which he defeated everything he met around Baltimore and New York. As soon as Trainer May, who was handling him for Roy T. Yager, saw the colt had struck his best form he wired General Manager John Hachmeister, of the Latonia track, that he would ship him there to run him in the Derby. The sale of the horse did not change May's plans one bit, as he will continue to train him at least until after the running of the Derby, according to information he conveyed in his message to Mr. Hachmeister.

The high-class performances of Al M. Dick have made him one of the choices along with Midway, Opportunity and Cudgel, and that he is as classy as either of these horses is evidenced by the fancy price that he brought. At the present time it looks as though he will be the best horse that the Eastern owners will have in the race, even though Ticket, Rickety and Skeptic are sent to Latonia to run in it. The Kentuckians have a real strong hand in Midway and Cudgel, but each day the race becomes a more open affair.—[Thoroughbred Record.

Kentucky breeders of Saddle horses are announcing the arrival of many fine foals. According to one well informed horseman, more good foals have arrived in the Blue Grass State this season than in the history of the business.

✤ ✤ ✤

Hans Berg, of Milwaukee, announces he has placed Marshall Chief, Missouri's champion saddle stallion of 1916, in the hands of his former and very successful trainer, Peter M. Voggetzer, of Taylorville, Ill., who will prepare him for this year's shows.

✤ ✤ ✤

Thornton Farms, Bement, Ill., report an exceptionally good demand for three and five-gaited horses. This is the home of that celebrated three-gaited mare, Eloise Thornton, which won the championship at the P.-P. I. E. in 1915, and is the property of Miss Mary F. G. Burr.

✤ ✤ ✤

Lovers of show horses should make every possible effort to attend the Red Cross Pony Sale, which will be conducted at the San Francisco Riding Academy, Saturday, June 23. The Foster ponies are the grandest collection on the Coast and there are several splendid little show animals in the lot. There also are some that should be bought for breeding purposes.

✤ ✤ ✤

Judge E. A. Bridgford's magnificent saddle stallion, Le Grand McDonald, has been making quite a season at the Bridgford Company's ranch in Contra Costa county, where Judge Bridgford sent him a few weeks ago. He will be taken up again within the very near future and every effort made to have him champion this year. Judge Bridgford has a younger horse, however, that horsemen say will give the Missouri-bred chestnut the show of his life.

✤ ✤ ✤

Bruce Robinson, of Riverside, Iowa, who has one of the best stables of saddle horses in that state, has been spending a few days each week for the last month at the farm of C. R. Wells, near Washington, Iowa, and fitting the Wells horses for the shows. Robinson will have several of the stars owned by this well known enthusiast in his stable this year. Mr. Wells has been one of the best buyers at Missouri sales for several years and should have some clever show horses.

✤ ✤ ✤

The three-year-old saddle horse futurity at the California State Fair, which is reopened, is thePacific Coast Gaited Saddle Horse Breeders' Association Futurity and not the State Fair Futurity. The State Fair, however, has added $300 additional to the stake and the horses are eligible to enter. The closing date is July 15. Every good three-year-old in the state which is not entered should be given this splendid opportunity. It will be one of the richest stakes this year and it has been opened early enough so that owners will have plenty of time to prepare them. The sooner they are entered the better.

✤ ✤ ✤

Mat. S. Cohen, of Kentucky, who judged the saddle horses at the Capital Horse Show, at Washington, last week, will also judge at the South Shore Country Club's elaborate show the latter part of June. Mr. Cohen, who by the way, was formerly Kentucky's leading exhibitor but who now is the Commissioner of Agriculture of that state, judged at the Country Club's brilliant 1916 show and is one of the first men ever invited to judge two years in succession. It always had been their rule to have different judges every year.

✤ ✤ ✤

Lady Seaton Retired.

After exhibiting her successfully nine years in single, double, tandem and four-horse harness, as well as in hand, William H. Moore has withdrawn his famous English hackney mare, Lady Seaton, from the show ring, retired her to the Seaton Hackney Stud, which he named in her honor, and bred her to imported Marlboro. At five successive exhibitions of the National Horse Show Association, in which she was a competitor for the championship prize, no harness horse ever defeated her, and with Lord Seaton she never failed to win the championship for pairs as well. Age at last accomplished what her rivals failed to effect, however, and when tired out at the end of a hard week last year she was beaten for the championship at Madison Square Garden.

World's Championship Saddle Stake Attracts Attention of Country

Stake Proposed by Mat S. Cohen, of Kentucky and 'Jump' Cauthorn of Cal.

The world's Championship Saddle Horse Stake will be contested at the Kentucky State Fair, Louisville, Ky., September 10 to 14, under the auspices of Mat. S. Cohen, Commissioner of Agriculture of Kentucky, whose office also includes the distatorship of the Kentucky State Fair, the Kentucky Agricultural College and everything in the Blue Grass State pertaining to agricultural and live stock progress. The stake is to be exhibited for a grand prize of $10,000. Of this amount $5,000 is given by the Kentucky State Fair and the remaining $5,000 is to be underwritten by horse lovers of America, the breed associations, state agricultural societies, etc.

The $10,000 is to be divided as follows:

$2,500 for best saddle stallions any age, money divided 50, 25, 15 and 10 per cent.

Same amount, same division for mare.

Same amount, same division for geldings.

This would leave $2,500 for the grand championship, permitting only winners in sex classes to compete in the grand championship. No entrance fee charged and no stall rent. Hotel expense of exhibitor also to be paid by Kentucky State Fair to the amount of $10.

No event since the establishment of the American breed of horses, the Five-Gaited Saddle Horse, has attracted the attention of the entire country and created the impetus among breeders, exhibitors, dealers and lovers of this type of horse, as has the World's championship saddle stake, which will take place at the Kentucky State Fair this year under the personal direction of the president of that greatest fair, Kentucky's Commissioner of Agriculture, Mat. S. Cohen.

Not only publications devoted to live stock and horse matters, but the leading newspapers of the country are appreciating the immense idea and are giving their valuable columns freely. Not alone are Commissioner Cohen, the Kentucky State Board of Agriculture as a whole, the Kentucky State Fair Board and every horseman in Kentucky excited over the proposed stake; but every individual in Kentucky is preparing to see what will unquestionably be the greatest show the world has ever known.

Both Commissioner Cohen and the writer have assurances from reliable sources that our plan will be successfully carried out. The money will be forthcoming in the immediate future and the Kentucky State Fair has on deposit the $5,000 to meet the horse-lovers' portion. The stake is going to attract horse-lovers to Louisville from coast to coast, and horses from every stable in the land. Owners of retired champions are now notified to get their horse in training. Jas. A. Houchin, of Jefferson City, Mo., who retired Astral King two years ago, has stated he would show; Longview Farm has thrown the eitry of My Major Dare into the ring; Jack Barrymore will unquestionably be shown, and then, such great Kentucky horses as Richelieu King, Kentucky's Choice, and the horses which are not retired but whose owners have absolute faith in their being greater horses than the world has ever known. Marshall Chief has been sent back to his old and successful trainer, Pete Voggetzer, and will be one of the headliners. It is to be a battle royal and horses who have dodged the issue heretofore will have no chance to escape. If they do they will lose all claim to any title and the advertising columns of all newspapers devoted to fine horses will refuse to accept advertisements which will be misleading. The horse that wins the grand championship in this event will be the world's greatest saddle horse. If that animal is worth $10,000 now, he will be worth $30,000 after the big show. Every horse that is any where near the top in the awards of any three of the sex shows wil win MORE CLEAR MONEY than he has ever won in an entire season.

Commissioner Cohen has arranged for the greatest advertising program any horse show or state fair has ever put out, in the event of this stake being contested Every horse entered will be advertised, as it would be impossible for its individual owner to advrtise him. The judges are to be selected by the State Boards of Agriculture of Missouri, Kentucky and California, the three leading saddle horse breeding states. Only the best qualified men will be considered and every exhibitor is assured the judge selected will be absolutely acceptable.

Horsemen Must Contribute.

As this stake will help the breeders of saddle horses now and for many years to come, and as it is absolutely for their benefit the show is proposed, no entry fee is to be charged; every horse breeder and exhibitor is expected to "do his bit" and it must be done at once. Write Mat. S. Cohen, Commissioner of Agriculture of Kentucky at Frankfort, Ky., at once and make your offer as large as possible. An effort is being made to cause the American Saddle Horse Breeders' Association and the Pacific Coast Gaited Saddle Horse Breeders' Association to do their share. In fact, the associations should be doing more to bring about this show than any other institutions. Not less than $1,000 is expected from the American Association. The writer wants every breeder in the country to give as much as possible, and solicits subscriptions from Missourians and Californians especially.

More than $1,200 has already been raised and the Kentucky State Fair has their $5,000 on deposit. If the breeders of saddle horses want to make an impression on the world, let them come in and make this event go. Commissioner Cohen has worked on the event as he never worked before and he says it MUST be accomplished. Stockmen in Missouri and Kentucky know when this man makes up his mind for a thing he gets it, and Cohen will put this over as surely as God made little apples. I wish horsemen to especially bear in mind that the usual entrance fee is five per cent; therefore, it would cost $500 to enter in the proposed show if it were given under the usual conditions. The owners, in view of this fact alone, should make their donations accordingly.

In speaking of the stake the Louisville Courier-Journal, the leading newspaper of the Southland, says: "It should add such stimulus to the horse breeding industry as has never been given any industry of a like character." The same paper devoted a column of space in which it assures Commissioner Cohen of its loyal support of the show.

There will be more than thirty horses shown in the three sex classes and the winners in each class will be seen in the final championship event. Any one of the four shows is worth the money. Every one of the sex classes will be a greater show than has ever been seen before. Every great saddle mare in America will compete; every great gelding will have his chance and then the stallions will clash. After this, the winners in the three shows will come together for the "battle royal" and a show such as will never be witnessed again will be staged. Horses are being bought by prominent Easterners now on the possibility of their getting a slice of the event, and from now until the show more great horses will be sold. After the show and for years to come horses will be sold higher than they ever have been sold before, as a result of the interest this event will bring about.

Are you a true horse lover? Do you want to see the breeding of saddle horses the greatest industry in all horsedom? If so—now is your one opportunity to show your true sportsmanship.

———o———

At the Tuxedo Horse Show last week, Mrs. Walter H. Hanley, of Providence, won the saddle horse championship with her bay gelding, Twilight, and John McE. Bowman's bay mare Beeswing won the reserve prize from a field of six champions. In the two saddle horses class Mrs. David Wagstaff carried off first honors with Pointex and Chitteah, and Justus Ruppert's Dollie Madison and Elliewood were second. The prize plate in the hunter's championship class was awarded to J. C. Brady's brown gelding, Kilkes, and Miss Carol Harriman's Minister won the reserve prize.

———o———

L. B. "Splint" Barnett, who perhaps has ridden more saddle horses to world fame than any other exhibitor, is working a few youngsters at Lee Bros.' Mexico, Mo., stable, which are expected to keep that well known rider in the spot-light this year. "Splint" Barnett achieved fame as the exhibitor of such horses as The Frenchman, Betsy Diamond, Black Squirrel, Rex McDonald, Senator Stone, Maurine Faisher, Astral King, and last season gave Marshall Chief his most successful campaign.

———o———

Chicago's Great Summer Show.

In a letter to the Breeder and Sportsman, C. A. Dunbar, one of the most active members of the South Shore Country Club, Chicago, says: "An informal 'Get-Together Dinner' was held at the club Thursday evening and was presided over by our worthy chairman, John R. Thompson, whose efforts, as you know, had so much to do with making our last year's horse show the best in the country. About the usual number showed up, twenty-two members attending, which is a very small number considering the interest that is shown to horse matters within the Club membership. The present outlook indicates a better show for June 21 to 24, if that is possible, than last year. The judge of the gaited saddle horses is to be Mat. S. Cohen, who judged the same classes so satisfactorily last year.

"The Club is making every possible effort to have every good stable of show horses in the East and West compete here, and it looks very much like we were going to be successful."

Notes and News

Spriggan 2:08¼ has been a mile in 2:17½ for Marvin Childs at Indianapolis. He is to be raced a few times over the half mile tracks, and later sent to the big show.

✣ ✣ ✣

Fred Woodcock of Forest Grove, Ore., who raced on the California Circuit last year, has entered the pacer Capt. Mack 2:10¾ in the Michigan Circuit. Report has it that this horse is very good this year.

✣ ✣ ✣

State Fair Closing.

Chas. W. Paine, State Fair Secretary, has announced that the date for closing of entries for this year's State Fair races has been extended from the 15th of June to the 25th of June to conform with the closing dates of other California race meetings and fairs.

✣ ✣ ✣

Omaha's well known sportsman, Tom Dennison, owner of one of the best stables of harness and saddle horses in the West, has decided to disband his harness stable and will put Hal McKinney 2:06¼, Hal Connor 2:07¼, R. C. H. 2:09¼, Miss Gailey 2:11½ and Tena G. 2:14¼ on the market at an early date.

✣ ✣ ✣

Robert C. Estill, vice-president of the Kentucky Trotting Horse Breeders' Association and one of the best known and most successful trotting horse breeders in the Blue Grass, is not retire from breeding, as the recent sale of his Elmhurst Farm might indicate. Mr. Estill will keep his magnificent band of brood mares.

✣ ✣ ✣

The Iowa State Fair is exceedingly popular among owners of racing stables. Entries this year have come from Minnesota on the north to Louisiana in the opposite direction; from Montana and Colorado to the states as far toward the rising sun as Ohio. There will be five days of racing by the horses, with not less than five events contested certainly.

✣ ✣ ✣

The Oregon stallion licensing law has been improved by amendments embodying changes suggested by the Oregon Horse Breeders' Association and the Stallion Registration Board. Some unnecessary red tape has been eliminated. It is no longer necessary to record licenses with the county clerk. The lien law is also improved so that the lien attaches automatically at the time of service and is good for the following 20 months.

✣ ✣ ✣

Millard Sanders, who made Lou Dillon 1:58½ the queen of the turf, declares that his mare, Peter's Queen, has more speed than Lou had with the same amount of work. Better than that, she appears to have race manners, something Lou was years in acquiring. Peter's Queen has a license to be a champion, as she is by the champion sire of trotters, Peter the Great, and out of a full sister to Sonoma Girl 2:04¼, that was the sensation of the Grand Circuit eight years ago.

✣ ✣ ✣

Bob Sebastian, of Hemet, Cal., uncovered a clever acting green pacing mare at Kearney, in Peggie C. (7), by On Stanley, dam by son of Electioneer; grandam by Zolock; third dam by Happy Prince. Bob made no trouble winning the 2:17 pace with his mare, who was bred by A. D. Orr, of San Bernardino, Cal., and was the first standard performer of the season at a Nebraska meeting. Sebastian told us that his mare never had but sixty days' track work and that this was her first start for the money—[Horse Review.

✣ ✣ ✣

John B. Stetson, who returned to the Coast from Omaha, has decided to locate at Centralia, Washington, for the season. The track at Eugene could not be prepared in time for this well known trainer to get his horses started early enough for their campaign. The track at Centralia is said to be one of the best two-lap tracks in the Northwest. Mr. Stetson only shipped two head to Centralia, C. A. Harrison's May Day Hal and Duke Hal, owned by J. J. Kadderly, of Portland. Duke Hal is also by Hal B. Duke Hal has never been in trainer's hands before but has been handled some by his owner and has demonstrated that it will be highly profitable to give him his proper opportunity.

✣ ✣ ✣

Apprehensive that the war will deplete the country of equine breeding stock, the United States government has prohibited further exportation of mares, in consequence of which the British and French are now taking only geldings. In two and one-half years about 1,000,000 horses have been sent across the Atlantic for military purposes. Twenty-five per cent of these were mares. It is estimated that close to half a million more will be required this year. The United States will let contracts for 30,000 horses and mules on June 1st, but specifies they must be six to ten years old, while the British are taking "short fives." Prices paid on the United States contract will be from $175 to $235 a head.—[Horse Review.

Missouri gets the good mare, Mable 2:10¼.

✣ ✣ ✣

Jockey Garner, who rode King Gorin to victory in the Kentucky Handicap, was presented with a check for $1,000 by R. L. Baker.

✣ ✣ ✣

C. A. Harrison, of the Hotel Smeed, Eugene, Ore., is using his influence to get additional harness meetings on in that vicinity this year.

✣ ✣ ✣

Want your children to love horses? Sure! Then start them right. Buy them a pony at the Red Cross Pony Sale, at the San Francisco Riding Academy, Saturday, June 23.

✣ ✣ ✣

Louis Lee Haggin, of Lexington, Ky., is the proud possessor of a two-weeks-old colt by the trotting stallion, Walnut Hall 2:08¼, out of the champion hackney harness mare Hildred, dam of the promising young saddle horse that died recently, the property of Mrs. Preston Davie.

✣ ✣ ✣

J. David West proprietor of San Francisco's best equipped "Horse Toggery," changes his announcement in this week's paper. Mr. West sounds a well-timed warning to horsemen who are planning to participate in this season's racing, as the horseman who goes unprepared with his favorite liniments and remedies will make a grave mistake. Plenty of good coolers, boots and accessories in a trainer's chest is as necessary as sugar in a grocery store. Mr. West carries a full line of horse remedies and can supply horsemen their wants from his present stock.

✣ ✣ ✣

It looked rather blue for the future of trotting on Wednesday at Madison Square Garden, when C. K. G. Billings' brood mares, with their foals by The Harvester 2:01 at their side, and other foals by him due to arrive next spring, were selling for less than twice the amount of The Harvester's stud fee, and for less than the average price paid in the Garden last fall for all the weanlings foaled in 1916 at Curles Neck, without any brood mares thrown in. But the sale of The Harvester for $30,100 to Paul Kuhn, of Terre Haute, put a different complexion on things, and Harry Burgoyne brightened the outlook still further by reporting more than one hundred mares bred this season to Guy Axworthy 2:08¼, and a still larger number to San Francisco 2:07½, with many turned away for each horse. It seemed to be the consensus among horsemen that a more unfavorable time to sell brood mares could not have been selected in the whole calendar year. E. J. Tranter so advised Mr. Billings, and even went so far as to offer to rent a farm and keep the mares and foals until the Old Glory sale next November at his own expense.

✣ ✣ ✣

At the Missouri State Fair Track.

Sedalia, Mo., June 10.—One of the most backward and rainy seasons in years has held back training of horses at the Missouri State Fair track and trainers have not had much chance at workouts until the last few days. Selpo, a 2:20 pacer, owned by Frank Ervin, has the track record for the season in 2:19¼, the last half in 1:07 and the last quarter in 33 seconds. Selpo is showing up nicely and Frank thinks he will be a much better horse this year than last. Black Diamond, a three-year-old trotter by Zolock 2:05¼, dam Stella Axtel, by Harry Axtel, is working out very satisfactorily and has been a mile in 2:22, last half in 1:09. Ruby Zolock, three-year-old pacer by Zolock 2:05¼, dam Hattie Johnson by Grand Baron, worked a mile last week in 2.30, last quarter in 34 seconds, last eighth in 15¼ seconds. Ervin is quite sweet on this filly as she is good gaited and good headed. Big Boy, three-year-old pacer, by Axtelit, dam the dam of Amut 2:11¼, has been worked less than three months—broke in that time, too—has been a mile in 2:22 already, on a heavy track early last week. May Lou, green trotter by Constanero 2:16¼, is showing up very fine and has been miles in 2:25 and last half in 1:09, and looks like a good animal in the slow classes and is good headed and good gaited. A green colt by The Earl has been in Ervin's hands for a little more than 30 days, and has been a mile in better than 2:40 and looks like a good pacer in the making.

William Morgan has the mare, Gratteleine 2:16¼, a pacer, at the fair grounds track and is getting this good mare ready for the purse races. It has been three years since Mr. Morgan was able to make 2:10 with this mare over half mile tracks. If she trains well the pacers that will beat her over half mile tracks will do it around 2:10. It looks as though Mr. Morgan has the right key to this mare Gratteleine. I expect her to come back to her old form, judging from what Morgan is doing with her already.

Morgan has also a yearling in training, a trotter, by Son of Todd 2:14¾, dam by Bratt 2:02.

W. H. Boyd is getting some good work-outs with the Fausett stable of Tregantle colts, and the veteran shoer, who has put the golden slippers on more great race horses than any man now living, perhaps, is making the Fausett string look mighty promising.

L. E. Edgington has his horses going well and has never had a more promising group at the State Fair track than this year. J. W. Wilkerson, after a winter on the farm, is showing up fine for Edgington and will probably get into his old-time form and winning capacity ere the racing season opens for him.

B. C. BIGGERSTAFF.

KENTUCKY NEWS.

[By Jesse Shuff.]

The time has come for the northward pilgrimage of the trotting horsemen from the Southern training camps. Not near as many trainers winter in the South as in former years, the most notable example among the public trainers being Mr. Geers, who left Memphis June 9 with eighteen head which will comprise his 1917 racing stable. There are a number of old-timers to be seen again among the number, the most notable of which are Napoleon Direct 1:59¾, the pacing star; St. Frisco 2:03¼, the trotter with which he made such a great campaign the past season. However, it would not be surprising if the real star of the lot turned out in one of the three two-year-olds, each of which has shown sensationally. Peter June, a chestnut colt by Peter the Great out of June 2:11½, by Bellini 2:13¼, has been in 2:16, and Anna Davidson (1) 2:27½ and Jay Lee (1) 2:28, have been in 2:17¼ and 2:18, respectively. The latter two are by J. Malcolm Forbes (4) 2:08, the half brother to Peter the Great. Anna is a sister to Alma Forbes 2:07¼, and Jay Lee has even better relations as he is a brother to Emma Magowan (2) 2:07½, and U. Forbes (2) 2:12¼.

Fair Maiden 2:07, a good race mare, taking her record in a stubborn heat race a few years ago, died the past week in foaling to Gazote 2:16¼. She was the property of S. DeRidder of New York and Louisville and was a daughter of Prince of India 2:13¼, and Buffalo Maiden by Jerome Eddy, second dam the famous old-time pacer, Buffalo Maiden 2:12. Fair Maiden was a sister to the good colt trotter, The Rajah (3) 2:14¾. She was to have been bred this spring to Harrod's Creek (3) 2:06¾.

———o———

The price paid by Paul Kuhn for The Harvester 2:01, at the Billings sale, is the highest ever realized for a trotting horse at auction in Madison Square Garden, the previous high water mark having been $30,000, paid by William Bradley, treasurer of the Fiss, Doerr & Carroll Horse Company, in 1908, for Todd 2:14¾. Not since 1904 has a trotter anywhere brought more money than The Harvester under the hammer. In that year Arthur H. Parker, of Bedford, Mass., paid $32,000 for Bingen 2:06¼, the sire of Todd, at the dispersal sale of J. Malcolm Forbes' stud in Boston. Mr. Bradley afterward paid more than $32,000 for Bingen to replace Todd when that horse died at Ardmaer Farm, but the purchase was not made at auction. The highest price on record for a trotting horse at auction in New York is $41,000, paid by E. H. Harriman for Stamboul 2:07½, in 1892. With two or three exceptions, this is the highest price ever paid for a trotter at auction in the United States. It was exceeded in 1889, when Judson H. Clark and George H. Hopper paid $51,000 for Bell Boy 2:19½, at public sale in Lexington, Ky., and again in 1891, when Anteeo 2:16½ was struck off to S. A. Browne for $55,000 and resold within a week to H. S. Henry, of Philadelphia, for $60,000.

———o———

Harrison Writes From Eugene.

Since getting back in the harness, C. A. Harrison, whose visits with the horsemen of the Northwest have been of great interest to California harness horse enthusiasts, has had his hands full and it has been impossible for him to get out and see what is doing there. The following letter, however, is of interest to horsemen:

"The Breeder and Sportsman came Sunday and it was like a check from home without asking for it. This town being under the blue law on Sundays makes it lonesome.

"Mr. Stetson left last week for Centralia, Wash. The officials here would not put their track in order. They promised several times, yet did nothing; and as Mr. Stetson was anxious to get busy with his new horses we decided on Centralia. Besides my May Day Hal, he took Dolly McKinney 2:17, by Washington McKinney; dam by Daley. This mare is a very fair trotter. She is the property of Jas. Murray, a Eugene business man. He also took as clever a pacer as I ever saw, Duke McKinney, owned by J. J. Kadderly, a hardware merchant of Portland. This is a brown gelding, four years old, and say—talk about nice ones, this scamp has 'em all cheated. He is fast and will be a winner as sure as 'thunder.' I also sold him a half interest in May Day Hal. He believed in her and it was up to him to make her; so I felt it only fair to let him share in the expected profits."

———o———

You race either for pleasure or profit—possibly both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Horses are subject to the serious hazards of transportation, training, and racing, as well as the greater and more frequent danger of fire, lightning or disease. In the past it has been practically impossible for many owners to secure satisfaction and complete protection. However, since the advent of the Hartford in this field, horsemen are assured of insurance that insures at a let-live cost. Jump Cauthorn has been made a special agent for the company and is in a position to insure horses at the lowest cost to owners and with the most satisfactory policies. Write to him, 366 Pacific Building, San Francisco, and he will give you full information.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.

June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.

June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.

June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.

July2, 3—Vancouver, B. C., Can. Vancouver Gun Club. Chas. Bowers, Secretary. "Old Policy."

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

N. W. Trap Features.—The blue ribbon trapshooting event of the Northwest season—the 33d annual registered tournament of the Sportsman's Association of the Northwest—is billed to be staged on the Portland traps June 24, 25, 26 and 27. This blue rock tourney always attracts the expert shots of the west, but under the yardage handicap the mediocre shooters have a chance to win some of the trophies, which are among the most valuable in competition in the sport alluring.

In addition to the nine trophies, there will be $700 added money to the purses. This added money does not include the entrance fees, which will be paid back under the Squier money-back system.

Indications are that a great number of the clay bird smashers of California, Montana, Idaho, Utah, Washington, British Columbia and Oregon will participate in this season's shoot. Professional shooters, who travel in this district, state that there is a great deal of interest in this tournament.

The Rose Festival shoot, which is usually held in conjunction with the northwest championship, will be staged Wednesday, June 13, the opening day of the 1917 Rose Carnival. This shoot will be 100 targets under the Lewis class system. Five trophies have been put up by the club officials in addition to the handsome trophy donated by the Rose Festival committee.

Stockton Shoot.—One hundred straight is the score made by Fred Willett, professional shot, at the Stockton Gun Club traps Sunday; Willett naturally won first prize for professionals. D. L. Davidson, Dr. E. V. Falk and H. Lorenson tied for first prize for amateurs. In team work the "Nut" team, composed of Stockton men, won the prize, scoring 112 out of 125.

The meet was a big success, there being about fifty professionals and amateurs present. The scores, at 100 targets:

*M. O. Feudner 89, *O. N. Jones 89, C. C. Huber 68x80, A. Hansen 94, H. Lorenson 96, C. Stamper 42x50, Spencer 18x20, *Al Cook 94, J. Brennan 76, L. Gorman 84, *W. Higgins 84, F. Eggersdorff 89, E. McConnell 66, Y. S. Johnson 78, C. Hansford 80, *F. Willett 100, J. Hammett 86, Dr. E. V. Falk 96, L. Davis 58, D. C. Davidson 96, H. Garrison 92, J. Fitzgerald 87, M. Leffler 93, Dr. S. F. Priestley 87, H. Balkwill 92, J. Gotelli 89, C. H. Hudleson 87, F. S. Harrison 45x60, R. Edwards 41x60, J. C. Smith 38x60, H. C. Lockey 56x80, McCoy 32x40, Buckingham 74x80, Stevenson 38x60, Clark 79, Weber 46x60, Woods 55x80, Lonjers 69x80, Spencer 85, McRae 38x60, Olsen 15x20, Dentoni 13x20.

Team Shoots: Holt team, 106—Woods 20, Ross 21, Grimsley 19, Muller 22, Lewis 24.

Purity team, 108—"Onion" Jones 19, Cook 24, Higgins 19, Old Man Feudner 24, W. O. W. Willett 22.

Modesto team, 104—Woods 18, Hammett 22, Falk 24, Davidson 21, Garrison 19.

Nut team, 112—Priestley 21, Balkwill 22, Fitzgerald 22, Gotelli 24, Leffler 23.

Sunset team, 92—Woods 13, R. McCoy 17, W. McCoy 17, Gorman 22, Egersdorff 23.

Northwest Trap Leagues—The trapshooting league idea is growing like wildfire, especially in the Northwest, where three leagues, each one having 12 clubs, have been formed within the past few weeks. These leagues are known as the Inland Empire, the Columbia-Willamette, and the Northwest Trapshooters' Leagues.

The novel thing about two of the leagues is that the promotion was done by newspapers—not the clubs—and the movement is being fathered by them. The Spokesman-Review, of Spokane, Wash., is conducting the Inland Empire League and the Portland (Ore.) Oregonian is managing the Columbia-Willamette League. Both have 12 cities represented in Washington and Oregon, and are conducted along the same lines.

The entrance of the newspapers into trapshooting promotion is a good thing for the sport. The publicity that the newspapers have given to baseball has made that sport what it is today. The same co-operation with trapshooting will make that sport just as popular. It is growing faster than any other sport in America, has more followers today than any other, and it will continue to grow with the aid of the press and public, and always remain the fairest of American sports.

Great Team Trap Shoot.—By a margin of only two birds, the Golden Gate Club beat out the Family Club in a team trap shoot Sunday at the Family Club's Farm. The score was 681 to 679 out of 750 targets. There were fifteen shooters on a side and the Golden Gate set the remarkable high average of 90 4-5 to the Family's 90 8-15.

The scores were, on 50 targets apiece:—

Golden Gate Club—H. B. Vallejo 43, H. D. Swales 44, Dr. E. Topham 44, Ed Garratt 49. Ted Handman 46, C. A. Haight 46, W. Cooley 47, Dr. Hamlin 42, W. H. L. Hynes 44, H. R. Phinney 46, B. H. Worthen 48, G. L. Thomas 48, Toney Prior 45, W. H. Price 44, H. Havens 45; total, 681.

Family Club—A. G. Wilkes 49, F. K. Burnham 44, Frank Stall 47, T. C. Gregory 43, J. H. Holmes 44, W. A. Landry 48, Dr. McGettigan 49, H. Brickell 46, E. R. Diamond 43, H. F. Bassett 47, W. B. Sanborn 48, J. W. Dorsey 42, L. R. Stewart 44, W. D. Mansfield 45, P. Bancroft 40; total, 679.

The Family Club entertained the Golden Gaters at their Farm. The shooters left San Francisco last Saturday at 1 p. m., thence to their beautiful home near Woodside by auto, and engaged in a practice shoot Saturday afternoon. They were entertained most royally at night—all kinds of entertainment—and shot the team race Sunday morning. A splendid luncheon was served after the race.

Trapshooters to Give Ambulances.—John Philip Sousa, the composer and president of the American Amateur Trapshooters' Association, has offered to the government in the name of the trapshooters of America an ambulance unit for service in France with the American forces. The offer which has been accepted by the American Red Cross provides for the equipment of a complete ambulance unit consisting of twenty motor ambulances, two motor trucks, a kitchen trailer and a utility car.

To raise the $20,000 necessary for the purchase of the unit, a National Patriotic shoot will be held during National Red Cross week, in which virtually every gun club in the country will participate. The national secretary of the A. A. T. A. is directing the campaign. Mr. Sousa, who is now busy training naval bands for the government, has given out the following statement concerning the purpose of the shoot:

"The aid of the trapshooters of America has been promised the Red Cross in this national emergency in the belief that it is the duty of every trapshooting club and every trapshooter in America to actively participate. The organization of the Red Cross is taxed as never before to provide facilities adequate for the care of our huge new armies. Assistance is needed quickly if American soldiers are to go into battle with the necessary equipment to protect them from death and disease.

"Many members of the trapshooters' fraternity have already joined the colors. Many more will be enrolled in the great national army soon to be called. The National Patriotic Shoot offers those who of necessity remain at home, an opportunity to 'do their bit' for the common cause. And later when those who have offered their lives for the national defense, lie wounded on the battle field, these ambulances will carry to them not only medical and surgical aid, but the godspeed of the trapshooters of America.

"The most we can do seems small in comparison with the supreme sacrifice being made by many of those who fight that the world may be made safe for humanity. We wish to make our response one that will show more clearly than any words our gratitude. If through the service we render but one life is saved each day, we will be well satisfied with our investment."

NEW FISH AND GAME REGULATIONS.

Seventeen New Game Refuges Created; Trout Season Will Open on April 1, 1918.

The most important acts passed at the last session of the legislature are those relating to the taking of kelp. In this act the control of the kelp industry is placed entirely in the hands of the Fish and Game Commission. An act requiring the packers of fish to pay a tax of 2½ cents per hundred pounds on all fish packed, was passed. Also an act prohibiting the sale of trout. This will not go into effect, however, until the first of November of this year. Seventeen new game refuges were created in the new District Act. All hunting except for predatory animals under permit is prohibited in these areas. Under the new trout law the open season for the taking of trout will commence the 1st of April in Districts 1, 2, and 3. In District 4 the season will remain as before. The law relating to the domestication of wild game was amended so as to make it more acceptable to breeders of wild game and so as to induce more people to go into this business. Under another act, approved by the Governor, the trapping of fur-bearing mammals is controlled. A license is required of those who trap for profit and a season during which fur-bearing mammals cannot be taken is provided; fur-bearing mammals are defined. Another important act was the placing of a closed season on the taking of salmon, shad and striped bass from June 6th until July 31st, spawning time. The export of abalones in any form is prohibited.

Other acts passed and approved by the Governor prohibit the shipment of game by parcel post. Opening the dove season in District 1 on August 1st instead of as before, September 1st. Restricting the season for the taking of grouse to one month, commencing the 15th of September. Postponing the season on valley and desert quail until the 15th of November, but extending the closing date until the 1st of February. Making the season for waterfowl conform with the Federal Law, opening on the 16th of October and protecting all shore birds except jacksnipe. Making it a felony to have elk meat in possession.

Amending the act relating to the domestication of fish in order to put it on a more definite basis. Allowing by the making of affidavits the possession of deer killed lawfully in an open district in a closed district.

Providing for the forfeiture of licenses upon a third conviction for violation of any of the fish or game laws. Increasing the minimum size of spiny lobsters from 9 inches to 10½ inches and the maximum size from 13 to 16 inches. Providing that oysters, clams and other shellfish cannot be taken from beds which have been condemned by the State Board of Health.

Removing the blackbird from the protected list in Districts 1, 2 and 3. Providing that after the 1st day of November, 1917, no aigrette, osprey, bird of paradise, etc., plumes or feathers can be sold.

Opening the black bass season in the entire state on May 1st but providing that there shall be no closed season in Clear Lake in Lake county. Placing the black-tail jack rabbit among the predatory animals. Opening the golden trout season one month earlier. Providing for a game refuge in the vicinity of Mount Tamalpais and providing that the possession of guns in that refuge shall be unlawful.

Amending the act relating to the construction of fishways by providing that in certain instances, where the expenses of a fishway would be too great, the company owning the property may provide a hatchery in lieu of a fishway. Providing that in Fish and Game District 3, salt water eel of less than 12 inches cannot be taken and that not more than 15 salt water eel can be had in possession during any one calendar day.

Other acts were passed which amend slightly the existing laws. These changes will be noted upon the abstracts issued by the Fish and Game Commission.

The Gun With a Pedigree.—At the Pacific Coast Handicap tournament held in San Jose, California, the "Old Reliable" Parker gun did some very classy shooting, as will be seen by following scores. On the first day, May 29, in the Introductory event, our redoubtable friend Mr. Henry Pfirrmann Jr., by scoring 97x100 targets landed the trophy, which, under existing conditions of wind and weather, was a great score. On the third day, May 30, Mr. Harry Ogilvie won the Pacific Coast Overture event with the brilliant score of one hundred straight—certainly a remarkable performance. Both of these events were won with 34" Parkers.

On the same day Mr. Charles Yocum won the Pacific Coast Handicap trophy with the fine score of 95x100 at 18 yards rise, and 23x25 in the shoot-off. In this, the blue ribbon event of the year on the Pacific Coast, Mr. Yocum was tied by Mr. Davidson (who also shot a Parker gun), Mr. McLachlan and Dr. Martin. Mr. Yocum always shoots the Parker gun.

For the three days' shooting Messrs. Harry Ogilvie, with his 34-inch Parker gun, and Mr. H. Lorenson tied for high amateur average on the great score of 330x340 targets.

Army officers in Persia have just purchased a number of hand traps. The day will come when trapshooting will be a world-wide sport.

CLAY PIGEON AS A DECEPTIVE BIRD.

Pulverizing the Targets Looks Like Simple Task—One Trial Will Convince You It Isn't.

[By "Trapshooter."]

Clay pigeon—or target—shooting looks easy. In fact, there are people who taboo the sport because it is too easy, or as they say, "like taking candy from a baby."

But did you ever swing a gun to your shoulder—take a slant down the barrel—and try to pulverize that same clay target? If you have, then you'll know something about the slipperiness of said target. If you haven't—well, as they say in correct parlor English, "you've got another guess coming."

It's a funny thing how the fellow looking on can almost invariably show the "doer" how it ought to be done, and trapshooting is no exception to this rule. But—well, there's only one answer, get out and "bust" a few yourself.

Standing near the score with the trap box only 16 yards away a target looks as big as a balloon when it starts its flight. Incidentally it sails away so gracefully that it leads one to wonder how under the sun it can escape the perfect hail of shot that is sent after it. Frankly, it seems as though any one with sense enough to shoot somewhere in its neighborhood ought to smash it. This, of course, is the viewpoint of the spectator. From the standpoint of the shooter, however, the case is different, yes, sir!

They supply you with a gun at the clubhouse. They give you twenty-five shells—loaded, of course. Then some sympathetic and helpful veteran leads you to the firing line. He tells you how to stand—the proper position in which to adjust yourself and how to hold and sight the gun. Perhaps you may have held a gun, and even shot one many times before, and, of course, to your mind, all this is superfluous. Your humble opinion of your own ability tells you so, and you mentally resolve to show the folks a thing or two.

Finally after you are all set and ready—after you have swallowed the lump in your throat—and settled the final speculation as to whether the gun will kick or not—you give the common "pull." Bing! The clay bird springs into the air. Bang! goes your gun, and what should be a mass of fragments scattered about in the atmosphere is in reality a perfectly good clay pigeon sailing away unscathed in the distance.

It's tantalizing to be sure, but it's exhilarating, too. The kick of the gun turns out to be mostly imagination. The bugbear of a sore shoulder is a thing of the past, and having been initiated into the sport you tackle each succeeding shot with greater ambition and anticipation.

Now here is the surprising thing, from the mere spectator's viewpoint those targets looked as big as the house. When you view them down the gun barrel they seem to shrink to the size of a dime. Furthermore, the path that they take through the air is as devious as that of a one-legged man walking up a corkscrew.

It's all in the game, however, and the first shot is a baptism to a sport that holds you closer than a brother. To get only three targets out of a possible 25 or perhaps to achieve 25 goose eggs, is really a decided rebuff to your pride. You may walk back to the clubhouse with a humble opinion of yourself, and the sympathetic, "you-did-pretty-good-old-man, I-only-got-one-out-of-my-first-25," holds little consolation.

But the hurt is soon lost in the firm intention to go back at them and make good. And it's this self-same desire to "make good" that constantly lures you again and again. That's why trapshooting is appropriately called "The Sport Alluring."

That's why it holds the interest and the unflagging enthusiasm and love of its ardent devotees year after year.

Incidentally, that's why its popularity is ever increasing.

S. F. Fly-Casting.—Members of the San Francisco Fly Casting Club who were not up in the Truckee region after game in the streams turned out Saturday and Sunday, June 9 and 10, for the tournament at Stow Lake. Following were the results, with S. Forbes, judge; W. J. Davis, Jr., referee, and H. L. Ellsworth, clerk:

SATURDAY'S SCORES.

	Accy.	Accy.	Del.	Net.	½-oz. Lure
S. Forbes	17	11	5	8	22
C. H. Kewell	9	30	15	22½	22
Col. Young	14	8	20	14	26
Re-entry:—					
Col. Young	15	18	5	11½	19
S. Forbes	15	22	12	18½	10
C. H. Kewell	15	..	..	..	39

SUNDAY'S SCORES.

Col. Young	25	16	13	14½	14
J. Springer	18	24	30	27	..
C. H. Gardner	12	11	20	15½	17
W. Crawford	22	30	25	27½	23
F. A. Webster	7	15	5	10	39
F. J. Cooper	10	17	5	11	..
W. J. Davis, Jr.	15	26	15	26½	12
S. Forbes	14	23	10	16½	10

1,290 clubs joined the A. A. T. A. during its first year. These clubs have a membership of 59,271. Of that number 4,000 joined the Association as individuals.

Boise Idaho, Shoot—The scores of the registered tournament at Boise, Idaho, on May 20, were as follows:

D. J. Holohan 115, E. C. Crice 123, A. E. Weaver 115, George Meier 85, E. M. Sebern 81, R. R. Towle 115, W. A. Reason 105, Chas. Stewart 106, W. O. Allen 93, W. W. Humphreys 121, D. L. Addison 114, C. M. Jones 100, H. R. Seckel 119, George Bartlett 99, L. L. Burtenshaw 117, E. C. Burtenshaw 107, F. D. Wade 114, J. E. Wade 110, E. T. Biwer 95, A. C. Keister 108, S. E. Sharman 96, Harold Dresser 100, H. A. Luff 86, Jas. H. Cobley 83, A. M. Rose 105, Mrs. W. A. Reason 87, T. W. Noble 83, Herbert Lemp 90x135, Miss Margaret Cobb 38, Mrs. W. H. Estabrook 64, W. H. Estabrook 16x30, J. H. Hopfgarten 90.

Professionals—E. J. Morgan 121, J. A. Reed 114, Gus Peret 107, E. L. Valleen 129.

Los Angeles Club.—Despite the fact that for the past two weeks the Los Angeles trapshooters have been taking part in two of the biggest shooting events of the year, a large crowd turned out at the Los Angeles Gun Club Sunday and participated in the first event since the California-Nevada championship tournament.

There were four gold and four silver prizes up. Tom Wilkes was the high gun for the day, while R. H. Bungay was a close second with 97x100 breaks and Owen Council third with 96 out of 100.

Following are the scores:

Tom Wilkes, 16 yds. handicap, 98x100; R. H. Bungay 20—97, O. Council 18—96, W. H. Whitcomb 19—95, H. E. Sargent 19—92, O. A. Evans 20—91, Wm. Mullen 17—91, V. A. Rossbach 17—91, E. K. Mohler 20—90, W. A. Cornelius 19—89, H. Hoyt 17—89, Seth Hart 17—88, R. O. Pool 19—87, T. McClellan 16—84, F. de Augustine 16—78; M. D. Towne 42x50, J. F. Griffith 41x50, M. Steel 30x50, J. R. Perkins 20x25, Mrs. S. A. Shephard 12x25.

Trapshooting Clubs Town Boosters.—That a live trapshooting club will place a town on the sporting map has long been recognized, but that an organization of gun artists should be used as an important factor in a general publicity plan for a city is an innovation for which credit goes to the Wilmington (Del.) Chamber of Commerce, which has raised $1000 to advertise that city and offer financial aid to industries desiring to locate in the Delaware metropolis.

Incidentally, it might be stated that the Wilmington Trapshooting Association is the largest in the world, its membership of 700 forming a veritable regiment of gun bugs. That this club is up and doing is shown in many ways, among which are standing advertisements in the Wilmington newspapers inviting everybody to join the club or, at least, be present at the Saturday shoots. Blotters with a photographic view of the grounds are placed in the rooms of every hotel in the city, and an active publicity man supplies the bulk of stories that would do credit to a circus press agent.

Oil Stock As Prizes.—Shares of stock in reputable oil companies will be the chief prizes in the State championship shoot of the Oklahoma State Sportsmen's Association over the traps of the Tulsa Country and Gun Club—and for this reason the Oklahoma shoot was the most important in the Southwest this year. Besides the oil stock, they give $2100 in cash and trophies. The oil stock was purchased one year ago, and is paying 6 per cent interest. The winners of the stock get the interest also.

There were four registered events at 100 targets on the second and third days of the shoot. The first event was the Harry Sinclair special; the second, the Frank Gillespie special; the third, the J. S. Cosden special, and the fourth—which decided the State championship also—was the Oil Field special.

The Harry Sinclair mentioned is the former president of the Federal Baseball League. He is very much interested in trapshooting, as are the other wealthy oil producers of Tulsa, and every one of the companies sent squads to the traps in the State tournament.

Dog Shows for Red Cross.—There is a movement on foot to hold a series of dog shows in San Francisco, Oakland, Sacramento, Chico, Los Angeles, Pasadena and probably one or two other cities in California, as well as Vancouver, Portland and Seattle. The proceeds will be given to the Red Cross. The greatest obstacle to be overcome is the differences existing between the American Kennel Club and National Dog Breeders' Association members. The latter seem to have decided to sit tight and refuse to show under A. K. C. rules. This, coupled with the fact that the big men in coast dog circles who have been disqualified by the A. K. C. for acting in an official capacity with the Nationals, cannot show A. K. C., and without the Nationals a successful show could not be held, is a fact that has been well demonstrated at recent shows. Every such show has been smaller in number of dogs, entries and attendance as well as poorer in quality than the one previous. If the two clubs could be brought together a splendid lot of shows could be held.

Fred Plum, of Atlantic City, N. J., has developed into one of the best amateur trapshooters in the country. His run of 281 at Maplewood last summer was the best of the year, and recently he was high average man—379 out of 400 in the New York Athletic Club shoot.

OREGON TRAP LEAGUE IS FINISHED.

La Grande Club Wins Trophy in Close Race With Woodburn Shooters.

STANDING OF CLUBS.

	W.	L.	P.C.	Shot at.	Br'k.	P.C.
La Grande	6	1	.857	750	713	.951
Woodburn	5	2	.714	750	688	.917

Results June 10th—

La Grande 123, Salem 115.

La Grande 123, Woodburn 116.

All hail to the La Grande Gun Club trapshooters!

The first annual tournament of the Columbia-Willamette Trapshooters' Association came to a successful close on June 10th, when the final matches of an exceptionally exciting race were contested.

Two engagements were staged, La Grande featuring in both. The first was a 123 to 115 victory over the Capital City Gun Club of Salem, Ore.; the result causing a tie for the leadership of the circuit, and the second affair was a 123 to 116 victory over the Woodburn, Ore., Gun Club.

By virtue of the showing made, the La Grande nimrods won The Oregonian first place trophy, while second place trophy was awarded to the Woodburn boys. There is no difference in the beautiful trophies and it is well now that the season has been completed.

W. G. Ballack, secretary of the Oregon State Sportsmen's Association and a member of the Albany Gun Club, which finished third in the race, wrote a few days ago:

"As we are practically at the close of the contests for this season in the- Columbia-Willamette Trap shooters' Association, we wish to congratulate The Oregonian for bringing forth the league idea in this part of the state and for the successful results obtained. Whatever the result of shoot-offs for place to be obtained by the leaders, it is immaterial as compared to the broad interest that has been stimulated in the shooting fraternity and among the members of the several clubs entering the league and competing in the 'greatest game on earth.'

"Everyone who follows the game knows the difficulty of getting a definite line on the merits of the respective clubs engaged in a telegraph shoot; where shooting is done out of doors and subject to wind, weather, trap conditions and the number of men that the clubs can turn out, but the main advantage of such contests is that make every man get in and shoot the very best he is capable of. This result we think has been obtained and is shown by the excellent scores that have been turned in.

"The Oregon City and Astoria clubs, which are new organizations, and did not place as high as some of the other clubs, are entitled to as much credit for the good sportsmanship and pluck in going into a race with clubs which have in their membership such veterans as Lou Rayburn, the Mackeys and Beckers, Stillman, Coutts, Despain, Leith, Hawman, Fellers, Whitney, Siddall, Lewis, Magers, Wilson, Baltimore, Froman, Leininger, Parker, besides many others whose names I cannot recall, and including a bunch of new men who are 'comers' and are outshooting the old 'vets.'

"Should The Oregonian organize a similar league next season, or continue the present organization, we think that a larger enrollment of clubs will be listed than this year, and we can assure them that much benefit will accrue to their members by the stimulus of this kind of a race.

"Thanking The Oregonian for the interest that has been shown in our game and the full reports given at all times, and in behalf of the Oregon Sportsmen's Association, I am very truly yours,

"W. G. BALLACK, Secretary."

Lou Rayburn and Claude Mackey each went straight for La Grande, as did Roy Forester, who made his "debut" as a member of the La Grande team. Robert Smith and Bert Hughes each missed one bird, making the total 123.

For Salem, Lewis and Wilson each speared 24, and Magers dropped two out of his 25. Cooley and Brown were able to break 22 in order and to make the total read 115. The Woodburn scores were: Leith 24, Feller 24, Hawman 23, Whitney 23 and Beach 22, total 116.

Trout Fishing Improving.—Trout fishing has also been somewhat improved during the past two weeks, probably because not so many anglers have been going out and also because the weather has been warmer. Limits were taken out of the San Gabriel, Sespe, Ventura and a number of other streams. The trout fishing is expected to improve from now on.

Billy Cline is now in Big Valley and in a note to George Cline stated that better fishing was expected at the San Bernardino mountain resort from now on. Many excellent catches were taken out of the lake last week.

"Dad" Skinner sent down a fine bunch of beauties to Fred Thatcher of the Tufts-Lyons company. Thatcher reports that the fishing has been better in Big Bear creek than it has been in the lake, but from now on the big ones are expected to be landed in the lake.—[Los Angeles, Cal.

Sportsmen's Row

Ohio is paying a bounty of $1 each for hawks.

✤ ✤ ✤

The deer season in Colorado in 1918 will be five days' duration—October 1 to 5.

Three trapshooting clubs were formed in Sherman county, Oregon, during the past month.

✤ ✤ ✤

Trapshooters of Central Texas have formed a league, starting out with 10 clubs.

✤ ✤ ✤

A bounty of ten cents each has been placed on the heads of crows by the State of Indiana.

✤ ✤ ✤

Birds and animals protected by the laws of Arizona cannot be sold in that State.

✤ ✤ ✤

One hundred and four United States and Canada trapshooters—two of which were women—won A. A. T. A. medals last month.

✤ ✤ ✤

60,000 of the 1,100,000 acres of Pennsylvania forest reserves have been turned over to the State Game Commission for game preserves.

✤ ✤ ✤

When Charley Newcomb won the Amateur Trapshooting Championship at 200 targets at Travers Island recently it was the fifth time a Philadelphian had won the title in 12 years of competition.

✤ ✤ ✤

A six-pound trout, one of the largest since the season opened June 1, was caught at Lake Tahoe the first part of the week by Jack Mathews. It was shipped to San Francisco and is on exhibition in the Southern Pacific window.

✤ ✤ ✤

Since the first question about southpaw trapshooters came up we are hearing from them every little while. The Milan (Mo.) club boasts of two port siders at the traps—Grover Chapman and J. L. Reed. Reed does everything else but shoot with his right hand.

✤ ✤ ✤

Elk liberated by the Biological Survey in the Sitgreaves forest of Arizona four years ago have been seen in the Mongollon Mountains in New Mexico, several hundred miles away. They don't seem to travel much faster than some of our American railroads!

✤ ✤ ✤

The E. I. du Pont de Nemours Co. is offering a sterling silver watch charm to clubs for competition among its amateur members. This company, too, is offering trophies to clubs who have five or more women shooters who want to participate in matches among themselves.

✤ ✤ ✤

According to Stanley Withe, secretary of the American Amateur Trapshooters' Association, four per cent of the membership are physicians. Doctors know which is the best sport for them. On top of this we desire to announce that Dr. D. A. Atkinson, of Pennsylvania, is the new champion revolver shot of the United States.

✤ ✤ ✤

A perfectly white deer, about two years old, was recently seen at the Marshall ranch, near Helvina, Cal. The game warden of Trinity county believes he will be able to trap the deer without injuring it, and he will attempt to do so. If he succeeds in taking the deer alive he will surely have a choice and valuable specimen.

✤ ✤ ✤

The Family Club "knows how," was the verdict of the shooters who were entertained last Saturday and Sunday. Down on the "Farm" there was nothing too good for the guests. And the boys showed their appreciation by turning in some of the highest scores ever made in a team race. Not one of the thirty shooters broke less than forty out of fifty.

◙

It took a California girl, Mrs. S. B. Friend, wife of a Los Angeles physician, to show the crack trap shots of the exclusive Tiro al Blanco in Manila that an American woman could best them at their own favorite sport. Mrs. Friend won a special ladies' cup, several medals, and her husband won a visitor's cup and medals at the annual shoot in the Philippene capital, February 25. Mrs. Friend made a score of 44 out of a possible 50 birds and her husband 43 out of 50. Dr. and Mrs. Friend arrived home from Manila last week.

✤ ✤ ✤

Los Angeles trapshooters are looking forward to staging the Pacific Coast handicap shoot at the L. A. Gun club next year. When the Southerners were in the north recently they made application for the title tourney. Fred Teeple, secretary of the club, got the signatures of all the prominent shooters on the Pacific coast and many signed to have the shoot held at Los Angeles. The Los Angeles Gun club is popular with the shooters. The climatic conditions made shooting ideal and all made good scores at the recent registered shoot. The next registered shooting tournament will be held at the L. A. Gun club in September.

Warm weather has arrived at last and the anglers are now looking forward to some real sport. Inside of a week or so conditions are expected to be ideal on the Truckee and fishing in the Coast streams may also pick up.

✤ ✤ ✤

The Fish and Game Commission has succeeded in having a district set aside in Fresno county for experimental purposes. It consists of sixty lakes that are barren of fish and it will afford the experts a chance to experiment with the different species.

✤ ✤ ✤

There will be no change in the deer law for the coming two seasons. An effort was made to cut down the limits to one per hunter all over the State, and then afterwards a fight was made to have the ruling for No. 4 district only, but all of them were defeated.

✤ ✤ ✤

Anglers are impatient for the opening of the golden trout season, which begins on August 1 in California. Golden trout inhabit the South Sierra streams. When the season for this species of fish opens California will have all her streams open.

✤ ✤ ✤

More than 300,000 abstracts will be dispatched to anglers throughout California in the near future by the California Fish and Game Commission. Any previous information that fishermen desire on the laws can be obtained from the commission, Call Building.

✤ ✤ ✤

Ottawa (Ont.), June 7—The Government has adopted an order prohibiting public betting at Canadian races during the war. It does not apply to the meets which are now being held on the Canadian circuit. The order probably will put an end to racing in Canada as long as the betting prohibition is effective. The order in council prohibiting betting on Canadian tracks will take effect August 1 and continue until the end of the war.

✤ ✤ ✤

At a recent meeting of the Arizona Kennel Club at Phoenix, Ariz., the largest attendance ever held by the organization, the following officers were elected for the ensuing year: President, W. B. Twitchell; first vice-president, Jack Barber; second vice-president, Mrs. J. Thorpe; treasurer, R. A. Gray; secretary, A. H. Fitz. The latter, who succeeded M. J. Murphy, acted as secretary of the club when it was organized. A deficit was reported, as the result of the club's last show, and steps were taken to raise the amount necessary to cancel all obligations now outstanding. The club expects to give a Fall show, probably during the week of the state fair.

✤ ✤ ✤

Improvements in Shooting Accessories.—Trapshooting, as it is at present practiced, says a prominent shooter, "is quite a different thing from what it was five or six years ago.

"In the first place, the shotguns now in use are marvels of accuracy and range, and perfection in construction. Not many years ago, the trapshooter able to afford the best bought his gun abroad, but, at present, the reverse is true, and American guns have the call not only at home, but also in the markets of Europe.

"A convincing evidence of the superiority of the product of the American gun maker lies in the fact that guns of a certain manufacturer are exempted from the English 'proof-house test' to which every gun made by an English maker must be subjected before being offered for sale in its home market.

"Constant improvements are also being made in the manufacturing and loading of shells. In keeping with the trend of improvement in trapshooting facilities, powder makers have spent thousands of dollars in producing new and better powders.

"The best of these are truly 'smokeless,' and in reduction of report and recoil are by all odds superior to the kinds formerly offered. It seems safe to say that more effort, thought and money are spent on the improvement of trapshooting than on any other outdoor sport.

"Here, at home, we are seeing the benefits in the higher scores that are turned in by our regular shooters."

✤ ✤ ✤

New Mexico State Shoot.—The New Mexico State tournament was held at Colorado Springs, Colo., on May 30 and 31st with the following results::

C. W. Luff, 161x200, 138x150; C. D. Plank 187, 143; B. E. Moritz 177, 142; W. R. Thomas Jr., 180, 136; August Sarcander 172, 125; C. A. Gunning 185, 138; R .A. King 187, 148; D. W. Thomas 190, 144; J. R. Hilton 175, 140; John W. Garrett 179, 145; C. A. Blain 153, 113; H. C. Saul 178, 137; Pete Hughes 181, 133; D. H. Osborne 80x100; Frank White 181, 138; W. E. Reid 142, 121; Max Weick 182, 146; Ralph Schildknept 169, 132; Nick Powell 180, 96x110; Geo. Roller 173, 127; J. H. Rohrer 187, 146; Otis E. McIntyre, 173, 128; C. W. Devine 165, 142; C. A. Whited 174; F. S. Petrie 135x160, 132x150; W. H. Walters 87x120, 116x150; B. D. Fletcher 166, 119; P. Rudnall 67x100; H. M. Ragle 122; W. W. Poe 72x100, 134x150; W. E. Doner 53x80; J. M. Holmes 32x40; Warren Conley 64x100.

Professionals—C. W. Phellis 172x200, 144x150; D. W. King 185, 145; E. J. Morgan 187, 137; L. A. Stanton 166, 130; Wm. M. Bowman 193, 148; Geo. Burt 191, 143; Capt. A. H. Hardy 190, 142; J. W. Magill 149, 94.

WHY SOME DO NOT CATCH FISH.

Rod and Reel Expert Explains Reason Inexperienced Anglers Have No Luck.

[By Al Reed.]

A great deal has been said about the trout, or rather lack of trout in the Southern California streams and Big and Little Bear lakes since the season opened, and naturally the majority claim there are no fish, while a few claim they can get the limit any time they choose. Most people seem to have the impression that all they have to do is to motor to a stream, where there are trout, throw in their hook with a salmon egg on it and pull out the fish regardless of the commotion they make, or the shadow they cast.

Trout fishing is not the same as going to the beach fishing for sardines and smelt, and if the people will get the idea out of their heads and fish for trout as they hunt for deer, that is approach a pool or riffle quietly and keep out of sight, more fish will repose in their creel, and the real sport of trout fishing will be appreciated.

A few years ago the writer was on the Sespe River on the opening Sunday with a friend, and while we do not profess to be expert fishermen, we succeeded in getting the limit between Henley's Camp and the oil wells by 10 a. m. Coming back to camp we met a party of fellows who had fished all morning and had 10 fish between them. They had a little boy about 10 years old with them and every little while he would take a flat stone and see if he could make it skip across the pool. Once in a while he succeeded and occasionally he hit some one's line. The only wonder to me was, how they ever got the 10 fish if that youngster was with them all the time.

On our way out we saw a party of three near the dam, man, wife and son, a little one of six or seven years old, also a dog. The man was sitting on a rock fishing a pool with small success. Twice while we stopped in the road the boy threw a piece of wood in the water and the dog jumped in after it. Several days afterward he was in the store and I asked him what luck he had, and to put it in his words, he said there were not 20 fish in the whole darn river.

A real fisherman came to see me, Monday, and I asked him if he fished Sunday. He said he went up to San Gabriel Canyon but did not fish. When I asked him why, he said it was very crowded and he asked a fellow to move over so he could get close enough to the stream to cast, but the fellow would not do it and so he could not fish. He said there were nearly one thousand people along the stream, merely because they could step out of the machine and start fishing without having to hike

To get trout one must get away from the roads and get up in the narrows where there is no noise or a crowd around all trying to fish in one pool, because some one caught a fish there.

When such fishermen as Joe Welch and Charlie Van Horn can and do go out any time on the San Gabriel and other streams and get the limit of trout with a fly, it is very evident that the trout are there and can be caught if the ordinary amount of caution is used in fishing the stream.

Of course, no one gets the limit every time they go out, as there are times when trout will not rise to a fly or spinner, nor will eggs tempt them; so all the fisherman can do is to consider himself out of luck and try again.

✤ ✤ ✤

Dog On the Affections.—I consider any increased dog tax an injustice to dow owners, as dogs are overtaxed now, the fee being, instead of a tax, a license permitting their keep. The important thing to do in rectifying the nuisance of the wandering cur is to enforce the laws that we already have, and insist that an owner be found for every dog and that in default of payment of the tax the dog be destroyed. This would cause a great falling off in the dog population, decreasing rabies, sheep loss and the high cost of living, and at the same time giving us a better race of dogs. .

I also wish to take exception to the statement of the worthlessness of the dog. I grant that in dollars and cents not one dog in ten earns the salt in his biscuit, but his relation to man is a higher one than the material. He is his friend and companion, and has been down through the ages. He was probably the first of domesticated animals, by some considered as having outlived his usefulness, but not while he has more of unselfish devotion and love to give man than any animal excepting our own species. Last summer I lost an Airedale puppy, from being run down by an automobile, and although I love horses and use them, I would rather have lost my favorite riding horse than that four-months pup. Read Vests' tribute to a dog, and "have a heart."

To raise the tax works an injustice on the man who is in the habit of paying, while those who have escaped in the past will continue to do so. If the present law is enforced, those who care more for their dollar than their dog will be discovered. As there are many in this class, dogs of the undesirable sort will be greatly on the decrease, to the satisfaction and welfare of the public at large, and with fairness to all. G. W. BROCK, M. D.

THE FUTURE FOR THE DRAFT HORSE.

Written for the Breeder and Sportsman,
By R. P. ROYCE.

[Mr. Royce, who is a member of the staff of Animal Husbandry Department of the University of California and Secretary of the Californi Draft Horse Breeders' Association, is a practical breeder and dealer, having had a wide experience in Missouri. He also is a graduate of the Agricultural College of Missouri University and was a member of that school's prize judging class several years ago.—Editor.]

Just when the death knell of the horse was first sounded is rather hard to discover, but there is a story to the effect that when young Stephenson first rigged up a steam engine on wheels with the avowed intention of making a self-propelled vehicle, an old Scotch breeder of Clydesdales visited the youthful inventor and threatened him bodily harm if he did not cease working on a machine that was calculated to supersede the horse.

Then came the cable cars, and then the electric trolley, then the bicycle and finally the automobile, the truck and the tractor. With the advent of each the prophets rang down the curtain on the horse. But the horse stayed on.

It is astonishing and would be alarming, if it were not humorous, how the idea has gained acceptance that the horse has about succumbed to the fumes of gasoline, and that before long we positively will have to visit the museums to gaze upon the lost remains of the horse. Even some draft horse breeders are getting panicky.

Let us examine the facts of the case. In 1880 the United States had a population of 50,155,783 and a horse population of 10,357,488, or a ratio of less than one to five. In 1890, we had a population of 62,947,714 and 15,266,244 horses—a trifle over four to one. In 1900 there were 75,994,575 people and 16,952,191 horses—not quite four and one-half to one. In 1910 the population was placed at 91,972,266 and the number of horses at 19,220,338, a ratio of not quite five to one. The most recent figures give our population at considerably over 100,000,000 and on January 1st, there were 21,126,000 horses on American farms.

It will therefore be noted that since 1880 the ratio has been fairly constant, varying between four to one and five to one.

A further investigation discloses the fact that in 1880 there were 4,088,907 farms on which the 10,357,488 horses were owned. In other words the horse equipment per farm in 1880 was slightly over two and one-half horses per farm. In 1890 there were two and one-half horses per farm. In 1900, less than three horses were owned on the 5,737,372 farms. In 1910 we find a few more than three horses per farm. No figures showing the number of farms in the United States, January 1st, 1917, are at hand, but it is safe to say that the 1910 count of 6,361,502 farms has been substantially increased, but with 21,126,000 horses, there are still fewer than four horses per farm. The above figures do not take into consideration the mules owned on farms; however, there has always been less than one mule per farm.

With only about four horses and mules per farm, you can figure it out yourself how many horses will be displaced by tractors. Just here I want to say that the tractor is in successful operation on many large farms and ranches and the popularity and efficiency of the tractor is bound to increase and will displace the horse where it is demonstrated to be more economical. But with the above figures in mind there does not seem to be any reason why draft horse breeders should become panic-stricken.

Now, some will say that the figures I quote are all very true, but I am overlooking the fact that in the past the cities have been the outlet for surplus horses and it is a well known fact that the trucks are displacing many horses. I will admit that the truck is displacing many horses in city streets. During the past few years, a great many firms sold their horses and purchased trucks, but a great many of the same firms are turning back to horses, because of their demonstrated ability to handle short hauls more economically.

But there is a wider market to look to.

Statistics for 1914 give the horse population of the world as 95,698,000. Russia, with 24,639,000, is the only country with more horses than the United States. Germany had 4,523,000, Austria-Hungary 4,374,000, France 2,231,000, The United Kingdom 2,233,000, Italy 956,000, and Canada 2,948,000.

No figures are available to indicate the extent of depletion of the horse stock of Germany, France, England, Russia, and Italy, but it goes without saying that the loss has been terrific and that the end of the war will find the warring nations facing a market shortage of horsepower. The United States, Russia and the Argentine are the three sources of supply. The native horse of Russia is a small pony-sort of horse, likewise the native Argentine horse is small. The United States is therefore the only country in the world that is in a position to furnish Europe with horses approaching the type that is certain to be in demand when the rehabilitation of Europe begins. Remember that we have shipped over one million horses and mules abroad—nearly all our surplus; that we have only about four horses and mules per farm, counting all kinds and ages. Couple the above with the war still going on, and that we also are at war. It takes 35,000 horses and mules each month to replace the foreign losses. If this government raises an army of 2,000,000 men it will require 416,000 horses and mules. Figuring the same ratio of loss as the European governments have, it will require 11,000 horses and mules per month to keep our army of 2,000,000 supplied. In other words, after our army is in the field, 45,000 horses and mules will be taken from the country per month.

From any viewpoint, the future of the draft horse seems assured. The horse industry as a whole has been, and is undergoing, a readjustment. It is folly to deny that the automobile has not affected the business, because we all of us know that it has. The light horse has been dealt a heavy blow. He has almost disappeared from our highways and streets. He fought a game battle, was weighed in the balance and found wanting. He retreated to the farms and for a while did much to restrict the advance of the drafter. He was a drug on the market and his influence in markets reacted somewhat on the heavy horse. Then came the war; vast numbers of light horses found their way to the battlefields of Europe. Every one left a gap. Thousands are still being sent across.

His supporters lost hope—declared the horse business dead and quit the game. Few light horsemen ever made a profit out of the operation, anyway. But the draft horse has been gaining in popularity ever since introduced. Few men who have raised heavy horses in a sane way have ever lost money, and today the demand for the big horse is greater than the supply and prices are higher than at any other time. Furthermore, a shortage of horsepower is certain and the kind of horses that will be in demand are ones that will pull down the scales. Just because a horse has weight does not make him a draft horse. There are other things to keep in mind, and, it seems to me, that the principal thing for California breeders to keep in mind is the question of soundness. The average California draft horse is not a sound horse—I believe it a conservative statement to make that nearly 75% of the heavy horses of the state are unsound, and it has been my observation that sidebones are the most common defects. Such a condition should not be. We can raise them just as big in California as anywhere, and we should raise them just as sound.

I am in earnest when I say that I believe the most important problem for California breeders to solve is the question of unsoundness. Greater care should be exercised in selecting breeding stock. We should educate the mare owners to the importance of unsoundness. An effective way to accomplish this, it seems to me, is through our fairs, colt shows and stallion shows. I want to stress the advantage of colt shows. It does not require much effort to start a colt show and the benefit to be derived from these exhibitions are many. Every man interested in better horses should encourage these shows. They stimulate interest in the community. They serve to educate mare owners to a keener appreciation of what is wanted in a draft horse. More care is exercised in selecting their breeding stock, better methods of handling are encouraged.

DRAFT HORSE BREEDERS MEET.

The annual meeting of the California Draft Horse Breeders' Association was held at the University Farm, Davis, May 29.

The attendance was not large, owing to the fact that most of the members were unable to leave their farms and ranches. However, a fairly representative crowd of breeders were on hand and the spirit they manifested argues much for the development of the draft horse industry in this state.

After a short business session, during which John M. Ratto of San Francisco was added to the board of directors, Dr. F. M. Hayes of the Veterinary division of the University of California gave a lecture on the foot of the horse. Dr. Hayes dissected a foot during his lecture and dwelt particularly upon the question of sidebones.

R. P. Royce, Secretary of the Association, discussed the present status of the horse industry, and expressed the belief that the future for the heavy horse was never brighter, providing business was handled in a sane way.

A general discussion indicated that, while all of the breeders present were optimistic as to the future, practically all were of the opinion that the quality of draft horses produced in this state was not what it should be. It was the consensus of opinion that the law relating to the licensing of unsound stallions should be more vigorously enforced.

The Association is planning to co-operate with the Animal Husbandry Division of the University of California in an effort to establish colt shows throughout the horse producing sections of the State.

The McCray sale of pure-bred Hereford cattle at Kentland, Indiana, held a couple of weeks ago, realized $131,250, or an average of $1,750 for 75 head. No animal sold for less than $1,000.

W. M. Carruthers, owner of Carruthers' Farms, breeders and dealers of Berkshire hogs and Shorthorn cattle, returned to San Francisco Saturday from a buying and inspecting trip in the East. Mr. Carruthers selected some splendid breeding stock which will be a valuable asset to his farm at Mayfield, and to the industry in California.

The Bridgford Company, of Knightsen, Contra Costa county, whose splendid herd of Holstein cattle has achieved much success in the record contest and in sale and show rings, and whose entries in the recent Sacramento sale made that event the success it was by bringing the average up to almist double what it would have been without their consignment, played an important part in the great Palo Alto dispersion sale, by purchasing the top cow of that sale. They got one of the best cows ever sold at public auction in California, paying $1,650 for her. The cow now has a 32 pound record and Judge Bridgford says he thinks they will not have any trouble in making her a 40 pound cow this year. She is said to be absolutely perfect from a conformation standpoint and is one of the best bred ones in existence. She is now with calf.

Notes of California Draft Horse Breeders' Meeting.

M. Bassett, Hanford, one of the best known and respected livestock men of this state, was among the breeders present at Davis last week. Mr. Bassett is perhaps best known as a constructive breeder of Poland-China hogs, but he is also engaged in producing pure bred Percherons and owns the stallion, Ithos, that was grand champion at the 1916 California State Fair. California needs many more breeders of the calibre of Mr. Bassett,—progressive, enthusiastic, sane, and one who breeds livestock along constructive lines.

E. W. Little, manager of the Whitehall Estate, Tracy, Cal., attended the Draft Horse Breeders' Meeting at Davis. Mr. Little remarked that business was uncommonly good with them, and that the inquiry for heavy horses was very lively. It will be recalled that this establishment owns the celebrated Percheron stallion, Londrecitos, and Mr. Little is planning on sending out a strong show string this season.

Mr. Henry Wheately, the well known Shire horse breeder, Napa, Cal., attended the meeting of the California Draft Horse Breeders' Association at Davis, May 29. Mr. Wheately states that he has an unusually nice crop of colts this year, all sired by his splendid stallion, Dsford Banker, and out of some of his best producing mares. Mr. Wheately is quite enthusiastic over a stud foal. There is a possibility of this well known stable showing again this fall.

One of the most enthusiastic Percheron breeders of California is Dr. Oliver P. Jenkins of Palo Alto. Dr. Jenkins, who is vice-president of the California Draft Horse Breeders Association, presided at the recent meeting held at Davis.

HOGS ON THE GENERAL FARM.

The number of hogs for each farm must be determined by a study of local conditions and the type of farming. The maximum number of hogs per acre is found on farms chiefly or wholly devoted to the raising of that class of stock; as, for example, farms in the state of Iowa, where it is quite common to see farms stocked with several hogs to the acre, while the average for the entire state is one to every three acres of improved farm land. Under average conditions in this country, however, hogs return the largest profit when raised to utilize waste products, and when kept for this purpose alone the number will depend upon the quantity of waste products to be consumed. Skim milk from dairy herds, shattered grain from grain fields, unmarketable products from the truck farm, undigested grain in the droppings of fattening steers, and many other minor wastes on the average farm, are examples of feedstuffs which would be wasted were it not for their utilization by the thrifty farmer for the production of pork.

In order to utilize some of these products it is necessary to have a number of pigs on hand for a relatively short time on account of the perishable nature of these feeds. The rest of the year the fattening pigs and the breeding stock must be maintained upon feed raised expressly for their consumption, and while they are not kept at a loss during this time, still the greatest profit is derived when they are eating the cheap feed in the form of waste products. The number of hogs which can utilize the waste to the best advantage, therefore, should be the limiting factor in determining the number of hogs to the farm. On farms in the corn belt where hogs are raised simply to market the corn crop on the hoof, the number is controlled by the amount of corn which can profitably be raised to fatten them.

THE FARM

SHOSHONE PROJECT FARMERS HELP UNCLE SAM.

Secretary Lane, of the Department of the Interior, has received many assurances of the patriotic loyalty of the settlers on the irrigation projects of the Reclamation Service, and of their enthusiastic response to his appeal to put under cultivation all available public and private land on the projects, but perhaps none more so than that shown by the action of the settlers on the Shoshone project, Wyoming, recently reported by Mr. Geo. O. Sanford, project manager.

It appears that there were about 3,000 acres of unentered public land on the Frannie Division of the project and about 300 on the Garland Division which Secretary Lane thought ought to be doing its share in growing crops for the benefit of the Nation. Accordingly advertisements were issued offering this land for farming purposes and contracts were entered into whereby the United States furnishes land, water, and seed, and the lessee performs all the labor incident to preparing the land, planting the crop, irrigating, and harvesting. One-third of the crop is to be turned over to Uncle Sam, who pays one-third of the threshing bill—the usual practice in Wyoming when new land is planted on a crop-share basis. Under this arrangement about 2,500 acres of land on the Frannie Division and 300 acres on the Garland Division are being put into wheat and oats . Forty 4-horse teams have been engaged on the work which is being handled by experienced farmers.

MONDAY IS JONAH DAY FOR MANY HORSES.

More work horses are sick on Monday than on any other day in the week. This is good evidence that something is often wrong with the method of feeding on Sunday, declared Dr. C. W. McCampbell, associate professor of animal husbandry in the Kansas State Agricultural College.

"One form of illness to which the work horse is subject ocucrs so often just following the Sunday rest that it is popularly known as 'Monday morning sickness,'" said Dr. McCampbell. "This trouble is noted most frequently in those cases where horses are working hard, require heavy feeding, and are given the regular feed on Sunday while they remain idle in the barn. This is a serious disorder often resulting in death.

"Another common disorder among work horses on Sunday and Monday is colic. In most cases it is caused by heavy feeding while idle, but it may be caused by a cold, sloppy bran mash which is a sure trouble maker. A warm steamed bran mash to which a liberal amount of salt has been added is often beneficial.

"When the horse is working hard his Sunday feed should be of the same kind and quality as that which he receives on other days, but the grain portion of the ration should be reduced one-half. If a small pasture is available and the grass is not too plentiful it would be well to allow him to spend the day there, especially if he can have access to shade."

WEANING LAMBS.

Lambs kept for breeding stock should be weaned when from four to five months of age. The lambs intended for market, on the other hand, should attain marketable weights before they are five months of age and should be weaned at the time they are sold.

Lambs at weaning time should be kept for four or five days at least on the old pasture as they do not fret as much as in a strange place. The ewes should be removed to another pasture as far away as possible from the lambs. If the feed on this pasture be a little scant, so much the better, for this will help to check the milk flow. The ewes and lambs should not be turned in together again, for a large amount of milk from a ewe that has not been suckled for two or three days is liable to cause digestive disturbances in the lamb.

Care of Ewes at Weaning Time.

At weaning time the ability of a ewe to produce a good lamb often is ruined because the necessary care is not taken so see that she is dried off properly. A little care at this time will be well repaid. Two or three days after the separation the ewes should be milked out. All of the milk need not be drawn from the udder, but enough should be taken to leave the udder soft and pliable. Mark with colored chalk ewes needing no further attention. In about three days the ewes should be milked out again and the drys marked. Further attention should be given four or five days later to those not dry. No efforts should be spared to maintain every breeding animal in a sound and useful condition.

The total amount of grain used for the manufacture of alcohol is 2,183,775,852 pounds. About 500 pounds of grain, supplemented by pasture, is necessary to raise an eight months hog weighing about 200 pounds. If this were devoted to pork production it would satisfy the requirements of upwards of 4,000,000 hogs. If the cereals used for beer were similarly applied, over 6,000,000 hogs could be raised. If the grains now used for the production of distilled spirits were used for human food, there would be rendered available about 800,000 tons of edible meal, the remainder—bran, etc.—being used for cattle, hog and poultry feeds. The corresponding estimated figure for the cereals now used for beer would be approximately 1,200,000 tons. In other words, if the total amount of grains now used in the manufacture of distilled spirits and beer were used as human food, there would be produced about 2,000,000 tons of edible meal. If this were all wheat flower, it would correspond to 3,000,000 tons of bread or 6,000,000,000 one pound loaves of bread—one loaf per capita per day for two months for the entire United States.—[Jrof. M. E. Jaffa, Nutrition Expert, State Board of Health.

HIGH-CLASS FILLIES FOR SALE.

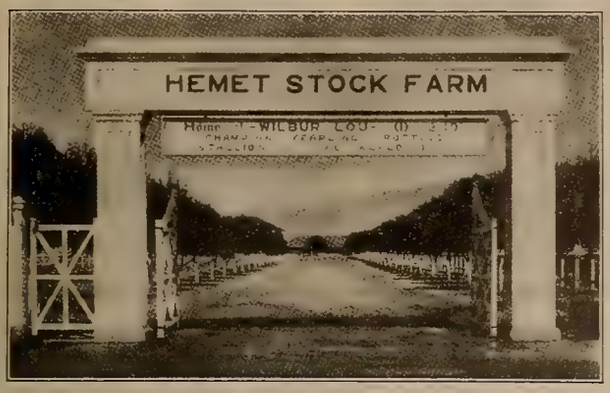
BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

LIST OF HORSES FOR SALE.

No. 1. Beautiful Bertha, by Moormont, grandson of Electioneer and Beautiful Bells; 1st dam Abbie McNutward (dam of Greatness (3) 2:10¾, Derby De Oro (3) trial 2:19, by that most elegantly bred son of McKinney 2:11¼, Guy McKinney, sire of Vernon McKinney 2:01½ and others; 2d dam Lady Irene 2:14½ (dam of a young family of extreme speed, though none have raced as yet), by Diablo 2:09¾; 3d dam Geraldine 2:16½ (dam of Leata J. 2:03, Lady Irene 2:14½), by Mount Vernon 2:15¼ by Nutwood; 4th dam Edith C., by Gen. McClellan 144 (sire of Nancy, dam of Mack Mack 2:08 and of 2d dam of Vernon McKinney 2:01½, Leata J. 2:03, Lynwood W. 2:20½, sire of Sonoma Girl 2:04¼); 5th dam by Rifleman (sire Col. Lewis 2:18¼) by imp. Glencoe. She is as elegant in individuality, conformation and style as in her bloodlines. Black; 1150 lbs., and a trotter, as are all her foals. She is a regular breeder and never requires a second service. She is unquestionably in foal now, having been bred to Mr. Borden's great trotter Major's By Guy 2:11¼, trial 2:08, April 30.



No. 2. Derbertha Bells 60907, a dark bay or brown trotting stallion, 6 years old, 1200 lbs.; very handsome, the best disposition in the world and a sure foal-getter. Never trained but a magnificently gaited horse, and all his colts are of splendid size, style, color, and show speed, though none have been developed as yet. He is by Derbertha Derby, son of Stellwell, out of Beautiful Bertha No. 1, as above.

No. 3. Louniska Berbells, a top notch 2-year-old black trotting stallion, as good an individual as California can show. By Rappallo 2:17¼, trial 2:07 trotting, by Greco B., trial trotting 2:12, son of McKinney 2:11¼ and Aileen (dam of 4), by Anteeo 2:16, by Electioneer out of Columbine. Brecco B.'s 2d dam is Lou Milton (dam of Lou Dillon 1:58½ trotting, present world's champion mare. Rappallo's dam is Oniska (dam of San Francisco 2:07¼, trial 2:04¼ trotting) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½ trotting, Copa de Oro 2:01), by Guy Wilkes 2:15½ trotting (sire of the dam of Guy Axworthy 2:08¼, sire of Lee Axworthy 1:59¼, present world's champion trotting stallion. No pen, brush or camera can properly portray this elegant young horse. "He must be seen to be appreciated." The first man that sees him who really wants to buy a good colt and has the money to pay for him will buy him. Nothing but sickness and consequent financial straits would induce me to dispose of this stock.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN, 366 PACIFIC BLDG. SAN FRANCISCO.

PONTIAC CLOTHILDE DE KOL 2d 69991

The first cow to produce 37 lbs. butter in 7 days, 145 lbs. in 30 days, and 1271 lbs. in a year. Also the first cow to make over 30 lbs. butter in a week in three successive lactation periods. She sold for $2,600 (at 13½ years of age) and a ten-months-old son sold for $6,100.

KING OF THE PONTIACS 39037 (202 A.R.O. daughters; 115 proven sons). At 13½ years of age sold for $10,500 at the Stevens Brothers dispersion sale, Liverpool, N. Y., May 15, 16 and 17, 72 of his daughters selling at the same sale, for $89,325, an average price of $1,241 a head. "King" has 19 daughters that have made him 30 to 44 lbs. butter each in 7 days, and 113 other daughters with records of between 20 and 30 lbs. in 7 days.

DISPERSAL OF THE GREAT BROOKSIDE HERD.

The greatest dispersion sale of pure bred dairy cattle in the history of the world took place at Liverpool, N. Y., on May 15, 16 and 17, when the great Brookside herd, founded in 1875 by the late Henry Stevens, of Lacona, N. Y., and later owned and brought to a high state of perfection by his two sons, Ward W. and Ralph J. Stevens, was placed under the hammer and sold for the magnificent sum of $242,665. There were 309 head and the average price worked out at $785, the two highest priced animals being the famous sire, King of the Pontiacs, who sold for $10,500, and the finely bred King Model, who was knocked down at $10,400. N. W. Salmon of Glenfield, N. Y., purchased the former and H. Perkins & Son and M. Phillip, of Red Creek, N. Y., the latter.

Naturally the event drew Holstein breeders and dairy cattle fanciers from all parts of the country, nearly every state in the Union being represented. The wide publicity and persistent advertising of the sale, as well as the high reputation of the herd, drew a magnificent crowd of buyers, men who today are reckoned among the elite of the Holstein industry, and who are giving freely of their time, money and brains toward the developing of this great breed of dairy cattle. The sale was a veritable triumph for the owners of the herd and formed a fitting climax to the courageous and optimistic foresight of the late Henry Stevens, whose faithful adherence to the breed, back in the days when there was a tremendous prejudice against the Black-and-Whites, has borne fruit and given proof to the world that no other breed of dairy cattle can compare with it for value as milk and butter producers.

HOUGHTON
MARION, OHIO

Join the happy throng of Houghton users. Among the prominent horsemen to whom we have made shipments in the past four weeks are: Thomas W. Murphy, E. F. Geers, Billy Taylor, Walter Traynor, Wert Mallow, Harrie Jones, Will Sweeney, Billy Crozier, Alex. Wishart, Charles Valentine, Nat Ray, Will Dickerson, Frank Hedrick, Fred Edman, Arlie Frost, A. L. Thomas, Roy Miller, Tom Berry and many others.

Houghton Sulkies started off the 1917 season auspiciously. At Bowling Green, O., and Monroe, Mich., we saw 63 horses start of which 25 (or 40%) drew Houghton sulkies, 20 of nearest competitor and 18 all other makes combined.

At Fort Wayne, Ind., matinee, Memorial Day, there were 15 starters, of which 9 (or 60%) drew Houghton carts.

Try a pair of Houghton Racer Black Tires. Size 1¼x26 or 28 inches; or Houghton Racer Gray Tires in 1⅜x26 or 28 inches. Price $8.00 per pair, f. o. b. Marion, Ohio, or $7.60 cash with order.

The most desirable age at which to have heifers calve is a very important question. In a great many herds, it is certain that the method of raising heifers is not such as to permit full development of their inherited powers of production. It has been shown that the larger cows of any breed are capable of higher and more profitable production than those of small to medium size. The extra capacity is a favorable point, providing they are equal in other respects.

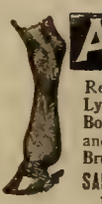
RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.



QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

California State Fair, Sept. 8th to 15th, 1917, Inclusive.

Entries Close June 25th, 1917 — All Races Three Heats

PROGRAM

SATURDAY, SEPTEMBER 8th.

1. Stanford-Occident Stake No. 1, 3 year old Trotters, Guaranteed $3,000 (Closed)
2. 2:14 Class Pace — NATIVE SON'S STAKE $1,200

MONDAY, SEPTEMBER 10th.

3. 2:08 Class Trot $1,000
4. State Fair Futurity No. 6, 3 year old Pacers, Guaranteed $2,000.....(Closed)

TUESDAY, SEPTEMBER 11th.

5. 2:24 Class Trot $1,000
6. 2:08 Class Pace $1,000

WEDNESDAY, SEPTEMBER 12th.

7. 2:20 Class Pace $1,000
8. State Fair Futurity No. 6, 3 year old Trotters, Guaranteed $2,600....(Closed)

THURSDAY, SEPTEMBER 13th.

9. Governor's Stake — 2:12 Class Trot $1,500
10. Free-for-All Pace $1,000

FRIDAY, SEPTEMBER 14th.

11. Stanford-Occident Stake No. 1, 3 year old Pacers, Guaranteed $2,000 (Closed)
12. 2:16 Class Trot $1,000

SATURDAY, SEPTEMBER 15th.

13. 2:11 Class Pace $1,000
14. 2:10 Class Trot $1,000

Entrance and payments on these stakes will be due and payable as follows: 3% June 25th, 1% August 1st, and 1% on or before five o'clock the night before the race Two or more running races each day.

GENERAL CONDITIONS.

ALL RACES THREE HEATS — Money divided 30 per cent to the first heat, 30 per cent to the second heat, 30 per cent to the third heat, and 10 per cent to the horse standing best in the summary. Money in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in the summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two or more horses in any race by payment of 2 per cent additional on each horse, but only one of the horses so entered to be started in the race, and the starter is to be named by 5 o'clock P. M. the day before the race is to take place.

ENTRIES TO CLOSE JUNE 25th, 1917.

All purse races 5% to enter and 5% from money winners, except the Futurity and Stanford-Occident Stakes. All purse races must have ten or more entries and three starters.

The Society reserves the right to declare two starters a walk-over. When only two start they may contest for the entrance money paid in, divided 66 2-3 per cent to the first and 33 1-3 per cent to the second horse.

The Society reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry, also if for any unforseen cause beyond the control of this Society, we reserve the right to declare this meeting off, after due notice, and entrance money will be returned.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause. All races shall be called promptly at one P. M.

All entries not declared out by 5 o'clock P. M. the day preceding the race shall be required to start and declaration must be in writing and made at the office of the Secretary at the track.

The Society reserves the right to start any heat after the fourth score, regardless of the position of the horses.

THURSDAY, SEPTEMBER 27th.

(7)	2:14 Pace	$ 500
(8)	2:12 Trot	2,000

TWO RUNNING RACES EACH DAY

Entrance fee, harness races, five per cent of purse with 5% additional from money winners, entrance fee payable as follows: No entry will be received unless accompanied with 1% of purse, balance of 4% due on or before night before the race.

All races three heats, money divided 30% to each heat, and 10% to horse receiving winrace record. A horse drawn or distanced in any heat shall not lose position in other heats or summary. Money in each division 50, 25, 15 and 10%.

Nominators may enter two or more horses in any race by payment of 1% additional WITH ENTRY, but only one horse may start in race, and starter named by 5 p. m. day before race.

Number of starters required in each race as follows: Races Nos. 2, 3, 6, and 7, four starters; races Nos. 5 and 8, six starters; races Nos. 1 and 4, five starters. When less than this number, horses will race for entrance money paid in. The Association reserves the right to start any heat after third score regardless of position of horses.

The right is reserved to reject any or all entries and declare off any race that does not fill satisfactory to us, and to postpone any race on account of weather or other sufficient cause. Further right is reserved to change the hour and day of any race except to antedate a race, in which case nominators will receive three days' notice by mail to address shown in entry.

All races shall be called promptly at 1:30 p. m.

Other regulations according to National Trotting Association.

J. E. DICKINSON, Pres. C. G. EBERHART, Sec'y.

"Hartford" Race-horse Insurance--

"HARTFORD" policies are broad and liberal in their terms and are offered at lower rates of premium than have often been charged in the past.

You race either for pleasure or profit—possibly for both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Any race-horse is subject to the serious hazards of transportation, training, and racing, as well as the greater danger of death from fire, lightning, or disease.

If good judgment prompts you to insure your buildings against fire, you certainly will admit the necessity for race-horse insurance.

In the past it has been practically impossible for many owners to secure satisfaction and complete protection. "Hartford" policies furnish real race-horse insurance.

This season will see the opening to the public of an American water spectacle of such extraordinary novelty and beauty that its eventual world-wide celebrity seems an easy prophecy. The Water-wheel Falls of the Yosemite National Park have probably been seen by less than a thousand persons, all told, since their discovery by white men; no doubt they were a familiar sight to the Indians of early days who considered the Tuolumne Canyon one of the safest of their fastnesses. The Tuolumne River is one of the finest of the many trout-haunted streams which flow from the snowy hollows of the High Sierras. It sings and roars by turns its sinuous way from the high places down into and through the celebrated Hetch Hetchy Valley to rest eventually in the Pacific. Its rush of several thousand feet into the depths of the Hetch Hetchy, which valley, by the way, its waters originally carved in the living granite, constitutes one of the most remarkable spectacles in the Sierra.

✤ ✤ ✤

AN INTERESTED VISITOR AT LONGVIEW.

Longview Farm, Lee's Summit, Mo., has been justly called by visitors, from near and far, the show farm of America. No other farm in the United States has entertained so many prominent people within its gates. On its green lawns the Bankers' Association of America has held its most enjoyable meeting; the American Jersey Cattle Club, the Loula Long Horse Show and numerous entertainments have been given which attracted the representative citizens of America.

Singly and by thousands visitors go over Longview, and by their efforts in the American Press they have told of their appreciation. However, recently there visited at Longview a man who, perhaps, was more interested than any other has ever been; who also was more interesting himself, than any visitor has been. When I say this I remember of seeing such notables as "Billy" Sunday and others there.

This visitor was Col. Graham Turner Hook, of Mexico, Mo., father of America's leading saddle horse expert, John T. Hook, who is the manager of that department, of Longview. It was "Uncle Gray's" (as he is affectionately known in his home town) first visit to the establishment which "his boy" has had so much to do in making world famous. It was the most wonderful farm he had ever seen and as he was driven over the estate by Miss Long behind one of the greatest ladies' pairs in America, surely that dimness with which he saw things was not from old age alone; it was the beauty and impressiveness that made "Uncle Gray" feel as he did. However, like his boy John ,this Missourian of the old school came back with a twinkle in his eye and a compliment for Miss Loula, which was about the neatest she ever received. When other members of the establishment heard Uncle Gray express himself they knew, perhaps for the first time, where John Hook got all his devilment, his "twinkle" and his wit.

RED CROSS SALE POSTPONED.

The sale of 60 Hungarian ponies presented to the San Francisco Chapter of the American Red Cross b ythe Hopland Stock Farm, and to be sold under the direction of "Jump" Cauthorn at the San Francisco Riding Academy, Saturday, June 23, has been postponed until next week. This being the National Red Cross Week; the San Francisco Chapter's great million dollar drive being under full sway, taking the time of every man, woman and child interested in the Red Cross and whose attention and interest is needed in the sale to make it the success it is intended to be, it was decided to postpone the event. The exact date has not been decided but will be announced through the press of the city and state so that all interested will be informed. Saturday, the day set for the event, also is the date of the "Change of Management Day" at the Fairmont Hotel, and many prominent members whose attendance would mean much to the sale found it would be impossible to attend.

The several days' postponement is also a good idea in that it gives the men in charge of the ponies more time to have them ready for the "kiddies" when they are sold. It is quite a job to thoroughly manner sixty ponies for children's use; however, this is what the Hopland Stock Farm is trying to do. The postponement adds about $35 a day expense to the farm but they believe the sale will be much more of a success.

This is the first opportunity the public will have to secure mares from this herd, as Mr. Foster has always refused to sell females. Such a thing as getting a stallion, a service, or a female from the herd in former years has been out of the question, however, now the entire herd, including their prize winners and breeding stock (no stallions) are at the mercy of the public.

Auctioneer Wm. Higginbottom, of Sacramento, will sell the ponies free of charge. The management of the Riding Academy also has offered the use of the institution free, and everything toward the success of the sale has been liberally offered by the public. Remember what you are doing for the child now and for the boys who go to Europe, when you buy one of these ponies. It's the best way to help the Red Cross and at the same time get something for your money, in addition to making the children healthy, happy and handsome.

JUDGES NAMED FOR KENTUCKY STATE FAIR.

Commissioner of Agriculture Cohen, of Kentucky, has named the judges for the coming fair, September 10 to 15, as follows:

John T. Collins, North Middletown, Ky., judge of fine harness horses; W. A. Dickerson, Trenton, Ky., judge of roadster and breeding classes; W. R. Crabb, of Bowling Green, Ky., judge of three and five-gaited horses, and Chas. W. Green, of Centralia, Mo., judge of ponies, heavy harness horses and miscellaneous classes. Mr. Green also will act as one of the judges in each of the eleven big saddle stakes given by the association this year, which will be under the three judge system. In speaking of the appointment Mr. Cohen sounds a well-timed expression for exhibitors by saying: "I feel that I owe it to exhibitors to let them know who will pass on their entries before planking down their hard earned coin for entry fee." The Kentuckians are well known horsemen of the Blue Grass State, having been prominently identified with the business there many years, and Mr. Green is one of the best known horsemen and judges in Missouri. Mr. Green's selection will meet with the approval of every exhibitor as his services have been highly satisfactory in all the big horse shows where he has officiated.

This year the Kentucky State Fair gives eleven stakes for saddle horses—all good ones—and the closing day will be July 1. This is one fair that is assured and these stakes are the best announced this year; so the horseman who is looking out for his own "bacon" will wire his entries in today.

Prof. W. L. Carlyle, dean of the Oklahoma A and M College, has been selected by the California State Board of Agriculture to judge the horses at the State Fair this year. This includes the horse show. Prof. Carlyle, who has judged in California in former years, was at one time in charge of the Government's horse breeding operations. He is especially noted, however, as a judge of roadsters and heavy horses.

According to a letter received here, Reno is going to have five days of racing, commencing on June 30 and lasting until July 4. Just what the events will be has not been made known. It is likely an attraction to celebrate Independence day will be provided. George W. Wingfield has a big string of thoroughbreds and the races will likely fill nicely.

OUR TIME TO GROW.

"The Breeder and Sportsman has put me in touch with the best herds of live stock in California and I am going to select my herd for my Nevada Ranch from breeders whom I have gotten in touch with through your paper." This is a letter from P. A. Brown, millionaire banker-rancher of Nevada and a constant reader of the Breeder and Sportsman. If you want to reach the men with the money—place your advertisement in this paper.

ANOTHER ACHIEVEMENT FOR CALIFORNIA LIVE STOCK.

Back in the Middle West three weeks devoted to pure-bred sales of beef cattle have passed with records far exceeding any figures ever attained. Good sound prices prevailed for more than 1,000 head of breeding cattle, Herefords, Shorthorns and Angus. Not in this entire campaign was there any spectacular prices with the exception of the McCray sale. From every indication the bidding came from good substantial breeders, rather than from speculators and breed boosters. The cattle sold are said to have been the best quality for the numbers that have ever gone before the auctioneers in one season, and, the best offering in almost every sale was sold to a CALIFORNIA BUYER. With the rapid strides California has made in the last few years in the production of beef cattle, and with the continued improving and building up of old herds and establishment of new, the future for this state is certainly most brilliant.

Nevada Agricultural Board Has Election.

The Nevada State Agricultural Board Tuesday afternoon elected new officers and the directors drew lots to determine the period for which each will hold office. In order to do this it was necessary for all the directors to resign and immediately thereafter Governor Boyle reappointed them.

W. A. Keddie, state senator from Churchill county, was elected president, George Wingfield, vice-president, and C. L. Noble, secretary and treasurer.

In the lot drawing contest Alex Dromiack, I. H. Kent, Reay Mackay and R. B. Givan drew one-year terms; two-year terms were drawn by E. L. Bingham, W. A. Keddie, Harry Stevens and R. L. Douglass; three-year terms by C. W. Renfro, D. E. Williams, Frank McDermitt and F. J. Button. Joe Jarvis, H. J. Amigo, Fred Dangerberg and George Wingfield drew four-year terms.

The board granted the Reno Business Men's association a lease on the race track for 1917 and 1918.

MORE "WAR HORSE" FACTS.

Secretary Wayne Dinsmore, of the Percheron Society, has just issued a statement regarding the use of the horse in war by Col. Henry J. Reilly, a regular army officer, and correspondent of the Chicago Tribune, who has just returned from the battlefield in France. His conclusions concerning the use of the horse in war are thus stated:

"There seems to be a rapidly increasing opinion that the day of the horse in war has passed. The nearly three years of warfare in Europe has shown this to be an entirely erroneous idea. On the Russian-Roumanian front where there are few good roads, in other words, where the road conditions are somewhat similar to those which ordinarily obtain in the United States, the horse has not only held his own for the mounted services, such as the cavalry and artillery, but also for supply purposes. Again and again the armies operating on this front have found the arrival of supplies and ammunition dependent upon the use of horse transport. Even on the western front, where the road system is probably the best in the world, mechanical traction has not been able to displace the horse.

"In general, it might be said that the line between mechanical and horse traction on a battlefield is the extreme limit of the enemy's artillery fire when any heavy action is going on. The horse is used on the battlefield and the mechanical traction in rear of it. Of course during calm periods mechanical traction is used along the rear part of the battlefield. There are various reasons for this division. Probably the main one is that batteries frequently must be placed and supplied in positions some distance from a road. Often the country to be traversed is so rough that a tractor cannot get over it. If the army is operating on conquered ground, this ground generally is so cut up with old trenches and shell holes that horse traction and only horse traction is practicable. Frequently the mud is so deep that mechanical traction is helpless. In many cases the situation is such that no wheeled carriages of any kind can move. In such cases pack animals have to be used.

"So well are these conditions recognized that in spite of the tremendous weights of heavy artillery material and the slowness and difficulty of moving them by horse traction, it is considered that only half the batteries should have mechanical traction. The remainder are horsed and thus the means is always available to move the batteries, no matter what the difficulties.

"Therefore in general it may be said that an army must still have animals for all its cavalry, the usefulness of which is far from disappearing; it must have horses for all its light field artillery, half its heavy field artillery, and all its regimental and divisional supply trains. Incidentally every regiment of infantry must have several hundred horses and mules. The more the question is examined the more two facts stand out. The first is that certain work in modern warfare can only be done by horses. The second is that the number of horses needed for armies which are counted by the millions must be counted by the hundred thousands."

✤ ✤ ✤

The cow is very much like a race horse when it comes to judging her ability to perform. Both the race horse and the cow must be judged by means of the eye assisted by the record of performance.

Harness Horses and Horsemen

CLOSING DATES FOR SACRAMENTO AND FRESNO.

The attention of owners and trainers is called to the closing dates of the programmes of the State Fair and the Fresno County fair which are advertised in another column of this week's issue of the Breeder and Sportsman. The state fair races close on Monday, June 25th and the Fresno Fair on Tuesday, the 26th. The purses at both meetings are very liberal and the two meetings follow one another closely, one week intervening between the two. Under the new rules which have been adopted by both the National and American Trotting Associations it is specifically provided that no conditional entries can be received, and lest some deviation from this requirement should occur it is deemed best, in this connection, to publish in full the conditions of Rule 4 in regard to making entries:

Rule 4.— Entries.

Section 1. All entries must be made in writing, signed by the owner, or his authorized agent; and within the time appointed for closing, they must be addressed and forwarded according to the published conditions or deposited with the Secretary or other person authorized to receive them. The entry shall give the name or registered name and address of both the owner and agent, the name, color, sex and winrace of horse, the name of the sire, dam, and sire of dam if known; if unknown, it shall be so stated in the entry and the class or classes in which the horse is to be entered. If any of these requirements are not complied with, the offending party shall be fined not less than $5 or more than $50 for each offense, and if the facts are falsely stated for the purpose of deception, the guilty party or parties shall be fined, suspended, or expelled.

Sec. 2. All horses must be entered in the name of their bona fide owners, and must so appear in the published list of entries. Horses cannot be entered in the name of a party other than the owner, except in the case of leases, certified copies of which must be registered with The National Trotting Association. Racing or stable names may be used, if registered, together with the names of the persons using them, with The National Trotting Association. Nominators and owners shall be liable to a fine of not less than $5 or more than $50 if this rule is not complied with.

Sec. 3. An entry signed by an officer or representative of a member, for another person is void.

Sec. 4. All entries not actually received by the members as aforesaid, at the hour of closing, shall be ineligible, except entries by letter bearing postmark not later than noon of the following day (omitting Sunday), or entries notified by telegraph, the telegram to be actually received at the office of sending at or before the hour of closing, such telegram to state the color, sex, and name of the horse, and the class to be entered; also to give the name and residence of the party making the entry.

Sec. 5. An entry signed by the nominator or his agent and mailed and postmarked, or filed for transmission by telegraph or delivered on or before the date of closing to the person authorized to receive it, shall be deemed to be made under the published conditions of the race.

Sec. 6. A nominator is required to guarantee the eligibility of his entries.

STATE FAIR WILL BE BIG SUCCESS.

Plans now formulating, backed by the Sacramento city commission, the consolidated chamber of commerce, the Native Sons and a number of other organizations and interests, promise to make the state fair of 1917 the greatest in the history of California. Last week's meeting of the directors of the State Agricultural Society, at which all the interests mentioned were represented, gave an indication of what is to be expected.

D. W. Marmichael, commissioner-elect, pledged the support of himself and fellow commissioners. Chas. E. Virden, newly elected president of the consolidated chamber of commerce, said that the organization would give financial and moral support. H. E. Yardley, chairman of the local committee of the Native Sons' Admission Day celebration, September 8th to 10th, said that their program was being arranged to coincide with the program of the fair directors.

The directors themselves announce a great vocational exhibit this year. They have already arranged for the renting of huge tents for the housing of exhibits, which will overcrowd the available buildings.

After the sale of the Curles Neck horses Doc Tanner left for Cleveland where he will settle down for a good long rest. Two very handsome offers were tendered Doc by the owners of prominent thoroughbred stables but were refused with thanks.

MISSOURI STATE FAIR TRACK.

Sedalia, Mo., June 22.

For thirty years W. F. Ervin has been associated with racing and training horses for racing, and in that time, East and West, North and South, has seen the best of them rise, many of them fall, and many of them sustain an early earned reputation as speedy individuals and great sires.

Looking back over these thirty years, he can recall when, at Cleveland, Ohio, he made Dan Patch take his race record of 2:03¾, and at Memphis he recalls Prince Alert taking the world's record for geldings, two heats—2:02 and 2:00¾. In the first instance with Riley B. 2:05¼ and in the last instance with the same horse, and sitting here this night in June, a cool one, too, with a blazing fire in the grate, Frank grew reminiscent and talked on and on of the great and near-great, never to be forgotten kings of the race track.

All of which just leads up to what we are trying to tell you of Big Boy, the three-year-old pacer that Ervin alleges is a phenomenon. Big Boy came to Ervin's stable March 15, this year, and had been hitched single four times prior to that date; and between showers, and there were plenty of them, between March 15 and June 11, Ervin estimates that he may have hitched the big fellow 75 times; not more than that. Now here's what makes the veteran trainer and driver think he has a phenomenon in this horse, Big Boy:

On June 11, without ever having had a boot or a bandage on, and without ever having been hitched to a sulky, having done all his work to a McMurray jog cart, he stepped a mile in 2:16. He stepped the last half in 1:07. If this is not a world's record in itself, Frank would like to have some one come out and show something equally good or better, and naturally the state fair track fans are congratulating Frank on his wonderful showing with this horse, who was poor and thin, but spirited and ambitious. Frank is taking mighty good care with this potential chap and his career will be followed with interest by many.

Ervin has another three-year-old pacer who is quite promising, Ruby Zoloc, that is entered and paid up in the Missouri Futurity. One day last week she worked a mile in 2:20, with the last half in 1:08. Selpo, Ervin's money getter, a 2:20 pacer, worked a nice easy mile June 15 in 2:17, the last half in 1:06½. May Lou, green trotter, has done a good mile in 2:21, last half in 1:08¼, lately. Black Diamond, a three-year-old trotter, is performing well for Ervin, and he too is entered in the trotting division of the Missouri Futurity, and has been a mile in 2:22, last half in 1:09. Ervin says, considering the season being so retarded by wet and cold weather, he has never seen horses working as nicely as his horses are, and with all the rain that has fallen here the track is in as good condition as it has ever been at any state fair race week.

Captain Earl, a green pacer, by The Earl, property of Bert S. Swift, a hotel man of Holden, Mo., and who came to the state fair track and the Ervin stables sixty days ago, went around 2:30 with Swift looking on and noting the horse's showing, and he was well pleased with it and is proud of the exceptional development the horse is making.

William Morgan is easing Grattilene, a proved mare of sterling worth and a consistent and persistent money winning mare, into her form, not being willing to take any chances on an early season spurt for speeding when he knows what she can do when put to the test. Morgan has been working Grattilene at about 2:40, but is confident from the early showing of the mare that she will pace around 2:10.

R. M. Burns has moved to the state fair track with Maria, a pacer, with a record of 2:17¼, a five-year-old, sound and attractive in every way. She is a valuable addition to the state fair training camp.

Guy Broom, who owns a grandson of Maron Wilkes, is putting the youngster into shape. He is fairly promising, at that, and may come out under Broom's experienced handling.

L. E. Edgington is betting a good showing from his horses, and this veteran of the training track and stables says that his horses are showing up better for him this season than he could have hoped for with such weather. J. W. Wilkerson is coming into form in fine shape and the temper of the hardy, spirited speedster, Mike Bright—another Edgington stable mate, is showing up well. Edgington is handling these boys carefully on account of the weather, which has involved intricate problems for the trainers this spring. He is hopeful of splendid ultimate results from the campaign of training he has mapped out.

Batton, Ky Mo, and Stocktonian, the Tregantle colts in care of W. H. Boyd, consigned to the state fair stables and tracks by Mr. Fausett of Neosho, Mo., are doing well for Mr. Boyd. He has had a great many errors in the training and feeding of these horses to overcome, and now that he has his way with them will make them show up well, it is hoped. Ky Mo has been making last quarters in 1:33; Batten in 1:35 and miles in 2:28, while Stocktonian, trotter, has been making last quarters in 1:38 and 1:39. Batten is the only pacer in this group of handsome young stallions.

B. C. BIGGERSTAFF.

Fairs Should Not Be Disturbed.

Since President Wilson's speech on the necessity of the conservation of foodstuffs, indiscriminate economy has seized the nation, and now threatens many industries which for more than two years have enjoyed their greatest period of prosperity. This hysterical wave of misguided patriotism is spreading to all lines of human endeavor, including agricultural fairs and racing associations, some of which are at this time undecided as to whether or not they will hold their 1917 exhibitions as heretofore.

At no time in the history of this great country has the enormous importance of agricultural pursuits shown to such wonderful advantage as now, and that the state and county fairs of the United States should fulfil their mission more thoroughly than ever before cannot be dwelt upon too forcibly. As a vital part of these fairs, the horse should not be lost sight of, but his production encouraged through the agency of trotting and pacing events, as the marked falling off in breeding operations the past few years, together with the exportation of millions of horses to foreign shores since the outbreak of the European war in 1914, has left Uncle Sam sadly in need of efficient cavalry mounts.

It is all very well and proper to conserve our food supply and guard against waste all along the line, but an indiscriminate economy is not desirable if we are to maintain our present prosperous state, which is needed more in war time than when at peace.—[The Horse Breeder.

TIME COMPARISONS.

Breeder and Sportsman,
San Francisco.

Gentlemen:

Will you kindly publish in your next issue a table of ½-mile and ¾-mile races and what they average to the mile? As nearly all the tracks are now half-milers there are many persons who go to the races who do not understand it. Say, for instance, that a horse paced a half in 1:02, the mile would be 2:04.

I am sure there are many of your readers who will appreciate this information. Yours very truly,

E. J. BROWN.

San Francisco, June 12, 1917.

Thoroughbred Matters

THE BEND OR BLOOD.

A noteworthy feature of the racing season to date has been the successes scored by horses bearing a strong infusion of Bend Or blood, Lucullite, Campfire, Stromboli and Ormesdale, whose performances have made them conspicuous, all tracing to the great English sire, the first named having a double cross of the treasured strain, through Topiary, the dam of Trap Rock, his sire, which was by Orme, a son of Ormonde, while Lucky Lass, his dam, is a granddaughter of the renowned "horse of the century" as he was termed after his English triumphs.

When Ormonde was bought for $150,000 by William O'Brien Macdonough and brought to California from South America, it was the belief that he would help the blood horse industry of the United States greatly, but as time passed, the son of Bend Or and Lily Agnes sent few representatives to the races, and he was branded as a failure. It wasn't until Ormondale appeared that the critics would give him any credit. Now that Ormonde and his former owner have both passed away his blood is breeding on, and his daughters and granddaughters will be as highly prized as those of Hanover.

The prominence of the Wilson and Belmont representatives in the events at Belmont Park has been a source of gratification to the respective presidents of the Saratoga and Westchester racing associations, because of the fact that the horses with which they have been winning were bred by themselves. It is one thing to buy a horse of merit and another to plan a union of blood and individuality which will produce a champion.

Mr. Belmont has been breeding great horses for a score of years just as his father before him did and there is no keener student of blood lines, nor better judge of an individual, than the Chairman of The Jockey Club. The late Ed. Kane, who was manager of the Nursery Stud in Kentucky, used to delight in telling how Mr. Belmont looked over the yearlings in the paddocks, and decided when they were unbroken what youngsters should be removed for home training and which members of the band should be sold. He made few mistakes, according to Kane, who used to say that Hawthorn and Norse King were the two best discards from the Nursery Farm.

Messrs. Belmont and Wilson were both in a happy frame of mind on Decoration Day. Lucullite, which had shown a remarkable spring trial, had demonstrated his reliability in no uncertain manner, and his owner told a characteristic story of Jockey Butwell, who when asked about the colt replied: "He don't know how fast he can run himself."

While Campfire's performance in the Toboggan was a dazzling one, he must beat Hourless, Omar Khayyam, Ticket and others over a distance of ground before his title to the championship will be secured. The son of Olambala developed into a phenomenally good looking three-year-old, possessing quality quite out of the ordinary. Mr. Wilson in speaking of him after Wednesday's triumph, said: "He is a typical Bend Or, even to his coloring, which is harder than last year. It's a wonderful family and in Olambala I think I have a worthy representative of the blood. Campfire will be his successor and I hope to send many more winners of good races from Kirklevington."

Another member of the Jockey Club, whose success as a breeder considering the extent of his operations has been remarkable, is Mr. Frank R. Hitchcock, whose Sandy Hook won the Prix de Balleroy at Chantilly in France from twenty-one competitors in a breeding trial held recently by the French Government. Le Jockey gives the colt praise, and William Duke in a recent letter to his employer, Mr. W. K. Vanderbilt, spoke in the highest terms of the prowess of Sandy Hook. Mr. Hitchcock said that when it would be possible to bring Sandy Hook to America, breeders here would have a chance to patronize him. "He is by Rock Sand out of Tangle by Meddler," said Mr. Hitchcock, "and the next dam Handspun was by Hanover. Sons of Rock Sand are doing wonderfully well both here and abroad, as witness the success of Trap Rock, Flint Rock and Rochester. Tracery and Vulcain are also bound to make good and we shall see the first of their get this year. It's staying blood and must have a beneficial effect on the horse fabric of this country."

Mr. Hitchcock was one of the syndicate which purchased Rock Sand for $140,000 from Mr. Belmont and sent him to France, where he died. Sandy Hook was foaled in France and is trained by the well-known American horseman, Fred Burlew.—[Thoroughbred Record.

New Orleans (La.), June 6.—Eddie Austin was found guilty, fined $200 and sentenced to eight months in the Parish prison today by Judge John E. Fleury, of the Jefferson Parish District Court, in the test case by Suburban racetrack officials of the Locke anti-betting law. An appeal was taken to the Supreme Court.

PASSING OF A PROMINENT TURFMAN.

Mr. Philip J. Dwyer, for nearly forty years one of the leading figures of the American turf, died on the 10th inst. of pneumonia, at the Wolcott Hotel, New York, where he had made his home for several years. Although it had been known for several days that Mr. Dwyer was seriously ill, but few of his great number of friends believed he was in danger of death and the news came as a surprise to them.

Mr. Dwyer was taken ill a little more than two weeks ago. He attended the races at the Belmont Par ktrack and contracted a cold, which quickly developed into pneumonia. He appeared to grow better on Friday, but on Saturday his condition became worse.

With his brother, Mr. Michael F. Dwyer, who died several years ago, "Phil" Dwyer, as he was familiarly known on virtually every race course in America, achieved a reputation unique in the history of horse racing in America. Because they had followed that business in Brooklyn for several years, they were known as the "butcher boys" when they first began racing horses. The partnership they entered into began in 1876 and was not dissolved until 1890. In the intervening time their stable became one of the most successful in this country, and the "Dwyer colors" perhaps more than those of any other stable passed first under the finish wire.

With Hindoo, one of the best known horses of that time, the Dwyer stable won the Kentucky Derby in 1881. Ben Brush, another famous horse, brought them fame in 1896 by winning the Brooklyn Handicap, and in the next year the same horse won the Suburban Handicap, a turf classic.

Mr. Dwyer was born in Ireland and was seventy-three years old. He came to this country with his parents when he was a boy, and, with his brother, displayed his first interest in horse racing by purchasing trotting horses of some reputation. Their racing stable was successful almost from the start.

M. F. Dwyer, who died in 1906, aged sixty years, was always a heavy bettor, while his brother seldom bet, even on his own horses.

Their first race horse was the fast black sprinter Rhadamanthus, bred by August Belmont, father of the present August Belmont, and with him they won so many races as to become at once prominent. Another selling plater they owned was Charley Gorham. Both achieved their greatest fame at Saratoga. Next followed the sensational purchase of the brother to Bassett and Vigil for $25,000. Bramble was the next horse they owned, and he really made the future of his owners, because, in the absence of Duke of Magenta in England, Bramble was the best horse left in this country. From J. T. Williams, the man who developed Ram's Horn, they purchased Luke Blackburn, and he also won a fortune for them.

Then came Hindoo, Runnymede, Barnes, Miss Woodford, Inspector B., Longstreet, Kingston, Hanover and Tremont. It was on account of Miss Woodford that James Rowe left the firm. He refused to become responsible for the mare in running her for a race in which he did not think she should have been started. Frank McCabe then became the trainer.

One cause for the dissolution of the partnership was that Michael Dwyer bet a large sum of money on a horse to beat Kingston, which was owned by the Dwyers, and Kingston won. Philip said he thought if Kingston had been beaten it would have led to a scandal.

Philip Dwyer was one of the principal owners of the Brooklyn Jockey Club track, at Gravesend, organized in 1886, and was largely interested in the New Jersey Jockey Club track, at Elizabeth, N. J., and the Aqueduct (L. I.) track.

Walter Miller Now a Trainer.

Walter Miller, who was the most famous jockey of his time, now is a trainer. Miller has signed to train the horses of Edward Arlington, the proprietor of Buffalo Bill's Wild West Show, with which Jess Willard is identified. The stable is racing in the name of Mrs. E. Arlington. Up to last winter the stable was trained by Snapper Garrison, who also was one of the greatest riders ever seen on the American turf. The horses raced in Cuba during the winter, but did not win many purses, and Miller's work with them will be watched with a great deal of interest, as this is his maiden effort at training.

If Miller proves half as successful as a trainer as he was as a rider, he will have many followers. When he was in his heyday as a jockey, picking winners was an easy matter.

Miller was a good judge of pace and a strong finisher, but it was in the short dashes that he shone brightest. He had wonderful control of the high-spirited thoroughbreds, and the secret of his remarkable success was his ability to get away from the barrier in front. When he had the post position in a sprint event, the race was almost as good as won, for he generally managed to steal a length at the start, and then hug the rail all the way home. In that way he landed many a winner that could have been hopelessly out with any other rider on his back.

Miller flourished during 1905, '06, '07 and '08, and then his rapidly increasing weight forced him out of the saddle. In 1906 he rode eight winners in succession, taking the last five races on the card and the first three the following day. This is a record never equaled in America. He also rode five winners out of five mounts on three different occasions, another record he has to his credit.

MACOMBER WINS ANOTHER IMPORTANT STAKE.

Latonia, Ky., June 16—Liberty Loan, running in the red and white stripes of A. K. Macomber, the California turfman, won the thirty-fifth renewal of the Latonia Derby this afternoon, eased up to a gallop, by six lengths. Cudgel, the favorite, was second, eight lengths in front of the badly tiring pace-maker, Midway. Diamond and Opportunity, the only other starters, finished in the order named many lengths in the rear. They never were in contention.

The race was worth $9,550 to the winner.

Liberty Loan won as his rider pleased when called upon three-eighths out, drawing away from Cudgel and Midway with ease, leaving no doubt as to the issue on the run home. Liberty Loan began slowly, running away lengths back through the stretch for the first three-quarters, but, when straightened out on the back stretch, steadily began to improve his position. At the half-mile pole he passed the favorite, Cudgel, which was closing fast on Midway. The latter was through rounding the far turn, and dropped out of it. Cudgel then was given his head, and for a moment appeared to take the lead, but at this moment Jockey Loftus called upon his mount, and the Macomber star from there on left his field. The winner's price in the mutuels was a trifle better than four and ahalf to one, but he proved a popular winner by virtue of his name.

Liberty Loan, which formerly ran under the name of Al M. Dick, was purchased by Macomber for $20,000 recently in order that the stable might have a candidate in the Derby, and for patriotic reasons he was renamed Liberty Loan.

The race was run in 2:30 4-5, or 2-5 of a second slower than the track record.

The horses, weights, Jockeys and owners of the horses entered in the classic were:

Diamond, 117, J. Metcalf, J. Livingston.
Opportunity, 119, W. Andress, W. Woodward.
Cudgel, 112, F. Murphy, J. W. Schorr.
Guy Fortune, 122, D. Connelly, Pastime Stable.
Liberty Loan, 122, J. Loftus, A. K. Macomber.
Midway, 122, R. Goose, J. W. Parsons.

The Billings-Johnson Dispersal.

The sale of thoroughbreds owned by C. K. G. Billings and Frederick Johnson was in all respects a brilliant success, twenty-three animals being disposed of for a total of $61,360. Mr. Johnson and Mr. Billings were well satisfied with the returns brought by their dispersal sale, but it should be added that this sale does not mean anything more than their temporary retirement from racing for the reason that neither of these gentlemen has time to devote to racing just now, and as everybody knows, a racing stable is not a piece of property which may be put in storage temporarily and then brought out again when it happens to be wanted. Details of the sale follow:

Imp. Omar Khayyam, ch c (3), by Marco—Lisma, by Persimmon; Wilfred Viau, Montreal	$26,600
Imp. All Star, ch c (3), by Sunstar—Falling Star, by Rightaway; S. M. Henderson	1,100
Pleasant Dreams, ch f (3), by Trap Rock—Privation, by Meddler; S. M. Henderson	2,500
Imp. Bachelor's Hope, ch c (3), by Tredennis—Ladytown, by Gallinule; B. Strasburger	850
Imp. Man o' th' Hour, br c (2), by Negofol—La Douma, by Macdonald II.; Ral Parr	5,000
Imp. Enfilade, br f (2), by Ramrod—La Rille, by Macdonald II.; M. L. Schwartz	5,300
Imp. Spear Lance, b g (3), by Spearmint—Smoot, by Perigord; D. S. Dryer	2,200
Imp. Greek Legend, b c (3), by Polymelus—Evadne, by Sidus (son of St. Simon); Louis Feustel	2,600
Imp. Sanscrit, b g (3), by Santry—Lilydale, by Juggler; Ral Parr	1,100
Imp. Rapidfirer, ch c (2), by Mordaunt—Cafe au Lait, by Meddler; W. K. Allen	1,150

American Sires In Favor Abroad.

Mr. L. Winans, who, in spite of all difficulties and restrictions by which racing is beset, is determined to carry on as hitherto, has three stallions at "Lordship" under the management of Joseph Cannon, namely, Sir Martin, Adam Bede and Dalmatian. Their foals and yearlings are said to be most promising, and as a result of his first season Sir Martin is credited with some exceptionally fine yearlings from Snow Marten, Maria Theresa, Collet Monte and Ventura, while Sir R. W. Jardine has a splendid foal by Adam Bede. Among the patrons of Sir Martin this season are Admiral Sir Hedworth Meux, Sir S. Scott, H. S. Gray, Colonel Lambton, Lady James Douglas, Mr. Gilpin, C. Mynors, Major Welman, P. Ralli, F. W. Wilmot and Captain R. Lucas, while on Adam Bede's list are mares belonging to Capt. Greer, W. Raphael, Sir R. W. Jardine, Sir John Robinson, Baron Baeiens, A. Wolf, Sir S. Scott, Mr. Gray, Mr. Langlands, Mr. Mynors and Major E. C. Clayton. Dalmatian, although foaled in America, is, like Adam Bede, of English blood. Dalmatian is by Ethelbert—Ionis, by Magnetizer. He was a fast horse in the States, and came over here with a reputation of being the best three-year-old in 1910. In England he proved himself a good stayer and a substantial winner, among his victories being the Newmarket October Handicap and the Manchester November Handicap.—[Vigilant, in London Sportsman.

SADDLE and SHOW HORSES

JAMES A. HOUCHIN AT TULSA.

In the following letter, Jas. A. Houchin, president of the Star Clothing Manufacturing Co., of St. Louis, and owner of the world-famed Astral King Farm, Jefferson City, Mo., writes of some of the experiences at the Tulsa show:

"June 16, 1917.

"Mr. Jump Cauthorn,
The Breeder and Sportsman,
San Francisco, Cal.

"Dear Sir: I noticed the unsigned article in your paper last week, where some spectator at Tulsa was treated to the new way of showing five-gaited saddle horses. One of my friends read the article and he accused me of making the query, but I want to say in defense of myself that when I am interested enough to do anything of that kind, you will always find my signature at the end.

"Well, for the benefit of this inquiring reader of yours, I want to say that evidently he has a few things to learn about the horse show game. If he just follows it a while longer, he will discover that these unusual things are what makes the horse show game really interesting. When an incident of that kind does not happen, we regulars think that the show is not spicy enough.

"It would never do to go to a horse show and see the ribbons tied on the best horse every time, and then, such a thing as calling for all of the five gaits is frequently overlooked. It is not necessary because the judge knows the other horse deserves to win. No doubt, Jump, you remember that big stake pulled off at Mexico some six or seven years ago, the one that Gingerbread Man won. You remember that show created more excitement and more spice and talk, and really more good old-fashioned Kentucky swearing, than anything ever pulled off before or since. It seemed to be a show where form was unheard of, and the fastest horse under the wire was the one to wear the rosette, no matter what qualities the other horses might have. Well, the Tulsa show was something along the same lines, not in one class, but in several classes. There was a three-gaited class, where the winner was expected to get over into the boxes almost any moment of the show. And such a thing as her standing even long enough to have the rosettes attached to her brow band was unheard of.

"Then there was a ladies' class where the horses are supposed to be tractable and readily respond to the slightest touch of the line, and where they are supposed to back and step forward and be modest of color, but no such thing as that could go at the Tulsa show, and at least one of the high-up winners scarcely deigned to show a square trot; but evidently thought it ought to be in a saddle class, because it wanted to canter all of the time, and what time it was not cantering, it wanted to stand on its hind feet. But that is what it took to win at Tulsa.

"Then, this five-gaited class to which your friend refers: it really was an exciting contest from beginning to end. But from what your friend says, I think he had it sized up about right. I had more fun and amusement at Tulsa than at any one show I have ever attended in all my life. It was exciting from the tap of the bell, because the unusual thing was happening all the time. Now, understand me, I do not want to detract from any credit that is due that bunch of fellows who put their money into this show at Tulsa, because they are the real kind of fellows and they are game and will come again. They will improve with experience and they will learn a few things about the horse show game as time goes on, and really, I am ready to go back down there to another show, whether it be where the best horse shall win all the time, or whether it be to have the unusual thing happening all the time. Tell your friend to sign his articles in the future, and that I would like to have him write me as to his impressions of things that happened down there, and I am sure that we can get up a long and interesting correspondence. Yours very truly,

"JAS. A. HOUCHIN."

Rodger Pemberton, of Chicago, last week sold an under-fifteen hand saddle horse to John R. Thompson, of Chicago. Pemberton has sold a number of high class horses in Chicago this year.

Guy G. Woodin, of Woodin Farms, Lake Forest, Ill., is now the owner of the beautiful Rex Chief A gelding, Vernon Castle, formerly owned by D. Schilling. "Billie" Shropshire has him.

✤ ✤ ✤

Ball Bros., of Versailles, Ky., were in Richmond, Ky., recently to see the saddle stallion, Jack Twigg 2681, with a view of breeding their great mare, Sadie Macy, to him. It was the first time they had ever seen him and they were highly pleased with him.

✤ ✤ ✤

George Ford Morris, America's most famous animal artist and photographer and author of "The Saddle Horse in America and the Morgan Horse" (illustrated), recently made a hurried visit to the South. He visited several leading nurseries in Kentucky and Missouri and also visited in the Carolinas. Mr. Morris until recently was the owner of Golden King, and still owns that magnificent young stallion, Glen Chief.

✤ ✤ ✤

The San Vicente Rancho, Los Angeles, has recently sold to S. Christenson and S. P. Eastman, well known San Francisco show horse lovers, a yearling colt by Don Castano, their premier sire, and out Dona Esmeralda. This is one of the best colts ever foaled at San Vicente and was a winner at last year's fair. The colt is registered as Don Diego, and when the writer visited San Vicente last winter picked it out among a dozen yearlings as his choice of the lot. It has very wonderful action and style and as it distinguished itself in the corral with a number of excellent colts, so will it undoubtedly distinguish itself in the show ring with noted entries.

✤ ✤ ✤

"The prospects for the coming fair are very bright," writes E. G. Bylander, Missouri's live-wire fair secretary, and continuing he says: "We have the assurance of good exhibits in all departments, including the machinery, which as you know has been pretty slim for many seasons past. The breeders we have talked and written to assure us they will exhibit as usual. I do not know just what we will do with reference to our night show program, but hope to have a classification that will bring stables from our own state as well as those from a distance."

✤ ✤ ✤

Undine, the beautiful and equally famous matron by Chester Dare 10, owned by San Vicente Rancho, Los Angeles, has foaled a handsome chestnut colt by Don Castano, at Ball Brothers' farm near Versailles, Ky., where she was sent this year to be mated to their famous Montgomery Chief. Rain Cloud, by Cloud King, another noted brood mare owned by San Vicente Rancho, has foaled a very fine chestnut filly by Don Castano, and Dona Esmeralda also has foaled a pretty filly foal by Don Castano. These notable additions to this famous band of saddle horses will be watched with interest.

✤ ✤ ✤

PRAISES FOAL BY MARSHALL CHIEF.

"One of the best colts I ever saw foaled," writes that well known Missouri farmer-stockman, Thos. Bryan, of Palmyra, in remitting to Jump Cauthorn for the season of the foal. The colt is by Marshall Chief and out of a Gloster mare, the dam of many good ones raised by this Marion county stockman. It is black with white points and has a world of action and style. Marshall Chief should prove to be one of the best sires in the country. His 1917 season, however, was very light. The terms were cash and as Missouri mare owners have not gotten used to this way of doing business it probably had much to do with keeping many good mares away. His first season in Missouri, 1916, was better than his owners' expectations and the colts which have resulted have all been remarkably good, not only justifying the return of the same mares but attracting many more.

GARRARD HUNT SOLD FOR $2,000.

The prediction several years ago by the editor of the Missouri Stockman that Chicago was the best field in all the West to dispose of good saddle horses is proving more true every month. This year more good horses have been sold to Chicagoans than to residents of any other city. Last week, however, one of the best sales was consummated there of the season. D. Schilling, prominent business man, rancher and horse-lover, having sold his beautiful young stallion, Garrard Hunt, to O. W. Lehman, of the great Chicago store, The Fair. The price was $2,000. This was an actual sale and Schilling, who detests the habit some horsemen have of boosting prices, carried the check a week to show 'em whenever they asked the price. However, horses of the character of this beautiful bay are worth such a price at any time. They are the kind it pays to raise as they are in demand and bring a big profit to their breeders. Garrard Hunt was brought out by Longview Farm as a two-year-old and was the most beautiful and successful two-year-old ever shown. His great resemblance to My Major Dare, even at that age, caused him to be taken for "the Major" by that horse's best friends on many occasions. He was purchased by Mr. Schilling last spring. He only made one show with him, the fine harness class at Tulsa, which he won over the best field ever seen in the West. He will be seen at the South Shore Country Club show, this week.

THE LAST CALL—KENTUCKY STAKES.

Mat. S. Cohen, president of the Kentucky State Fair, America's greatest horse-show fair and exposition, sounds his final warning in an announcement which appears on another page of this issue. The date for this great fair's horse show entries close July 1. Horsemen will have time to get their entries in by writing now. It is more important than ever that horsemen should enter in these stakes this season as the proposed $10,000 stake makes it imperative to every horse owner to have his horses ready for that rich stake. Every great stable should make entries in the regular classification now so that they will have the opportunity of reaping the big harvest in store for them. The stakes published in this issue are the best arranged for a general stable that have ever come from this great fair. The purses were prepared by a horseman and every stable entered is almost sure to win something. It is a poor stable that will not win more at the Kentucky State Fair this season than they have ever won before.

In addition to the great $1,000 championship stake, there is an early closing junior stake; a fine harness stake for $500; roadster stake for $500; championship three-gaited stake and a stake for every youngster. The baby foals, the yearlings, two-year-olds and three-year-olds all have a "pie" at this great fair.

As the majority of Missouri horsemen are contemplating attending this fair this year and most of them showing in the big stake, they will make the greatest mistake of their lives by NOT ENTERING IN THE ADVERTISED STAKES. Remember, they close July 1, and must be in the secretaries' hands on that date. The conditions are printed in every stake and will be found the most liberal of any published so far this year. Make your entries when you receive this notice—it's the one big fair and horse show of the year. The horseman's greatest triumph, all brought about through the efforts of Commissioner of Agriculture and former exhibitor, Mat. S. Cohen. He is one fair president who is "doing his bit" for the saddle horses and the way to show him his efforts in your behalf, Mr. Horseman, are appreciated is to enter your stable in these liberal stakes. Do it now; tomorrow will be too late.

Letter From Buford.

As saddle horse lovers know, Jas. D. Buford now has the spacious fair ground stable at Paris, Mo., which was built by the association for John Hook and John Woods, then Missouri's best known exhibitors, under the firm name of Hook & Woods. Buford is well established there and has made, as his friends predicted when he was working for Hook & Woods, a brilliant success. In a letter to the Breeder and Sportsman, he says: "The sale business is good in Missouri. Last week I sold to Mr. Jos. Hoch, of Chicago, the good young chestnut stallion, Mack Whirlwind, owned by McGowan Bros. and myself. He is a three-year-old and I showed him successfully last year. I also sold to O. Loeffler, of Chicago a five-year-old mare to be used by his wife. She is a good looking bay, and an ideal ladies' mare. To Mr. D. Schilling, of Chicago, I sold the handsome black gelding Milan Chief. Mr. Schilling in turn sold the horse to a Chicago business man.

"Mr. W. H. Grant, of Kansas City, visited my stables last week. He was well pleased with his three-year-old gelding, I'll Dare You, which he bought at the Longview sale. He told me to show him every time the bell tapped, which I intend doing. Mr. Grant was also very favorably impressed with W. W. Crosswhite's mare, Katherine Farmer, which I have had since she was a yearling. This mare is working as well as anything I ever rode and has developed into one of the finest, best made individuals in Missouri. I also worked a three-gaited mare by Forest King out of a Rex Peavine dam, which he simply went 'crazy' about. You know Mr. Grant well enough to know that he is one of the best judges in the country and when he takes his hat off to my horses I feel good."

Live stock advertisements may be placed in the Breeder and Sportsman at a very reasonable cost. Your announcements surely will bring results as we have the most interested and prominent subscribers of any publication in California.

Langhorne Tabb Anderson, of the very famous Point-au-Vieu Farm, at Maysville, Ky., again felt the glory of achievement when the results of the very recent Eastern horse shows were published. Mr. Anderson has supplied more really sensational winners to the Eastern shows than any other horseman. Just now he has the most brilliant stable of new horses he has ever possessed and has had a highly successful sale season this spring.

The South Shore Country Club's horse show is in full swing. This has become the greatest of all outdoor horse shows and now attracts the leading exhibitors of East and West. This year's show is their greatest success. John R. Thompson, Chicago's ardent horse lover and owner, is the chairman of the horse show committee which has made this the show it now is. In addition to the big stables of the country the local events here are the best to be seen in the United States.

Notes and News

Colleen by Charley D. won the 2:08 pace at Cleveland last week, and in doing so paced the second heat in 2:09¼, the fastest time of the year.

✤ ✤ ✤

The pacer Dr. Burns Jr. 2:04¼ which was the favorite for the $20,000 2:06 class pace at the spring meeting at the Panama-Pacific races, and which broke down so badly at that time, is now going sound and appears in excellent order. He has been turned over to Wert Mallow to race in his engagements.

✤ ✤ ✤

Walter Tryon is working with the Cowell horses, and they are reported to be coming along in great style. He is putting the finishing touches on John Mack now, and expects that animal to show for the money strong. Last week he is reported to have driven Mountain Dee a mile in 2:10½. Mountain Dee was never known to be in such good shape before.

✤ ✤ ✤

Considering that this year's fair will be the twenty-third annual one at Ferndale, Cal., Secretary W. S. Moore, of the Humboldt County Association, which promotes the exhibition, believes that the organization has cause to feel proud of the continual improvement made. In order to keep things at the best a new grandstand and additional horse and cattle stalls are being built, and all buildings will be freshly painted. The dates are August 21-25.

✤ ✤ ✤

Unless arrangements for a series of exhibition races with Directum I. can be made it is hard to see where William will have much chance to show his ability in actual contests this season, as he undoubtedly will be barred from the free-for-all purses. His new owners breed trotters in a small way, their principal line being heavy horses, but as Indiana is the home of the pacer and horses of that gait make speed quickly and find ready sale, the fame of William will assure his success in the stud from a financial standpoint, although whether or not he will sire speed is, of course, to be determined.—[Horse World.

✤ ✤ ✤

The racing stable of Andrew Albright, Jr., proprietor of Prospect Farm, Hilton, N. J., which has been in training at the Historic track at Goshen during the spring, was shipped to North Randall, O., last week, in charge of Trainer Lou Baker, where the horses will get ready for their Grand Circuit engagements. Trainer Thomas Nolan, of Goshen, shipped his three-year-old Axworthy colt in the same car. The Stony Ford Farm stable, which has been occupied by Mr. Albright's horses, will now be taken by Peter Goode.

NEWS OF STOCKTON.

M. Henry, who is training the R. S. Irvine stable at Stockton, was a visitor at this office this week. He reports the enterprising trainers at the Stockton track making "hay while the sun shines" and predicts the railbirds will know the Stockton boys were at the races when the season is over. The track has been neglected until very recently and caused the boys some trouble; however, the Supervisors have made a small appropriation for the care of the track and J. N. Jones is going to take care of it. This means a better track for the remainder of the season. Mr. Henry reports the celebrities of the Stockton track all doing well; but declares there are going to be a number of youngsters from Stockton this year of sensational form.

Mr. Henry has his colts going so good that he probably will not go down the circuit, only making the State Fair and the Breeders' meeting. He has turned Baretta Dee, the pacer, over to Fred Chadbourne, of Pleasanton. Fred worked her a mile Friday in 2:11¼ and back in 10—making the last eighth of both miles in 31 seconds.

Mr. Henry has quite a "comer" in Submarine, a four-year-old pacer by Vernon McKinney out of the dam of Will Guthrie 2:07¾. He took this horse in hand on May 10, and already has worked him in 2:34¼; the last half in 1:11 and the quarter in :34¼. He is well pleased with the progress his two-year-old candidate is making. This colt is by The Bondsman out of The Bloom, a daughter of Nushagak, and is paid up in the Breeders'. He has worked in 40 on several occasions, winding up the last quarter in 37½ and the eighth in 17¼. He reports Mayme Alwin 2:12, by Lord Alwin and out of Louise Carter, dam of the celebrated Wilbur Lou; 2d dam, the dam of John A. McKerron, in her prime. He says she has never been as game and fresh and ready for a long and successful season as now. He worked her a mile list week in 2:13 and says she could have and wanted to go much faster. If Mr. Henry decides to remain at home with the colts this mare too, probably, will be seen in Chadbourne's stable. Mr. Irvine's good mares have foaled splendid colts and were bred this year to Peter McKlyo. Weatewater, by Sidney Dillon, foaled a "beauty" by Wilbur Lou. Lady Inez, by Nutwood Wilkes, also foaled by the same horse.

SAN FRANCISCO-CALIFORNIA DRIVING CLUB.

The members of the San Francisco Driving Club held their weekly meeting on Tuesday evening at Promotion Hall on Valencia street; considerable business was attended to and afterwards the classification committee went into executive session and made up the following program for tomorrow's races. The races will be called at 1:30 p. m. and will be three-in-five heats:

Free-for All Trot.

Harold C., Petrina, Yoncalla, Vallejo King, Milly May.

2:15 Pace.

Hamburg Bell, Little Jack, Victor Pointer, Lilly R., Rodney Patchen.

Free-for-All Pace.

King Pointer, Emma M., Directress Mac, Bradmont.

✤ ✤ ✤

Mr. J. J. Ryan's pacer Directress Mac worked a mile in 2:08¾ at Pleasanton this week.

✤ ✤ ✤

The Horse Review is of the opinion that the banner bargain among the Billings brood mares was Bernice R. 2:07¼, sold for $400. She is but thirteen and throws grand foals.

✤ ✤ ✤

The number of horses destroyed in the war has been variously estimated from five to eight million. The American Hackney Horse Society, through its president, Reginald C. Vanderbilt, is urging all breeders to continue their operations despite the high cost of grain, but we have yet to hear from the American Association of Trotting Horse Breeders. If the conflict lasts two years longer, which seems probable, the shortage of animals suitable for cavalry and artillery purposes will be alarming. Again we say, "Breed a mare!"—[The Horse Breeder.

✤ ✤ ✤

Peter Mac is easily the best three-year-old of his season. He is a particularly well mannered colt, with a great turn of speed and an abundance of stamina. He was driven by his trainer, A. Hendricksen, who has long been known as one of the most capable reinsmen in this country. Peter Mac is by the imported stallion Petereta, a son of the mighty Peter the Great 2:07¼. According to the performance of this first crop of foals to race, Petereta promises to become one of the leading sires of New Zealand. D. I. C., the dam of Peter Mac, has proved herself a great brood mare, being as she is the dam of that great stallion Admiral Wood and other notable performers.—[New Zealand Trotting Journal.

✤ ✤ ✤

AN UP-AND-DOING ASSOCIATION.

We publish below a letter written by J. F. Seldomridge, secretary of the Pennsylvania Association of State and County Fairs, to every fair secretary in that state. This was a move in the right direction and should have the endorsement of fair associations everywhere, as with an added assessment to fairs it would mean the elimination of many of our best meetings. It is also very important that fairs be conducted at this time as they will prove as important to the agricultural and live stock co-operation the Government is seeking as any move made. In fact, fairs should be assured in every county this year and if necessary, instead of assessing them the government should assist them to a successful staging of good live stock fairs.

"You can readily see what would become of the horse racing game in general if the fairs closed their doors," writes Mr. Seldomridge, "as they are the greatest boosters of horse racing and breeding":

"Lancaster, Pa., June 11, 1917.

"Dear Secretary:—

"The following representatives of different states and fair associations met at the Willard Hotel, Washington, D. C., on Monday, June 4th, to keep an appointment made previously with Senator Penrose:

Harry Cochran, Dawson, Pa.; S. K. Foster, Philadelphia, Pa.; Wm. R. Buckman, Philadelphia, Pa.; W. H. Gocher, Hartford, Conn.; J. F. Seldomridge, Lancaster, Pa.; Thos. Poffenberger, Hagerstown, Md.; D. H. Staley, Hagerstown, Md.; O. C. Warehime, Frederick, Md.; C. B. Ralston, Staunton, Pa.

"At this time we made our protest against the Federal War Tax on admissions to fairs and also on complimentary tickets, stating the hardship it would bring on us financially and even put a great many fairs out of business. He called in a Treasury expert who gave us an interview, carefully going over the status of it with us.

"Senator Penrose then sent us to Senator Simons, Chairman of the Finance Committee of the Senate, who gave us also an interview and then came to an agreement which would exempt agricultural fair associations, and so it was brought before the committee to be acted and passed on. Both Senators promised to give it their support and with this we feel sure that our protest will not only be considered but granted as well.

"This is the big thing now before all the fairs and we must get it passed, because fair business has been so poor the last few years we are unable financially to bear such a tax; otherwise I am sure we would gladly pay it. Yours very truly,

J. F. SELDOMRIDGE,
Secretary."

Rags 2:09¼ by Del Coronado 2:09½ is doing nicely for his new owner, Geo. McCrea at Columbus, Ohio. His best mile to date was in 2:20.

✤ ✤ ✤

Single G. 2:00 has worked in 2:10¾, and Ben Earl 2:00½ a second or two slower. Both should be fit for that match at Youngstown in July.

✤ ✤ ✤

New York state will distribute $250,000 among its fair associations. Last year 78 fairs were held, and 10 were declared off on account of infantile paralysis.

✤ ✤ ✤

Waynetta 2:04¾ and Lillian Van 2:11½, the property of Dr. J. G. Belt, of Phoenix, Ariz., are being raced on the Michigan Short Ship Circuit by Ted Bunch, who campaigned Zombrino 2:06¼ with so much success last year.

✤ ✤ ✤

At Fleetville, Pa., during the Memorial Day races, the presiding judge and an associate took the reins in their own hands at the conclusion of the fourth heat, after two trips had been dead heats, by driving the mounts themselves, which settled the "stand's" argument.

✤ ✤ ✤

Marvin Childs dropped Ben Earl 2:00½ to a mile in 2:13 last Thursday, letting the Omaha wiggler breeze the last quarter in 30¼ seconds. Ben Earl never looked better than right now. Greatness 2:10¼ worked in 2:18½, Spriggan 2:08¼ around 2:18 and Baxter Lou 2:11¼ around 2:15.

✤ ✤ ✤

Dick McMahon was among those present the last day at Monroe, Mich. The Pointer Queen, that he started in the pacing stake, showed a lot of flight, both on the track and in the air, and Dick evidently was disgusted, as he went only half-way around in the second heat. Sis Bing trotted a very fair race for him. While there Dick made arrangements for Hal Boy p. 2:01½ to eet Hal B. Jr. p. 2:02½ at Mt. Clemens next week, which whets the appetite of those who crave speed.

✤ ✤ ✤

The Harvester, it might almost be said, was purchased by long distance telephone, and the deal involved a considerable degree of confidence. It seems that on the day before the sale, Auctioneer George A. Bain was called on the phone by the buyer, Mr. Paul Kuhn, from his home, Forest Park Farm, Terre Haute, Ind., and instructed to buy the stallion. Mr. Bain asked how far he should go, and Mr. Kuhn told him to bid as far as his judgment dictated. Not wishing to put himself in a position where he could be even suspected of wrong dealing, Mr. Bain secured Mr. J. D. Grover, Georgetown, Ky., to do the bidding, telling him to go on until he got a signal to stop, and as Mr. Grover did not get the signal he kept on till the stallion was knocked down at $30,100. We would like to know, just for curiosity, what figure Mr. Bain had fixed for the getting-off place. Of course, Mr. Kuhn was safe in putting full discretion in a man like Geo. A. Bain, but it was a nervy thing to do, just the same, with the knowledge that the price might be $50,000 or more. Not every man would, justify so much confidence. It is said that Walter Cox, who also figured in some of the tall bids, was acting for Walnut Hall Stock Farm.—[Trotter and Pacer.

SOME QUEER CASES.

An examination of the reports of the Boards of Appeal and Review of the governing associations regularly brings to light a number of applications for orders to change the time of certain heats, on the assigned grounds that the official reports erred in giving faster records than the horses actually earned.

We must frankly say we find ourselves very little in sympathy with such requests, as, although we will not positively say that no errors are made in such matters, we still cannot believe that the honest mistakes are anything in comparison with the claims put in before the boards.

Under the rules the chairman of the timers signs the slip giving the correct time, this is passed to the clerk and the official records the time in two places in the Judges' Book, the official record of the race, and then this page is signed by all of the judges and timers, as well as the clerk. Furthermore, when this official record is sent in to the parent association, the original timers' slip accompanies it, with the result that all of the original records are placed in the hands of that body.

We cannot imagine any steps that could be taken to assure more accuracy, and hence can only regard any effort to set aside a record so attested as an attempt to render written evidence inferior to parol testimony, when all practice of law and evidence is that parol testimony can be admitted to contradict written documents only in case of fraud. Yet we find many applications made for change of time, accompanied by affidavits of timers and judges that the official records are in error, thus directly charging themselves with dereliction of duty in that they did not make sure that the time was properly reported originally, as well as attempting to have their present recollection of time made at the meeting in question considered as of more effect than their written testimony.—[American Sportsman.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 anc a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.
June 17, 18—Billings, Mont.—Billings Rod & Gun Club. W. K. Moore, President.
June 17, 18, 19—Palouse, Wash.—Idawa Gun Club. John P. Duke, Secretary.
June 24—Bellingham, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Bellingham Gun Club. I. Dienberger, Secretary.
June 24, 25, 26, 27—Portland, Ore.—Sportsmen's Association of the Northwest Tournament, under the auspices of the Portland Gun Club. H. R. Everding, Secretary.
July2, 3—Vancouver, B. C., Can. Vancouver Gun Club, Chas. Bowers, Secretary. "Old Policy."
July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.
July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.
July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.
August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.
August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.
August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.
September 9—Seattle, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.
September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.
October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.
October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Too Many "Champions."—Before the Interstate Association for the Encouragement of Trapshooting uncovered the idea of having State championship trapshooting tournaments for amateurs, quite a number of State sportsmen's Associations conducted so-called championship events—amateur and open to all—and quite a few are still doing so.

These championship events, so termed, were all very well before the Interstate Amateur Trapshooting championship tournaments were put on in every State; now they are confusing. They serve no good purpose, and there is no good reason why they should be continued.

Seldom does a week go by that we do not read of Jim Smith or some one else winning the "Open Trapshooting Championship" of some State or other, and in the same publication you are apt to learn that John Jones won the "Amateur Trapshooting Championship" of some other prosperous State. This is all wrong. The only State championship is the one conducted annually at the various State tournaments under the permission of the Interstate Association.

All these other so-called championships are nothing more or less than challenge trophies. The winner can be chalenged and must shoot for the trophy within a certain number of days; in fact, he must defend the trophy as often as anyone challenges. This is all well and good in its way—but instead of being called championship events they should be called challenge events.

The so-called championship matches not only confuse but also cheapen the Interstate Association championship. A championship should mean something. The Interstate Championship does. The winner of the State title is privileged to attend the Grand American Handicap and engage in the event for the National Amateur Championship of America—an event open only to the winners of State titles. The term championship should not be used when it is not in order.

It would be a good thing for the sport of trapshooting if the organizations promoting such championship shoots would eliminate that word and substitute the word challenge. It would give the event the proper name, prevent confusion to shooters and readers, and also prevent having a number of "champions" in every State. There can be only one real champion.—[By Peter P. Carney.

Golden Gate Club.—E. G. Nelson made the old timers sit up and take notice at the Alameda traps last Sunday. In the beginners' shoot of the Golden Gate Club, the new recruit simply knocked out 24 out of 50 and naturally pulled down the trophy. The event was for shooters who have shot at less than 500 targets previous to May 1st of this year, and by the way Nelson went is an indication that he will give some of the cracks a tussle later on.

In the regular monthly program of the Club, there was a ding-dong race for high honors. J. Brickell, Ted Handman and Barney Worthen made the smoke fly out of 49 out of the fifty. Brickell missed his bird in the first frame of twenty, Worthen fell down in the last ten, and just to add variety Handman missed in the second twenty.

The warm, bright morning was instrumental in prompting Henry Stelling to put a new silk shirt with all the trimmings on exhibition, and he struck his old-time form to get 48. J. B. Brady tied with the same mark and Andy Flickinger came in third with forty-seven.

Dick Reed took the professional field into camp with 48, while Al Cook was there with 47. Onion Jones knocked out 46.

Capt. Simonton of Wilmington, Del., was a visitor and was given a warm greeting by his many friends who remember his high-class shooting in these parts some three years ago before he went East. The Captain showed that he can still sight them by getting 43. The scores were:—

Bray Thorning 36, Al Durney 43, A. M. Gearheart 40, Ed Garratt 41, C. W. Linderman 47, F. W. Parsons 40, *F. Blum 41, A. J. Williams 45, H. R. Phinney 44, *E. Stressler 42, *O. N. Jones 46, H. Stelling 48, W. E. Cooley 44, J. Brickell 49, *J. W. F. Moore 33, A. E. Stoneberger 45, *Capt. DuBray 34, W. H. Price 45, H. A. Ray 46, C. Merrill 35, *A. L. Cook 47, *R. C. Reed 48, H. C. Golcher 43, E. G. Williams 43, P. Swenson 35, *L. Middleton 38, *H. J. Truscott 40, B. Worthen 49, B. R. Hart 43, H. D. Swales 45, J. H. Millett 43, Capt. Simonton 43, J. B. Brady 48, B. L. Quayle 40, L. L. Fuller 36, A. G. Flickinger 47, J. B. Nichols 37, George Vesper 45, J. H. Jones 36, T. A. Zane 44, Ted Handman 49, C. D. Carmen 38, Smith 30, O. B. Hamlin 40, Dr. E. Topham 42. (*Professionals.)

The only State trapshooting champion who has repeated this time is R. A. King, of Colorado.

Atlantic Fleet Shoot.—The Atlantic Fleet Championship was held on May 26th and 27th under the auspices of the Red Cross Gun Club. Following were the scores:—

F. P. Williams 126, G. B. Landenberger 116, L. W. T. Waller Jr. 114, S. Doherty 111, F. R. Holt 111, D. O. Thomas 94, E. L. Woods 94, N. J. Blackwood 89, W. H. Whitmore 69x120, E. H. Cope 74x100, E. L. Gunther 69x100, G. C. Hill 55x100, H. W. Osterhaus 33x100.

A-WISHIN' FER A-FISHIN'.

The mist is on the marshes and the sun is shinin' thru,
Jist a-lightin' up the surface of the old bayou.
For the days I've been a-wishin' fer a chance to go a-fishin',
And I'm chockful of ambition fer to catch a fish er two.
Sure, the dew is on the meadow; it's too wet fer makin' hay.
You can scarcely see yer shadow—it will rain again today.
It's not good fer cuttin' clover er a hoein' of the corn in,
When the mist is on the marshes in the mornin'.

The mist is on the marshes and I'm on the marshes, too,
Jist a-makin fer the fishin' in my old bateau.
Sure, the day will be complainin' and a threatenin' and a-rainin'.
It's the weather that's detainin' me from work that I could do.
'Stead, I take my bait and tackle and row across the bay—
If the mist stays on the marshes, I can stay out here all day.
O, the world is full of pleasures—it's a fine place to be born in,
When the mist is on the marshes in the mornin'.

The mist is on the marshes and the fish are bitin' fair,
Jest a-makin' me forget about the labor waitin' there;
For I love to feel the flingin' o' the linen and the steel,
And I love to hear the ringin' and singin' o' the reel.
With a boat upon the water and a song within my heart
I could fish and fish forever—till they call me to depart.
Sure, I'm wishin' to be fishin' when old Gabriel sounds me warnin',
With the mist upon the marshes in the mornin'.

—By E. Ormonde McMullen, in Sports Afield.

Pacific Indians Shoot.—The Pacific Indians will hold their annual tournament this year on July 22, 23, 24 and 25, under the auspices and on the beautiful grounds of the Portland Gun Club at Portland, Oregon, which is an assurance that all who attend the tournament will be handsomely entertained. The Indians will again donate thirty sets of silver, as during the past three years, and in addition the Portland Gun Club will donate ten sets. The program this year will be as follows:

Preliminary day—100 targets, four high gun trophies; first day, 150 targets, total entrance $7, purses divided 40, 30, 20 and 10 per cent. Second day, 150 targets, $150 by the Indians and $100 by H. R. Everding added to the purse, money divided the same as on the first day. Third day devoted to a series of special Indian events, and will be the big day of the tournament, the program to consist of four 10-target and four 15-target events. All Indian trophies will be awarded on the last day's shooting, and there will also be three prizes for the ladies on the last day's program. The annual meeting of the Tribe will be held on the evening of the second day at the Imperial Hotel, while the annual business and potlatch meeting will be held on the afternoon of the last day at the club house. An excellent luncheon will be served daily on the grounds, under the special supervision of the ladies of Portland. For programs write Frank C. Riehl, Tacoma, Wash.

NEW ENGLISH SETTER FOR COAST.

J. B. McCormick Buys Georgia Whitestone, Two-Year-Old by Sport—Count Whitestone.

A welcome addition to the English setters of the Coast is the forty-pound two-year-old Orange Belton bitch George Whitestone, F. D. S. B. 35098. She is a well broken, wide ranging dog that knows where to find birds and how to handle them, and it is a pleasure to go afield with her. Georgia is by Sport—Count Whitestone, the best bred son of Count Whitestone. His dam , Sports Marian, the dam of seven field trial winners and an unbroken line of seven producing and winning dams, placed him in a matter of prepotency in a class by himself. Both North and South he beat nearly all the best dogs of his day.

It is a remarkable fact that Count Whitestone was the sire of 73 field trial winners, credited with 216 wins, a record that has not been equaled since the Tennessee Sportsman's Association of Memphis inaugurated the first field trials in America, October 8, 1874, and won by Knight, the black setter. Her dam Searima Danstone L. is of the famous Pinerust Kennel stock of N. C. and Pinehurst, a direct descendant of Count Danstone, one of the best producing sires up to his death in July, 1907.

While her owner, J. B. McCormick, of 554—21st Ave., San Francisco, selected her for breeding as a bird dog, she is an excellent bench show type as well. She was bred by her former owners, J. V. & V. J. Michalek, of Victor, Iowa, on April 18th to their pure Llewellin setter Momoney II., F. D. S. B. 33340 by Momoney—Lady Dorothy.

Momoney II is a three-year-old, fifty-pound white, black and tan and ticked; a thoroughly broken bird dog with an abundance of speed and endurance, an earnest worker, winds game at a long distance, promptly locates and knows how to handle them, and transmits all these qualities to his offspring.

That this breed is demand is evident from the fact that Momoney has been bred to 19 and his 6 young sons in stud to 15, making a total of 34, or 20 per cent of the 174 setter dams nominated in the Fourteenth American Field Futurity. It is hardly necessary to say that the litter which is expected about June 20th, a combination of Momoney—Count Whitestone Mohawk II. is the equal of any setter blood obtainable in America. Yours,

FIELD TRIAL ENTHUSIAST.

San Francisco, Cal.

A bill to amend the game law, introduced in the Canadian Legislative Council, by the Hon. Mr. Logan, provides that moose may not be hunted except between September 30 and November 16, that rabbits or hares may not be hunted for three years, and that partridges likewise have a three years' close season. Reads curiously doesn't it? Hares, rabbits, and partridges to be protected for three years! The Canadian farmers don't know their business; they ought to come and take lessons from us!

Percy Howard, writing in Dogs Weekly, an English publication, says: "Probably the most sensational sale that has taken place in Fox Terriers for some time came to pass when Mr. George S. Thomas, of Hamilton, Mass., cabled accepting Dr. Fenton's charming wire-haired Fox Terrier bitch puppy, Wincanton Sylvia, at £350 (about $1,750). This is without any question of doubt the largest sum ever paid for an eight and a half months wire bitch puppy, and we congratulate the genial doctor on breeding such a grand specimen, and also the plucky purchaser, Mr. Thomas. Sylvia's future will certainly be watched with the greatest interest, and her success is almost assured, for we happen to know that she has already been proclaimed to be a "gem of the first water."

Dogs in England.—Charles D. Muller, a London live stock buyer who is now in this country, says that it is almost impossible in England to get hold of dogs that may be regarded as of the "middle class." Mr. Muller speaks very interestingly of matters pertaining to the dog and war. He declares that bulldogs and those of the smaller breeds are the only ones available because they are not suitable for use on the battlefields.

"But try to get hold of Airedales, sheep dogs, and such," said Mr. Butler, "and you will have trouble. The dogs that are left in England of the kinds used on the battlefields are very scarce and high priced. They are bench show dogs that cost too much for soldiers to have. But even the ranks of the highly bred dogs are more or less depleted, because very often some patriotic rich fancier will give a regiment his dog, or perhaps three or four dogs, considering it is better for his pets to be striving for glory in the great war than for 'tin-cups' at the shows.

"The bulldog is very fortunate, because though considered a fighter, he really is not, at least not on the battlefield, being too clumsy, short-winded and delicate, catching cold very easiiy and getting tired when on long hipes.

"It's a fact, nevertheless true," concluded Mr. Muller, "that conditions in London are such that if an able-bodied, long-legged animal is seen on the streets people remark as to the reason he has not gone to the war. He is considered almost as unpatriotic as a man who would refuse to enlist to fight for his country."

TRAPSHOOTING MAKING TREMENDOUS GAINS.

The Hundreds of Thousands of Devotees Attest the Sport's Remarkable Growth.

[By "Trapshooter.]

Less than half a century old, yet numbering its enthusiasts by hundreds of thousands, is the brief history of the success of trapshooting.

And the best evidence of its fast and ever-increasing popularity is that its membership roll is rapidly being added to by the new clubs that are constantly springing into existence in almost every section of the country.

Like its contemporary, baseball, trapshooting is a truly American sport. A clean democratic pastime filled to the brim with the spirit of fair play and good sportsmanship. Its influence over its devotees, however, is perhaps more deeply rooted than that of any other sport. For trapshooting finds its very source in an inherent human trait—an inborn desire on the part of every red-blooded individual to excel in marksmanship. Incidentally the pastime demands active participation.

One cannot watch a club tournament without experiencing an irresistible desire to grab a gun and show the other fellow how to do it. The lure of the clay pigeon with its tantalizing challenge to the shooter's skill beggars description. Baseball fans may be made, but trapshooters can be truly said to be born, for it needs only the mere sight of the sport to fan the dormant shooting instinct into a brilliant flame. And once this condition is brought about a veritable "gun bug" exists.

Verily, the trapshooting fever is contagious. No one is immune. The microbe attacks all classes and both sexes. It is nothing extraordinary to find both boss and employee fighting it out to the finish at the score. Youth and old age are brothers "in arms" at the sport, and the one-armed shooter is no exception. Incidentally, the sport has the approval and indorsement of every thinking man. Even the clergy are susceptible to its charm.

Like every other popular sport ,trapshooting also has its gala occasions which in many ways rival and outrival even the world's champion baseball series.

The Grand American Handicap is the mecca toward which each trapshooting enthusiast turns in the late summer. And no distance is too great—no journey too long—to prevent the more ardent from attending.

This year the Grand American promises to be even greater than ever before, for the spacious grounds at South Shore Country Club, Chicago, form an ideal spot for the meet, and it is safe to predict that the Windy City will be the scene of the greatest gathering of "gun bugs" that has ever occurred. Many titles will change hands. Perhaps some notable records will be broken, for notable marksmen from every state in the Union will compete, and the National Championship will be decided.

Birds to Destroy Krupp's.—Telling of the inventions submitted to the British War Office for use in connection with the war, the Animal World of London says of one scheme: "The inventor had observed birds pecking mortar, and his idea was to obtain a flock of cormorants—chosen presumably because of their great appetites—and to train them to feed by putting their food in horizontal and vertical lines against a wall. The idea was that the birds might associate those lines with their food. They were then to be taken to Essen and liberated, and they would attack the great chimneys at Krupp's works with such vigor as to destroy them. "I hope," said our correspondent, "that I shall not get into trouble for divulging important secrets of use to the enemy. Who says there are no brains left in England?"

Tough On Dogs in England.—A new Order under the Defence of the Realm Act authorizes the destruction of any dog seized by a police-constable after the expiration of three clear days, unless in the meantime the owner has claimed the dog and produced his license. Any person who takes possession of a stray dog shall, unless he immediately returns it to its owner, forthwith hand the dog over to a police-constable for destruction. If he fails to do so he will be guilty of an offense. It is now also announced that it will be unlawful to hold any show at which dogs are exhibited, whether for sale or otherwise.

Mr. W. T. Cecil Hayward (Hon. Secretary, Wire Fox Terrier Association), writing in defense of our dogs, denies that the animals are a menace to the food supply of the country, their staple food being horseflesh, sheeps' paunches, butchers' offal, greaves, fishes' heads, and millers' sweepings. The importance of the breeding of pedigree dogs in this country may be gathered from the fact that they are valued roughly at £3,000,000 yearly. Last year a fox terrier was sold to the U. S. A. for £1,000. Referring to the character of the dog, he says: "The dog is man's most loyal friend; his affection never changes; he is faithful, a defender and a protector. His presence is a comfort to many thousands of homes today, where the husband is away serving his country in this hour of dire need, whilst his presence serves to comfort many a poor bereaved wife or mother. A dear old lady in humble circumstances, whose sons are fighting and whose two dogs she is taking care of, asks, 'How can I face my boys if the dogs are gone?' If every dog were destroyed tomorrow it would not mean one meal per year for the people of this country."—[British Sportsman.

Moose Delay Trains.—A very heavy fall of snow between McBride and Prince George, British Columbia, on the main line of the G. T. P. last winter, made it very difficult for moose and caribou to find feed. With the surrounding country covered with a mantle of snow ten feet deep, the animals came down to the railway track, and the operating men had considerable difficulty in getting them off the right-of-way.

"When passing over the line with the snow plow," writes Superintendent Kirkpatrick, "I personally counted over fifty moose in different places on the track, and we had to delay trains to avoid killing them. We did kill six or seven moose, but this was unavoidable as the animals ran some distance ahead of the trains, then turned and charged the engine. There were some very humorous as well as painful incidents. Two buck moose ran ahead of our snow plow for about two miles, finally turned and charged the plow at full speed. The moose were not killed, however, as the snow from the plow picked them up and threw them about fifty feet from the track. We watched them make their way down through the snow to the river, apparently uninjured."

Trapshooting Championships.—Seventy-nine trap shooting tournaments—six of them State championship affairs—are listed to take place during the month of July under the supervision of the Interstate Association for the Encouragement of Trapshooting. These tournaments will take place in 31 States and in two Canadian provinces

Pennsylvania and Iowa lead with 10 tournaments each. Minnesota and Wisconsin will stage five each and Michigan four. Wyoming, Oklahoma, Illinois, Indiana and New York each will hold three; Arkansas, North Dakota, Maryland, Maine, Delaware, Missouri, California, two each; and British Columbia, Alberta, Rhode Island, Oregon, Connecticut, New Jersey, Ohio, Massachusetts, Montana, Washington, Georgia, New Hampshire, and Kentucky, one each.

The State championships, the date and places they will be held, together with the dates of the important special trapshooting events to take place during July are appended:

State Championships—Wyoming, at Douglas, July 7-8-9-10; Indiana, at Indianapolis, 10-11-12; Montana, at Anaconda, 15-16-17-18; Kentucky, at Louisville, 19-20; Wisconsin, at Wausau, 22-23-24; Maine, at Rockland, 27-28.

Special Shoots—Maplewood, at Maplewood, N. H., July 2 to 8; Western Handicap, at St. Joe, Mo., 17-1819; Pacific Indians, at Portland, Ore., 23-24-25.

Fish Tragedy of Pacific—When the Chinook salmon of the Pacific coast leave salt water and go far inland to spawn in shallow streams, they never return. Large, fat and healthy when the run up the coast rivers begins in the spring, the fish soon waste away from lack of food, as they never eat after leaving the salt water. During the long trip to the spawning grounds, hunger causes the fish to attack each other viciously, and it is a question of the survival of the fittest. The weaker never reach their destination, the stronger lose tails and fins in their fights for supremacy. As a result of the actual spawning following the run up the rivers without food, the fish change in color and lose all their scales and most of their skin, becoming a mass of white patches and blotches of decay. Their mission in life ended, the old fish die and the newly born find their way to salt water, only to repeat the experience of their elders four years hence. The spawning ground of the Chinook salmon is both his cradle and his grave. Here is a fish tragedy unequaled certainly by anything in human annals.

Interesting Sporting Booklets.—The Du Pont Company has just issued two very interesting booklets, one covering "Trapshooting Leagues," the other, "Trapshooting Organization, Equipment and Management," and is known as the "Trapshooting Club Handbook."

The league booklet is to trapshooting what a baseball guide is to baseball. It explains the organization of leagues and full information as to their successful life. Just a few of the important topics mentioned are—

- When and How to Organize a League.
- Cost of Organizing a League.
- Rules of Successful League.
- Duties of Officers and Committees.
- Location of Clubs.
- Kind of Shoots to Hold.

It also goes into detail concerning the foremost trapshooting leagues of the country.

The other booklet is timely, in that there must be clubs before good leagues can be established. It would be of special interest to sporting men who are thinking of forming a club. Everything necessary to know about forming a trapshooting club and successfully conducting same is in this booklet, such as—

- The Call of the First Meeting.
- The Organizing and Election of Officers.
- Constitution and By-Laws.
- Proper Equipment.
- Conducting a Trapshooting Club.
- Novelty Shoots.

In fact, the booklet contains enough information to answer all questions usually asked about a trapshooting club.

It is estimated that there are at least 1000 boys under 15 years of age who are proficient trapshooters.

WARM WEATHER IMPROVES FISHING.

Splendid Sport Is in Order in the South Now That Spring Is Here.

All kinds of fishing are producing splendid sport now that summer has asserted itself, and the angling licensees of every persuasion are taking advantage of everything that will hit bait, spoon, fly or those fearful and wonderful contraptions in variety without end, spawned during the disturbed dreams of bass casters, looking like nothing in the waters, on the land or underneath or over, known as "plugs," "wobblers," etc.

Heat will spoil some sport along the headwater trout streams and may do flies the trick of "low visibility" by running in much snow water, but up to the middle of the week casters were creeling fine messes, and quite a few took limits on "feathers."

Bear lake, weather and certainty of sport to the reasonably expert being considered, is the most attractive angling proposition offering the recreationist with a few days at his disposal. The four and five pounders are more plentiful than ever, and striking spoons well, provided the gear be right and the presentation properly made. Weather is less windy, and the biggest season Bear Valley has yet seen is setting in.

Surf fishing has experienced a real—or "reel"—revival this year with the resumption of the kind of sport that made lower Orange—San Diego coast—famous years ago when local sinker-shiers with their bags of big clams used to crowd the Santa Fe chair cars of Saturday nights and bribe brakemen to make flag stops they had orders for anyway; making payment in terms of corbina and croakers on the morrow. The clam carvers run the risk of red water, but given clear casting conditions, may feel sure of a fine mess of fish, the bigger ones having begun strongly during the week.

Announcement is made by the fish and game commission that the season of golden trout will open July first this year, the last legislature having moved the date of opening back one month.

Deputy Fish and Game Commissioner Harry Pritchard returned from Owens valley and reports Cottonwood lakes still frozen over, and the streams running snow water to a degree prohibitive of sport. It is hardly likely there will be much golden trout fishing for another month, but there will be plenty then. Every angler wants golden trout experience. Not that the fish have anything on our regulation "rainbows" for gameness or delicacy, but they are colored like a Grand Canyon sunset, and take the fly freely in that crystal-clear lake amid its snowy setting. The high clear air, cold nights and unique surroundings make an enduring impression. And the fish are peculiar to the Sierras.—[Los Angeles, Cal.

Anglers of Oakland are about to organize a casting club. The park commissioners have promised that facilities for indulging in the sport of casting will be provided at a suitable place upon Lake Merritt and an organization will be perfected as soon as possible.

Peter B. Kyne, the author, is a most enthusiastic trap shot and is preparing for an active part in several of the coming tourneys. Kyne a few years ago was quite a trap shooter and when Bill Price gets through giving Kyne's gun an overhauling he will start in earnest.

A. K. C. Judges' Licenses.—The applications of the following persons to officiate as judges at A. K. C. shows have been passed upon by the license committee and approved:

Jas. Anderson, R. W. K. Anderson, F. N. Anderson, M. S. Baldwin, H. K. Bloodgood, E. L. Boger, Vinton Breese, Miss Margaret Brigham, William Brueggemann, J. A. Buchanan, John Buck, R. S. Byram, Mrs. A. B. Carmichael, C. J. Cassleman, H. W. Church, J. F. Collins, Theodore Crane, Mrs. F. A. Dallen, Dr. J. E. De Mund, W. H. Dietz, S. J. Duhn, Mrs. J. A. Dunn, Mrs. C. Ehlerman, Jules Ferond, Dr. F. A. Fisher, Dr. G. W. Fisher, Mrs. Haley Fiske, H. T. Fleitmann, Miss J. Forgeus, George Greer, J. N. Goodman, Mrs. J. C. Hadley, W. T. Hall, A. Mc. Halley, Mrs. A. Mc. Halley, E. N. Hano, Mrs. M. E. Harby, Mrs. C. B. Harmon, F. L. Hauptner, G. O. Heinlein, A. F. Hochwalt, Mrs. A. L. Holland, A. G. Hooley, G. B. Hooley, Miss Lydia Hopkins, G. C. Hopton, H. B. Hungerford, G. H. Keyes, Mrs. T. E. L. Kemp, W. F. Kinder, Morris Kinney, Dr. H. B. Kobler, G. O. Kolb, Mrs. G. O. Kolb, H. W. Lacy, B. F. Lippold, F. G. Lloyd, W. R. Lowe, Mrs. M. C. McGlone, J. R. MacTlroy, Mrs. W. W. MacLeod, A. B. Maclay, Mrs. F. Y. Mathis, J. E. Meade, Enno Meyer, E. D. Mills, A. K. Morrison, G. Muss-Arnolt, C. F. Neilson, Theodore Offerman, F. L. Parnham, Miss C. L. Phelps, G. W. Quintard, Dr. C. W. Reed, L. E. Rode, Mrs. J. G. Rossman, Jacob Ruppert, J. H. Rushton, Charles Schott, A. R. Schulze, Robert Sedgwick, Jr., W. H. Shanks, R. F. Smith, Frank Spiekerman, Miss M. A. Stovell, J. R. Thorndike, B. H. Throop, Mrs. M. C. Throop, Miss Anne Tracy, Miss N. C. Untermeyer, L. F. F. Wanner, Mrs. L. F. F. Wanner, D. E. Waters, Miss A. H. Whitney, L. Wielich, Levi Wilcox, J. Macy Willets, A. C. Wilmerding, J. Bailey Wilson, W. P. Wolcott, C. H. Yates and Mrs. C. H. Yates.

A cursory examination of the list displays a great paucity of judging material aside from the East, there being but a slight representation from the central states, South and West, a condition which in all probability will be considerably ameliorated later.

Sportsmen's Row

C. A. Nash, runner-up in the California-Nevada State shoot this year, was the runner-up last year, too.

✤ ✤ ✤

D. J. Holohan, who competed in the Pacific Coast Handicap at San Jose, won the Idaho state championship at Twin Falls on June 13.

✤ ✤ ✤

R. D. Morgan, of Washington, D. C., who made the high run of 231 in the Westy Hogans shoot last fall, likes shooting so well that he took the trip to Tulsa for the Oklahoma State event.

✤ ✤ ✤

Mrs. C. E. Groat, of Los Angeles, Cal., has been doing some remarkable trapshooting this spring. On successive days late in May she broke 96 out of 100 targets, and then 191, 185, and 180 out of 200, and had straight runs of 63, 79 and 56.

✤ ✤ ✤

Mr. C. E. Locke, of Tara, Ont., recently imported from Miss Marion Du Pont, of Montpelier, Vermont, a registered Dalmatian pup by the name of Montpeliers Captain, A. K. C. 219707. This is a very promising puppy by Montpeliers Duke of Cleveland, out of Windholme Belle.

✤ ✤ ✤

There was a mistake in sending out the information that there was an open season on cottontail rabbits the year round. The laws are the same as last season with the exception that the bars are let down November 15 instead of October 15 and run until February 1st.

✤ ✤ ✤

The fish and game commission gives the information that sportsmen should not worry over the creation of so many new districts—or rather, sub districts. All they will have to do is to keep track of the laws for districts one, two, three, and four and they will be reasonably safe.

✤ ✤ ✤

The biggest trout taken from the Yuba river for many years fell to the angling skill of Jerome York of Downieville ,Cal., a few days ago. While fishing at the old foundry pool, he drew out a rainbow weighing four and one-half pounds and measuring two feet. The trout put up a lively battle before he was landed.

✤ ✤ ✤

On June 24th competition will take place at the L. A. club for the trophy offered by H. R. Everding of Portland. The schedule for the remainder of the summer includes shoots for trophies offered by E. K. Mohler, H. E. Sargent, Henry Pfirrmann, Owen Council, William Kennedy, Harry W. Cline, C. E. Groat, E. C. Crossman, N. W. Nelson, George Melford, B. Carnahan and Seth Hart.

✤ ✤ ✤

The gun club of the Alameda Elks is planning a ladies' day in the near future. The exact date has not been decided upon as yet, but it will probably be early in June. All of the crack fair shooters will be invited to compete for the valuable trophies the Elks are going to hang up. Mrs. A. G. Wilkes, Mrs. Geo. Thomas and other well known woman shots have signified their intention of competing.

✤ ✤ ✤

There is no bar to age or size in trapshooting—in fact, the restrictions are very few. In the Grand American last year, W. E. Phillips, aged 14, and J. H. Breitenstein, aged 84, shot in the same event. In the recent Pacific Coast Handicap Mrs. Ada Schilling, weight 90 pounds, was at the firing line with George J. Tuckett, weight 350. Mrs. Schilling broke 93 targets and her heavier opponent broke 86.

✤ ✤ ✤

A movement is under way to inaugurate an intercity trapshooting league in the East. It is the idea of the promoters to get the league under way by next fall. The success of the Philadelphia Trapshooters' League, the team shoots of the New York Athletic Club, and the various other leagues throughout the East has caused no end of comment, and it is the feeling that a league with Philadelphia, New York, Newark, Boston, Hartford, New Haven, Baltimore, Syracuse, Buffalo and Wilmington would prove a great success. Such a league would stimulate interest in the sport.

✤ ✤ ✤

A happy lot of fishermen of San Jose recently returned from a most enjoyable week's outing on Naciemento Creek in Monterey county. The party consisted of District Attorney Arthur M. Free, John R. Chace, Supervisor Henry M. Ayer, J. Derol Chace, County Auditor Albert Schilling, F. O. Reed, Joseph Ayer and B. Slettedahl. Almost 600 trout were taken by the party during its absence and the outdoor life was enjoyed by all. The camp of the fishermen was pitched on the summit of the Gabilans at an elevation of 2,600 feet above sea level, about twenty-five miles south of Jolon in Monterey county, and commanded a wonderful view of the surrounding country. The fishing was reported to be good, but did not come up to the catches made in former years, although Mr. Free succeeded in landing the largest steelhead trout yet reported by San Jose fishermen as having been taken with hook and line, its measurement being thirty inches.

The public service commission of Los Angeles county has thrown open Silver Lake, near Hollywood ,and San Fernando reservoir to fishermen, the only restrictions being that the fishing be done from the shore, as boats and wading are prohibited. This places black bass fishing again within easy access of Pasadena.

✤ ✤ ✤

Mrs. A. W. Strahorn and Mrs. T. M. Ramsdell, enthusiastic fisherwomen of Portland, Ore., accompanied by A. W. Strahorn, recently journeyed to Goodsell's camp, fifteen miles from Prindle, on the Washougal Rover, where they succeeded in landing 37 good sized trout in one forenoon. The water is said to be clear at this particular spot, despite the swollen condition of the stream, because of that portion of the river having a rock bottom.

✤ ✤ ✤

There is some agitation for a professional trapshooting championship. There should be such a thing. The amateurs have their State and national events, and it would be fitting to have State and national championships for the professionals. Some States now have professional championship races. It would be a wise move on the part of every State association to put on its annual program professional and woman's championship events; to have the Interstate Association approve of these events and to conduct the national championship in connection with the Grand American Handicap.

✤ ✤ ✤

Rattlesnake killing, coupled with poor fishing and another "murder" of a three and a half foot salmon, is the stirring yarn told by Dr. H. M. McKinley and party, who have just returned from an extended fishing party on the Pitt River. The party got lost in the woods one day and, en route through the wilds, happened to come across a sick Indian. They doctored him and to show his gratefulness the redskin disclosed to them one of the most flooded fish streams in Shasta county. Another day on returning from a fishing tour the party was confronted by three big rattlesnakes, which entered their tents and took possession of the beds. After the "doc" committed a murderous act it was discovered that the rattle had eight jingles.

✤ ✤ ✤

Just as balloon ascensions, baseball games and a midway have in the past been advertised as the features of city celebrations, so trapshooting is now taking its place as one of the star attractions in many affairs throughout the country. In a number of cities, chambers of commerce are encouraging the organization of trapshooting clubs because of the wide publicity given through the publication of the scores of local shooters in newspapers and in magazines with national circulation. As every trapshooter shooting in registered tournaments is pitted against every other shooter for yearly average honors, trapshooting publications have big circulations and are carefully read. It is this fact that makes a trapshooting club a publicity-getter for its home town.

✤ ✤ ✤

Turtle 742 Years Old.—Pittsburg, Pa.—Three hundred and eighteen years before Columbus started from Spain to find land westward a baby green turtle said "good morning" to the warm waters of the South Pacific. Recently this lord of the centuries reached Pittsburg consigned to G. H. Gledhill of the Diamond market. His journeyings and romances over the years which have intervened are his memories alone, for he is reticent about the incidents of his life story.

Mr. Gledhill does not know just where on the Pacific coast this age-old monster of the deep was netted and brought to captivity. The turtle's 482 pounds will contribute to a considerable feast, and he is resigned to an exit which will delight epicures. His only regret is that Methuselah had it on him by 227 years. It is this which makes it hard for him to die at the youthful age of 742 years.

Los Angeles Club.—Despite the warm weather about ten trapshooters turned out at the Los Angeles Gun club and competed for the V. A. Rossbach cut glass water set. E. K. Mohler was the high gun for the shoot and, as a result, captured the much sought for prizes. Mohler smashed 96x100, which is some shooting with the mercury as high in the thermometer as it was Sunday morning.

Mrs. C. E. Groat, blasting from the 18-yard mark, was the runner-up with a mark of 95x100. This was also some shooting and won her a handsome golf trophy. C. E. Groat, V. A. Rossbach and C. W. Fish all annexed 94x100 breaks. Groat won a silver trophy.

Next Sunday the H. R. Everding trophy will be up for competition at 100 targets, and a good shoot is to be expected. Some very remarkable scores were made at the Venice pier traps during the past week. Tom Wilkes broke 125 straight after dark, while William Robinson of Columbus smashed 780x800 targets. He broke 300 of these targets after dark. Both these marks were accomplished with a 20-gauge gun. Following are the scores:

E. K. Mohler, 19 yds., 96x100; Mrs. Groat 18—95, C. E. Groat 18—94, C. W. Fish 19—94, V. A. Rossbach 17—94, C. S. White 19—93, H. E. Sargent 19—89, S. H. Wilson 17—89, O. A. Evans 19—88, O. Council 19—86, M. D. Towne 16—45x50, J. A. Meiling 16—37x50, T. B. Sloan 18—22x25, J. W. Meek 18—20x25, S. McInnes 16—15x25, R. A. Miller 16—14x25, H. W. Cline 16—23x25.

Salmon Trolling Now Good.—Word received from Santa Cruz and Capitola is to the effect that salmon are now running, with prospects of the best season on record. Old-time fishermen claim there are more salmon being caught at present than at any time in the last twenty-seven years. They explain that every fourth season turns out to be the best for salmon and the exceptional catches seem to bear out their theories.

One party composed of Harry Ewing of San Francisco and J. W. Chilton, Ed Carey, Frank Holmes and J. G. Patton of San Jose brought in 450 pounds of salmon when they went out on Thursday last.

Seattle Association.—The Seattle Trapshooters' Association held the first A. A. T. A. Spoon Shoot in this city on Sunday, June 17. J. H. Davis, who only recently joined the American Amateur Trapshooters' A. A. T. A. 95% proficiency medals, J. H. Hopkins, Association, was the high score man in this special event of fifty targets. The added bird handicap was used. C. E. McKelvey, recent winner of one of the amateur state champion and now shooting for his 95% medal, with all other entries in this event also contesting in the medal races, were entered in competition with Mr. Davis.

In the regular program Dr. C. L. Templeton tied with his brother, J. H. Templeton, with a score of 48 as high men. In the 100-bird race Dr. Templeton ranked high with 96 and C. E. McKelvey second with 92.

The club prize in the regular 50-target program went to J. H. Davis, he winning a shoot-off between J. H. Templeton and himself for this prize.

July 8th the Seattle Trapshooters' Association will hold the Northwest Washington Trapshooters' League tournament which was slated for Chehalis June 22d. At this time the club will feature a "Red Cross Event" the entire entry of which will go to the Trapshooters of America Ambulance Fund. The scores:

At 50 targets—J. H. Templeton 48, C. L. Templeton 48, Hugh Fleming 45, J. H. Davis 41, C. E. McKelvey 45, J. H. Hopkins 41, D. A. Robb 37, J. B. Lewis 36.

At 100 targets—C. L. Templeton 96, C. E. McKelvey 92, Hugh Fleming 91, J. H. Templeton 88, J. H. Hopkins 83, J. H. Davis 82, J. B. Lewis 77, Dr. LeRoy Newton 44x50, Chas. Dockendorf 15x25.

E. A. FRY, Secretary.

WILD DUCKS AND THEIR HABITS.

American Widgeon Secures Food Through Diving of Redhead and Bluebill.

That the American Widgeon or Baldpate takes advantage of the diving capabilities of the Redhead and Bluebill to obtain some of their food is a fact that has been known to duck-shooters for some years.

Last fall I spent some interesting moments in watching the movements of a flock of twenty-five or thirty Baldpates. A large flock of Redheads were feeding in a cove by diving in their customary manner for the wild celery which grows on the bottom in water ranging in depth from ten to thirty feet, and consequently out of reach of the widgeon which, like the rest of the family of marsh ducks, are surface feeders and if dipping go down only to the extent of the length of their necks. As a rule the Widgeon would swim about on the surface of the water down the wind from the Redheads and pick up the leaves of the celery after the Redheads had eaten off the roots, but some of the bilder or more hungry Baldpates would actually swim right up among the Redheads and just as soon as the latter duck emerged from the bottom with a stalk of celery in his bill the widgeon would snatch it from him.

One would naturally suppose that the Redhead, being the larger duck, would resent such treatment, but he simply took another dive for some more. The Redheads stood this kind of thing for some time, when they all got up and flew to another part of the cove, to be promptly followed by the Widgeon, who took up their position down wind of the Redheads, and went through the same performance again. I have seen all the different varieties of marsh ducks feeding on the wild celery that had been brought to the surface in the first instance by the Bluebill and Redheads, and had washed up on the beaches and sand-bars, but the American Widgeon is the only member of the duck family that I know of to be Johnny-on-the-spot.

The Redheads and Bluebills are therefore benefactors to several other members of the duck family.

I am going to mention a habit peculiar to the Canvasback that I know other old duck-hunters have noticed, but which some of the younger shooters may profit by knowing.

Sometimes a flock of Canvasbacks will fly past outside of your decoys and apparently take no notice of them whatever. They may be gone for some time and make a complete circuit of the bay and come back a little closer but still out of range. In fact they have been known to do this four or five times and finally come and settle in the decoys. The new hunter may be tempted to take a longer shot whereas if he exercised the virtue of patience he might get a much better chance to make a bag.—[J. Tournson.

BETTER LIVE STOCK
and Agricultural Topics

The man who makes two blades to grow of grass where one grew before, the man who makes two roosters crow where but one rooster crew before; the man who makes two gallons of milk flow where but one flowed before, is worthy of the crown of life.

✤ ✤ ✤

Don't take a chance with a sick hog. Act quickly. Get a veterinarian or a trained man immediately. Don't wait a single hour when you suspect disease in your herd. Use the telephone or send to town at once. Only prompt action will stop hog-cholera losses.

✤ ✤ ✤

The brood sow suckling her litter should be well fed in order to give a maximum milk flow. Gains in live weight made by the pigs at this time are usually the cheapest ones during their whole lives, and any factor which will increase the sow's milk yield or cheapen the cost of her feed during these weeks will increase and cheapen the gains made by the suckling litter.

✤ ✤ ✤

There is some danger, according to agricultural authorities, that the sheep tick may become a source of considerable loss to farmers and stockmen in those localities in which the dipping practiced for some years in order to eliminate sheep scab has been largely discontinued. Dipping for scab has helped to control the sheep tick in those localities, which consequently have been comparatively free from this pest for a number of years. Now, however, it appears that sheep ticks are becoming a nuisance in the areas where systematic dipping was formerly carried on, and they are likely to cause a great deal of damage if steps are not taken to control them.

New Missouri Regulations for Stock Hog Imports.

Governor Gardner has placed a quarantine on the shipment of stock hogs from other states into Missouri until they are inoculated against hog cholera and held for fourteen days. This action was taken upon the recommendations of the State Board of Agriculture, which met to consider necessary measures for the prevention of hog cholera, which resulted in losses in Missouri last year of more than two million dollars.

Dr. D. F. Luckey, state veterinarian, says that hog cholera now is prevalent in ninety-three counties of Missouri, but the losses to date have not been heavy. Luckey's report, filed with the Board of Agriculture, indicates that between April 1 and June 1, 1917, his department had placed 377 outbreaks of cholera under control. These occurred in more than ninety counties. Luckey estimates that if the hog cholera in Missouri now was uncontrolled the losses to farmers this year would exceed $5,000,000.

SUCCESSFUL CATTLE SALES REPORTED.

There have been more big sales of pure bred cattle this summer than have ever been known for this time of year. Many breeders were doubtful of the outcome, however, the reports of the big sales bear out the opinion of "those who know best" in declaring good stock always sells well.

The Hereford sale conducted under the auspices of the Ohio Hereford Cattle Breeders' Association at the Ohio State Fair grounds, Columbus, O., on May 30, resulted in an average of $233 on 37 head. The top price was $630, paid by Fonner Stock Farm for Belle Dale, by a grandson of Dale and out of a Beau Donald dam.

At Worcester, Mass., on June 7-8, 143 cattle, consigned by 30 or more leading breeders to the National Holstein-Friesian Sale Co., of New England's public auction averaged $2,073.30.

The Rev. E. J. Sanderson, of Fulton, Mo., reports the arrival of a fine saddle filly by by John P. Arnold's grand young Peavine colt, Rex Direct. The foal's dam is by Astral King and second dam a daughter of Black Squirrel.

The largest representation of buyers seen at an Angus auction in years marked the auction at the Longbranch Farm of Chas. Escher Jr., Botna, Ia., June 5, and the Pleasant View Farm sale by Escher & Ryan, Irwin, Ia., June 6, when, in the two-days' selling, 123 head were sold for $95,285, an average of $774. This is the highest Angus average attained at a public sale in many years.

Missouri Shorthorn breeders are jubilant over the purchase of a foundation herd of that breed by Robert M. Brown, one of the leading stockmen of Monroe County Missouri, who last week at the big Missouri Shorthorn sales selected several top cows. Mr. Brown is a son of Col. Paul Brown, St. Louis millionaire broker and horse-lover, and former owner of My Major Dare, Johnny Jones and others of note, and has one of the best improved farms in Missouri. Young Brown has been "leaning" to Angus for some time but has finally decided in favor of Shorthorns. This means that within a very few years Missouri will have another famous herd of red, white and roans.

WORLD FAMED COW COMES TO CALIFORNIA.

The demand for Shorthorns was put to a test in the selling of 107 head in less than 5 hours in the sale by the Mansfield, Ohio, firm of Carpenter & Ross in Chicago on June 7. The demand not only stood it, says the Breeder's Gazette, but grew stronger as the sale progressed. The 107 head realized $7,000. It was one of the largest and most remarkable and satisfactory sales in the history of the trade in America. The appetites of the breeders had been whetted, and when the time came for them to express their appreciation of this war-time importation it issued with force, without hesitation and in such a measure as to stimulate greater pride in the breed. It was a memorable manifestation of strength in the demand for good breeding stock. Even the old-timers do not recall so magnetic an auction.

T. T. Miller, of Los Angeles, Cal., came in for the good ones, and annexed the excellent Secret Stamp at $2,000 and the great cow Brandsby's Jinny 18th. The London winner went at the top price for a female, $3,100, so there comes to California one of the most celebrated Shorthorn cows ever imported to America. The purchaser is the same man that purchased the top cow at the Carruthers Farm Sale, Mayfield, Cal., May 2. Ohio, Oklahoma, Indiana, Michigan, Tennessee, Nebraska, Missouri, Illinois, Mississippi, Iowa, Oregon, Virginia, California, Minnesota, New York, Pennsylvania, Wisconsin and Canada were represented at the auction.

Admirers of the breed will be interested in knowing that the four Chicago sales resulted in the selling of 237 Shorthorns for $265,615, an average of $1,120, with the demand still unsatisfied at the close. Carey M. Jones won much praise by the manner in which he handled the sale. He was assisted in the ring by Reppert, Martin and Milne.

Thos. Stanton scored another big average for the Shorthorns sold at Sittyton Grove Farm, Wheaton, Ill., June 6, when the 23 head listed from his herd realized $29,100, with the seven bulls making an average of $1,467. There was present one of the largest crowds ever seen at Sittyton Grove. Maxwalton Amateur by Maxwalton Renown went to J. E. Kennedy, Janesville, Wis., at $3,450. He is one of the good bulls of the breed. King's Heir, a Duthie-bred bull, made $2,600, selling to B. F. Hales, Oak Park, Ill., after a bidding contest with the Smiths of Memphis. Commander-in-Chief was bought by Fred Mighel, Hinckley, Ill., at $1,800. Sittyton by the champion Selection made $750, falling to the bid of W. C. Faber, Paw Paw, Ill. A. F. Crawford, Clarinda, Ia., purchased Lavender Champion by Rusper Champion at $775. Sittyton Select, another son of Selection and a show prospect, went to T. T. Miller, Los Angeles, Cal., at $725.

At the close of F. R. Edwards' sale in Chicago on June 8, Heart's Delight Farm, Chazy, N. Y., sold 7 Shorthorn bulls at an average of $821.

Frank R. Edwards, Tiffin, Ohio, closed in Chicago the week's series of Shorthorn sales on June 8 with one of the snappiest and liveliest sales, and an average of $1,005. Less than two hours were taken to dispose of the offering. Attenders were for business and manifested it by bidding spiritedly. Mr. Edwards was specially pleased with the results, and has to his credit one of the best sales in recent years. The few imported cattle listed made good values. It was evident that many more could have been sold. Imp. Eliza, with a cow calf, made the top price, selling to T. T. Miller, Los Angeles, at $2,000.

Animals Require Attention at Breeding Season.

Female breeding animals require special attention at two seasons of the year. The first is during the breeding period and the other is when the animals are giving birth to young. E. A. Trowbridge of the University of Missouri College of Agriculture suggests that those persons who have breeding animals in charge can well afford to give this attention.

It is poor business policy to keep a good breeding female and, through lack of careful observation and attention, fail to see that she becomes pregnant. Oftentimes a half an hour a day devoted to the animal at this season of the year will prevent a wasted year in the life of a breeding female. It is equally poor business policy to take pains that females are bred at the proper time and safely settled, to carefully carry them through their period of pregnancy, and then at the close of that period lose their young through lack of attention.

A rainy week during the farrowing season costs thousands of pigs. It is certainly true that some special effort can be made to save little pigs after money has been invested in a sow and she has been carefully fed and cared for throughout her period of pregnancy.

There are enough unavoidable losses at these two periods without permitting any losses which might be eliminated. At this particular time, therefore, it is highly essential, if breeding animals are to be kept, that they be given every opportunity to become pregnant; and second, that sufficient precaution be taken to minimize the losses at birth.

Livestock insurance is just as important as fire insurance, automobile insurance or any other form of insurance and business protection. The Montana Livestock & Casualty Insurance Co. offers the livestock owners this kind of protection. Douglass Keith, 701 Royal Insurance Building, San Francisco, is their Northern California General Agent and W. H. Miller, 505 Lankershim Building, Los Angeles, is the Southern General Agent. These gentlemen will furnish information and application blanks on request.

✤ ✤ ✤

Record Breaking Holstein Sale.

Last week at Worcester, Mass., a Holstein bull calf sold for $53,200; a cow at $18,300 and 143 head sold for a total of $296,470. The $52,200 sale was for a five months old calf out of the champion milk and butter cow Ormsby Jane Segis Aaggie, consigned by Pine Grove Farms, Elma Center, N. Y., selling to the D. W. Field Farm Co., Montello, Mass. John F. Shanahan, who recently established this herd, and John Arfmann were contenders for this superbly-bred youngster. The world's champion under 4½-year-old 7-day butter producer Wandermere Belle Hengerveld, consigned by E. LeRoy Pelletier, Detroit, Mich., achieved the honor of world's record-priced females of the dairy breeds when she went to John F. Shanahan, Chas. H. & Philip Dold, all of Buffalo, N. Y., at $18,300. Oliver Cabana, A. W. Green and others participated in the spirited contest for her possession. Hollywood Farm, Hollywood, Wash., secured the 42-pound two-year-old Glen Alex Queen DeKol, consigned by A. C. Howe, New Hartford, N. Y., at $18,000. There were 59 animals that sold for $1,000 or more each, realizing $242,515. Of these 45 were females that averaged $2,990. Fourteen bulls made $7,712.50 each. The 23 bulls and bull calves sold averaged $4,911. S. T. Wood in the box and Auctioneers B. V. Kelley, D. L. Perry, R. E. Haeger and Geo. V. Baxter participated in the honor of conducting the auction.

DREAD ANTHRAX CATTLE DISEASE BREAKS OUT IN HAWAII.

What is apparently a deliberate attempt to let loose an epidemic in the Hawaiian Islands which might wipe out the Territory's beef supply has been discovered by Government officials. The dreaded anthrax cattle disease has been distributed to herds in many sections of the islands. The Hawaiian Gazette of June 12 declares the disease is no accident and has roused public indignation. The epidemic appeared suddenly and virulently in the great herds of the territory. We quote from the Hawaiian Gazette:

Anthrax, the cattle disease which recently broke out mysteriously among herds on Kauai and Oahu, has now broken out on Maui, according to wireless advices received by the board of agriculture and forestry.

That the outbreak on Maui is due to a criminal act, inoculation of the cattle by a person or persons desiring to injure the Territory, or more probably the United States, appears more than probable, according to the opinion expressed by those cognizant of the circumstances.

Dr. J. C. Fitzgerald, deputy territorial veterinarian stationed at Wailuku, was in Honolulu to attend the races. Immediately upon receipt of the news that anthrax has broken out on Maui, he left for that island to take charge of the situation.

Independent Outbreak.

Dr. Victor Norgaard, territorial veterinarian, stated that there was no possible connection between the recent outbreak at the Farm Cornn dairy in Honolulu and the on on Maui. Asked if in his opinion the Maui outbreak might might be due to malicious intent, he stated emphatically that it looked that way.

Doctor Norgaard stated recently at a meeting of the board of agriculture and forestry that, in his opinion, there was absolutely no doubt but that the cows of the Farm Cornn dairy that were attacked by the disease had been deliberately inoculated with anthrax germs.

The last outbreak of anthrax, Doctor Norgaard stated, is in a bunch of about sixty cattle in a paddock below the polo grounds. Every precaution is being taken to prevent the disease from spreading to the great herds of cattle on the island. Doctor Norgaard stated also that the cattlemen of Hawaii have been warned to take precautions to prevent the disease gaining a foothold among their herds.

A large supply of anthrax serum is due to arrive here by the next steamer from the Coast, and it will be used to render the unaffected cattle on Maui immune to the disease.

That the outbreak of anthrax on Maui under conditions similar to that at Moiliili, this city, clinches the theory of a deliberate plot against the meat supplies of this Territory is now the belief of responsible officials. It is now evidently believed that unless the greatest care is exercised by the stock men of Hawaii, the dread scourge will appear on that island.

The outbreak in an isolated herd on the slopes of Haleakala fulfills a prediction made by a high Government officer thoroughly conversant with the situation, in which he asserted as his belief that the fiend responsible for the inoculation of the cattle would carry it to the Maui herds and also the Hawaii herds. The latter part of the prediction has yet to be proved.

THE FARM

HEREFORDS ON THE PACIFIC COAST.

Secretary Kinzer Reports Promising Outlook in California, in The American Hereford Journal.

California, the land of sunshine and flowers, and the state with which we usually associate the idea of orange groves, vineyards and fig trees, is beginning to realize that Whiteface cattle will be another adornment and source of profit in keeping with the other resources of the state. The first sale of Herefords in the state, at Mayfield, May 3, was the first indication of the establishment of this great beef breed in this state where better pasture is to be found in winter than in summer.

The Lively sale attracted the greatest beef cattle auctioneer, Frēd Reppert, to sell them, and the Secretary of the Hereford breed, R. J. Kinzer, to look over the prospects of extending the Hereford breed clear to the Pacific Coast by establishing it more firmly in this state. And the prospects are as sunny as the climate is. For those who do not know the climate and the country, Secretary Kinzer describes it for them:

"After being awakened from a very comfortable bed in the St. Francis Hotel by the first rays of a Pacific sun followed by a hearty breakfast in the famous electric grill of that hotel, all was in readiness for a 90-mile automobile ride to one of California's great cattle ranches, that of Charles Rule of Jenner. A few minutes drive through busy streets, followed by a long ride on a ferry, and a landing was made. From there a well-paved country road, for which California is famous, was followed through several small villages, and for the greater part of the distance through a prosperous agricultural district. The landscape was dotted now and then by a dairy, a vineyard, or a lemon or orange orchard. Briefly, this describes the country from San Francisco to Santa Rosa.

"Santa Rosa is the county seat of Sonoma county, but its chief distinction is that within its limits is the home of Luther Burbank, America's greatest plant breeder. Pages have been written describing his work and his beautiful garden, but to be fully appreciated, they must be seen. After a bountiful meal and the purchasing of some gasoline for the powerful Stutz, we were joined by Mr. Morrill, general manager of the Muniz Ranch. The road for the next several miles led us through vineyards and fields planted to hops. The tall posts, carrying heavy wires at their tops with cord strung from the ground to the wires, presented a peculiar and interesting sight to one not accustomed to such crops. The fertile hop-fields were followed by the foothills of the Coast Range, and the climb over these dwarf mountains began. Traveling a narrow mountain trail with a forty per cent grade, and making several curves in a powerful car at 25 miles an hour, causes one to remember the number of his accident policy, and wonder just how close it is to the nearest undertaker's establishment. But with such a master hand as Charles Rule at the wheel, and the beautiful scenery along the valley of the Russian River and the slopes of the mountains on the opposite side, one's nerves were soon relieved of the thrills that dangerous curves and narrow footings present. When the top was reached, we were 1,800 feet above the sea. Then the long descent down the west slope, almost to sea level, was soon made. A few miles along the winding banks of the Russian River, and we were on the Muniz Ranch. It took a climb of 800 feet to land us at headquarters, which ended the day's trip.

"A great wall of cypress, 16 feet high, conceals the ranch house and the beautiful sunken garden around it, from view. Flowers of all descriptions, palm trees and artistically well-kept grounds, with the spacious ranch house overlooking the great Pacific, makes it one of earth's most delightful spots.

"Munix Ranch is one of the old Spanish grants, consisting of 6,000 acres with a fronting of two miles on the Pacific Ocean and rising inland, to a height of 2,200 feet. Part of the ranch was once heavily timbered, but it is now in pasture or cultivated fields which for many years have furnished feed for a dairy herd of some 600 Holstein cows. Two large, roomy barns furnish shelter for the cows during the very few nights that shelter is required. It is not necessary to provide any great capacity for the shortage of feed, for the cows gather their own feed from the sides of the hills and mountains almost the year round. Down near the sea, a complete and modern dairy has been installed.

"But Mr. Rule found it difficult to get satisfactory help for his dairy and about three years ago gave his attention to beef cattle. Believing that Herefords were the best suited to his conditions, he laid the foundation for his herd by the purchase of 50 head of two-year-old heifers from the Gudgell & Simpson herd. These heifers were by Bright Stanway, Beau Dandy and Beau President. For a herd bull, he purchased a son of Simon, that has proven very satisfactory. He now has about 100 head of breeding cows, a fine bunch of yearlings and an excellent crop of calves. Last January, at the Denver sale, he purchased the first-prize senior yearling bull, Sir Beau Donald, that he has just rechristened as Sanoma. He is now being used as chief herd bull.

"Mr. Rule finds that the Herefords require far lass care than his Holsteins did and are proving far more profitable. He is now remodeling the dairy barn to accommodate the Herefords, and is disposing of the Holsteins as rapidly as possible.

"With the excellent foundation that he has laid, and by the use of such herd bulls as Sonoma, he expects to soon have the leading herd of the Pacific Coast country. He has found ready sale for all his bull calves at very satisfactory prices, some of them selling as high as $800. He expects to increase the size of his Hereford herd, and soon the pastures of Muniz Ranch will be grazed by Herefords exclusively. The entire ranch, in every detail, is skillfully handled by Mr. Rule and Manager Morrill."

But this is not the only ranch where Herefords are being introduced. The Lively sale speaks for itself. Another firm, Miller and Lux, are becoming interested in the Whitefaces. They are probably the largest, or among the largest, land owners in California. They could drive their cattle through to Canada from their ranches in the Southern part of the state, and be able to stop practically every night on their own land. When they get all this vast territory stocked with Herefords it will give a great impetus to the breed in California.

It is the opinion of Secretary Kinzer that there will be more Herefords taken into California in the next two years than in all previous time. And even now as one passes through the grazing districts of the state, the cattle seen from the trains show a 50 per cent sprinkling of Hereford blood.

HIGH-CLASS FILLIES FOR SALE.
BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.
LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.
These fillies are at Sacramento. For price and further particulars address
C. H. C., Care Breeder and Sportsman.

A GREAT COLT FOR SALE.
Rare breeding and individuality are combined in LOUNISKA BERBELLS, a large, handsome 2-year-old, coal-black, standard bred trotting stallion by Rappallo 2:17¼, trial 2:07, by Greco B., trial 2:12, by McKinney 2:11¼ (sire of Sweet Marie 2:02). Greco B.'s dam is Aileen (dam of 4) by Anteeo 2:16 (sire of the dam of Sonoma Girl 2:04½) by Electioneer (grandsire of Maj. Delmar 1:59¾ and Azote 2:04¾, each of which was champion trotting gelding of his day); great-grandsire of Uhlan 1:58, present champion trotter and great-grandsire of dam of Lee Axworthy 1:59¼, present champion trotting stallion). Greco B.'s second dam is Lou Milton (dam of Lou Dillon 1:58½, first 2:00 trotter and present champion trotting mare), granddaughter of Happy Medium (sire of Nancy Hanks 2:04, first 2:05 trotter, only 2:05 mare to produce a 2:05 trotter, Admiral Dewey 2:04¾, sire of Lord Dewey 2:03¾). Happy Medium is grandsire of Peter the Great 2:07¼, sire of 7 in 2:05 and champion extreme speed sire. Rappallo's dam Oniska is dam of San Francisco 2:07¾, trial 2:04½ (sire of St. Frisco 2:03¼ and Mary Putney (3) 2:04¾) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½) by Guy Wilkes 2:15½ (sire of dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼), full brother to William L. (sire of Axtell (3) 2:12, the only 3-year-old to hold world's trotting championship, sire of Axworthy 2:15¼ (grandsire of Lee Axworthy 1:59¼ and sire of Hamburg Belle 2:01¼). Guy Wilkes is grandsire of Sonoma Girl 2:04¾, Maymack 2:04½ and John A. McKerron 2:04½. Rappallo's 2d dam, Bay Line by Direct Line, by Director 2:17 (sire of Directum 2:05¼, ex-champion trotting stallion and the dam of John A. McKerron 2:04½), son of Dictator (sire of Jay Eye See 2:10, first 2:10 trotter) and Dolly, dam of Onward, great-grandsire of Nervolo Belle (dam of Peter Volo 2:02 and Volga (3) 2:04½). Direct Line is out of Lida W. 2:18 (dam of Nutwood Wilkes) by Nutwood, champion brood mare sire. Rappallo's 3d dam, Puss by Cal. Nutwood (son of Nutwood and Fanny Patchen, granddaughter of George M. Patchen 2:23½, ex-champion trotting stallion); was out of a granddaughter of Williamson's Belmont (grandsire of dam of Directum 2:05¼ and grandsire of grandam of sire of Lee Axworthy 1:59¼. Rappallo's 5th dam was by Gen. Taylor, champion 20-mile trotter. Louniska Berbell's 1st dam, Beautiful Bertha, is by Moormont, grandson of Electioneer and Beautiful Bells, dam of 11 trotters including 4 champions. 2d dam, Abbie McNutward (dam of Greatness (3) 2:10¼ and Derby De Oro, trial (3) 2:19) by Guy McKinney (sire of Vernon McKinney 2:01½), son of McKinney 2:11¼ and Flossie D. by Guy Wilkes 2:15½; 2d dam Blanchward (dam of China Maid 2:05¼) by Onward (grandsire of Spanish Queen 2:04¼); 3d dam by Mambrino Patchen 58; 4th dam Lady Blanche, dam of Jaywood 6557, sire of dam of William 1:58½, champion 4-year-old pacing stallion).
Louniska Berbell's 3d dam, Lady Irene 2:14½, by Diablo 2:09¼, ex-champion 4-year-old pacing stallion, son of Chas. Derby 2:20 (sire of Jim Logan 2:01¾ and Don Derby 2:04½) and Bertha (dam of 2 in 2:05, 5 in 2:10 and 14 in the list, champion speed producing mare. 4th dam, Geraldine 2:16½ (dam of Leata J. 2:03), is by Mount Vernon 2:15¼, son of Nutwood and Daisy (the 4th dam of Maymack 2:04½) by Chieftain 721. Daisy's dam was by Doc 449 (sire of Occident 2:16½, ex-champion trotting gelding) by St. Clair. Geraldine's dam was Edith C. by Gen. McClellan 144 (sire of dam of Mack Mack 2:08 and 2 dams of Bernon McKinney 2:01½, Leata J. 2:03, and Lynwood W. 2:20½ (sire of Sonoma Girl 2:01¼. Geraldine's grandam was by Rifleman (sire of Col. Lewis 2:18¼) by imp. Glencoe.
Analysis shows that most of the blood of the entire 6 2:05 trotters produced in California is embraced in this pedigree. That of the 7 sons of Hambletonian 10 with tail male descendants in the 2:05 trotting list, 6 are here included, and that of the 55 2:05 trotters 52 are descendants in tail male of sires here tabulated. I am sick, however, and he is for sale cheap, as are also his dam and his half-brother, Derbertha Bells 60907. The first man who sees him that wants a good colt and has the money to pay for him will lead him away. Take Melrose Electric at the Mole, get off at Seminary Ave., walk south. Take Elmhurst, San Leandro or Hayward car in Oakland, get off at Seminary Ave., walk north.
J. W. PENDLETON,
1601 Seminary Ave., Oakland, Calif.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10 ¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, including

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE. EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedella, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

Thirty-Second Annual Meeting of the Holstein-Friesian Ass'n of America.

The 32d annual meeting of The Holstein-Friesian Association of America was held in the banquet hall of the Bancroft Hotel, at Worcester, Mass., Wednesday, June 6. It was an extraordinary meeting, broad in its thought, powerful in its action. It was inspiring, stimulating and uplifting, even to outsiders present, dealing as it did so splendidly with great questions involving the national issues of the day. A feature of the meeting that stands out conspicuously as characteristic of the spirit shown, was the passing of resolutions to invest $100,000 of the association's $200,000 reserve fund in liberty bonds; to subscribe $1,000 to the National Red Cross society for use in its work, and to subscribe $1,000 to start a fund for the erection of a tablet or monument as a memorial to Ex-Governor W. D. Hoard of Wisconsin, a leading figure in the advancement of agriculture in this country. The adoption of these measures was the occasion of enthusiastic applause. Other stirring features of the convention were the simplification of the tuberculosis problem (so long a wearisome and disheartening puzzle to live stock owners) by Mr. Fred F. Field; President Aitken's eloquent tribute to agriculture and appeal for the recognition of its dignity; and the masterly oratory of Mr. W. A. Matteson, with which he unified the minds and hearts of his hearers with his own mind and heart, when he declared that "we are behind the government" in this hour of national stress.

President D. D. Aitken presided over the meeting, which opened at about 10 o'clock. The roll-call cards were distributed and in the unexpected and unavoidable absence of Mayor Holmes of Worcester, Gen. C. W. Wood of that city, a former president of the association, extended a cordial welcome to the visitors in behalf of the city and of the New England Holstein Breeders' club. The reading of the call and of the minutes of the last meeting was waived as was also the reading of the reports of the several officers, which were distributed among the members in the form of printed pamphlets. The elimination of this formality left time for consideration of matters of interest and value to all present.

President Aitken spoke briefly, referring to the historical significance of the meeting place—the so-called "cradle of liberty"—and trusted his hearers would get inspiration therefrom to decide aright upon three things they would be asked to authorize: the investment of reserve funds in the liberty loan; an appropriation for Red Cross work; and an initiative subscription to a fund for the erection of a memorial to Ex-Gov. W. D. Hoard of Wisconsin. He said that a committee had already been appointed to start such a fund, but that he had requested them to wait until after this meeting, to give the greatest organization of cattle breeders in the world an opportunity to lead in honoring agriculture through a man who had been foremost in the country in dignifying and upholding this great calling. He thought it would be a large and fine thing to do and an opportunity seldom presented to stand first for a great principle.

Ask Dad for A Rifle!

Dad knows that it is just as important for his boy to learn how to handle a gun safely as it is for him to know how to swim. Dad also knows that a gun will teach his son responsibility, self reliance and self control.

Tell Father you want a Winchester .22 caliber rifle. Remind him that a boy's natural interest in a gun is going to make him get his hands on one sooner or later. It is going to be mighty fine if Dad can get out to enjoy the the sport with you and teach you the correct use of a rifle.

Have you heard about our Winchester Junior Rifle Corps? If not, ask your nearest dealer for a booklet explaining how any boy or girl under sixteen can earn a silver "Marksman" or gold "Sharpshooter" medal. At the same time get the proprietor of the store to let you "try on" a Winchester .22 rifle.

In case your dealer cannot supply you this information write direct to us.

RUBBERSET

TRADE MARK

PERFECTED

Bell Quarter Boots

you may be sure that their money is "down right"

Murphy

leaves no room for doubt as to his opinion:

Poughkeepsie, N. Y.

The Rubberset Quarter Boots which I have been using are the very best I have ever seen. I have given them a thorough trial before making such a decision, but am now thoroughly convinced that they are unquestionably the best on the market. Please send me ten more pairs of them, six medium, four small. The Stallion Rings I also like very much—they are a great improvement over the ordinary ivory rings. I note what you say in regard to others using your Quarter Boots, and you will find from now on that everyone who wants the best will be using them. Please send me bill.

Very truly yours,
THOS. W. MURPHY.

Cox

said, "a-plenty" in his usual few words:

Dover, N. H.

Received the quarter boots and like them very much. I think they are an improvement over anything I have ever seen.

Yours truly,
WALTER COX.

McDonald

obligingly found time to write us between workouts:

Indianapolis, Ind.

In reply to your letter of the 11th, will say that we like the boots very much. I don't know as I can suggest any improvement to be made in them. It's a good protection, and with the roll top they ought not to chafe.

Yours,
A. McDONALD.

Pitman

started in early and is evidently "finishing strong":

Trenton, N. J.

I was among the first to begin using Rubberset Quarter Boots and I guess I will be among the last to quit using them. I consider them the best boots of this style which I have ever seen, and they are in my equipment to stay.

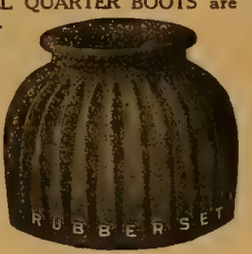
Yours very truly,
EARL PITMAN.

Ray

speaks up on behalf of our Canadian Allies:

Toronto, Canada.

I was one of the early users of both the Rubberset Quarter Boot and the Rubberset Stallion Ring. They suit me down to the ground, especially the boots. You have taken away weight where it was useless, and have added protection on the parts of the foot which a quarter boot is meant to protect.



Yours very truly,
NAT RAY.

We make these boots ourselves

in a factory which for fifty years has **specialized** upon the production of rubber and rubber-covered articles for horsemen. Our chemists have perfected our **exclusive** formula for bell boot rubber; we know **what** goes into it and **why**, so that we can back our boots unreservedly with the guarantee that our other products have made famous around the world—**RUBBERSET** must make good—or WE WILL!

RUBBERSET BELL QUARTER BOOTS are made in two styles—ribbed and plain; in two standard colors—red and black (special colors to order); in three sizes—small, medium and large; and in three degrees of stretch—stiff, regular, and extra elastic. **Order to suit the individual requirements of your horses.**

$3.95 PER PAIR, either style, any size. At your dealer's

Or *sent direct*, postpaid, on receipt of remittance and your dealer's name.

THE RUBBERSET STALLION RING

is the most economical, effective, humane and convenient device for the prevention of self-abuse in stallions. "Fool-proof" and absolutely sanitary and non-irritating. Sizes from 1¼ inch to 2¼ inch. Price, at your dealer's or postpaid, direct, ONE DOLLAR EACH.

RUBBERSET COMPANY

Proprietors

NEWARK, NEW JERSEY

Durfee

sends his O.K. all the way from Southern California:

Los Angeles, Cal.

Certainly I like the Rubberset Quarter Boots. Any practical horseman is bound to be pleased with them, and they suit me so well that I am using them to the exclusion of all other rubber boots. That is a great idea to have three different kinds of rubber so far as the stretch is concerned. Keep up the good work.

Very truly yours,
WM. G. DURFEE.

Geers

likes them, so he told us so in this valued little letter from Sunny Tennessee:

Memphis, Tenn.

The rubber rings and the rubber quarter boots came all O.K. and I thank you for them. They are giving entire satisfaction. The rubber quarter boots seem to be made of extra good quality rubber; they are made right, fit good, protect a horse just where he needs it, but still they are not bundlesome—are light and nice.

Yours truly,
E. F. GEERS.

McMahon

dropped us this welcome contribution from winter quarters:

Macon, Ga.

I wish that you would send me three pairs of medium size rubber bell quarter boots. Have been using the two pairs you sent me, and they are the best rubber boots that I have ever seen.

Yours truly,
DICK McMAHON.

Jamison

orders ten pairs at a time and tells why he does it:

Arden, Pa.

I received the Stallion Rings and also the Rubber Quarter Boots a few days ago and am greatly pleased with both, as I consider them the best in their lines that I have ever had the pleasure of using. I am enclosing you my check, for which please send me by Adams Express to Arden, Pa., ten pairs of the boots, medium size and extra stretch, same as the ones I now have. You might send two or three pairs in the red color.

Think you will have a great run on the boots and stallion rings as soon as the horsemen get to know about them, as the boots are far superior to any I have ever seen.

Very truly yours,
FRED JAMISON.

THE RED CROSS SOCIETY.

In an age charged with being selfish, sordid, and commercial there has arisen and developed the greatest organization for unselfish service the world has ever seen—the American Red Cross. The growth of the Red Cross Society is evidence not to be controverted that the spirit of service is strong in the hearts of the people of today. The work of the society demonstrates that there are thousands who are willing to devote their services to humanity, and the support given them by voluntary contributions shows that there are hundreds of thousands more who are willing to devote a portion of their means to the alleviation of suffering.

The activities of the Red Cross always have been generously supported by the American public, but only since "our own" soldiers began to take a place in the trenches alongside our allies has this support become bountiful. It is the suffering and comfort of the men from "our own neighborhoods" as well as the physical needs of our allies for which the Red Cross must now mobilize. The result—a greater and more imperative duty now confronts the givers in America.

No appeal to the generosity of the American people has ever been unanswered. Let one part of the world be visited by some calamity like the Mount Pelee and Italian earthquake, China floods, the Johnstown flood, the San Francisco earthquake or any greater or lesser calamity, and the response from the Nation is immediate and generous to a degree. The services of the American Red Cross Society to both sides in the Boer War and in other wars was liberal and sacrificing. Fresher in our minds is the work the American unit has been doing in Europe in the last three years, especially the relief given the Belgian population.

To meet this new and greatly enlarged demand—this demand that has the added force of patriotism and a duty we owe our own soldiers—there has been a campaign to raise $100,000,000 for the Red Cross work. The campaign has been conducted with a vigor and earnestness that insured success. It was participated in by all classes of Americans from the President of the Nation down to the smallest boy scout, and the women of the Nation were particularly active.

"Red Cross Week" will not be the only time in which one can assist the work of the society. Every week should be a Red Cross week with those who are able to contribute to the work of this greatest agency of mercy. Its work is pressing and will continue a long time. It needs continued support and will not appeal in vain to a people as generous as the American Nation.

WORLD'S GREATEST SADDLE STAKE NOW ASSURED.

The World's Championship Stake for five-gaited saddle horses, proposed by the Breeder and Sportsman and featured by the Kentucky State Fair, has been practically assured and will be contested at the Kentucky State Fair as outlined in previous editions of this paper. The prize of $10,000 makes it the richest stake ever given. Commissioner of Agriculture Cohen, of Kentucky has more than $3,500 subscribed for the public's part of the stake and it is expected the remaining $1,500 will have been subscribed before the first of the month. The press of the United States already has been attracted by the magnitude of this great stake and are featuring it as no event in horsedom ever has been featured. Most gratifying of all to the promoters, however, is the support of the live stock and breed papers are giving the event. The following editorial from The Show Horse Chronicle, published at Lexingtoi, Ky., and the only journal devoted exclusively to the show horse, gives one an impression of the importance attached to the stake by the leading authorities of the country:

We append hereto a letter, which is in the form of a circular, sent out by Hon. Mat. S. Cohen to saddle horse lovers all over the country. The letter virtually explains itself and is as follows:

My Dear Sir:—

Some weeks back The Breeder and Sportsman, published at San Francisco, Cal., suggested the feasibility of giving a class for a World's Championship for five gaited saddle horses, any age or any sex, and suggested that perhaps through the medium of private subscription together with a guarantee from various owners, breeders, dealers and lovers of fine horses throughout the United States, that $5,000 in cash could be raised for the purpose of giving such a stake, and further suggested the idea, that should such an amount be raised, that the various fairs, horse shows or expositions should come forward with a bid in order to have such contest upon their grounds during their dates.

Taking the cue from this suggestion, as President of the Kentucky State Fair, I agreed to match the sum of $5,000 which would give a $10,000 show at the Kentucky State Fair, Louisville, Kentucky, September 10th to the 15th, 1917. This is to be divided as follows:

$2,500 for the best saddle stallion, any age, money divided 50, 25, 15 and 10 per cent.

Same amount, same division for mares.

Same amount, same division for geldings.

This would leave $2,500 to be contested for the World's Championship, permitting only the four ribbon winners, in sex classes to compete in the grand championship.

I further agreed to charge no entrance, deduct nothing from the money winners, to give free stall and free bedding to horses contesting and $10 hotel bill for each exhibitor actually contesting in the award.

This proposition I submitted to Mr. "Jump" Cauthorn of The Breeder and Sportsman, San Francisco, and it has been extensively published throughout the United States, with some few exhibitors and breeders coming forward with a guarantee of from $100 to $300 in order to make this stake a "go." But the subscription to this great event has so far amounted to only a few hundred dollars, and I am writing you, earnestly requesting that you wire, either Mr. Jump Cauthorn at San Francisco, Cal., or myself, a guarantee of a stipulated amount, which I will ask you to make most liberal to insure this national exhibition and have it pulled off at the place and on the dates mentioned.

Since there is to be no entrance fee, or nothing deducted, it does seem to me that the breeders, dealers, exhibitors and admirers of the five gaited saddle horse and especially the exhibitors, should send in their guarantee at once, of not less than one or two per cent of the stake, which, with the ones on the list to whom I am mailing this appeal, should bring the desired results and enable the Kentucky State Fair to pull off the greatest saddle horse exhibit at Louisville during the week of September 10th to the 15th the world has ever known.

The stake will be judged by the three judge system, one to be selected by the State Board of Agriculture of California. one by the State Board of Agriculture of Missouri and one by the State Board of Agriculture of Kentucky. In leaving the task to these bodies to make that selection, I feel that they realize the importance of such an exhibition and it is safe to predict that only the very best, most eminently qualified and thoroughly fitted men will be selected.

Please let me hear from you by return mail, because what we do, must be done by July 1st, in order to give an event of this character the publicity it rightfully deserves.

Again reiterating my earnest desire for your co-operation and liberal guarantee in seeing that this event is pulled off, I am

Yours very sincerely,

(Signed) MATT S. COHEN,
Commissioner of Agriculture.

We know Mr. Cohen and we know Mr. Cauthorn. Both are live wires; both possess indefatigable energy and are brim full of enthusiasm and novel ideas. Such an event as is above suggested would get a million dollars' worth of free newspaper publicity from which the saddle horse interests of the United States would gain millions of dollars of benefit. It would be talked of from coast to coast. It would attract such an audience as has never assembled in the history of the world to witness a competition between saddle horses. Its effect upon the breeding industry is absolutely beyond calculation. Its indirect benefits would be immediately perceived in the increased demand for the services of stallions. It would mean that more mares would be bred than have ever been bred before in the saddle horse ranks. Such an event would do the one thing for saddle horses that saddle horses have always lacked, and that is, real conspicuous publicity.

Mr. Cohen and Mr. Cauthorn will place the entire saddle horse breeding industry under a debt of eternal obligation if this stake can be made a success, and it can be made a success in just one way, and that is through the co-operation and assistance of the saddle horse people themselves. We have long and frequently advocated the imperative interest that exists for saddle horse people to do something for their own interests. They never have; they do not now, and if they do not take hold of the proposition that is above suggested it will seem to many that it is doubtful if they ever will. This project is so simple and so easy of accomplishment that it ought to be made a success in 24 hours. Every person identified with saddle horse interests in any way should realize that he is bound to participate in the benefits of such an event. So firmly does The Chronicle believe that all of these statements are true that we hereby publicly offer to donate to this stake, in case it is made a go, $100 worth of advertising of same in The Crronicle at our regular card rates and supported by the same sort of service that we give all our regular paid advertisers.

At this time, we understand, approximately two thousand dollars has been subscribed toward the amount required to make this stake a success. We are further advised by Commissioner Cohen that only one Kentucky breeder has donated anything toward this stake whatever. We cannot conceive how it is possible for such apathy to exist. We hope that the true explanation of it is that Kentucky saddle horse breeders are, notoriously, waiting until the very last moment before they take any action upon the matter. It must be arranged forthwith. This is the greatest opportunity that has ever presented itself in saddle horse history for saddle horse people to show their colors and display the faith there is in them and advance their own interests and advantage.

The terms and conditions as suggested by Commissioner Cohen make this a gift of $10,000 in cash to saddle horse people. But that is inconsequential compared with the millions of dollars of benefit that will accrue through the inevitable publicity incident to the staging of such an event, and the incident discussion and newspaper space that will be given it from one end of the country to the other.

Now, saddle horse men, "kick in!"

—[Show Horse Chronicle.

A NEGLECTED PHASE OF ADVERTISING.

Racing associations, says The Horse World, do not avail themselves of the advantages of advertising to increase attendance as greatly as they might do. Conditions which once made it easy to fill grand stands no longer exist. Twenty-five years ago a large number of the residents of the larger cities owned one or more horses having some speed, and, in most cases, fairly well bred. Almost every little town had its local trainer and its local owners of prospective speed horses. Farmers without number raised trotting bred horses. Those conditions were responsible for a general interest in harness racing which disappeared when the automobile took the place of the road horse and made breeding for that purpose unprofitable. Under the old conditions boys were brought up to know horses; they commenced to drive them early in life and the love for speed contests was quickly developed. Nowadays many sons of the men who years ago owned and loved trotters have never driven a horse nor do they possess the most elementary knowledge of racing as a sport. This is not because they have not the inborn love for the horse and the sport racing furnishes, but because conditions are such that this inborn love has not been awakened. It is quite likely true that seven out of ten normal-minded young Americans would become genuine lovers of the harness horse and the sport harness racing is productive of if they were to become once interested. And here is where advertising can be made to help racing associations to fill their grandstands. It is not alone necessary to get good fields of horses to race in order to make a race meeting a success. There must be a sufficient number of spectators to enable the association to make a reasonable profit. In almost any other branch of sport which is conducted by private capital or in any business enterprise which depends for its success on the attendance of the public, advertising plays a more prominent part in securing the attention and the patronage of the public than is the case with harness racing. A few wide-awake race managers have discovered the value of proper advertising as a means of attracting the public to their race meetings, but the majority are still confining such advertising as they do to efforts to get horses to race. But a race meeting without a crowd is like "Hamlet with Hamlet left out."

✚ ✚ ✚

The Golden Gate Thoroughbred Breeders' Association, through its president, Mr. Charles W. Clark, has applied to the Jockey Club of New York for a charter that will cover racing in the west. Mr. Whitney and Mr. Clarence Mackey have assured Mr. Clark that they are in favor of the granting of such a charter, and that they will do all they can to promote the interest of the Golden Gate Thoroughbred Breeders' Association in accomplishing this object.

✚ ✚ ✚

Everyone must hand it to John E. Madden. Not only is he the leading thoroughbred breeder of this country, but he usually sets the pace in other things. He has just announced that he has donated ten per cent of his purse winnings at Belmont Park to the Nassau County Red Cross Society. He intends to give the same percentage of his winnings at Jamaica to the Queens County Red Cross Division and will do the same thing at Saratoga and during the other meetings of the metropolitan racing circuit.—[The New York Evening World.

Harness Horses and Horsemen

SAN FRANCISCO-CALIFORNIA DRIVING CLUB.

Fully five thousand persons were present at the Golden Gate Park Stadium weekly races of the San Francisco-California Driving Club last Sunday. Three races were on the card and all were closely contested; the 2:12 class pace which was finally won by Emma M. being a split heat affair. Rodney Patchen won the 2:15 pace for the trophy given by the Roberts Cafe, and while he won in straight heats Hamburg Belle, driven by J. Dupon of Petaluma, gave him a close fight in each heat and the result was in doubt until the wire was passed. Little Jack took third place, and Victor Pointer fourth.

The 2:12 class pace for the handsome trophy given by the San Francisco-California Driving Club was won by Emma M., owned and driven by William Malough. Emma M. captured the first heat, lost the second to King Pointer and won the next two; King Pointer did not race in his usual good form on this occasion.

Yoncalla, owned by Thos. J. Ryan, won the trophy presented by J. C. Welsh for the free-for-all trotters, and though he won he was given quite an argument by Vallejo King, ably driven by J. C. Welsh, who forced him out in each of the three heats. Petrina, owned and driven by Mr. Gielow, was third, and the San Jose mare Millie May took fourth place.

The bright particular star among the drivers was Frank Burton, who drove the winner in two events and was second in the other. Jack Welsh also drove Vallejo King in a masterly manner and seemed to do better with him than the professional drivers who were behind him in his other races.

Although no new records were established in any of the three races, Emma M. tied her record made recently for the 2:12 pace. Emma M. paced the six furlongs in the first heat in 1:35¾. The summaries follow:

First Race—2:15 class pace; three in five heats:

Rodney Patchen	(J. McNamara)	1	1	1
Hamburg Belle	(J. Dupon)	3	2	3
Little Jack	(G. Conlon)	4	3	2
Victor Pointer	(D. Keating)	2	4	4

Time—1:41, 1:39½, 1:43.

Second Race—2:12 class pace; three in five:

Emma M.	(W. Malough)	1	2	1	1
King Pointer	(H. Campodonico)	2	1	2	2

Time—1:35¾, 1:37½, 1:40½, 1:40½.

Third Roce—Free-for-all trot; three in five:

Yoncalla	(Thos. J. Ryan)	1	1	1
Vallejo King	(Ottinger & Welsh)	2	2	2
Petrina	(W. Gielow)	4	3	3
Millie May	(D. Hanks)	3	4	4

Time—1:40¾, 1:39½, 1:41.

ACTIVITY AT STATE FAIR GROUNDS.

The horses training at the State Fair grounds are just now working very satisfactorily. Also, about this time is when horsemen have the most fun. Soon the money will be hung up, the bell ring, and some will find out how they are bred. The track won't suit some. The blacksmith will shoe others wrong and spoil a stake prospect. Some will step in "that hole in the track"; and a lot will "make a good horse next year."

But a real horseman can have lots of fun just talking horse with other horsemen. Years ago from six to eight usually gathered at my stable Sunday mornings and talked horse for an hour or two. It's years since this has happened. Occasionally one shows; usually none. But last Sunday two of the old-timers called, one in a $3,000 auto, and tried to sell me some mining stock. He hadn't heard of Mabel Trask. Asked if she ever played with Mary Pickford. All the other had was a hold-over, but he knew all about Mabel and I had vastly more fun talking with him than with the first.

Walter Tryon has worked Rastus and Albaloma in 2:15. Mr. Cowell worked John Mack in 2:09½ and Mountain Dee in 2:10½; also a three-year-old Peter the Great pacing filly in 2:22.

L. B. Daniels worked Merrill, a three-year-old pacer by Teddy Bear, in 2:15½. Wm. Ivey worked G. W. Davis' green pacer by Demonio in 2:09¾—1:04—:30. Sweet Bow in 2:11.

Jim Thompson worked Peter McKlyo in 2:20; McKlyo Boy, three-year-old trotter, in 2:22—1:07—:31¾; Natalday in 2:15—30½; Bon Watts in 2:25; Onward McGregor in 2:20—1:07—:30½.

J. E. Montgomery worked Lock Logan in 2:09¼—1:03¼—:31¼.

O. J. Holmes worked Col. Mazuma in 2:25.

OBSERVER.

The matinee racing at the City Park in Denver is coming along all right with large crowds and plenty of sport. Joe Osner has a good prospect in the colt Little Joe, who won a special trot by going the two heats in 2:21 flat. The other performers are scarcely up to form as yet and are not making their time as set by the classes.

TRAINERS AND HORSES AT FRESNO TRACK.

Frank Malcolm has in his stable six head. A gray pacing mare by Guy Borden, which has been a mile in 2:12 and looks like she could go much faster. He is also working Miss Bond. She is going good and has been a number of miles around 2:20.

A green trotter by Sky Pointer Jr.; a mile in 2:15 seems very handy for him.

He has Lindsay Belle 2:10¼ and has been a mile in 2:14 with her. A black stallion by Carlokin he has been working around 2:20.

He has a colt by F. S. Whitney owned by Sutherland & MacKenzie, and he will bear watching.

Claud Clark has two in his stable: Ella Mac 2:11¼, that is working good, and a green trotter by Expressive Mac that is trotting around 2:20 and looks like 2:15 would be easy for him.

Bert Webster is here with Merry Widow 2:03¾ and a son of Blue Peter. They have both been doing miles around 2:12.

W. W. Gallup is working Surety 2:11 and he seems to be a better horse this year than ever.

A. W. Reynolds heads his stable with Breezy Marie. Also a green trotter by Black Hall, and one by Nobage. They are all doing pretty good work.

Jake Brolliar has a bay gelding by Best Policy which looks like the best prospect in California.

B. F. Townsend is working M. L. Woy's horses, Lulu B. by the Bondsman, Miss Macklie, and a two-year-old pacer by Black Hall. They are rounding into fine form. He also has J. C. L., by Best Policy, dam by Zombro, that has been a mile in 2:11 and looked very good at the end of it.

OPEN LETTER TO TROTTING HORSE TRAINERS

Marion, O., June 20, 1917.

To the Public Trainers of America:

The price of feed and labor has indreased the cost of running a public training stable.

Did you ever stop to figure out just what it costs you to train a horse? Here is the way we compute the cost of training a horse per day in mid-winter:

Oats, 12 quarts daily at 90c a bushel	$ .34
Hay, 25 pounds at $20 per ton	.25
Straw, 25 pounds at $15 per ton	.19
Wages of groom (at $50 per month with board) who is caring for 5 horses	.33
Interest (6 per cent) and depreciation (20 per cent) on $1000 worth of equipment, carts, harness, etc.	.07
Stall rent at $1 per month	.03
Office coal, heat, light, taxes, repairs, tires, medicine not charged for, and miscellaneous expenses	.05
	$1.26
Trainer's salary, figured at only $100 per mo. and split among 10 horses	$ .33
10 per cent profit on money spent for feed and caretaker	.13
Charge per day should be	$ 1.72
Monthly charge should be	$51.60

Some trainers winter horses as low as $25 or $30. They are paying owners for the privilege of training. The above figures show that it costs $1.26 per day or $37.80 per month in money actually spent to feed and care for a horse in training. The trainer is entitled to a salary of at least $100 a month. If there are ten horses in his stable, this raises the cost of training to $10 per horse, making the total cost $47.80 per month. Then he is entitled to ten per cent profit on the money spent for feed and caretaking. This means that he should charge $1.72 per day for training a horse in the winter, or $51.60 per month.

The above figures are the minimum. When one caretaker has four instead of five horses, add 9c a day to the above costs; three horses, 24c a day; two horses, 55c a day; one horse, $1.46 a day. With ten per cent profit, these charges are 10c, 26s, 61c and $1.61 respectively.

In other words, when a caretaker has four horses instead of five the monthly charge should be increased from $51.60 to $54.60; three horses, to $59.40; two horses, to $69.90; one horse, to $99.90.

If a trainer considers himself worth $150 a month, he must either increase his stable to fifteen horses or increase his charges $5.00 a month. If he considers himself worth $200 a month, he must either increase his stable to twenty horses or increase his charges $10 a month.

Take out your paper and pencil and figure out your own costs on the basis of the local price of feed and labor, and you will be surprised at the actual cost of training trotters.

We solicit replies to this open letter from our readers. They will be considered confidential if so desired, but we prefer to have permission to print them in future issues of "The Houghton News."

Sincerely yours,

THE HOUGHTON SULKY CO.

P. S.—The owners who may momentarily object to this letter on the ground that they can not afford to pay more for training are asked not to be too hasty in their criticism. An owner whose horses are trained at a loss can not expect the best possible service and is the victim of false economy. He is advised to reduce his stable to a number which he can afford to train at figures which will allow his trainer a profit, or if he has only one horse in trai ing and can not afford to pay his trainer a profitab fee, he should retire until he is financially able pay such a fee. We would be glad to have the opi ions of owners also.

HORSES AND TRAINERS AT STOCKTON TRAC

More than a score of trotters and pacers are bein trained at the Stockton track and these animals wi be started on the racing circuit when they are take to Salinas July 11 to open the season there.

The animals then will be taken over the circui including the State Fair in September.

Seven stables are being trained at the track. En tries for the circuit closed this week and Stockto horses were entered in many of the events.

Following are some of the horses being trained a this track ,and their owners or trainers:

In the Williams' stables the entries for the race are Bird S., trotter, owned by Ed Speikman of Lodi which is a green trotter, showing 2:23 in a trial.

White Sox, another trotter, owned by William and Acker of Lodi, trotted a mile in 2:12¾. Kat Binger, a trotter in this stable, owned by Williams made a trial mile in 2:15. Prince Demonio, pacer owned in Lodi, showed 2:10¼.

W. B. Humphreyville has two entries from hi stable, Lady Steinway, pacer, with trial mile of 2:16 and Lady Bon, a trotter, worked out in 2:27.

Farmer Bunch has five promising ones in his lis of entries, owned by Dr. J. G. Belt of Phoenix, Ariz. who is well known in track racing circles as the owner of Waynetta 2:04¾, and Lillian Van 2:11½ raced in Michigan by Ted Bunch. Dr. Belt's horses will start in the Arizona races and are counted on winning, purses of fully $3000 for the money being hung up for Arizona trotters and pacers.

Kildare, with a trotting record of 2:12½, has been converted to a pacer and has worked out in 2:15¼ owner, Dr. J. G. Belt.

Julius Toley, trotter with a three-year-old mile in 2:25½, is another of the Arizona man's racers.

Caddie Russell, a green trotter, the third one of Dr. Belt's horses handled by Bunch, worked a mile in 2:20 and is considered a good one.

Hand Direct, owned by J. C. Adams of Phoenix, will be raced there. This pacer showed 2:12 in his trial this week.

Bunch has a baby trotter one year old July 1st, entered in all stakes next year, which has shown a 2:40 gait in a quarter-mile trial.

M. Henry, training the R. S. Irvine stable here, has a lot of promising fast ones but his entries in the circuit races are not known. He may enter his fast colts in the State Fair and the Breeders' meeting. A four-year-old pacer by Vernon McKinney is a new one of great promise, showing 2:34¼ since starting work May 10.

The pacer, Baretta Dee, has been turned over to Fred Chadbourne of Pleasanton, who has driven her in 2:11¼ and back in 2:10. Mayme Alwin 2:12 worked in 2:17. Icicle is by the famous Iceman 2:10. Jackson also owns Royal McKinney, sire of Leata J. 2:03.

Charles Fagan has a promising green trotter at the track which may be started in races next fall. This new one has no record, but is showing fine speed in working out.

J. N. Jones, owner of Leata J., with a record of 2:03, has listed that sensational pacer to start at Salinas, on the opening of the circuit races. This game mare has been resting some time and is again in good fix, showing 2:10 in trials. She will go through the circuit and meet all of the free-for-all pacers. Jones has 11 entries.

Stockton Lady, a four-year-old pacer, is another one of the Jones string, which showed 2:12½ this week. Lady Irene, another one, paced in 2:13. Lodi Boy, pacer, showed 2:13½, and Clements Maid, a trotter, has shown 2:14.

Jones has three of Ed Lavin's fast ones entered in the circuit and he looks for sensational performances by Lady Alice T., a pacer which went a mile yesterday in 2:09½. This fast one is bred on lines of Leata J. and is considered a coming wonder. Another one of the Lavin string is Dredger Boy, a trotter, showing 2:15, and Lily of the West, a trotter with a two-year-old trial in 2:21. Mary Osborne is another Lavin trotter with a three-year-old trial in 2:23.

Modesto Maid, a trotter showing 2:15, and Bill Jones, an old campaigner with a 2:17 record, completes the Jones string.

A. T. Jackson, a veteran trainer and owner of the much talked of sire, Royal McKinney, sire of Leata J. and others of great promise, is working a number of young horses which he believes will prove good throughout this year's campaign. The Icicle, in his stable, is his favorite prospect.

Race horsemen are pleased to point to the twenty-four stalls leased by H. B. Thornberry, who brings out wonderfully attractive saddle animals and valuable jacks from Missouri which call many wealthy men and women to the Stockton track. Mr. Thornberry has 24 stalls at the track and more visitors are there than in any other section. He is constantly advertising Stockton as the show place for high-class imported stock, and once here visitors marvel at our well equipped fair grounds that are without an annual fair.—[Stockton Mail.

Thoroughbred Matters

Jockey Willie Knapp has signed a contract to ride for John Sanford.

✤ ✤ ✤

Juarez, Mex., June 26.—Orders have been received here from President Carranza to stop all gambling in this town, according to the Juarez officials. This order became effective yesterday.

✤ ✤ ✤

The Pikes Peak Fair and Racing Association has been incorporated by Colorado sportsmen to establish a race track and plant at Colorado Springs at a cost of $150,000. Spencer Penrose is president of the association; Charles T. Fertig is secretary-treasurer, and W. W. Finn of Denver, general manager. In addition the board of directors is composed of J. H. Hine of Denver; Senator L. A. Puffer, Ralph O. Geddings, Colorado Springs; and E. E. Nichols of Manitou. The association will purchase 100 acres of ground and will begin the construction of buildings and a modern track at once. The meeting is the first of a series that will be in Colorado Springs, Denver, Pueblo and Cheyenne. The races will last for a period of three or more weeks and will be conducted by Mr. Finn, Mr. Hine and associates who are old hands at the business. The Colorado Springs meeting is scheduled for August and a lot of good sport is in sight despite the anti-betting laws and a lot of other foolishness.

✤ ✤ ✤

John Cahill, charged with bookmaking, was arrested at the Jamaica track recently. A number of written betting slips, handed to him by friends, were found in his pocket. He obtained a writ of habeas corpus and on Monday he was dismissed by Supreme Court Justice Manning, who ruled that the possession of betting slips didn't prove the charge of making a book on the races in violation of the Agnew-Hart laws. Cahill's dismissal, it is believed, will put an end to the wholesale arrests at the race tracks in Queens County, N. Y. It looks as if the atmosphere had been partially cleared. Persons who solicit bets are the ones that are likely to find themselves in serious trouble.

✤ ✤ ✤

Henry T. Oxnard's Yearlings Average $839.

New York, June 12.—An imported bay colt by Catmint out of Arlette, daughter of Robert le Diable, brought the top price at the sale of Henry T. Oxnard's Blue Ridge yearlings, held at Durland's last night by the Powers-Hunter Company. This youngster was imported with his dam by Mr. Oxnard last year.

C. H. Theiro, a newcomer to racing, was the purchaser of the star of the sale, and also bought others of the lot of twenty-seven which went under the hammer. Andrew Miller, steward of the Jockey Club, paid the second highest price of the sale when he bought a chestnut filly by King James out off Gatien Belle. The next highest price was paid for a filly by Superman out of Lux Casta, by Mr. Theiro.

The sale of twenty-seven yearlings, thirteen of them being colts and fourteen fillies, brought a total of $22,650, or an average of $839. This was considered a good sale for the lot offered, and breeders from Kentucky and elsewhere expressed themselves as satisfied with the outlook for the future sales of yearlings. What was regarded as the star of the sale, the chestnut filly by Sir Wilfred, out of Proud Duchess, by Watercress, was withdarwn.

This sale was attended by all the leading owners and breeders, H. K. Knapp being one of the most liberal buyers.

✤ ✤ ✤

Next year you will see some great improvement made at the Milldale course, as it is the intention of Mr. Hachmeister to move the paddock and Secretary's office and jockey room about 100 yards further up the stretch, allowing for an addition to the grandstand and about doubling the space for the mutuel machines. The accommodations at Latonia are greater than at any Kentucky track, but even so they have been found insufficient this spring, and with the prompt decision so characteristic of him, Manager Hachmeister immediately set to work to arrange for the necessary enlargement of the plant.

The meeting of the State Racing Commission will in all probability be called for the last Saturday in June at the Latonia Club House, at which time several matters of importance to racing and the breeding industry of Kentucky will be taken up, most important of which is the allotment of fall dates.

Horsemen are making tentative arrangements to present a formal request to the Commission to grant a substantial increase in the number of days for racing this fall, as the expense is considerable in shipping to Maryland for the three or four weeks between the end of the Latonia meeting and the last day in Maryland, as has been the case in previous late years.

There is plenty of room now to support more racing at Latonia, and the sport-loving people of Cincinnati and other Ohio cities would welcome the extension of dates, and from every angle it seems the thing to do, as there are 600,000 people in easy reach of the Latonia course, while not half this number can be drawn upon by Lexington and both Louisville tracks combined.—[Alves, in Thoroughbred Record.

Ward & Ray, Kimberly, Nevada, have purchased of George Wingfield the bay stallion Volplane.

✤ ✤ ✤

James MacManus met with a serious loss at Belmont Park recently when his useful plater, Oratorium,, a bay colt four years old, by Ossary out of Tenebrae, was killed by a fall in his work.

✤ ✤ ✤

The training stable occupied by a portion of the string in charge of Trainer William Shields at Jamaica race track was burned late Monday night, and three yearlings belonging to Henry Waterson were destroyed and a lead pony belonging to Trainer Shields were destroyed, while some other animals which were occupying the stable overnight had a rather narrow escape. The yearlings which were burned were bought at the Oxnard sale about a week before by Mr. Waterson and they made a promising trio as yearlings go. Probably the most valuable was an imported brown colt by Adam Bede out of Autumn by St. Frusquin. This was a good looking as well as a richly bred yearling, and the general impression among the horsemen who attended the sale as Durland's was that Mr. Waterson had made a fortunate purchase when this colt was knocked down to him for $900. The next in value, as indicated by the price, was a thrifty-looking bay colt by King James out of Golden Grain by Hanover, which went to Mr. Waterson at $600, and the last on the list was a neat and attractive chestnut filly by Superman out of Olevia by Ornus, which brought $350.

✤ ✤ ✤

DOUGLAS RACING PARK STATISTICS.

The spring meeting of the Douglas Park Jockey Club, which began May 26 and came to an end June 9th, embraced thirteen racing days, during which time ninety-one races were decided and $97,140 was distributed in stakes and purses. The daily average distribution amounted to $7,472. R. L. Baker was the leading owner with $13,150 to his credit and J. W. Schorr was second with $8,039. The following owners won $1,000 or more each:

Owner.	1st.	2d.	3d.	Amt.
R. L. Baker	2	1	2	$13,150
J. W. Schorr	4	1	3	8,039
E. R. Bradley	4	3	3	5,151
W. H. Baker	4	4	6	3,362

J. L. Paul	1	3	0	1,011

Death of a Noted Thoroughbred.

Hastings, the famous old thoroughbred sire which brought such a full measure of fame to August Belmont's Nursery Stud, is dead. Some time ago the twenty-four year old son of Spendthrift and Cinderella became paralyzed and Mr. Belmont ordered that he be put to death painlessly to end his suffering. His hide has been sent to a tannery, where it will be made into a robe, as was the hide off the celebrated St. Blaise.

Hastings was a brown horse, foaled 1893, by Spendthrift (sire of Kingston, Lamplighter, Lazzarone, Bankrupt, Pickpocket, Stockton, and a host of other good ones), out off Cinderella (dam of Glenheim, Foreigner, Handsome, etc.) by Blue Ruin or Tomahawk.

Hastings won the Surf Stakes at two, the Tobogan and Belmont at three, ran a dead-heat with Clifford for the Kearney Handicap, beat Ornament and Cleophus in a sprint race, ran five furlongs in 0:59¼ with 130 pounds up, won a handicap carrying 140 pounds, and was second to good horses in several important races at four years of age.

Hastings was a great sire, his get showing remarkable constitutions and possessing gameness and ability to race in any sort of going. Since he has been in the stud he has always been among the leading sires in the country, being premier in 1902 and 1908. He was the sire of such good racehorses as Fair Play, Priscillian, Mizzen, Magistrate, Lord of the Vale, Raymond, Masterman, Gunfire, Glorifier, Tiptoe, Diamond, Madman, Rosetint, Okenite, Field Mouse, Hawthorn, Ferrier, Golden View, Masthead, and many other famous ones, and the winnings of his get show a wonderful record, 460 of them winning $1,137,697.

FOALS OF SAN JOSE STOCK FARM.

Mr. Edward Cebrian, owner of the San Jose Stock Farm, reports twenty foals for this season, thirteen fillies and seven colts, all of which were sired by Von Tromp, son of Ben Brush and Cinderella by Hermit (the dam of Peter Pan), a complete list of which is given herewith:

FOALS OF 1917.

Bay filly by Von Tromp—Lotta Creed, by Hammon—My Fair Kentucky.
Bay filly by Von Tromp—Modecia, by imp. Canopus—Moderocia.
Black filly by Von Tromp—Zorita, by Cerito 2nd—Savannah.
Brown filly by Von Tromp—Illusion, by Mesmerist—Marmarica
Bay filly by Von Tromp—Foul Play, by Foul Shot—Theresia.
Black colt by Von Tromp—Dally, by imp, Giganteum—Dal.
Bay filly by Von Tromp—Candlewick, by imp. Candlemas—Intrepid.
Chestnut colt by Von Tromp—Ruth W., by King's Counsel—Letter B.
Brown colt by Von Tromp—Directa, by Vinctor—Santa Zalida.
Brown colt by Von Tromp—Trained Nurse, by Yo El Rey—Santa Rosa.
Bay filly by Von Tromp—Mi Reina, by Santiago—Leola.
Bay colt by Von Tromp—La Sinaloa, by Emperor of Norfolk—Janova.
Chestnut filly by Von Tromp—Saleska, by Salvation—Escarola.
Bay colt by Von Tromp—Gano Belle, by Gano—Anabell.
Bay filly by Von Tromp—Isolation, by George Kessler—imp. Fair Recluse.
Black colt by Von Tromp—Bonsetta, by imp. Masetto—Bon Bon.
Bay filly by Von Tromp—Arcadia Belle, by Emperor of Norfolk—Anabell.
Chestnut filly by Von Tromp—Charm 2nd, by imp. Mariner—Charm.
Brown filly by Von Tromp—Ardiente, by Gano—Sister Anna.
Bay filly by Von Tromp—Palizada, by Gano—Formosa.

New York, June 25.—While Harry Payne Whitney's aged gelding Borrow, carrying 117 pounds, won the Brooklyn Handicap at nine furlongs at Aqueduct, L. I., today, his stable mate, the chestnut mare Regret, winner of the Kentucky Derby of 1915, was the heroine of the race.

From flagfall to within fifty yards of the finish this five-year-old daughter of Broomstick—Jersey Lightning led the field of eleven of the best horses in America, setting such a dizzy pace that the winner's time, 1:49 2-5, sets a new world's record for the distance. The old record of 1:49 3-5 was made over the Laurel, Md., track by Roamer, then a three-year-old, on October 10, 1914.

Borrow and Regret finished first and second, and a very short head separated them at the wire, with Old Rosebud a length away in third place.

A. K. Macomber's heavily handicapped Boots finished fourth, with the others in the order named: Ormesdale, Old Koenig, Chiclet, Omar Khayyam, Hosmer, Clematis II and Stromboli.

✤ ✤ ✤

There is an interesting story attached to Home Brew, a bay American-bred filly by Broomstick out of Jersey Lightning, that created a surprise by winning a Two-Year-Old Selling Plate at the Newmarket second July meeting in 1913 for Mr. Whitney, who then let her go for 340 guineas to Mr. H. J. Newman. After failing many times in the latter gentleman's colors she won the Corporation Selling Handicap at Doncaster the next season, and was afterwards purchased by Mr. D. Norton for 185 guineas, in whose name she ran once and then found her way to India. The excellence shown by Regret and Thunderer, respectively sister and brother to Home Brew, and who were probably the best three-year-old and two-year-old performers in the United States in season 1915, when they were unbeaten, drew attention to the possible prospects of Home Brew as a matron, but for a long time her Indian owner declined all offers to part with her. However, about three months ago the mare broke down, news of which was cabled to England, with the result that the British Bloodstock Agency, acting on behalf of Mr. Arthur B. Hancock, of Paris, Kentucky, secured Home Brew for breeding purposes. She was shipped to England en route for U. S. A. about a fortnight since, but this week a cable was received to the effect that the mare had died at Colombo. This was a particularly bad piece of luck after all the efforts which had been made to obtain her. Had she reached England in time Home Brew was to have been mated with Sir Martin, whose reputation with American breeders is naturally very high. Four yearlings—two colts and two fillies—by Sir Martin, were shipped to the U. S. a fortnight ago. The quartette, which were bred the son of Ogden, were out of Almond Rock by Wolf's Crag, Poet's Dream by Chaucer, mare by St. Pat (by Ascetic), and Sugar by Symington. Calamint, a gray yearling filly by Spearmint out of Haurdina, was also recently shipped to the United States on behalf of Mr. A. B. Hancock.—[Horse and Hound.

SADDLE and SHOW HORSES

C. E. Bunn, Peoria, Ill., has received an order for some Shetland pony mares to go to Santiago, Chile. The express charges on these ponies amounts to about $250 per head.

✤ ✤ ✤

D. Schilling, of Chicago, during the South Shore Country Club Horse Show, sold his magnificently bred stallion, The Sultan, formerly in the Houchin & Anderson stable, to W. C. Waller, of Chicago. Mr. Waller will use him as his personal riding horse and will place him in the stud next season.

✤ ✤ ✤

Col. Ion Beverly Nall, former editor and at one time one of the owners of The Farmer's Home Journal, died June 16 at the home of his daughter, Mrs. Maurice B. Nash, at Johnson City, Tenn., of paralysis. Col. Nall was a prominent figure in Kentucky. He was associated with the Farmer's Home Journal for many years, having become editor of the paper in 1875. For twenty-five years he was one of the owners of the paper. He acted continuously as editor of the Journal until 1899, when he was elected Commissioner of Agriculture, Labor and Statistics, when he resigned to assume his duties in that department. At the expiration of his term he again became editor of the paper and continued in that capacity until a short while ago, when he went South. Col. Nall was for years secretary of the American Saddle Horse Breeders' Association, in which organization he took the greatest interest until his death.

✤ ✤ ✤

A. S. Thompson, of Paducah, Ky., one of the leading horse judges of that country and a well known owner of harness horses, recently has sold his personal using mare, Mary Pickford, a blue roan daughter of that grand little stallion Estill McDonald, by Rex McDonald, to Miss Maude Burbank, of Memphis, Tenn. This is the mare that caused such a rumpus at the 1916 show when D. Schilling, who purchased her from Jas. Houchin, sold her to Jump Cauthorn and was to deliver her in Missouri. Through a misunderstanding she was left in Denver and horsemen who attended the show remember what took place between Mr. Schilling and one well known horseman, with the black boy, Ollie Cross, as a referee. Mr. Thompson took her and sent her East in the car with the Chicago horses. There she lost a beautiful colt by Astral King and finally wound up in Paducah as Gus Thompson's personal using mare, and no man ever had a better one.

✤ ✤ ✤

Friends of that well known horse lover and attorney, Charles E. Wheeler, of Iowa, who read The Spur this month, were surprised to find his announcement for the sale of his very splendid saddle mare, Alice Lorraine, which was selected in Missouri, at the Mexico sale in 1915, and which has proven such a satisfactory animal for this popular owner. Alice Lorraine was bred and made in the "Kingdom of Callaway" in Misouri and is a typical Missouri mare in every respect. She is well educated and perfectly mannered and does every one of her five gaits with precision. Mr. Wheeler is now sixty-five years old and has ridden Alice Lorraine almost every day for two years. "She has kept me primed and raring to go," Mr. Wheeler wrote me some time ago. However, rheumatism in his knees now prevents his further use of her.

✤ ✤ ✤

With the keen interest manifested in the breeding, development and showing of saddle horses in California, it is indeed fortunate that the state fair has a secretary who appreciates the value of horse shows and who also is a lover of this widely popular form of entertainment. Secretary Charles Paine, of Sacramento, is "doing his bit" for the horse show. He not only provides a good program for the public who make the show possible, but a program that is interesting to the owners and exhibitors. When Paine went to the State Fair the horse show was of small dimensions; however, with his support and the splendid affiliation of the Pacific Coast Saddle Horse Breeders' Association and the breeders and exhibitors of California, this is now considered by many devotees of the fair as the paramount entertainment on the attractive program. This year's horse show will be the best yet.

CASCADE IS CHAMPIONSHIP WINNER AT CHICAGO.

The South Shore Country Club's Most Brilliant Show.

[By Herbert J. Krum.]

With the most celebrated stables of harness and saddle horses in the country headlining the competitions, the eighth annual horse show of the South Shore Country Club was brought to a successful termination Saturday evening.

Judging was done by J. Campbell Thompson of Mamaroneck, N. Y.; J. Garner West of Garnesville, N. Y.; Mat. S. Cohen, Commissioner of Agriculture, of Frankfort, Ky., and Samuel Cozzens, of Chicago—all eminent horsemen.

Thomas E. Wilson won the opening event which was for the best colt two years old and under, bred by a member of the club. He also won the class for the best two colts.

John R. Thompson was also successful in one of these classes, winning the division for trotting bred youngsters, the Wilson entries being saddle bred.

Mr. Wilson made rather a field day of it for himself by winning, later in the afternoon, the class for saddle horses, 200 pound division, with his Viceroy of Ballymore, thus repeating his victory of last year.

Thomas H. Cross, a local enthusiast, scored a notable win over the New York and Kansas City and other exhibitors by taking the blue in the 15.2 hands or under class with his recently purchased Kentucky mare, Star Princess.

Mrs. Henry J. Schlessinger, a newcomer at this show, was second, with Margerite Clark, Louise Lovely, owned by Miss Loula Long, third, and Dictator, a many time eastern winner, owned by the New York corporation lawyer, Myron H. Oppenheim, fourth.

John L. Bushnell, the Springfield, O., banker-sportsman, sprung a sensational new horse called Lady Maud in the not exceeding 15.2 hand class. She was most skillfully driven by Miss Pauline F. Cole, of New York, one of the most accomplished reinswomen known to the tan bark game.

Miss Loula Long was second with Realization II., a Canadian bred mare, and John R. Thompson's Lovely Lady secured the white ribbon.

Combination horses furnished one of the best contests of the afternoon and local exhibitors scored over the visitors from other states. John R. Thompson's beautiful bay mare Nancy Walker proudly wore the blue, the Lexington, Ky., dealer—incidentally he sold Nancy to Mr. Thompson last year—"Bob" Moreland taking second with a new mare named Woodson Rose, third being awarded to anothe ex-Kentucky horse, Dink Stover, owned by Girard S. Parsons, Rutland, Vt., and fourth to the handsome bay stallion Garrard Hunt, owned by O. W. Lehmann of the Fair in Chicago.

Shadow Lawn, a beautiful black mare, owned by D. Nym McCullough of Atlanta, Ga., secretary of the Southeastern States Exposition, won the 15.2 and under class. General Pershing, from the local stable of Kattenstrath, second.

Four Entries in Ladies' Pair.

Four entries made up the ladies' pair of harness horses class. Mrs. J. M. Harris of Chicago won with Pick of the Basket and Odora, owned by O. J. Mooers of Columbia, Mo. Miss Pauline Cole, driving Mr. Bushnell's new pair, Lady Maud and Maxin, was second, and Lord Rose and Sir Rose, owned by Val Crane of St. Charles and driven by Miss Long, third.

Judge West reversed some of the earlier decisions of the day by placing Mr. Oppenheim's Noble Denmark first in the over 15.2 hands class. Mr. Thompson's Nancy Walker, ridden this time by his daughter, Miss Ruth, taking second, and Cross' Liberty Bell, ridden by Mrs. Elbert, third. Although there were ten entries, Mr. West would not award a fourth tie.

Jack Tar, the roan runabout horse owned by Mr. Thompson, disposed of the runabout class in short order, Mr. Bushnell getting second with Gypsy Maid.

My Major Dare Defeated.

Cascade, owned and ridden by Robert E. Moreland, well known dealer of Lexington, Ky., won the $500 stake for five gaited saddle horses at the South Shore Country club after a contest that electrified the large crowd and brought the spectators to their feet before the ribbons were finally tied.

An even dozen of the finest saddle horses living made up the field that fought for the richest prize ever offered by this famous club. The class was judged by Mat. S. Cohen, Commissioner of Agriculture of Kentucky, and for many years the leading saddle horse exhibitor in the country. Cascade was the Kentucky champion in 1915, but was not seen in public last year.

Second prize went to My Major Dare, the famous stallion owned by Miss Loula Long of Kansas City, which was the grand champion stallion of the Panama-Pacific exposition, since which time he was never defeated until at this show. He was ridden by John T. Hook, who gave him a splendid ride and made a determined effort to land the blue.

Johnny Jones, another famous winner, was third. He was ridden by Ed D. Moore of Columbia, Mo., who has had him in charge since his recent purchase by the well known New York lawyer, Myron H. Oppenheim. This gelding won the $2,500 stake at the Missouri state fair last October.

Fourth prize went to a magnificent bay stallion, Crimson Chief, owned by G. S. Parsons of Rutland, Vt., and never shown before in this class, but one of the handsomest and best going ones seen in several years. He was ridden by Quinn Davis.

Another Place For Miss Long.

Another of Miss Long's entries, a chestnut mare named Martha Lamar, was fifth, this class being divided into eight prizes. Sixth went to another novice mare called Nicollette, owned by McCrary Brothers of Kentucky; seventh to Peter Pan, a recent purchase of Thomas H. Cross of Chicago, and eighth to Garrard Hunt, owned by O. W. Lehmann of Chicago.

The class was of special significance, because it is likely to forecast the results in other big stakes this fall. The famous gray gelding Jack Barrymore was not shown, although he had been nominated and was on the grounds. Every class of both afternoon and evening sessions was well filled, and the show has proved to be one of the best ever held in the west.

Miss Morton Rides Victor.

Miss Helen Morton won the opening event of the second day, riding Gypsy Maid from the stable of John L. Bushnell of Springfield, O. This mare has heretofore always been shown in heavy harness classes. William Daniel, the stockyards live stock dealer, won second, and E. A. Faulkenburg's entry was fourth. Miss Loretta Hines was given the white ribbon for Lexington.

On the evening program Mr. John R. Thompson won the class for docked saddle horses with his handsome bay mare Nancy Walker, a winner on the first day. Holger Ramussen rode this entry and made the best show with her she has made this year.

Chestnut Pair Winners.

Lawrence H. Armour was the contender in the pair of saddle horses class, the conditions requiring one horse to be ridden by a lady and the other by a gentleman. Mrs. George Elbert and Robert McCray handled Mr. Armour's pair, which were placed second to Mrs. Schlessinger's chestnuts, ridden by Mr. and Mrs. Holger Ramussen.

A FINE PRESCRIPTION.

Rufus Jackson, who, as every saddle horse lover in the Middle West well knows, put Missouri on the map as a saddle horse state, but whose services with the Government now prevent his active co-operation with the cause he loves so well, sends us the following prescription for "pale people" from the Hannibal Journal:

Miss Mary Hendrix of New London, a few days ago, called on Dr. Howell for treatment. She was just a little pale and her throat bothered her. The doctor examined her throat and found it in excellent condition. Her eyes were fine and her hearing perfect.

"You do not need a doctor," the specialist smilingly informed her.

"But the paleness, what about that?" she inquired.

"Sleep outdoors and fresh air will do the rest," replied the physician.

The young lady was, of course, rejoiced at the diagnosis. She thanked the doctor and just as she was emerging from the door of his office he halted her and remarked, "Perhaps I had better give you a prescription."

He handed it to her and she departed for her home. The next morning she took the prescription to her father's drug store. He scrutinized it and handed it back to her with the remark: "Daughter, you are in the wrong place—you want to go to a livery stable!" The prescription read:

1 horse,
1 saddle,
1 bridle.

Subsequently Dr. Howell received a brief note from her father, Dr. Hendrix, thanking him for "advice" and enclosing a check.

The following is from the Stockton Mail:

"'January,' the favorite riding horse of Dr. Fred P. Clark of the state hospital knows, in its equine way, that Sherman was right in his definition of war.

"Dr. Clark, in anticipation of the drafting of doctors for army service, is getting into condition.

"The horse suffers, as Dr. Clark, if he goes to war, is going to ride a horse and look as near like Napoleon as possible. Therefore Dr. Clark gets up before daylight these mornings and takes a ride through the city.

"During the time Dr. Clark takes his preparedness rides the light is such that moving picture cameras are unable to record any portion of the ride.

"But it is an inspiring sight to see Dr. Clark riding his prancing palfrey through the city. Those who arise early enough will be rewarded by a glimpse of the hospital superintendent as he ambles by on 'January,' so-called because it never gets warm."

The writer of the above is not a horseman. That's very evident. Any horseman would know that an animal like "January" would enjoy this morning canter as much as his rider. Dr. Clark is using a good preescription, too, and should he give some of his patients a little of "his own medicine" he would get results impossible to obtain through the administration of "pink pills."

While the chief value of exhibitions is educational, the live stock exhibits at county fairs are often so poorly classified that frequently the educational value is largely lost.

Notes and News

Quite a number of Missouri racing associations have decided to make their meetings in favor of the Red Cross. The poloists, also, are to play off their 1917 tournaments for Red Cross benefits.

✤ ✤ ✤

A. T. Jackson is at the Stockton track; he worked The Icicle a mile in 2:18, half in 1:08, last quarter in 33 seconds. The horse has been ailing with a bad cold but is now rounding into shape.

✤ ✤ ✤

Harry McFadyen, president of the Solano County Fair, reports that he received a total of 79 entries for the eight races to take place at the Dixon meeting, entries to which closed on June 25th.

✤ ✤ ✤

The house built for the late Geo. C. Boldt, at Montecito, Cal., and only recently completed, has been leased by C. K. G. Billings for the 1917-18 winter. Mr. Billings and his famed Uhlan "wintered" in California last year.

✤ ✤ ✤

C. A. Durfee, who is training at Pleasanton, visited San Francisco the early part of the week. Mr. Durfee was "laying off" on account of a bad cold and it is the first time he has been off the job since going to Pleasanton last May.

✤ ✤ ✤

Some time back it was reported that the English Government had rescinded its prohibition of racing. Also that the regular Newmarket program of meetings for the year would be carried out. This report was untrue. There was no annulment of the prohibition and racing in England is dead.

✤ ✤ ✤

Every owner should insure his horse before starting them out on the circuit. For the first time in the history of the game Western horsemen are offered an absolutely safe policy at a reasonable rate. Write Jump Cauthorn, 366 Pacific Bldg., for full information.

✤ ✤ ✤

C. W. J. Landergen of Ferndale is working three horses at the Ferndale track; Little Shamrock 2:17 by Bonnie Steinway and Lady Steinmore, a green trotter. He also has a three-year-old colt by Young Monterey, the sire of A. B. C., which Mr. Landergen considers the fastest colt, for the amount of work he has had, that he ever heard of. He has been broke but sixty days and the first mile he went the right way of the track was in 2:54 and back in 2:41, with the last eighth in 17 seconds.

✤ ✤ ✤

ENTRIES FOR SAN FRANCISCO-CALIFORNIA CLUB RACES.

First Race—2:18 Pace.

Geo. Conlan's Little Jack.
D. Keating's Victor Pointer.
J. McNamara's Rodney Patchen.
H. Campodonico's King Pointer.
Frank Burton's George W.

Second Race—Free-for-All Trot.

D. D. Hank's Millie May.
L. A. Gielow's Petrina.
Ottinger & Welsh's Vallejo King.
Thos. J. Ryan's Yoncalla.

Third Race—Free-for-All Pace.

G. J. Giannini's Bold Harry Aerolite.
R. P. Roberts' Bradmont.
Wm. Malough's Emma M.

LEXINGTON NEWS.

Trotters are beginning to step along at the Lexington track. The past week the three-year-old trotting colt, Leonard (2) 2:11½ trotted in 2:12½ for Henry Williams, with the half in 1:05, each quarter in 32½ seconds. Leonard was generally considered better than a 2:10 two-year-old last year. He is a full brother to Dr. Elmore (1) 2:24¾, that brought $4,200 last fall as a yearling.

Recent arrivals at the Forkland Farm of R. S. Strader include brothers to Peter Pearl (4) 2:09¾, Peter Hopeful and Baden 2:05¼. The last named is the more noted trotter of the trio, having won over $35,000 in a single season, which was the largest amount of money ever credited to a trotter in a single season, and which has only been beaten by Peter Scott 2:05. These foals are all the property of Stoughton A. Fletcher, of Indianapolis, the owner of Peter the Great.

One of the handsomest horses in training at the Kentucky Trotting Horse Breeders' Association track is the black mare, Prestolite 2:07¼, pacing, in the stable of Trainer Henry Horine. The mare is the property of Chas. P. Cecil, Jr., of Danville. Her breeding is very interesting, though it is of the kind that one would hardly expect to produce a 2:05 pacer, which is what they claim for the beautiful black mare this year. She is by Don Varrick, a son of Onward Silver 2:05¼, one of the fastest and best trotters of his day and a good sire of trotters both in this country and in Europe. Her peculiar breeding comes in on the dam's side, which is a daughter of the saddle stallion, Dignity Dare, by Chester Dare 10.—[Jesse Shuff.

Pater Valpa, a three-year-old son of Peter the Great, and one of the most magnificent specimens of the breed, at the recent Devon Horse Show defeated E. T. Stotesbury's very good Ebony King. Peter Valpa is the property of John P. Crozer, of Philadelphia, owner of a number of famous Kentucky and Missouri bred saddle horses.

✤ ✤ ✤

A week ago last Tuesday Mr. William McCrory Neal, who edited the Breeder and Sportsman for several years, and who is well known in the journalistic field, having formerly been on the editorial staff of the Western Horseman, was married to Miss Elizabeth Frances O'Brien at Newark, N. J. Congratulations are in order, and the many friends he made while in California will be pleased to hear of this happy event and join in wishing him all kinds of good luck. Mr. Neal is now sales and advertising manager of the Rubberset Company, one of the biggest manufacturing concerns in New Jersey.

✤ ✤ ✤

Better Quarters for Trainers Necessary.

C. A. Harrison, who is beyond doubt the greatest booster and worker for the Standard-bred horse in the Pacific Northwest, has disposed of his interest at Eugene, Oregon, and has returned to his home in Seattle. His first efforts after being relieved of his business obligations were, as usual, for the harness horse. Mr. Harrison hits the nail very squarely on the head and soundly, in suggesting that those fair associations who expect to keep good trainers interested in their track the year-round; or even during the summer training period, should provide for their comfort in a better way. There are, of course, many trainers who are content to spend the remainder of their days in "bunk stalls"; however, those who have families cannot afford to do this. At the same time if they are the right kind of trainers and look after the best interest of the men who place horses in their charge, they want to be near their charges.

Only those who own horses of this type realize the necessity of some one really dependable being near every minute of the time. There are a thousand and one things which can happen around a fair ground stable at any time which will prove of disastrous consequences to the horses. The fire hazard, always uppermost in the mind of trainer or owner, is only one of many evils. A horse is likely to become "fast," to push his foot through a crack, to take cold or have a spell of colic, any of which are not thought much of if the SOME ONE you can trust is near; but which, if not found for an hour or so, or perhaps until morning, will mean the loss of the animal entirely and at the best spoil it for future usefulness.

Mr. Harrison's suggestion that the associations in building their tracks and stables provide a small restaurant or portable houses for trainers, is sound and very sane, and just what is expected from a man of his type. It has been demonstrated time and again that a fair of any kind can not be successful without racing; also, that the most successful fairs in the country are the associations which invite leading horsemen to make their track "headquarters."

It is very naturally expected that these associations want the better class of trainers and they can spend thousands of dollars in providing high class grounds; yet, a little expenditure in this direction would attract a type of trainers as nothing else has.

The Breeder and Sportsman would like to see some association try this. We know what the result would be. Every trainer of good repute, who is compelled, through his occupation, to live with his horses, would patronize that track. Many Eastern and Southern associations have provided these necessities and found it paid, and it is the one thing needed in the West if racing is to be maintained on the high plane all true horse lovers hope for. To establish "dumps" or "shacks" would be only inviting more "bums"; but by providing a small, neat and inexpensive cottage for a trainer would attract the best trainers in the land and put the track head and shoulders above the kind which invites loafers and bums.

In the following letter Mr. Harrison has a few things to say which will prove of interest to harness horsemen:

"Seattle, June 25.

"When I left Eugene I fully intended stopping off on the way home and trying to buy a good green one I heard about, a Hal B. (you know I like them). When I got to the town, however, I held on to my seat, for feed is high and war is all Sherman said it is. I stopped off at Centralia, Wash., where John B. Stetson has located, and found Stetson getting along fine. The track is fine and Walker is a live-wire secretary. You can look for a good fair here this year.

"I saw May Day Hal and boy, listen: She is as fast and pleasant a mare as one gets to see in years of travel. Dolly McKinney is a nice trotter. She is a big mare but as light on her feet as a cat. Duke Hal is proving quite a pacer and Mr. Stetson is well pleased with the progress all are making. Miles McGrail, chief of police of Centralia and a good scout, has a beautiful five-year-old Hal B. mare.

"Charles Cook is training at Chehalis, Wash., and has a nice bunch of horses. Indian Hal was not sold as reported and is one of the Chehalis stars..

"Roland Wilson left Seattle for Chehalis this week with Florodora Z. 2:11½, and she is in fine form.

"A. R. Miller left Vancouver, B. C., last week for Calgary, Can., with a car of Standard-bred horses to sell. Mr. Miller is a former owner of Bon Voyage, Bonaday and others of note."

SEDALIA TRACK NEWS.

The past week has been a great one for the horsemen at the Missouri State Fair tracks and stables. Ideal weather conditions, a track that is in mid-racing season shape, and every condition favoring the horsemen has made the last few days ideal.

We are not through talking about Frank Ervin's Big Boy as yet. It was our pleasure last Thursday to see this phenomenal pacer go a slow mile in 2:20 and step the last half in 1:05½. He has so much speed and performs so well on the track that it is impossible to say how much speed this fellow has. He does not wear boots and goes willingly and with vigor, taking the long stretches eagerly. Black Diamond, another three-year-old of Ervin's, entered in the Missouri Futurity as a trotter, stepped 2:21 the other day, the last half in 1:05 and the last quarter in 30½ seconds. May Lou, Ervin's green trotter, also entered in the Missouri Futurity, stepped a mile last Friday in 2:18 and the last half in 1:07½. Ruby Zoloc, another Ervin entry in the futurity, paced several miles last week in the vicinity of 2:19 and is showing up fine. She is a good one and has lots of stepping ability.

William Morgan is going fine with Gratteliene and this fine mare is going to go on the racing circuit in a few weeks, in her old-time form and winning condition.

W. H. Boyd is bringing Ky Mo, Batton and Stocktonian, the Fausett stable, out in fine shape and these three fine young stallions are going to show up well as the result of changes introduced into their training by Mr. Boyd.

A. L. Derby of Independence, Kansas, is bringing his string of horses here for tutelage under Tom Grant, the veteran trainer. Mr. Derby visited the state fair tracks last Sunday and was so pleased with the local situation and the company his horses would have here, that he decided to have Grant bring his horses here from Wichita. Mr. Derby has Drift Patch 2:08¼, The Object, a three-year-old by Exponent, who has trotted at two years old in 2:29½, and Eureka Thorn, with a mark of 2:18.

The state fair track will welcome this week a fine string of horses from Vermont state, and a number of show horses are coming here for training.

The entries in the futurity for the Missouri State Fair are: Hovilla Burton, Hackley and Martin, Higginsville, Mo.; Queenlock, B. F. Funk, Liberal, Kan.; Black Diamond, Ervin and Gorroll, Sedalia and Marshall, Mo.; Ruby Zoloc, Frank Ervin, Sedalia, Mo.; Maud A., C. W. Gorrell, Marshall, Mo.; Peter Hardin, and Adrian A., P. Hancock, Mt. Leonard, Mo.; Peter Boy, G. P. Warren, Lexington, Mo.; Earl's Law-Son, D. Clark Thomas, Knox City, Mo.; Noble Aubrey, Al Thomas, Benson, Neb.; Major Neill, Wilson Bros., Lexington, Mo.

B. C. BIGGERSTAFF.

LEADING HORSEMEN USE RUBBERSET BOOTS.

The best advertisement in any line of human endeavor is the satisfied customer. When the customers become boosters, that is more than ever a recommendation. Perhaps in no other business producing supplies for the harness horse fraternity is there a product which has the universal and unlimited approval of the leaders in that profession, as the Bell Quarter Boots, made by The Rubberset Co., of Newark, N. J.

The Rubberset Perfected Bell Quarter Boots are made in a factory which for more than fifty years has specialized upon the production of rubber and rubber-covered articles and are made under the direct supervision of PRACTICAL horsemen. That, perhaps, is the reason they "fit so well, protect the horses just where they need protection," as "Pop" Geers says; as well as to wear and give the service they do. And perhaps that is why they brought such a recommendation from California's leading driver, W. G. Durfee, who declares: "I like Rubberset Quarter Boots. Any practical horseman is bound to be pleased with them, and they suit me so well that I am using them to the exclusion of all other rubber boots. That is a great idea to have three different kinds of rubber, so far as the stretch is concerned."

Murphy, Cox, McDonald, Durfee, Geers, McMahon, Jamison, Ray and Pitman express their valued opinion of Rubberset Quarter Boots on another page of this issue. These, with hundreds of testimonials from owners, trainers and exhibitors who have used Rubberset Boots and who are now using this successful make exclusively, making the argument in their favor conclusive.

They have been in use for many years and time as well as the voluntary testimonials of AMERICA'S MOST SUCCESSFUL horsemen attest their value. Trainers and owners realize how important it is to have a dependable quarter boot. One can no longer afford to take a chance with the untried kind. It is at this season, before the circuit opens, that horsemen should supply themselves with this very valuable adjunct of a trainer's equipment. The best yet remains to be said. Their quality, reputation and almost universal demand has not raised their price. They sell for $3.95 for either style, any size.

Will M. Neal, formerly editor of the Breeder and Sportsman, and one of the best known horsemen in the country, is sales manager for THE RUBBERSET COMPANY, and any information desired by owners or trainers who are interested will be given his personal attention. If you write direct, give the name of your dealer and mention the Breeder and Sportsman.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July2. 3—Vancouver, B. C., Can. Vancouver Gun Club, Chas. Bowers, Secretary. "Old Policy."

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Palouse Shoot.—In the second day's event of the annual registered tournament of the Idawa Gun Club, G. B. Joslyn of Palouse was high gun, breaking 147 out of 150, on June 19th. He led F. M. Troeh, amateur champoin in 1915, who shattered 142 in this shoot. Hugh McElroy of Spokane and Jim Hickman of Colfax were tied for second with 146 out of a possible 150. Pete Holohan of Portland was high professional with 146 out of 150.

A strong wind during part of the afternoon interfered to some extent with the shooting. The attendance was the largest of the shoot.

H. Poston, professional of San Francisco, was high gun for the entire shoot, breaking 295 targets out of a possible 300. Joslyn of Palouse was high amateur, with 292.

Scores, 150 birds, registered targets:—

*L. Reid, Seattle, 145; *W. E. Poston, San Francisco, 145; *Gus Peret, Spokane, 143; *F. Riehl, Tacoma, 142; *E. A. Valleen, Spokane, 143; P. J. Holohan, Spokane, 146; G. B. Joslyn, Palouse, 147; F. M. Troeh, Vancouver, 142; H. Everding, Portland, 130; H. J. Geesey, Spokane, 141; A. W. Woodworth, Spokane, 141; Mrs. C. A. O'Connor, Spokane, 124; H. W. McElroy, Spokane, 146; *F. Dryden, Spokane, 140; R. A. Miles, Spokane, 112; G. E. Beckman, Lewiston, 136; C. Hahn, Lewiston, 139; F. Burler, Lewiston, 125; J. Wann, Lewiston, 133; A. R. Johnson, Lewiston, 135; O. E. Lynch, Palouse, 130; N. M. Ragan, Palouse, 132; D. M. Dudley, Palouse, 131; E. J. Chingren, Spokane, 141; M. D. Campbell, Condon, Ore., 103; O. Slaught, Palouse, 121; R. Cowan, Potlatch, 126; Schriver, Spokane, 127; D. B. Harrison, Palouse, 129; L. Seymour, Palouse, 114; J. Hickman, Colfax, 116; M. O. Lynch, Palouse, 119; Mrs. Gus Peret, Spokane, 122; R. W. Phipps, Colfax, 143; D. Anderson, Colfax, 137. (*Professionals.)

In event No. 11, for the bankers' trophy, 25 targets on handicap, four tied for first place—Geesey, Chingren, Dudley and Schriver each breaking 25 straight. On the shoot-o: Chingren won, 24 out of 25. In the Idawa Gun Club trophy event Chingren and Troeh tied with 25 straight, and Troeh won the shoot-off with 25 straight. Event ..o. 13, a three-man team shoot, was won by Spokane; McElroy, Schriver and Geesey shooting, getting 73 out of a possible 75. Palouse took second place with Hickman, Joslyn and sPhipp8 shooting.

The six high averages for 300 birds in two days' shoot: G. B Joslyn 292, H. McElroy 291, F. M. Troeh 285, C. E. Beckman 285, Charles Hahn 285, E. J. Chingren 284.

High runs for the day's shoot were as follows: L. H. Reid, Seattle, 66; H. E. Poston, San Francisco, 137 and 79; F. A. Dryden, Spokane, 93; E. J. Chingren, 72; F. C. Riehl, Tacoma, 71.

Multnomah Anglers' Club.—The Multnomah Anglers' Club held its first fly and bait-casting tournament Sunday, June 17th, at the Oaks, where good scores were turned in. The results:

Half-ounce accuracy—W. F. Backus, 33 demerits; C. J. Spooner, 59, J. C. Morris 63.

Half-ounce accuracy (novice)—John Brown, 65 demerits; William Kaiser 86, O. H. Reed 101.

Half-ounce distance—W. C. Block, average, 126 feet; W. F. Backus 105 feet, C. J. Spooner 103 3-5.

Light tackle accuracy fly casting—W. F. Backus, 5 demerits; W. C. Black 7, J. C. Morris 27.

Light tackle distance fly casting (novice)—O. H. Reed, 80 feet, John Brown, 75 feet.

Light tackle fly casting, distance—W. F. Backus, 10 2feet; W. C. Block, 87 feet.

Average of Shooters.—Herewith is the complete list of "Sporting Life's" averages of registered tournament contestants who have shot at 1000 or more targets up to Registered Tournament No. 97:—

HUNTING AND THE WAR.

A member of the Legislature has offered in Pennsylvania a bill "prohibiting all game hunting for a period of two years or during the longer duration of war." He has based this "necessity" upon the presumption that "there is an immediate need for large quantities of the munitions of war, and the use of cartridges for hunting tends to decrease the ready supply of ammunition available for the use of the armed forces of the United States and her foreign allies."

"Patriotism" is our middle name, and we would no more think of intentionally weakening our country's resources than putting Paris Green in our coffee to find how it tasted. And if this legislator was familiar with conditions he would know that there is no similtarity in the equipment employed for hunting and military purposes. Then, had he looked into the matter, he would have realized that there are already on hand enough field shells and ball cartridges for the use of all the hunters of the United States for some time to come, even if their manufacture were to stop today. That which is already made cannot, by any means, be diverted to war purposes, any more than the trapshooting material can. So why worry about the possible evil effect of hunting upon the conduct of war?

As a matter of fact, from the recreative and food supply standpoints, hunting is likely to prove a distinct boon to the country.

There is still a more obvious angle. The encouraging of interest in the proper use and handling of firearms is one of the greatest stimulants toward real preparedness. To be able to shoot is an accomplishment, and a nation full of men who know how to massage the trigger of a shootin' iron is a big asset on the right side of the ledger when Mars takes his trial balance.

This year finds more shooters than ever before, and contrary to the logic of the above the war has given a new impetus to the shooting game. New clubs are being formed to teach men how to shoot and national movement is on foot to promote one of the greatest mainstays for the perpetuation of Liberty and Freedom.—[Sportsman's Review.

A Folder For Sportsmen.—The Northwestern Pacific Railroad has added another to its issues of attractive advertising literature in the form of a 15-page illustrated folder devoted exclusively to hunting and fishing in Marin, Sonoma, Mendocino, Lake, Humboldt and Trinity counties. The half-tone cuts depict scenes along river, lake, mountain and marsh, with fish and game in alluring evidence. It also contains an admirable map of the line, which shows in detail streams and roads adjacent, and contains a list of resorts and lodges that cater to the huntsman and angler. The thoroughness with which the varieties of fishing, the seasons and locations, are set fofrth makes it a valuable asset to the sportsman.

Seattle Red Cross Shoot.—A Red Cross event will be featured in the league tournament under the auspices of the Seattle Trapshooters' Association on Sunday, July 8th, this date being transferred from the Chehalis Gun Club, which could not handle it. The entire proceeds of the Red Cross event will go to the "Trapshooters of America Ambulance Fund," which is being created for buying and equipping an ambulance unit to be sent to France as the gift of the trapshooters of the country.

Another feature of the league shoot on that date will be one of the "A. A. T. A. Fifty" events. All sportsmen are invited.

SPORTSMEN WILL UNITE FOR LAWS.

Bill Pending in Congress to Give Effect to Treaty For Protection of Migratory Birds.

Washington, D. C.—It has always been set forth that sportsmen if united could secure any desired legislation within reasonable limitations, and in the matter of the pending bill in Congress to give effect to the recently made treaty with Great Britain for the joint protection of migratory birds in the United States and Canada, the American Field made the suggestion that representative sportsmen from all sections of the country and from State Game Commissions should be appointed upon the advisory board for the formulating of the rules and regulations of this most important feature of game conservation. This suggestion was taken up by Hon. M. L. Alexander, president of the National Association of Game Commissioners and Wardens, and he immediately called together the Executive Committee and, at a meeting held in Washington, D. C., on June 12, the following resolution was unanimously adopted:

"At a meeting of the Executive Committee of the National Association of Game and Fish Commissioners held at Washington, D. C., on the 13th day of June, 1917, present, M. L. Alexander, Carlos Avery, John P. Woods, J. Quincy Ward, Geo. M. Graham and W. E. Barber, the following resolution was unanimously adopted:

"Whereas, There is pending in Congress a bill (S. 1553—H. 2612) to give effect to the migratory bird treaty between the United States and Great Britain for the protection of migratory game and insectivorous birds in the United States and Canada; and

"Whereas, The conservation and protection of the migratory insectivorous birds is so closely related to the conservation of the food, cotton and timber crops of the country, and the migratory game birds constitute an important source of the food supply, the conservation of which is so necessary to the success of the United States and her Allies in the war upon which we are now engaged; therefore be it

"Resolved, It is the sense of the Executive Committee of the National Association of Game and Fish Commissioners that the said bill is and should be considered an important war measure, and we respectfully recommend the immediate passage of said bill by Congress as one of the most effective means of conserving the resources so necessary for the welfare of the country;

"Resolved further, That a copy of these resolutions be forwarded to the President of the United States, to each member in Congress, and to the Secretary of Agriculture."

While the present special session of Congress was called for the special purpose of enacting war measures, it has been suggested by leaders in that body that if the sportsmen united in asking for immediate action on the bills to put in force this treaty it would probably be acted upon before adjournment.

John B. Burnham, president of the American Game Protective Association, Dr. T. Gilbert Parson, secretary of the National Association of Audubon Societies, E. W. Nelson, Chief, Bureau of Biological Survey, and Chas. E. Brewster, the well-known importer of live game birds, met with the committee by special invitation, and discussed with them the many phases of the problems presented. All agreed that Senate Bill 1553 should be enacted into law with the least possible delay and to that end pledged their united efforts.

Chief Nelson stated he had received the approval of the Honorable Secretary of Agriculture to the proposition of the Game Commissioners to add six members to the Advisory Committee having in charge the framing of the regulations relating to the government of migratory birds, and President Alexander will submit a list of names of state officials from which to choose in the near future.

Taken all together this is perhaps the most important as well as resultful meeting ever held by sportsmen in the United States—"United We Stand; Divided We Fall."

WORLD'S RECORD AT OUR STATE SHOOT.

Fred H. Teeple Points Out Remarkable Shooting That Took Place at Los Angeles.

Now that the smoke has rolled away and we have recovered from the excitement of our state shoot, perhaps it is meet that we discourse a little on the event that proved a world-beater. Not in attendance or targets thrown did we set the world's record. Then how, pray? Ah, listen: On May 20, 21, 22 and 23, three hundred and fifty-two entries shot at 42,100 16-yard targets and broke 47,672, equaling .9153 per cent, a world's record; and this includes every man's and woman's score that contested on the above dates.

When reading this one quite naturally will say to himself: Humph! easy targets, sunshine, good light, no wind, etc. Nay, nay, not so. Sunday, May 20, was the only day the sun shone. Monday, Tuesday and Wednesday it was dark and threatened rain; a little of the latter, accompanied by gusts of wind and at times a stiff breeze, were the conditions. Certainly not conducive to world's record scores. The targets were thrown full 48 to 50 yards and 9½ feet high at 10 yards from the traps. In the afternoons, when the wind blew over the backs of the shooters, many targets were carried 55 yards, away over the 10-foot high net that was stretched clear across the premises 46 yards in front of the battery of Leggett traps to catch the targets that escaped from the deadly charges of shot. Explain, please, your version of the massacre! Right, I will do my best:

The $1,090 that was pledged the shooters was distributed as average money and brought together under our giant gum trees the best bunch of gun-pointers on the Pacific Coast. Yea, even a few from the far North, East and South. The equipment of the grounds was of the best. Four traps facing north were tuned to the minute; every one threw the same height, distance and width of angles, excepting at the times when the gusts of wind prevailed. The office force and the management had the full confidence of the shooters; no vexatious delays occurred; the entire bunch had the pep and dash and were kept moving when once started.

Now for the figures, which only include the 16-yard targets:

May 20—89 shooters shot at 8,600 targets and broke 7,709, .8593 per cent; 88 shot through the program; 63 shot 90 per cent or better.

May 21—84 shooters shot at 16,800 targets and broke 15,376, .9152 per cent. Every man shot through the program; 58 shot 90 per cent or better.

May 22—90 shooters shot at 17,800 targets and broke 16,331, .9118 per cent; 89 shot through the program; 68 broke 90 per cent or better.

May 23—89 shooters shot at 8,900 targets and broke 8,256, .9277 per cent. Every man shot through the program; 65 shot 90 per cent or better.

May 20, 21, 22, 23—352 entries shot at 52,100 targets, broke 47,672, .9153 per cent. Attendance, May 20, 96; May 21, 89; May 22, 90; May 23, 99—93½ average; 79,000 targets thrown.

Over 125 long runs from 50 to 272 were recorded. Frank Troeh ran 242, Henry Pfirrmann 272.

On May 22 Pfirrmann set a Pacific Coast record by breaking the full program of 200 targets; Frank broke 199x200.

On May 20 Les Reid broke entire program of 100 straight.

On May 23 Frank H. Mellus, shooting in a late squad, when the light and conditions were at their worst, won the California-Nevada State Championship by breaking 99x100.

The seven state trophies were up for competition on May 22, the day that Pfirrmann was sawing wood. Little Henry won five out of the seven events, and the next morning shot off for the other two. Julius Weisser won the sixth and W. H. Whitcomb, former Chicago trapshooter, annexed the seventh, and in doing so he made a run of 119 straight.

In the State Championship event, Frank Troeh tied Mellus with his score of 99x100, but being a non-resident of the state only shared the glory and the purse with our Frank. C. H. Nash, H. Lorenson and O. A. Evans were the runners-up in this event with 98 each.

Frank Troeh won high amateur average by breaking 492x500; Pfirrmann was second with 488x500; Nash and Lorenson tied for third with 487. Truly remarkable shooting. Hugh Poston was high professional with 489x500.

In the handicap shoots, Frank Troeh and L. R. Mellus starred on May 20 by breaking 99x100 from 22 yards, and 96x100 from 18 yards.

On May 23 R. H. Bungay and Dr. R. N. Fuller tied for high with 95x100 from 20 yards. Bungay won first place by breaking 24x25 to 23x25 in the shoot-off.

And now, after mentioning all of the wonderful shooting that these wonderful gun-pointers accomplished, I have to unfold what I think is the most wonderful and startling shooting of the entire tournament, namely, the running of 85 straight by Wm. Kennedy, who up to six months ago had never shot at a target, and R. O. Pool, who broke 96x100 after only six months' practice, and this his first tournament. H. Jewett won first place in our handicap race by breaking 50x50, and he had never broken 25 targets straight before; and Seth Hart broke 97x100 in the State Championship event, and he but a recent convert to the sport; and our own sheriff, John Cline, who in the championship event stood on the 16-yard line and, with gun below the elbow, broke 25, 23, 25, 22—94x100, and won a diamond pin from the yardage. Last but not least, that grand old man, C. H. Nash, of San Jose, with silvered locks and the many mile-posts of life stretching away behind, with never a falter in this fast company, drawing a deadly aim on 487x500. Is it any wonder that our game is called the "Sport Alluring"?

The officers of the club are deeply indebted to the sportsmen's journals and our local papers for the generous and hearty publicity which was accorded this big and wonderful shoot. This publicity drew thousands to our grounds. The 100-foot-wide boulevard that passes our gates was on numerous occasions almost impassable to vehicles, and our heretofore ample parking space was running over and many autos were forced to park on the street.

FRED H. TEEPLE,
Secy-Mgr. Los Angeles Club.

Portland Club.—The practice shoot at Everding Park traps of the Portland Gun Club on Sunday, June 17, brought out 22 nimrods, and several good scores were recorded.

Frank M. Templeton, winner of the Pacific Coast handicap in 1916, was out tuning up, and he was responsible for 71 bluerocks out of the 75 being thrown to the discard. James W. Seavey, who has been going like a prairie fire the last few months, broke 73 out of 75. Dr. O. D. Thornton manages to find time occasionally to run out to the Jenne Station grounds and limber up his scatter gun, and after he had made a mark of 70 out of 75, he fell down on his last 25 targets, and his day's result was 88 per cent.

Following are the scores of June 17th:—

F. M. Templeton 71, M. Samptenberg 25, F. O. Joy 74, E .H. Keller 46, Jas. W. Seavey 73, R. P. Knight 66, A. W. Strowger 44, C. B. Preston 56, W. W. Hulat 52, A. D. Hosfeldt 30, A. L. Zachrisson 76, Al Seguin 78, H. A. Pollock 21, J. G. Kamm 35, G. C. Haworth 16, J. G. Clemson 76, J. S. Crane 78, Dr. Thornton 88, T. J. Mahoney 57, R. E. Martell 49, *H. Ricklefson 72, H. B. Newland 47. (*Professional.)

Trade Notes.—The silver cup ffor the championship of the Middle Texas Trapshooters' Association was won by A. H. Richardson of Brownwood, Texas. Shooting Arrow Shot Shells, he broke 23 out of his quota of 25 targets. He also won the 200 target event at the Brownwood gun shoot. He broke 192x200 targets, using Arrow Shotshells.

At a recent registered shoot of the Gladbrook Gun Club, Chas. Hummel won high amateur average. Shooting the "Perfect Combination" of a Remington Pump Gun and Nitro Club "Speed Shells" he broke 142x150 targets.

Missing but two out of his quota of 75 targets, B. F. Augustine carried off high honors at a recent shoot of the Warsaw Gun Club of Warsaw, Indiana.

H. T. Strother was high amateur at a recent shoot of the Latonia Gun Club of Latonia, Kentucky. Shooting the "Perfect Combination" of a Remington Autoloading Shotgun and Nitro Club "Speed Shells" he scored 145x150.

The Wilmington Shooting Association of Wilmington, Delaware, had a good turnout at their recent shoot at which 80 men faced the traps. C. H. Newcomb of Philadelphia broke 287x300 shooting Arrow Shotshells. Second honors went to Fred Tomlin of Wilmington. Shooting a Remington Pump Gun and Nitro Club "Speed Shells," he ran up a score of 284x300. C. Newcomb also won the 150 target event with a score of 146x150, shooting Arrow Shotshells. W. B. Severn was second high man. Shooting Nitro Club "Speed Shells" he broke 145x150.

Los Angeles Club.—Robert H. Bungay did considerable shooting at the Los Angeles Gun Club last Sunday and as a result captured the handsome H. R. Everding trophy. Bungay smashed 99x100 targets in sensational style. He was competing from the 20-yard mark.

J. F. Dodds finished in second position with 96x100 breaks, while W. A. Cornelius took third place with a total of 95 smashes ost of a possible 100 targets.

Probably the best thing of the day was the shooting of the twenty-yard men. Frank H. Mellus, Heine Pfirrmann, Bob Bungay, J. F. Dodds and W. H. Whitcomb broke a total of 475x500 targets, which made an average of 95 per cent for the day. This is some team to shoot against any other club.

J. F. Dodds, Cornelius, Mrs. Pfirrmann and Saffell all won gold take-home trophies Sunday, while Heine Pfirrmann, Pool, L. R. Mellus and Frank H. Mellus captured silver trophies.

Tomorrow there will be two prizes up. The E. K. Mohler prize uill be competed at 100 targets with distance handicaps, while the H. E. Sargent prize will be up for the winner of the doubles shooting event, which will be at twenty-five targets. Four gold and four silver trophies will also be up for the day's shoot. Following are the scores of the day:

R. H. Bungay, handicap 20 yds., broke 99; J. F. Dodds 20—96, W. A. Cornelius 19—95, W. H. Whitcomb 20—94, F. B. Saffell 16—94, F. H. Mellus 20—93, H. Pfirrmann 20—93, L. R. Mellus 18—93, R. O. Pool 18—92, O. Council 19—91, H. E. Sargent 19—91, W. Clement 16—91, C. W. Fish 19—89, O. A. Evans 19—89, H. Hoyt 16—89, E. K. Mohler 20—88, Mrs. Pfirrmann 16—85, V. A. Rossbach 18—84, Geo. Melford 18—84, J. H. Bishop Jr. 16—84, S. B. Friend 16—84, C. M. Wood 16—95, F. H. Nichols 16—44, J. A. Mailling 16—37x50, R. J. Loomis 16—11x25, R. S. McKinsey 16—9x25, Mrs. J. Clark 8x25.

Del Monte Shoot Postponed.—The Interstate Association makes announcement of the postponement of the registered tournament at Del Monte. The original date was July 27, 28 and 29, and now it will be held on August 10, 11 and 12.

BLACK BASS IS A GAMY FISH.

There are reasons why the black bass is so favorite a fish among anglers. It is endowed with strength for its size beyond that of most fresh water fishes; moreover, it seems to possess the intelligence (or an acute development of instinct) to use its strength to the best advantage in its efforts to escape from the rod, to throw the hook from its mouth and sever the gut of the leader by getting it around jagged and sunken rocks.

Frequently it will sink, sullenly, as it were, to the bottom, and nothing will dislodge it except main strength and the strain to the utmost of the tackle by which the bass is held in restraint. All the devices of an old salmon angler will not budge him from his lair; stones thrown, lashing of the water, knocking on the butt of the rod, even a stick jabbed at him unseen in a pool, but doubtless not touching his body, has failed, as all other attempts have done, in making him move an inch. Nothing but a steady strain sufficient to overcome his strength of muscle will have any effect, and frequently even that will be only temporary, as the bass, under such conditions, will sometimes move but a few feet and then "sulk" again.

So persistent and determined is this action of the fish that one would be inclined to think that he evidently braced his two strong pectoral fins on the sides of two stones between which he was "sulking," a term insulting to the majesty of the fish in his intelligence of resources to escape capture, says All Outdoors.

With many anglers the grade of a fish, when restrained on the rod, is determined by his practice of leaping from the water. It is doubtful if the salmon of the fresh water or the tarpon of the solt would be so highly esteemed as a game fish were it not for their leaping qualities. The black bass is an acrobat by heredity. No matter when you fasten one in running water, he will sooner or later come into the air.

Idaho State Shoot.—The Idaho State tournament was held at Twin Falls, Idaho, on June 11 and 12, with the following results:

150 targets each day: L. E. Riter 143, 134; E. M. Sweeley 137, 131; J. Taylor 134, 130; L. Burtenshaw 123, 116; L. T. Wright 131, 123; Ned E. McCracken 123, 118; Ernest White 141, 138; E. C. Burtenshaw 139, 135; Ed Fitzgerald 135, 135; D. J. Holohan 144, 142; W. Miller 120, 114; J. G. DeKlotz 131, 111; C. A. Bailey 143, 136; C. J. Doon 124, 120; Harold Dresser 124, 131; M. Miller 125, 117; E. C. Grice 137, 137; A. W. Heither 106, 109; H. R. Seckel 132; W. T. Woods, 128.

Professionals—L. A. Cummings 144, 143; E. B. Morris 142, 131; P. J. Holohan 148, 142; G. Holohan 124, 123; F. J. McGanney 128, 120; C. A. Anderson 141, 141; J. A. Reed 128, 122.

Championship Dog Show Ratings.—The license committee of the American Kennel Club has adopted a schedule of points governing championship ratings in winners' classes, a revision of the former list published, each breed's rating being fixed on an individual basis. The following breeds will be credited with one point towards a championship for each dog entered at a show up to five dogs; that is, where one dog is entered a first in winners class will credit one point, two dogs two points, three dogs three points, four dogs four points, and five dogs five points: Bloodhounds, mastiffs, Eskimos, St. Bernards (smooth), Newfoundlands, Irish wolfhounds, Shetland sheepdogs, Scottish deerhounds, foxhounds (English), setters (Gordon), retrievers, Welsh springers, wirehaired pointing Griffons, Irish water spaniels, Clumber spaniels, field spaniels, whippets, sheepdogs of the Maremmes, Samoyedes, Belgian sheepdogs, Boxers, miniature bulldogs, toy bull terriers, Dandie Dinmont terriers, Bedlington terriers, Italian greyhounds, otterhounds, Papillons, pugs, toy terriers, Cairn terriers, Chesapeake Bay dogs, Skye terriers and Mexican hairless.

Anglers Are Disappointed.—Local anglers, perhaps 100 or more, who expected a good day's fishing on the Deschutes River Sunday, were disappointed bitterly. W. E. Carlon, Mason Ehrman, Charles R. Brinkley and S. S. Battin were some of those who expected to return to the city loaded with redsides, but who returned with tongues heaping abuse on the caretakers of the power plant at Cove on the Crooked River. Just at evening when the fishing was getting good and the stream was lined with anglers, a volume of inky black water came down and spoiled all possible fishing. Some thought it was a cloudburst on the Upper Crooked River. Finally the cause was discovered. Once or twice a year the employes of the power plant at Cove clean out the plant and overhaul all the pipes. They decided that no other day but Sunday would do, and after much persuasion on the part of Dr. R. B. Brandon to dissuade them, they went ahead with their cleaning and rendered the fishing horse de combat.

Dr. Brandon and C. M. Stevens, Pacific Coast automobile representatives, enjoyed a good catch at Opal Springs, above the power plant.—[Portland, Or.

Sportsmen's Row

The Interstate Association plans to conduct every one of the registered trapshooting tournaments, and the sectional and Grand American Handicap, as there was no talk of war—feeling that the association is doing a good thing for the United States in developing the art of shooting.

✤ ✤ ✤

Traps have been installed in parks in twelve Middle and far-Western cities, and it will only be a question of time when trapshooting will have a place in the parks of the United States with golf and tennis. The Springfield (Ill.) Gun Club has applied to the park commissioners of that city for permission to place traps in the city park so that more people may become interested in the sport.

✤ ✤ ✤

The programs for the Interstate Association's 12th Western Handicap tournament, which is to be held under the auspices of the St. Joseph Gun Club of St. Joseph, Mo., on July 17, 18 and 19, are now ready for distribution, and may be had by addressing either J. E. Webster, secretary, St. Joseph Gun Club, P. O. box 448, St. Joseph, Mo., or Elmer E. Shaner, manager, the Interstate Association, 219 Coltart Avenue, Pittsburgh, Pa.

The Alaska legislature has appropriated $4,000 for the transportation of deer from the islands of southeastern Alaska to the islands of Prince William Sound for the purposes of propagation and food supply. In Skagit county, Washington, the Montana elk turned loose by that state a few years ago have grown so abundant that they have come into the towns and eaten the tops from vegetables in gardens, it is said. Farmers employ dogs to keep the elk out of their fields. Killing of the animals is forbidden, and farmers whose crops have been injured have filed claims against the county.

✤ ✤ ✤

Redding, Cal.—"Beware of Bears!" is a sign that seems appropriate for the State highway in the neighborhood of Sims. As Robert O'Donnell, secretary of the Northern California Counties Association, and C. Fred Smith, secretary of the Shasta County Development Association, were autoing along south of Sims the other afternoon, a big cinnamon bear jumped down from a bump above them and lit squarely in the road in front of them. The automobile bumped the bear off the highway. The autoists sped on as the bear rolled down the mountainside toward the river. All alike were frightened.

✤ ✤ ✤

Rocky Mountains Ideal for Camping.—The special advantages—altitude, sunshine and dryness—of the climate of the Rocky Mountains for camping life can only be realized by experience. The altitude of the camping grounds, ranging from 4500 to 9000 feet and upwards above sea level, is naturally accompanied by a correspondingly rarified atmosphere, which in turn means means exhilarating and invigorating effects on the human system, as compared with the denser and heavier atmosphere of much lower levels.

It also means clearer and phenomenally wider vision with the naked eye, with wonderful results in a country of superlative scenic attractions and of magnificent distances, where mountain peaks varying from 12,000 to 14,400 feet high exist by the hundred, interspersed with wild and weird canyons, picturesque mountain lakes and tarns, spacious valleys and enchanting streams; the whole more or less clother with an infinite variety of odorous pine woods, shrubs and flowers, a veritable unique botanical world, more or less inhabited by a special zoological world of "fur, fin and feather," but none of them objectionable. There are no mosquitoes as compared with the lower levels of the Eastern, Southern and Middle States.

The Rock Mountains are also unique for their abnormally high percentage of sunny days, their corresponding minimum of rain, and the entire absence of foggy or misty weather and dew. From the first of June to the first of October there is practically no rain except passing showers of short duration, preceded and succeeded by bright sunshine.

The altitude and the dryness of the climate minimize the heat to the extent of upwards of 20 degrees. In other words, speaking of an altitude of 5,000 feet, as an illustration, according to Major Glassford, Signal officer U. S. Army, from the recorded temperature at least 22 degrees has to be subtracted in order to find the real sensible heat actually experienced by a person in the mountains.

When the published record of the heat in Boston, New York, Washington, St. Louis and Chicago is above 100 degrees it is simply unbearable, while the same recorded temperature in Denver is attended with practically no discomfort. Why? Because at the above-mentioned Eastern points moisture is present to a very considerable extent in the atmosphere, while in the Rocky Mountains it is almost absent. The camping grounds of the Rocky Mountains are not subject even to the heat of Denver on the plains.

Another especial charm of the Rocky Mountain climate is the delightfully cool nights, admitting of sound and refreshing sleep through the hottest portion of the summer.

With such an unique combination of altitude, sunshine and dryness, mere breathing is a pleasure and camp life a continuous and unalloyed enjoyment.

One reason to think that trapshooting is a sport to which Indians would take to quickly, but they do not, for among all the trapshooters in the United States there are only two Indians—Chief Bender, the former baseball pitcher, and C. P. Hurlburt, of Hurlburt, Arizona, the champion trapshot of that state. If Bender can win the championship of Pennsylvania this summer there will be two Indians shooting for the National title.

Brainerd, Minn., June 23.—Charles Mason of Thief River Falls today won the Minnesota championship at the state trapshooting tournament here with a score of 99 and 19 out of 20 in the shoot-off. Dr. F. H. Allen, of Staples, was second with a score of 98 and 17 out of 20 in the shoot-off. In the three days' shooting, six hundred targets, Dr. W. A. Anderson, of Sleepyeye, was high man in the amateur class with a score of 579, and J. R. Graham of Chicago was high in the professional class with a score of 575.

✤ ✤ ✤

This Club Is Progressive.—The trapshooters of the Colorado Springs (Colo.) Golf Club are awake and alive to the situation. They are strong for preparedness and believe that every one should know how to shoot and they are willing to do their bit to aid. The club announces that a shoot will be held each week during the remainder of the season at which all persons who desire will be given instruction in the proper use of firearms. While there are hundreds of thousands of Americans who do know how to shoot, there are many that do not—and trapshooters are patriotic enough to give their time and experience to aid in this well-deserved cause.

Decoys Used by Market Hunters.—On a recent visit to Paso Robles, San Luis Obispo county, I was informed how easily the Bandtailed Pigeon had been slaughtered by the simple device formerly used to decoy the Passenger Pigeon. The method was to fasten a dead or half-dead pigeon on a stick or wire in the top of one of the oak trees where the birds commonly congregated, the decoy being placed quite high where it would easily be seen. This decoy would lead flock after flock to the slaughter, the market hunter being able to kill all he wanted without moving from the tree.

I think that before there is once more an open season on the Band-tailed Pigeon it would be wise to have legislation enacted prohibiting the use of decoys, and thus in a measure guard against a repetition of this former disgraceful method of slaughter.—[Lee Chambers, Eagle Rock, Cal., in The Condor.

FIRST DOG SHOW WAS HELD IN 1859.

Three Judges to One Breed Were Used at Newcastle, Where Initial Exhibition Was Staged.

In these days, when the big shows we had become accustomed to are temporarily suspended, it will be interesting to recall the event which gave birth to the modern show, and which took place at Newcastle-on-Tyne on June 28 and 29, 1859, says a correspondent of the Illustrated Kennel News. Newcastle always was a doggy center and at that time was celebrated for its sporting dogs, so it is not surprising to know that at this first show gundogs alone were catered for; in fact, pointers and setters were the only two breeds scheduled, and each had only one class. There was, however, a good show in the Town Hall, which had been requisitioned for the purpose, for no less than sixty dogs were exhibited. There was one prize only for each breed, with two v.h.c cards, a far different state of affairs to that which obtains at the present day. The prizes were valuable, consisting of sporting guns valued at £20 each and manufactured by Mr. Pape, well-known local gunsmith, from whom the well-known strain of black pointers attained their name, he being for years interested in breeding them.

We are accustomed to one judge taking a dozen or more breeds, perhaps. What should we say to three judges for one breed? Yet this was the arrangement at Newcastle in 1859, and the gentlemen who officiated in pointers were Messrs. J. Jobling, T. Robson and J. H. Walsh. The winner under them was a liver-and-white dog (unnamed) by Lord Derby's Bang out of his Dora. Messrs. F. Foulgar, R. Brailsford and J. H. Walsh judged the setters and the prize went to J. Jobling's Dandy.

The show was the suggestion of R. Brailsford, and it was organized by Messrs. Shorthose and Pape. The venture was such a success that Mr. Brailsford, acting with Frederick Burdett, Lord Curzon (afterward Lord Howe), and J. H. Walsh ("Stonehenge," kennel editor of the London Field), organized a show of sporting dogs at Birmingham in November of the same year. Pointers, setters, retrievers, Clumbers, and cockers were given classes (seven in all), and this little meeting was the precursor of the great shows of the National Dog Show Society which have been held annually in Birmingham almost without a break ever since.

Fourteen years afterward the Kennel Club was formed, as it was felt by many who were interested that some possible body should exercise control and have power to legislate and to impose penalties for the irregularities and fraud which had unfortunately become all too common. From this time onward dog breeding and showing gradually developed into the great industry that it is today.

Record of Trumpeter Swan.—Reports and sight records of the Trumpeter Swan (Olor buccinator) have always been much more plentiful for Washington than actual specimens. Therefore, about three years ago, I was greatly interested to have Mr. Fred Edwards, our Tacoma taixdermist, report to me that an unusually large swan had been sent in to him for mounting. It was shot on or about November 9, 1912, the locality being Moses Lake, Douglas county, Washington. The sex was not ascertained, but the bird had not yet reached the mature white plumage. After comparing it with a number of Whistling Swans (Olor columbianus) that were brought in, both Mr. Edwards and I felt positive that it was a Trumpeter. The bird is now in the possession of Mr. George Willett, of Los Angeles, California, who writes that he is perfectly satisfied as to its identity. Measurements, furnished by him, are as follows, in inches and hundredths: Length of wing, 25; tarsus, 4.12; middle toe and claw, 6.36; eye to tip of bill, 5.36; nostril to tip of bill, 2.55. Number of tail feathers, 22.—[J. H. Bowles, Tacoma, Wash.

Team Shooting Has Taken Hold.—Trapshooting team competition as advocated by the Interstate Association for the Encouragement of Trapshooting has taken a firm hold.

Following the announcement of the association that trophies would be given for "team competition" 32 clubs made known their intention to engage in such contests, and since May 1st 26 other clubs have filed application for trophies. Thus there are 58 clubs engaged in team competition for Interstate Association trophies.

The stipulations are that the clubs shall engage in competition once a month, alternating on the grounds, until one club has won the trophy three times. Each shooter fires at 50 targets. Teams are made up of 5, 10 or 15 shooters, depending entirely on the number the visiting club has before the traps. When the trophy is won by a club three times it is then put up for competition among the members who shot on the teams that were victorious in the three matches and remains in competition until one shooter has won it three times.

GRAND AMERICAN AT WORLD'S FINEST CLUB.

South Shore Country Club in Ten Years Has Grown From 5 to 67 Acres and From Small Club House to One That Cost Half-Million.

[By Peter P. Carney.]

Trapshooters in particular and sportsmen in general are delighted that the Grand American Trapshooting Handicap tournament was awarded to the South Shore Country Club of Chicago, for 1917. The Interstate Association is to be congratulated upon its choice.

It is extremely doubtful if there is another organization in America better equipped to handle the great tournament than the South Shore Country Club. Its president, Everett C. Brown, is a former president of the Amateur Athletic Union, and a man who knows how to handle big events. The secretary is S. C. Mosser; vice-president, Charles E. Fox, and treasurer, R. B. Upham.

The trapshooting committee which will endeavor to please the greatest number of shooters that ever entered one tournament are: R. E. Peacock, chairman; Charles Antoine, R. W. Clancy, G. T. French, W. C. Peacock, Carl Horix, E. W. Heath, R. H. Morse.

The rise of the South Shore Country Club is like a tale from the Arabian Nights. Ten years ago a number of prominent Chicago sportsmen purchased five acres of sandy beach on Lake Michigan, adjoining Jackson Park on the south and built a clubhouse. This was the beginning. Today the ground area is 67 acres with a frontage of three-quarters of a mile on Lake Michigan, and takes up 90,000 square feet.

The South Shore Country Club is one of the show places of Chicago and is the greatest Metropolitan Town and Country Club in the world. The cost of the new clubhouse, opened on New Year's eve, 1915, was $450,000. It is built in the style of the Italian Renaissance. It is the last word in clubhouses. The solarium is the greatest room of its kind in the world and the dining rooms and ballrooms are beyond the description of mere man.

There were 2,468 diners served the evening the new clubhouse was opened and 3,000 can be served at one time. There are 92 sleeping chambers in the new clubhouse, single or en suite, each provided with a bath, offering living facilities as good as the best hotel. There are 32 sleeping quarters in the old clubhouse. The club has a membership of 2,200. The operating expenses are $657.54 a day—or in regular figures $240,000 a year. Membership dues bring in $163,000 a year. The salary list is $170,000. The deficit is more than met by the department profits. The club finished $47,000 on the right side of the ledger in 1916.

The 10-mile drive following the South Park Boulevard through Washington and Jackson Parks, and finishing on the superb drive of the South Shore Club, is considered the finest in America.

The members of the South Shore Club go into all branches of sport extensively and their trapshooting team in 1916 won the championship of the Chicago Gun Clubs League. Two hundred and fifteen thousand targets were trapped at the South Shore Club in 1916.

"BRAYLESS" MULES.

At Lathrop, Mo., is a training station for mules to be used in the British and Russian army. But the most marvelous stunt is removing of the "bray" in order that he shall not betray the soldiers' position to the enemy. This is a discovery of a Frenchman, that by performing a simple operation on the mule's nose, the animal would henceforth and forever refrain from voicing his woes. Each of the mules now leaving the station is unable to bray. The operation is no small task, as about 5,000 mules are shipped from the station each week.

Mark L. Requa, of Oakland, one of the most prominent mining engineers of the country and incidentally the owner of the Anchorage Farms, of Orland, is in Washington, where he has volunteered his services to Herbert C. Hoover and is actively engaged in assisting Hoover in his great work. Mr. Requa has established at Orland one of the most modern farms and live stock nurseries in the country and has laid a sound foundation for what promises to be one of California's great producing plants. The Anchorage Farms will breed Berkshire swine and Jersey cattle. The great young boar Star Leader, son of the grand champion, Grand Leader 2d., is at the head of the Berkshire herd. The females in the herd were selected by "Billie" Guilford, Prof. J. I. Thompson and W. L. Frost, and are up to any lot of sows in the west.

✤ ✤ ✤

CROPS BETTER IN MISSOURI.

Perhaps no other individual not connected with the State Board of Agriculture of Missouri is so well informed regarding the crop conditions in that state, as Rufus Jackson, of Mexico, Mo., former publisher of the Missouri Stockman and an all-round agricultural expert, who says in reply to our inquiry: "Wheat has come out wonderfully all over the state and the crop will be much better than was expected. Oats never looked better and a bumper yield is assured. Corn is late but looks good and planters are assured of a splendid crop with any kind of weather conditions. While this is a warm day and the best growing day of this very backward season, a rain is now needed. Despite the high price of feed and beef farmers are arranging to feed extensively and Missouri may be depended upon to do her usual share of preparedness."

MORE GOOD CATTLE TO CALIFORNIA.

The additional Shorthorn sales in the Middle West, last week, found California buyers in the front ranks, and as those remarkable sales which were reported in these columns the week before, got the "top" offerings. At Bellows Bros.' sale, near Maryville, Mo., June 14th, 51 Shorthorns brought $57,850. Eight bulls averaged $1,678, one selling for $8,100, and 43 females sold for an average of $1,033. T. T. Miller, of Los Angeles, whose selections at the recent cattle sales have created much enthusiasm among California breeders, got at this sale Choice Beauty 2nd, for $1,750. This was the most successful sale these well known Missouri breeders have ever conducted.

At Maryville the day before, E. Ogden & Son sold 38 Shorthorns for $31,475, an average of $828. Eight bulls averaged $809 and 30 cows and heifers averaged $833.

At Skidmore, Mo., June 15th, F. C. Barber & Sons, well known breeders, sold 49 of their magnificent Shorthorns for a total of $28,110, an average of $574 on the entire lot.

This just about winds up the recently advertised annual Missouri sales and in a hurried and unofficial summary of 60 sales of pure bred cattle, Shorthorns, Angus and Herefords which have taken place in Missouri, an average of more than $700 has been made. There were sold in these sixty sales more than 4,000 pure bred cattle, and while most of them were sold to breeders of other states, some of the choice offering were sold to Missouri breeders. Harriman Bros., of Cooper county, who annually sell many Shorthorns have, perhaps, improved their already good herd more than any other breeders, as they have selected some very noted breeding animals. Col. R. L. Harriman of this firm has officiated as the auctioneer at a number of the best sales. He is considered one of the best auctioneers in America. His specialty and greatest successes on the block, however, have been with Shorthorns, Poland China hogs, and horses. The well known salesman, Carey M. Jones, has had charge of his usual number of Shorthorn auctions, while Fred Reppert has conducted the successful Hereford sales. In both these breeds these well known salesmen have been materially assisted by Col. P. M. Gross of Macon, Mo., known as the giant of the profession and one of the best auctioneers in the country.

Make your hoe this summer keep your can opener busy next winter.

Says the Rocky Mountain Husbandman, of Great Falls: "With shot and shell and bushels of wheat and 10,000,000 of the bravest men who ever faced a bullet we will help England and France win the war of liberty."

✤ ✤ ✤

The University Farm has lately added to its flock of six choice Romney ewes, recently imported by H. S.Coffin, of North Yakima, Washington. They arrived at the University Farm on May 5th after being in quarantine in San Francisco two weeks. They were bred previous to importation and will lamb in August and September.

✤ ✤ ✤

The Pacific Purebred Stock Exchange is the title of a million dollar live stock industry which is likely to b edeveloped in the Santa Clara valley within the coming year. The project is in the hands of T. Butterworth, who was for thirty years the editor and publisher of the Live Stock Journal in Chicago. Mr. Butterworth, who has lived in Santa Cruz for the past four years, is planning in the near future to go to Chicago to enlist the interest and the services of the breeders and breeders' associations of that community in this big project, which he expects will revolutionize the stock industry of the state of California.

✤ ✤ ✤

A. B. Humphreys of Escalon, California, proprietor of one of the country's most noted live stock nurseries and one of the most prominent men in that live-wire corps now forming the foundation of what is to be the greatest live stock producing state in the country, announces that on August 2 he will conduct his first Grape Wild Farm Berkshire sale. This will be good news to all stockmen as it will permit of their selecting of breeding animals from this now world famous herd at their own price. In place of Grand Leader 2d., the grand champion boar at the P.-P. I. E. and sire of champions which Mr. Humphreys sold last winter for $3,000, he has that magnificent show and siring boar, Royal Supurbus, now at the head of the herd. Many of the sows to be sold and a number of bred gilts are by Grand Leader 2nd and other leaders of the Berkshire world. This will be an annual sale and the best in the herd will be offered.

✤ ✤ ✤

State Veterinarian Dr. Charles Keene is preparing July 1st to launch his biggest campaign against animal ills. On that date he will have eight new deputies added to his working force by the last Legislature, and, realizing that stock diseases result in the destruction of a large amount of foodstuff, he will make a thorough effort to stamp out or control these diseases. The effort will be aimed at hog cholera, tuberculosis and other infectious contagious diseases which cause millions of dollars of loss annually. Regarding his campaign, Dr. Keene says:

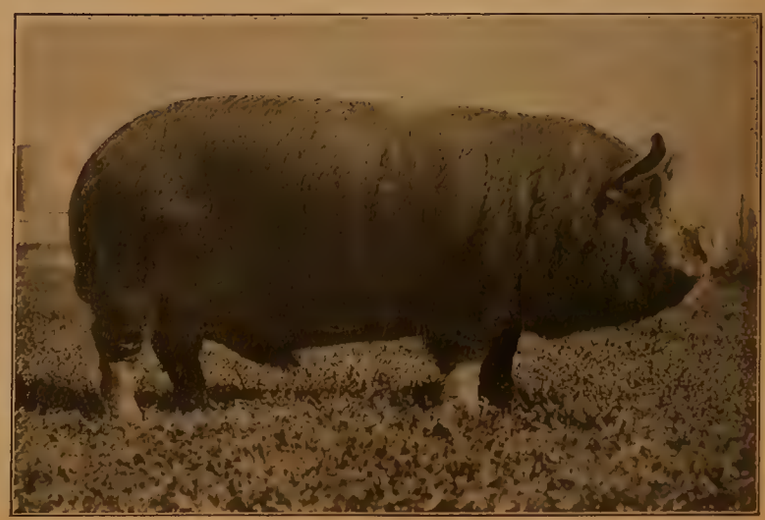
"Because of the war, the campaign means more to the public now than it could mean at any other time. It is a fact well recognized by the Government that there is a tremendous loss in livestock each year as a result of havoc played by disease. If the cause of this loss can be checked, it is apparent that the food supplies will be conserved.

"This department will undertake the work in cooperation with the Federal Government, prepared not only to combat the diseases now more or less prevalent in California, but to prevent outbreaks of new infections as well."

EDUCATIONAL VALUE OF LIVE STOCK EXHIBITIONS.

The chief value of live stock exhibitions or shows, whether under the auspices of community, county, state, or larger organizations, lies in their educational features. Live stock shows and fairs have been an important factor in the improvement of farm animals, since it is the show ring which designates the types and standards that breeders of animals strive to produce. These standards generally are based on market and economic demands.

The absorbing interest of competition in the show ring stands as the chief incentive for the breeder to exhibit his animals. If he annually enters into competition with other breeders, he will surely improve the quality and type of his herd or flock. The great value of the live stock show ring for the less experienced breeder, however, is in the demonstration of standards which may be followed. The best qualified persons obtainable are found officiating as judges at the large exhibitions. These men know the requirements for the animals which they judge, and through them breeders become better acquainted with the standards for the breed in which they are interested and also with the faults and good points of their own exhibits.



The county fair officials should enlist every aid possible to make the live stock show a success. To be successful it must by all means have the backing of the breeders of the county, and of other counties if possible. Co-operation with the county live stock association, if such an organization exists, and with the county agricultural agent, is essential. If the live stock association advocates a certain kind of breed of live stock, then the officials should provide liberal prizes for such classes. In a great many cases it will be advisable for the county fair officials to meet with the county live stock association before the premium list and classification are announced. In most instances it would be well to allow the association the privilege of offering suggestions in making up the premium list and classification. In this way their interests will be represented and their support consequently will be stronger.

Uniformity of Classification.

The county fair association should be uniform from year to year and, as far as possible, the classifications of different county fairs in the same State or section should be uniform. County fair secretaries should be careful that their show dates do not conflict with those of neighboring counties. To provide for uniformity in classifications, to arrange fair dates, and for other purposes an association composed of the county fair officials in the State is very helpful. Such organizations generally meet once a year for discussion. A good place and time for this meeting is at the State agricultural college during some farmers' meeting.

Futurity Contests.

One very effective feature which may be adopted is the futurity contest. In this the breeder names the animal which he will exhibit soon after or even before it is born; in case it is not yet born, the dam of the animal is named. In this contest, each breeder entering should be required to put up a sum of money which is to go into the general purse. He may be required to put up another sum just before the date of the fair, and at some shows the exhibitor is required to pay still another fee at the time of the actual contest. The amount required from each exhibitor should not be too great; but the nomination fee, even though it be small, is essential for the success of the futurity contest. All the money received through the nomination of animals is put into the general purse, which may be divided into three or more prizes. Generally the fair association adds additional money to the purse. The more money in the purse the keener the competition. The animals nominated are judged during the fair week, just as are the other classes.

STAR LEADER, the magnificent boa r owned by Mark L. Requa, Anchorage Farms, Orland, one of the most select swine farms in the country.

THE $53,200 NULL, KING ORMSBY JANE RAG APPLE.

THE GREAT RECORD-BREAKING SALE.

It is doubtful if there has ever been seen such a display of enthusiasm at a cattle sale as that which occurred at the wonderful record-breaking sale of Holsteins at the Fair Grounds, Worcester, Mass., on June 7 and 8, under the management of Mr. Harvey A. Moyer. Before the sale commenced it was thought by many breeders that the high-water mark of prices for dairy cattle at auction had been reached at Detroit last year, when 143 head of Holsteins sold for $156,710, or an average of $1,090 each.

The arena was filled with breeders from 20 states and Canada when the first animal was led into the ring, and in the first hour Col. Perry had to produce many of his long stock of jokes, etc., to "get 'em a-going." The first 10 cattle that were sold averaged $386 each, the highest price paid being $675 for a 19-lb. daughter of King Pontiac Artis Canada, a son of King of the Pontiacs out of a 31-lb. daughter of Hengerveld De Kol. The next 10 brought the average up and, when the 20th cow had been sold, an average price of $580 was shown. Gardiner Hall Jr. & Company of South Willington, Conn., paid $2,500 for a 5-months-old daughter of King Model (who sold for $10,400 at the Stevens' sale a few weeks ago) and out of a 33-lb. dam. Mr. J. T. Shanahan of Buffalo, N. Y., made his initial purchase at the sale by securing K K S V Aaggie Maid, a 6-months-old daughter of King Korndyke Sadie Vale and out of a 25-lb. dam, for $1,000.

The average was maintained and improved upon when No. 30 on the catalog, a double granddaughter of Colantha Johanna Lad, sired by a son of the former world's champion, Aaggie Cornucopia Pauline, the first 34-lb. cow, and out of a 28-lb. daughter of a 31-lb. cow, fetched $1,825. This yearling heifer was secured by H. E. & K. E. Aitken of Waukesha, Wis.

Exciting scenes were to follow the sale of this well-bred young heifer. Everybody was on tip-toe and all eyes were at once focused on the beautiful King Ormsby Jane Rag Apple, the 5-months-old son of Rag Apple Korndyke 8th and Ormsby Jane Segis Aaggie, the wonderful twice 40-lb. cow and world's champion for 30-day butter production. "A peerless combination" of breeding is shown in this handsome creature's pedigree. Mr. Cabana made a short talk calling attention to the wonderful future which he believed was in store for Rag Apple Korndyke 8th and for the splendid animals bred by this fine bull, out of some of the greatest cows of the breed, and also mentioned that Ormsby Jane Segis Aaggie was now milking 100 lbs. a day and was in absolutely perfect condition.

The first bid for this regal youngster was $10,000 and like a flash came another for $15,000. Three men competed for possession, Mr. John Arfmann quitting at $30,000, leaving Mr. J. T. Shanahan and Mr. D. W. Field to "carry on." Amid intense excitement these two men answered the calls from the auctioneers and eventually $50,000 was bid by Mr. Field. Still Mr. Shanahan kept things moving, but at $53,000 he gracefully retired and Mr. Field was acclaimed the purchased of King Ormsby Jane Rag Apple at the world's record price of $53,200.

The insistent demands of the big crowd of breeders present for a speech compelled Mr. Field to say that he wanted the best bull in the world and believed he had secured it in King Ormsby Jane Rag Apple. Mr. Cabana called for cheers for Mr. Field and also for Mr. Shanahan, which were given in a demonstrative way. Mr. Arfmann told the breeders that he wanted to buy the youngster and the only reason he did not was because Mr. Field's pocket was a great deal deeper than his.

Number 52 in the catalog was Verona De Kol Beets 238719, a 32-lb. 3-year-old cow in calf to Rag Apple Korndyke 8th. Mr. Shanahan wanted this animal and was willing to go to $10,000, which sum was considered the highest prive ever paid for a dairy cow in the auction ring. But the record was soon demolished.

The average for 55 head was $2,134. Ralph King, a generous buyer at the Stevens' sale, bought number 62, Fancher Farm Maxie 2d, a young daughter of the great world's record 46-lb. cow, Fancher Farm Maxie. Mr. King compelled his competitor to quit at $7,000, and this wonderfully well-bred yearling heifer was added to the other good ones secured by this buyer.

Mr. Moyer decided to keep the sale going until 7:30 and more than 500 enthusiastic Holstein "fans" remained to see the selling of Glen Alex Queen De Kol, "the only 40-lb. 2-year-old that ever lived." John Arfmann opened the bidding on this wonderful juvenile producer with $7,000 and Mr. Shanahan and Mr. F. S. Stimson, the noted Pacific Coast Holstein breeder, both showed a strong desire for ownership. Competition between the two latter gentlemen was extremely keen and when the bidding had reached $18,000, the hammer fell, Mr. Stimson as the last bidder. There was a tremendous ovation given to the new owner, who made suitable response.

The price of $18,000 paid for Glen Alex Queen De Kol was the highest ever paid for a dairy cow in the auction ring, and speculation was keen among the breeders in attendance the second day, as to whether Wandermeere Belle Hengerveld, the world's champion junior 4-year-old, would beat this record. Mr. Pelletier's cow achieved the honor by topping the sale at $18,300! Mr. Shanahan bought her, and it was stated that he received an offer of several thousand dollars for his bargain after the close of the sale. Mr. Pelletier made an offer of $10,000 for the calf that "Wandermeere" is carrying, delivered to him at 6 weeks old (bull or heifer). Mr. Cabana offered a free service to Rag Apple Korndyke 8th, and if "Wandermeere" fetched $20,000, a free service to son of Segis Fayne Johanna, the 50-lb. cow. Other offers were made by Mr. Bernhard Meyer, Finderne, N. J., of a free service to King Korndyke Sadie Vale; Fred F. Field, to King Segis Pontiac Konigen, the $35,000 bull, and F. M. Jones, Clinton, N. Y., to Spring Farm King, with an offer of $12,000 for the calf, either sex.

BUYS DAIRY HERD.

Mrs. Luella Hughson, of Modesto, who built the palatian Hughson hotel at the dairy city, has purchased sixteen head of grade Holstein heifers from the Sanitary Dairy. Mrs. Hughson has a fine ranch and in former years had one of the finest dairy herds in that section.

HIGH-CLASS FILLIES FOR SALE.

BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

A GREAT COLT FOR SALE.

Rare breeding and individuality are combined in LOUNISKA BERBELLS, a large, handsome 2-year-old, coal-black, standard bred trotting stallion by Rappallo 2:17¼, trial 2:07, by Greco B., trial 2:12, by McKinney 2:11¼ (sire of Sweet Marie 2:02). Greco B.'s dam is Aileen (dam of 4) by Anteeo 2:16 (sire of the dam of Sonoma Girl 2:04½) by Electioneer (grandsire of Maj. Delmar 1:59¾ and Azote 2:04¾, each of which was champion trotting gelding of his day); great-grandsire of Uhlan 1:58, present champion trotter and great-grandsire of dam of Lee Axworthy 1:59¼, present champion trotting stallion). Greco B.'s second dam is Lou Milton (dam of Lou Dillon 1:58½, first 2:00 trotter and present champion trotting mare), granddaughter of Happy Medium (sire of Nancy Hanks 2:04, first 2:05 trotter, only 2:05 mare to produce a 2:05 trotter, Admiral Dewey 2:04¾, sire of Lord Dewey 2:03¾). Happy Medium is grandsire of Peter the Great 2:07¼, sire of 7 in 2:05 and champion extreme speed sire. Rappallo's dam Oniska is dam of San Francisco 2:07¾, trial 2:04¼ (sire of St. Frisco 2:03¼ and Mary Putney (3) 2:04¾) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½) by Guy Wilkes 2:15½ (sire of dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼), full brother to William L. (sire of Axtell (3) 2:12, the only 3-year-old to hold world's trotting championship, sire of Axworthy 2:15¼ (grandsire of Lee Axworthy 1:59¼ and sire of Hamburg Belle 2:01¼). Guy Wilkes is grandsire of Sonoma Girl 2:04¼, Maymack 2:04½ and John A. McKerron 2:04½. Rappallo's 2d dam, Bay Line by Direct Line, by Director 2:17 (sire of Directum 2:05¼, ex-champion trotting stallion and the dam of John A. McKerron 2:04½), son of Dictator (sire of Jay Eye See 2:10, first 2:10 trotter) and Dolly, dam of Onward, great-grandsire of Nervolo Belle (dam of Peter Volo 2:02 and Volga (3) 2:04½). Direct Line is out of Lida W. 2:18 (dam of Nutwood Wilkes) by Nutwood, champion brood mare sire. Rappallo's 3d dam, Puss by Cal. Nutwood (son of Nutwood and Fanny Patchen, granddaughter of George M. Patchen 2:23½, ex-champion trotting stallion); was out of a granddaughter of Williamson's Belmont (grandsire of dam of Directum 2:05¼ and grandsire of grandam of sire of Lee Axworthy 1:59¼. Rappallo's 5th dam was by Gen. Taylor, champion 20-mile trotter. Louniska Berbell's 1st dam, Beautiful Bertha, is by Moormont, grandson of Electioneer and Beautiful Bells, dam of 11 trotters including 4 champions. 2d dam, Abbie McNutward (dam of Greatness (3) 2:10¼ and Derby De Oro, trial (3) 2:19) by Guy McKinney (sire of Vernon McKinney 2:01½), son of McKinney 2:11¼ and Flossie D. by Guy Wilkes 2:15½; 2d dam Blanchward (dam of China Maid 2:05¼) by Onward (grandsire of Spanish Queen 2:04¼); 3d dam by Mambrino Patchen 58; 4th dam Lady Blanche, dam of Jaywood 6557, sire of dam of William 1:58½, champion 4-year-old pacing stallion).

Louniska Berbell's 3d dam, Lady Irene 2:14½, by Diablo 2:09¼, ex-champion 4-year-old pacing stallion, son of Chas. Derby 2:20 (sire of Jim Logan 2:01¾ and Don Derby 2:04½) and Bertha (dam of 2 in 2:05, 5 in 2:10 and 14 in the list, champion speed producing mare. 4th dam, Geraldine 2:16½ (dam of Leata J. 2:03), is by Mount Vernon 2:15¼, son of Nutwood and Daisy (the 4th dam of Maymack 2:04½) by Chieftain 721. Daisy's dam was by Doc 449 (sire of Occident 2:16½, ex-champion trotting gelding) by St. Clair. Geraldine's dam was Edith C. by Gen. McClellan 144 (sire of dam of Mack Mack 2:08 and 2 dams of Bernon McKinney 2:01½, Leata J. 2:03, and Lynwood W. 2:20½ (sire of Sonoma Girl 2:04¼. Geraldine's grandam was by Rifleman (sire of Col. Lewis 2:18¼) by imp. Glencoe.

Analysis shows that most of the blood of the entire 6 2:05 trotters produced in California is embraced in this pedigree. That of the 7 sons of Hambletonian 10 with tail male descendants in the 2:05 trotting list, 6 are here included, and that of the 55 2:05 trotters 52 are descendants in tail male of sires here tabulated. I am sick, however, and he is for sale cheap, as are also his dam and his half-brother, Derbertha Bells 60907. The first man who sees him that wants a good colt and has the money to pay for him will lead him away. Take Melrose Electric at the Mole, get off at Seminary Ave., walk south. Take Elmhurst, San Leandro or Hayward car in Oakland, get off at Seminary Ave., walk north.

J. W. PENDLETON,
1601 Seminary Ave., Oakland, Calif.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, including ——

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE.
EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

AYRSHIRE AUCTION SALE.

The consignment Sale of fAyrshires by the New England Ayrshire Club, held at Springfield, Mass., on Thursday, June 14, was the most satisfactory public sale of Ayrshires ever held in the United States. The consignments were of a uniformly high order and the prices paid showed a healthy tone of appreciation among the lovers of this popular breed of dairy cattle. The average price for those catalogued was $646, and six young things from one day to three weeks old sold for $610.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a well gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

"Hartford" Race-horse Insurance--

"HARTFORD" policies are broad and liberal in their terms and are offered at lower rates of premium than have often been charged in the past.

You race either for pleasure or profit—possibly for both. A fast horse is very valuable, the purchase price running from a few hundred to many thousands of dollars, and should be insured against death. Any race-horse is subject to the serious hazards of transportation, training, and racing, as well as the greater danger of death from fire, lightning, or disease.

If good judgment prompts you to insure your buildings against fire, you certainly will admit the necessity for race-horse insurance.

In the past it has been practically impossible for many owners to secure satisfaction and complete protection. "Hartford" policies furnish real race-horse insurance.

Ask Dad for A Rifle!

Dad knows that it is just as important for his boy to learn how to handle a gun safely as it is for him to know how to swim. Dad also knows that a gun will teach his son responsibility, self reliance and self control.

Tell Father you want a Winchester .22 caliber rifle. Remind him that a boy's natural interest in a gun is going to make him get his hands on one sooner or later. It is going to be mighty fine if Dad can get out to enjoy the the sport with you and teach you the correct use of a rifle.

Have you heard about our Winchester Junior Rifle Corps? If not, ask your nearest dealer for a booklet explaining how any boy or girl under sixteen can earn a silver "Marksman" or gold "Sharpshooter" medal. At the same time get the proprietor of the store to let you "try on" a Winchester .22 rifle.

In case your dealer cannot supply you this information write direct to us.

The Economy Treatment SAVE-THE-HORSE

TRADE MARK REG'T.

Ossining, N. Y., R. No. 1, Box 92.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen—I write to tell you that my mare is going sound. Save-the-Horse removed the growth on her knee and cured her lameness.

It also cured a bad case considered to be Navicular Disease. She is going on that foot sound as ever.

I will never forget you or your remedies. Thank you for your kindness and advice, and will recommend your Save-the-Horse as a sure cure. I will send you another photograph of my mare showing that the knee is cured.

Yours truly, ALBERT JOHNSON.

IN TWO WEEKS

Glencoe, Minn.

Dear Sirs:—Now I have a horse I would not sell for $225. Four weeks ago he got kicked on the joint of hind leg; it got as large as a man's head; I treated for two weeks without any change. Then got a bottle of Save-the-Horse from my druggist, and in just two weeks no one can tell it ever had been larger.

Yours respectfully,
J. C. PAGGEN, R. 4.

Portland, Maine.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—Last October I purchased through Riker-Jaynes one bottle of Save-the-Horse to use on my driving horse, Dan Sox. Everyone of my acquaintances laughed at me. He had a blood spavin and had been lame for several months. He was never trained, but is the best road horse in Portland.

I started using Save-the-Horse and in five weeks' time he was all over his lameness and I have been working him every day. He goes as sound as he ever did in his life. He can step just as fast as ever, not one mite stiff in any way. I have since cured a cockle of two years' standing on a work horse.

A friend of mine has a valuable trotting mare that last summer had two large windpuffs come on behind. He had his horse in the barn six weeks. Half a bottle of Save-the-Horse cured her entirely. I remain,

Yours respectfully,
55 William Street. J. H. CAIL.

LAME TWO YEARS

Mill Creek, W. Va.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs: — Save-the-Horse Remedy has cured my mare of ringbone. She was lame for two years before I used it. I am very proud of it, and could say it was worth $50 to me.

Yours truly
D. T. SIMONS, R. F. D. No. 1.

HALF A BOTTLE CURES

East Foxboro, Mass.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—I used almost half a bottle on a horse that had windpuffs and cured him. He was lame in left hind leg—came out almost on three legs. I was told he could not be cured and less than half a bottle cured him. I remain,

Yours truly,
A. C. HARVEY.

West Acton, Mass.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—Some time ago I wrote you in regard to my horse, which had two bowed tendons on front legs. I have since used Save-the-Horse and his legs are now as well as ever, and he goes sound and good. I intend to race him next year. Yours truly,

W. C. GARDNER.

Harrisonburg, Va.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs:—It cured my mare "Queen" of a bad bone spavin about one year ago. She has never been lame since. I tried three or four different remedies—none did her any good, but Save-the-Horse set her right. Please send me your book, as I gave mine away. Yours truly,

G. C. DOWELL.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS. No scar or loss of hair. Horse works as usual.

SAVE THE HORSE IS SOLD BY DRUG GISTS AND DEALERS EVERYWHERE

For 21 years throughout the whole world it has stood up and "Made Good" under Every Test.

TROY CHEMICAL CO., Binghampton, N. Y.

The Owner-

of one of the most select and magnificently bred stables of saddle horses in the UNITED STATES has commissioned me to dispose of the entire stable.

—— INCLUDING ——

STALLIONS, MARES, AND GELDINGS

Horses

for the show ring, for the park and for useful vocations. Not only some of the most remarkable and promising prospects I have ever seen, but a stallion and a mare which have won some of the most valuable stakes in the country.

The Permanent Retirement

of the owner makes it possible for any one desiring horses which have been trained by one of the foremost trainers in the country; bred in the purple and right in every way, to secure them at a CLOSING OUT PRICE.

The Stallion

one of the most noted of all the Denmarks, **can be purchased at a price which will permit of his owner paying for him the first year in the stud.** He is, in addition to his show and breeding qualities, one of the few saddle stallions of this class that can be ridden with absolute secureness by any one who can ride anything. He is worth more as a pleasure horse, forgetting his enviable show ring record and breeding ability, than I am commissioned to sell him for.

Brood mares, gelding, fillies and colts at tempting prices.

PRICES NOT BASED ON SENTIMENTAL OR PROFITABLE FIGURES, BUT MADE TO ATTRACT QUICK BUYERS

If interested write for full information to

THE FUTURE OF CALIFORNIA FAIRS.

In some states the county fair, according to those well informed, is passing. The days of the great stock show, agricultural display, horse race and everything that has gone in making this the most popular form of entertainment for the rural folk, and which has resulted in improving the rural conditions of America as no other form of education has; has made the great herds of live stock and better farm products possible, in our opinion, will never be of the yesteryears.

The passing of the county fair in some sections has been made much over, but, thank goodness, in California the shoe is on the other foot. Here it is "The county fair is coming back" that we hear in every nook and corner of the state. In fact, the fair is just arriving at its proper destination here. It is not only coming back; it is going forward. Fairs, the like of which have never been known on the Pacific Coast, are now being successfully conducted in many counties of California. The rapid strides this state is making in the production of live stock is largely responsible. The realization of the value of fairs for the improvement of herds and flocks; for the betterment of crops and living conditions, has made the fair in California the rural man and woman's best thought-of institution. The advent of the agricultural college and the natural turn of the big business man of the city to live stock and farming has made fairs here possible beyond the fondest hopes of all the advocates of such form of entertainment.

California has never had the county fair that is coming. We have had good fairs, too. However, there is an era of rural progress under way here that has never been achieved in any other section of the country. Wherever one goes he finds a herd of pure-bred stock. The owner has an ambition to have his herd on exhibition at his county fair and ultimately at the state and district fairs. He is no slacker. If he is defeated he is going to know why and "come back" next year with that very thing—and win. If it is true that fairs are losing money in the old-established fair-going communities, it must be true that interest is being lost in their great rural life. If it be true, fairs are just coming into their own here, then it must be a certainty that interest is just taking hold in the progress of the farm. There will come a day, and not far distant—when the majority of counties in California will boast of a county fair. They will come, as they should, before the state fair, and the winners will compete there for the CHAMPIONSHIP CONCLUSIVE.

It has been demonstrated in Missouri, Illinois, Iowa and Kentucky; in Pennsylvania, New York, and wherever fairs have been conducted, that to have a successful fair the people of both town and country must be attracted. The public loves what has been aptly termed, the spice of life, Variety. In smaller communities, and to a certain extent in large communities, in addition to a romping good live stock show, an agricultural display and the pumpkin show and tractor demonstration, it has been conclusively demonstrated that a snappy race meet for the afternoon program and a horse show in the evening are necessary to make the fair a success. Just so, a race meeting in the majority of instances, without the other features is a mistake, and will result in financial loss and eventually a discontinuance of the fair.

GIVE A REGULAR BOOMERANG OF A COUNTY FAIR!

The old-time "punkin show" that horsemen in former years were so anxious to "poke fun at" is the only successful way to get the people in the gate and keep them there and bring them back with their neighbors next day. California, we believe, is coming to this. When it does, the live stock industry, the breeding and development of good horses, the prize ear of corn and bushel of wheat—all will be found to be a prosperous business. The fair will draw the crowd and the crowd will be satisfied. This is coming in California. The exclusive race meet, in the small town at any rate, is no more; the same is true of the exclusive "punkin show." It is time for every one to pull together and build fairs along these lines. Co-operate with your fair secretary, and with the breeder of the other kinds of live stock as well as crops. Boost, and fairs will soon be established successfully and permanently throughout California.

A scrub ram is expensive at any time but doubly so at the present high price of wool and lambs. A good ram has many times proved to be more than "half the flock." Many successful and progressive sheep breeders trace their start on the road to success to the purchase of a good ram. Sometimes the price of the ram has looked high but time proved it to be the cheapest and by far the best paying investment ever made.

✤ ✤ ✤

What is, to the public, a new scenic attraction for California is coming into its own with the increase of the fame of Mount Diablo, the mountain with the greatest vista in the world. As a result of the summit's being made accessible to the motorist by a scenic boulevard—few other mountain tops can be reached by motor—there has been a revival of interest in the peak, from which 35 of California's 58 counties can be seen in whole or in part without a glass.

ENTRIES IN HARNESS RACES AT SALINAS.

July 11 to 14, 1917, Inclusive.

First Day—2:24 Trot, Purse $500.

Sweet Bow (time allowance claimed), L. H. Todhunter, Sacramento; Howard's Comet, P. J. Howard, Alameda; The Demon, E. A. Stockton, San Jose; Great Policy, Simas & Brolliar, Hanford; Pegasus, I. L. Borden, San Francisco; Byron (time allowance claimed), W. G. Durfee, Los Angeles; Yoncalla, T. J. Ryan, San Francisco.

2:08 Pace, Purse $500.

Potrero Boy (time allowance claimed), C. F. Silva, Sacramento; Mack Fitzsimmons, Ben F. Jaggar, Portland (Ore.); Lock Logan, J. E. Montgomery, Davis; A. B. C., and Julia M., J. (Continued on Page 7.)

Harness Horses and Horsemen

EMMA M. SCORES IN MATINEE AT PARK STADIUM.

Bill Malough and his popular pacer, Emma M., had a big day at the Park Stadium speedway last Sunday. In the free-for-all pace the consistent side-wheeler took Bold Harry Aerolite into camp in a four-heat contest over the three-quarter-mile course. It was in the nature of a surprise as Bold Harry was figured as the winner. Emma M. finished second to the favorite in the first heat, but came along in the next three and beat out Bold Harry in duels through the stretch. The large crowd gave Bill Malough a big hand, as he is one of the best sportsmen who get in the sulky in the fun races.

"South America Shorty" Roberts made his initial appearance, but little Bradmont was not up to a hard contest and finished in the rear. It was suggested that Braddie did not understand the Spanish Shorty used.

Vallejo King, J. C. Welsh and A. Ottinger's handsome black, finally came out to trot a good race and he stepped off with the free-for-all pace in straight heats, reversing the tables on Yoncalla, that beat him last week. Charley Spencer did the driving. King Pointer scored his first win of the season to take the 2:18 pace. The summary:

First race, 2:18 pace:

King Pointer .....(H. Campodonico)	1	2	1	1
Victor Pointer .....(D. Keating)	2	1	3	3
Little Jack .....(George Conlan)	3	3	2	4
George W. .....(Frank Burton)	4	4	4	2

Time—1:39, 1:39, 1:39, 1:41.

Second race, free-for-all trot:

Vallejo King .....(Ottinger & Welsh)	1	1	1	
Yoncalla .....(T. J. Ryan)	2	2	2	
Milly May .....(Hanks)	3	3	3	

Time—1:38¾, 1:41, 1:38.

Third race, free-for-all pace:

Emma M. .....(William Malough)	2	1	1	1
Bold Harry Aerolite....(G. J. Giannini)	1	2	2	2
Bradmont .....(R. P. Roberts)	3	3	3	3

Time—1:35, 1:36, 1:37½, 1:39½.

OAKLAND DRIVING CLUB.

The Oakland Driving Club is furnishing some high-class sport in the shape of harness races at the old Bay View half mile ring at 18th and Peralta streets every Sunday, and the Fourth of July will wind up the game as the track will be filled with mud from the bay after that date, and the lovers of horses who are getting more enthusiastic every day, will have to quit, as there will be no place to race after July 4th.

It is a shame that Oakland has not a place for that kind of sport, for the public really enjoys it, for the crowds gather down there on Sundays and stand to see the races and also stay until the last heat is finished, under all these disagreeable conditions; and this goes to prove that a good horse race is appreciated.

The Oakland Driving Club is going to make another attempt to get a track. We have a good many green horses in Oakland that would be developed if a place could be had. I know of several that would be very fast horses if given a chance.

I have a five-year-old horse by Lord Alwin that has only been pacing two weeks and I know he will be very fast if I can go on with him. I put the straps on him twice and he can show a 2:20 gait now. It will be a shame to let up on such a horse.

We had another meeting to arrange for July 4th races and expect to wind up with a very good card. We have horses available for six races. Following are the results of Sunday's races:

Free-for-all Pace:

Shorty .....(Al Hanks)	1	1
Grand W. .....(A. L. Hinds)	2	2
Little Dick .....(H. Olsen)	3	3

Time--1:13, 1:08.

2:20 Class:

Allegro .....(G. Schreiber)	1	1	2
Oakland Boy .....(Geo. Hahn)	2	2	3
Cleo Verne .....(Mrs. Carlisle)	3	3	1

Time—1:15, 1:12, 1:13.

2:30 Class:

Queenie Direct .....(L. T. Carey)	3	3	1
Sleepy Dick .....(W. Rutherford)	1	1	3
Starlight .....(C. Gabrielson)	2	2	2

Time—1:16, 1:12, 1:12.

2:40 Class:

Andy O. .....(W. M. Ray)	2	2
Rhoda .....(A. L. Hinds)	3	3
Minnie H. .....(Barney Hanley)	1	1

Time—1:23, 1:21.

The free-for-all pace was the feature event, and Shorty had all the foot. Little Dick had to be contented with third place both heats. Mr. Hinds' Grand W. made a grand showing, finishing second both times. Mrs. Carlisle's Cleo Verne acted bad in the first two heats, but came back in the third with her neck bowed and won. Mr. Hahn's trotter did very nicely in this race.

W. Rutherford's Sleepy Dick won the first two heats and then dropped the third by a bad break to Queenie Direct. Old Starlight was second and made a good showing. Very easy for Minnie H. in the last race.

A. S. HANKS,
Sec'y Oakland Driving Club.

392—8th St., Oakland.

McLees, Lindsay, Lindsay Bell; Marsh Thompson, Ventura, Zolock Zar; Chas. F. Silva, Sacramento, Eloise Dell; W. G. Durfee, Los Angeles, Virginia Barnette.

The Fresno races filled remarkably well and the Directors were not at all niggardly in deciding to allow the 2:08 Trotting Class to go with but five entries, although the purse is much larger than has been offered in the past for that class.

♣ ♣ ♣

It was left to J. P. McConnell of Santa Rosa to make the first entry for the Riverside race meet to be held in connection with the Riverside County Fair, October 9-13. Mr. McConnell entered Potreress with a winrace record of 2:13¼, sire Potrero Bay, in the 2:11 pace, the first race of the second day of the meeting.

Thoroughbred Matters

E GOODMAN'S KINNEY WINS AT LATONIA.

Latonia, June 23.—Kinney, Joe Goodman's four-ar-old Dick Welles—Lady Strathmore gelding, ac-unted for the Merchants' Selling Stakes, the fea-re offering at the Mildale course this afternoon, d although the purse was worth $2,380 to the win-r, Kinney's owner lost considerable of this amount, he was bid up from his entered price of $1,300 to ,505, at which figure he was retained.

Tom Hayes, breeder and former owner of Kinney, d the bidding, as it was he who lost the horse via claiming route to Goodman recently. In retal-tion for the bidding up of his horse Goodman aimed J. J. Murdock, who finished second, from F. Schorr, for $3,880.

An enormous crowd turned out for the racing today the program was made up of evenly balanced lds, and while the stake race was the chief attrac-on from a monetary viewpoint, there were several her events which could be classed as features. The ing was fast and the weather ideal for the sport.

Thirteen horses contested for the stake, with J. J. urdock the most favored, but second was the best could do, being beaten half a length by Kinney. ady Rotha finished third.

Latonia Notes.

Word has been received from Chicago that Jeff ivingston has recovered from his recent operation d has left the hospital. He expected to see one of is horses perform in the Independence Handicap at atonia on July 4.

The crowd was only a few short of Derby Day, but course, the wagering was nothing like that of the ig day, for the accommodations were not as ample.

Books for the Windsor meeting arrived and were istributed to horsemen by Frank J. Bruen.

Gene Elrod was missing from the track. He had iked to Canada to make arrangements for the mu-al betting up there.

Many of the horsemen racing here have signified heir intention of shipping to Grand Rapids and take art in the meeting at Comstock Park. Among those ho are going from here are W. Martin, Gallaher ros., T. L. Pierce, J. Gass and T. Scott. Joe Murphy ays there are already 100 horses on the grounds nd that he will have plenty of racing material. Many f the jockeys here will go there to ride.

Ross & Looney, proprietors of the big racing sta-le of that name, will ship their horses to Empire ity at the close of the present meeting.

J. B. Goodman surely is a good man with a horse. He has claimed many a one and every one has won or him. The latest ones he grabbed were Kinney nd Gipsey George, and both of them have won races or him. Kenney was claimed at Lexington, and Kinney won six races, including a stake. T. P. Hayes, the former owner of the horse, advanced him fter he had won the stake yesterday from $1,300 o $2,500, but Goodman put up the extra $5 and kept im. Goodman then turned around and took J. J. Murdock, as above stated.

The Merchants' Selling Stake yesterday was worth $2,380 to the winner. This is the largest amount the winner has received from this stake since it was naugurated in 1884.

Mr. Geo. W. Wingfield, writing under the date of June 29, says: "From information received from England today, I am inclined to think that there is no doubt but that racing will be continued there through the war."

✤ ✤ ✤

The spring meeting of the Westchester Racing Association, which began at Belmont Park May 29 and came to an end June 16, embraced seventeen racing days, during which one hundred and two races were decided and $131,088, a daily average of $7,711, was distributed in stakes and purses. August Belmont was the leading owner, his horses winning $21,075. A. K. Macomber was second on the list with $13,938 to his credit.

✤ ✤ ✤

Preston Burch has been looking up recent successes achieved by American-bred horses and American turfmen abroad. The Grand Steeplechase International, two and one-half miles at Milan, May 7th, was won by the American-bred gelding Not Guilty, by Ormondale out of Verdict. He carried top weight, 165 pounds, and won by six lengths. At Chantilly, France, the same day, the first race on the program, a nine-furlong selling dash was won by Valhalla, with 133 pounds up. Valhalla is by Ethelbert out of Lady of the Vale. The second race on the card at a mile and a quarter was won by Masquerade, a three-year-old filly, with 128 pounds up. This filly is Maintenon out of Maskette. The third race of the day was at a mile and a quarter and it was won by Sandy Hook, a three-year-old colt by Rock Sand out of Tangle. He was carrying 128 pounds. Sandy Hook belongs to F. R. Hitchcock and Masquerade to W. K. Vandervilt, both of whom have been frequent winners over the Chantilly course.

"Fruit Cake" Is Best at Ottawa.

Ottawa, Ont., June 23.—Fruit Cake, the best filly that Dick Welles ever sired, showed another sterling performance at Connaught Park this afternoon when she won the Chateau Laurier Handicap, a dash of a mile and a sixteenth in which she beat a field of the best horses racing here. She conceded lumps of weight to everything in the race and after sprinting into a commanding lead the first furlong was rated under slight restraint. Fruit Cake hung up a new track record when she took two and two-fifths seconds off the previous mark for the distance. While at the post Runes was kicked inside the forearm of the off foreleg and came out of the race very lame.

The stewards announced today that they had suspended Jockey Mink for what they considered a bad ride on Iron Cross in the race in which he finished second to Priscilla. Since his trensfer to the Captain Press stable Iron Cross appears to have gone back. At all events he has never shown the races he did at Toronto when in charge of Mr. West.

James Arthur left for Hamilton last night to give the good three-year-old Bondage his final trial for the Hamilton Derby. Hart Dernham remained over to look after the shipment of the Arthur horses, which will leave here tomorrow night.

W. A. Burtschell ships a division of his stable from here to Montreal to be raced at Mt. Royal. He will also race a couple of horses at Hamilton and then ship his entire lot to Grand Rapids, Michigan.

THE SOUTHAMPTON HANDICAP.

Jamaica Race Track, L. I., June 23.—More than 12,000 persons saw Hourless, August Belmont's speedy brown colt, make a runaway race of the Southampton Handicap here this afternoon. He made a show of his field, winning by six lengths from Corn Tassel, which defeated Belle Desmond, an added starter, for the place by three lengths. The time for the mile and a sixteenth was 1:45 3-5, which is one-fifth slower than the track record.

Hourless opened at 1 to 5 in the betting, and, despite the sad experience of George Smith's backers yesterday, when the Sanford colt was defeated at odds of 2 to 5, there were plenty of takers, so that at post time the best to be obtained on Hourless was 1 to 7.

Hourless was caught unprepared when the barrier went up. He was on the outside of the field and before he got away Corn Tassel was lengths in the lead, with the others spread out, so that Hourless had to make a wide detour in order to get to the front and obtain the rail. But it was an easy matter for the Belmont colt. Before the field had rounded the first turn he had shot to the front.

The rest of the way was just a gallop for the favorite. After gaining the lead and a clear field Butwell had nothing to do but sit tight. He always had the colt under wraps and Hourless could have gone much faster if he had been pushed.

Jamaica Notes.

Superintendent Maher, of the Jamaica race track, said yesterday that it would take about $5,000 or $6,000 to rebuild the Shields' stable, which had been burned there. He also said that there appeared to be an excellent prospect of catching the drunken incendiary who was responsible for the fire.

Walter Jennings has shipped four of the Macomber thoroughbreds back to Kentucky. They were shipped Friday.

W. L. Oliver left with his horses Friday night for Hamilton, Canada.

A. K. Macomber, who recently donated a young imported stallion to the Kentucky Breeding Bureau, yesterday made one to the New York public stud. This one is the three-year-old Caramel, by Star Shot —Miss Granville. He was bred by John E. Madden at Hamburg Place and is a half brother to that good campaigner, Little Nephew.

Old Rosebud is in Frank Weir's stable at Aqueduct, and he is looking wonderfully fit and well.

BLUE BONNETS RACING STATISTICS.

The Montreal Jockey Club's meeting at Blue Bonnets, which began June 7 and came to an end June 14, embraced the customary seven days of racing, during which time forty-nine races were decided and $39,085 was distributed in stakes and purses. The average daily distribution amounted to $5,583. H. C. Bedwell was the leading owner with $3,110 to his credit. W. Stockton was second with $2,430. The following owners were winners of $1,000 or more each:

Owner.	1st.	2d.	3d.	Amt.
H. G. Bedwell	4	1	3	$3,110
W. Stockton	4	2	0	2,430
G. M. Hendrie	2	0	1	2,095
W. J. Press	2	0	3	2,075
J. P. Jones	1	0	1	1,475
E. W. Moore	2	2	0	1,470
E. T. Colton	1	0	0	1,425
J. S. Tyree	2	2	0	1,320
C. A. Crew	2	1	0	1,155
E. McBride	2	1	0	1,150
W. Smith	2	1	1	1,145
Brookdale Stable	2	1	0	1,085
T. F. Bornman	2	0	0	1,025
J. Whyte	2	0	0	1,000

Golden Gate Thoroughbred Breeders Take Action.

The first move to block James W. Coffroth's plan to be the turf Czar of the Far West was taken last Saturday when the Golden Gate Breeders Association made formal application to the Jockey Club of New York for a charter taking in the entire Western racing country. At a meeting attended by Charles W. Clark, president, and James C. Nealon, secretary of the association, with Fred W. Kelley, secretary of the Pacific Coast Trotting Horse Breeders' Association, it was decided that the California thoroughbred breeders should take immediate action in controlling the turf sport.

Coffroth adopted a rule a couple of months ago setting forth that all racing associations west of Chicago, which included the California State and all the district fairs, would have to secure a sanction from the Tijuana Jockey Club to hold running races, or the horses competing at the unsanctioned meetings would be barred from the Tijuana track. Coffroth reserved the right to appoint stewards, charge for the sanctions, and, in short, be the dictator of how the game should be conducted.

California horsemen went up in arms over the unexpected and bold move on the part of the former boxing promoter. They argued that Coffroth, with a race track and association that are not even in this country, was trying to tell the California Fair directors how their speed program should be handled. Two running races daily are programmed on the eighteen meetings booked for the fair and sulky circuit, and the fair people bucked on going to Tijuana for a sanction.

The Golden Gate Breeders were equally as indignant, and their action at this meeting is the first step taken to block Coffroth. If the Jockey Club of New York, the parent turf body in the United States, grants the charter it will mean that the local association will be in a position of doing some dictating. They could likely force the Tijuana Jockey Club to apply for a sanction, and if Coffroth refused, the Jockey Club of New York could bar out horses from racing on the Eastern tracks.

The breeders would have some strong support on their side. Just what Coffroth will do in view of the latest turn of affairs remains to be seen. He will likely wait until the Jockey Club acts. At present the Tijuana Jockey Club head is in San Diego making arrangements for the opening of the Lower California meeting on Thanksgiving day.

MORE IMPORTS OF BLOODSTOCK.

As I write the above there comes in the news that the exceptionally fine four-year-old, Atheling, has been bought by John Dawson for the Nevada Stock Farm, Inc., owned by Mr. Geo. Wingfield of Reno, Nevada. I have more than once described Atheling as the finest of all Desmond's sons, and he is a right good one, too, as he has shown in public in his two-year-old and three-year-old seasons, also in his only race this year. Moreover, he is rarely bred to make a stallion, being by Desmond out of Wood Daisy, by Cyllene, her dam, Mountain Daisy, by Ayrshire out of Light of Other Days, by Balfe. This is a very valuable branch of No. 2 Family, from which Prince Soltykoff bred so many good winners, and it is to be noted that Hurry On, the champion of last year, comes of the same family. John Dawson is also buying several mares for the same destination as Atheling. Straws show how the wind blows, and there will be a general clearing out or shooting off of bloodstock if the present ruinous situation is maintained. This morning I have been asked to obtain a freight quotation for 100 head of bloodstock to Australia. So runs the world away!—[London Sportsman.

Atheling's pedigree is herewith appended:

ATHELING	DESMOND (16)	St. Simon (11)	Galopin (3)	Vedette (19)	
				Flying Duchess (3)	
			St. Angela (11)	King Tom (3)	
				Adeline (11)	
		L'Abbesse de Jouarre	Trappist (1)	Hermit (5)	
				Bunch (1)	
			Festive (16)	Carnival (14)	
				Piercy (16)	
	WOOD DAISY (2)	Cyllene (9)	Bona Vista (4)	Bend Or (1)	
				Vista (4)	
		Mountain Daisy (2)	Arcadia (9)	Isonomy (19)	
				Distant Shore (9)	
			Ayrshire (8)	Hampton (10)	
				Atalanta (8)	
			Light of Other Days (2)	Balfe (43)	
				Meteor (2)	

Atheling is a beautifully balanced and in all respects most attractive bay colt, foaled on February 20, 1913. He made a successful debut in the Hopeful Stakes wherein he proved a neck too good for Ali Bey (sold for 2300 guineas) and five others, and then beat the subsequent One Thousand Guineas winner Canyon by a head for the Dewhurst Plate, with Kwang Su and seven more behind. Last year Atheling confirmed his previous form with Ali Bey in the Midsummer Stakes at the Newmarket second July fixture, this being his only success as a three-year-old; but racing has been so curtailed that the colt's opportunities to further distinguish himself were very limited. In his only race this year he showed capital form when only failing by a head to give 17 lbs. to Bramble Twig in the Friday Welter Handicap in May.

SADDLE and SHOW HORSES

NOTES OF THE CHICAGO HORSE SHOW.

[Observed especially for the Breeder and Sportsman by "Old Chi."]

I am glad to supply you with a little gossip of the show. The real true impression of one you seem to think "knows." I give you what little information I can straight from the shoulder, of the horsemen, unbiased; therefore, it does not read good for the "big push."

There was the greatest lot of three and five gaited horses here that ever came together or that will come together this year. All classes were wonderfully filled and the horse that could win here in the open class is eligible to win anywhere in the United States.

The judging in the heavy harness and walk-trot classes was, I think, the most satisfactory I have seen in some time. "Bob" Moreland had things much his own way with McCray Bros. playing second fiddle. The rest of the exhibitors therefore were compelled to take the "leavings." In some innings I think Moreland must have hummed the tune: "Well, there ain't a-goin' to be no leavin's when we Kentuckians get through." Miss Long of Missouri was persuaded, on Monday of the show, to bring her stable for Thursday. Many of her horses were turned out, but were quickly shod and brought on to help the show out. She brought four harness horses, two roadsters, and five saddle horses, including "The Major," Joan Sawyer, Martha LaMar, Louise Lovely and Chloe Malone. Louise Lovely is better known to devotees of the Middle West as Cleo Grand McDonald. She is a bay mare and was exhibited in five gaited classes several years. Was retired to the matron ranks and this spring when she showed not to be in foal Hook brought her out as a three-gaited mare. She is not bad, either.

Mr. Schilling, of Chicago, showed Garrard Hunt, the handsome young stallion he recently sold to Mr. Lehman, one of Chicago's big merchants, in the combination class, and was fourth in the awards. This was rather good for a young horse as the horses placed in front of him were the best in the land. Dinks Stover, owned by "Jerry" Parsons; Nancy Walker, owned by John R. Thompson and Woodson Rose. However, what made Schilling feel better was to see what was placed behind him. There were ten excellent horses worse than fourth.

Much comment has been made over the defeat of My Major Dare. Supposed to be invincible. You ask me for my honest opinion and I shall give you that. I do not mean to criticise anyone—the decision was the judge's opinion—this is mine. My Major Dare made a very good show; not as good as usual, but not bad by any means. Cascade certainly made as many mistakes as did the Major. The good Missouri gelding, Johnnie Jones, made as perfect a show as a horse can make. His rack, of course, has never been—in my opinion—a real true saddle horse rack; a little too pacey. Mat had those two stripped, and it must be close when one goes to that trouble, and after stripping them turned the Major down. I knew that show was close but when he stripped them I felt confident Mr. Hook would ride out with the blue. In the evening these three showed again. Hook rode Major as he has never ridden before. He was wild and so was the stud; made a perfect show and I did not consider it close in this event; however, Cascade was placed in front again. I could not see it that way; yet, I did not approve of the kick registered by the rider. That does not help the game any. The sooner we all learn to take a good beating the more shows there will be. Judges are different and when one enters a ring one is compelled to accept the verdict of the jury.

I was very agreeably surprised in the Parson stable. I remember well the glowing accounts you gave these horses when Mr. Parsons bought them; also what you said of their Missouri show that spring, and I agree with you. Their walk-trot horse is a star and Crimson Chief will be a much better horse with a few hard shows under his belt. He is one of the greatest racking horses now in the entire country. Their mare, Fair Maiden, is also a very high-class creature and Quin Davis, who is doing the riding, is a splendid horseman. This stable will be seen through Missouri and Kentucky this year. They will be trained and stabled, I understand, at the Missouri State Fair Grounds.

When a stable of saddle horses is brought from Vermont to the Middle West to show, one realizes the growing popularity of this type and of the shows. Why don't you send some of your California horses, which you have been raving about since going there, back here and let us compare them?

The New Yorker, Myron Oppenheim, had a big stable here. He kept his recently acquired gelding, Jack Barrymore, in the barn, and wisely too, I think, for Moore does not seem to be getting along with him. He was entered but not shown in either three or five gaited classes. Is he really all that has been said of him? Some wonder about this.

Bob Moreland is in a class by himself as an exhibitor and horseman. He has forgotten more, I think, than all the others know.

Your good friend Mat. Cohen is smart, brusque, and gets by any place on earth. He does not make any excuses for anything. Yes, I am sure he will be Governor of Kentucky some day.

Robt. McCray, or rather, the McCray Brothers, are coming dealers and Bob is a first class exhibitor.

Quin Davis is a very tasty figure on a horse and he can ride them, too.

A. W. Atkinson, owner of one of the most notable show stables in America, and incidentally owner of the Victor Talking Machine Co., and "Jack" Goodwin, manager of his stable, were interested visitors. They did not bring on their stable, however.

Dell Holeman, formerly of Blades & Holeman and more recently with Houchin & Anderson, was a visitor. I understand he has severed his connection with Houchin & Anderson.

Ed White, manager of John R. Thompson's stable, had mistortune in having his Lord Brilliant pull a shoe and with it much of the hoof. The horse was just getting into the greatest form of his life and would have been a victor this year. Now, however, he will be out of the running for the remainder of the season.

John L. Bushnell, of Springfield, Ohio, one of the most popular sportsmen interested in the game, was, to the delight of the crowd, very successful with his stable of harness horses. He has a new pair of small chestnuts that look and act good. They were always near the top.

Miss Loula Long was, without doubt, the most popular exhibitor at the show. The horses had been turned out and had to be brought in and shod on Monday of that same week. I do not believe there is another stable in America that could have made such a remarkable showing under the circumstances.

John Hook felt bad when the ribbon was tied in the stake and Cascade went out with the blue; but he was mad clear through, when they were tied the same way in the open class, after the Major had made such a sensational show. When the decision on performance is so close, that the three top horses have to be stripped, the Major certainly was the horse on conformation.

Apparently ideas regarding Johnny Jones have changed again, for he was shown in the five-gaited stake. So, I guess, no more three gaits for Johnny; it was an impossible dream anyway; if they had hammered him down to three gaits he would only have had bad ones and nothing else. Now, I suppose, Oppenheim will play equal stars with him around the Middle West fairs.

MRS. PRYOR COMBS

Who, before her marriage last week to the prominent young Kansas City man, was Miss Loula Long, daughter of Mr. and Mrs. Robert A. Long, of Kansas City, and unquestionably the most popular horse lover in America.

✣ ✣ ✣

The Breeder and Sportsman has received news of the marriage, last Saturday, of Miss Loula Long, America's most popular and fabulously wealthy horse lover, to Mr. Pryor Combs, son of the celebrated Kansas City minister and one of the leading young professional men of the Southwest. While the news will come as a genuine surprise to friends and admirers of Miss Long all over the country, her more intimate friends have been buzzing about th announcement for several months.

The two families are very intimate and thoug the Master of Commerce, as R. A. Long has come t be known, has been more or less selfish over th affections of his favorite daughter, it is known tha Mr. Combs was his choice of the admirers of Mis Long. It is said that Mr. Long remarked not lon since, "If I have to give her up I would rather se Pryor have her than any other man," and so, as h also is a great favorite with the mother of the brid as well as all her friends, the wedding has naturall been made much over and the occasion of much jo in this particular circle in Kansas City.

Naturally, the first question which will be asked is "Will Miss Long give up her horses?" The write takes pleasure in assuring her friends that she wil not. Not long ago she informed me that should sh "annex a husband" she would continue to love Long view Farm and the fine horses she has establishe there and when I remarked it would not be right t say, "The stable of Mrs. Pryor Combs was success ful, etc., etc.," Miss Long informed me she woul show her horses under the name of Loula Lon Combs, or whatever name she might, at some futur time, select. At that time, of course, she did no use any particular name.

It is given to relatively few people to be so widel popular and universally admired as the bride of las week. Miss Long is not only interested in horse and Longview Farm, which, by the way, is the mos magnificently equipped establishment in the United States, but is just as keenly interested in religious affairs and charitable work. She, perhaps, has done more than any other woman, for the poor and unfortunate of her home town.

THE DISPERSAL OF A BRILLIANT ARRAY OF HORSES.

What is, in the opinion of the writer, one of the best stables of saddle horses in the country, combining the utmost in breeding and individuality, has been placed on the market. The owners, for very sane reasons, do not at this time desire to have their names mentioned in connection with this sale; and as per the announcement on another page, have prevailed upon the editor of the Breeder and Sportsman to dispose of them.

This stable includes one of the grandest bred and looking saddle stallions it has ever been my pleasure to see. A horse bred along the line of what is, by comparatively recent developments, the most sought-after blood in the breed. A horse of wonderful conformation and attractiveness, possessing the qualifications of all that can be desired. He has proven a really good breeder; the winner of some very important stakes in Kentucky and in addition to this, can be ridden every day in the week, in town or country, by either a man or woman. In fact, he has been used extensively by a lady and has been shown on numerous occasions by ladies and in ladies' classes.

There also is a mare, bred in the most approved fashion, which is an ideal ladies' mare. The right size, of the proper conformation, perfectly reliable, safe and sound. A girl or woman can ride her any place that a horse can go. She has beautiful action, speed and manners; is a show mare capable of winning in the best company, and certainly one of the most pleasant things to ride a person ever crossed. This mare is young, sound and ready to show or use at once.

There are three or four very fine young things—a stallion, two geldings and a filly—also for sale, which I believe will make just as good horses as the above described; a full aged mare, a brood mare or two and one or two using horses complete the stable. I would like to see some good horseman get these youngsters and give them the benefit of his ability. The stallion should be purchased by some one who desires to do a successful breeding business and have a horse to use and show. He will, I think, pay for himself the first year in almost any community. He will be a credit to any stable in Kentucky, Missouri, California, or elsewhere. There is one brood mare in the lot, now in foal to this stallion, which has produced two or three of the most notable show animals of the present day. She is breeding regularly now and will soon foal.

The owners do not expect to get their worth. They are very anxious to dispose of them at once and have commissioned me to make the sale; to name the price, and have given me free rein. This means that the horses will sell. They are not going to be priced on sentiment or on what they cost the present owners; but for what I really believe will sell them quick. I do not know of a time, in my rather varied experience in the saddle horse business, when such horses have been offered in this manner. I don't know what the horses have sold for in former years, nor do I care. I am going to sell them and the buyers will get bargains. These horses will not have to wait long for buyers, so those interested should lose no time in communicating with me at this address.

JUMP CAUTHORN.

Trim the Colt's Hoofs.

Hoofs of colts should be trimmed in case they become crooked, or larger on one side than the other. If they are neglected, the hoofs may crack and lameness will result. A knife or rasp may be used for trimming them.

Notes and News

Secretary Chas. W. Paine of the State Agricultural Society is entitled to great credit for the success he attained in securing such a great entry list for the State Fair races this coming September. The events were well advertised and entry blanks mailed to nominators throughout the State with the most gratifying results.

✤ ✤ ✤

Rockport Ripples.

The following sulkies were used at the Rockport race meeting last week.

	1st day	2nd day	3rd day	4th day	Total	%
Houghton	11	11	11	9	42	62
Nearest competitor	3	3	3	4	13	19
All others	3	3	4	3	13	19
	17	17	18	16	68	100

In other words there were over three times as many Houghton sulkies used as any other make and almost two times as many as all other makes combined.

Moberly, Missouri, a member of the Missouri-Kansas Grand Circuit, has discontinued its fair this year. Moberly wanted to go on with the fair; but with Marshall, Mexico and Columbia fairs on the circuit off, Col. Dingle realized it would be impossible for him to give a successful meeting. This makes seven of Missouri's recognized county fairs, institutions of long and successful standing, which have been called off this year. Seven fairs of the caliber of the Moberly, Mo., fair in most states would be an alarming thing for horsemen; however, this leaves 48 good county and district fairs in the running in "Old Mizzou" besides the great Missouri State Fair, the St. Louis Agricultural Fair and the American Royal Live Stock Show.

Interesting Comment: Enforcement of the Rules; Entries For the Next Transylvania.

"Suspended for thirty days for not trying to win a race," is the first penalty announced by harness racing judges this year, an incident which verifies the prevailing belief that track managers who have the welfare of sport at heart will spare no efforts to help improve racing under the uniform rules and bear their share of getting the full benefit from a system which is now in force for the first time in harness turf history.

This rather severe penalty for a starter was imposed on Dan Seeley, driver of the Kansas starter, Winnotoma, for not trying to win the 2:18 trot on the opening day of the Rockport, Ohio, meeting, the honor therefore of giving early and fair warning to race drivers that clean racing is the rule for the season belongs to the men who presided at the judges' stand.

To what extent this, the first penalized driver of 1917, used his pulling ability to prevent his mount from winning has not been given in detail, yet the punishment itself and the fact that all bets were also declared off on heat and race proves that the judges were not asleep.

While the report of a penalty almost at the very start of the racing season will not be cherished by well-wishers of the sport, yet few will fail to consider the incident as an indication that, although it took years of argument and efforts to bring about uniform and mandatory racing rules by the men in charge of the two governing bodies, track managers will not fail to do their share for the expected success by their strict enforcement of the rules.

✤ ✤ ✤

Trotting horsemen have often wondered why a certain Western turf weekly has never missed the slightest opportunity to severely criticise the secretary of the National Trotting Association, and carried this on persistently at all occasions, until the puzzle was settled recently by the publication itself. It appears that over twenty-five years ago, Mr. Gocher, then a private citizen, "tried to freeze out" the same paper, a sort of (apparently) perpetual grudge.

"I am very much pleased with The Harvester," writes Paul Kuhn, of Terre Haute, Ind., present owner of the former champion trotting stallion in a personal letter to a friend. "He is really a much handsomer horse and a finer individual that I thought he was, not having seen him since his racing days, and I think he has developed wonderfully." Mr. Kuhn also adds that ten mares have been shipped in up to last Tuesday and as six of these went direct from Curles Neck Farm, others will also be mated with the stallion before his stud season is declared closed.—[A. G. Asdikian, in Morning Telegraph.

Perhaps no better and more select field of trotters were ever named in Lexington's trotting classic, the Transylvania, than the twenty listed for the next event. The fact that changes in the list can be made again in September, is an extra evidence that a fine field of final contenders will answer the call next October. At least half a dozen of the present nominees have shown better than 2:05 speed, while, with the exception of one, all are either fresh from last season's campaign or have extreme speed trials. Of the twenty, only two are eligible under time allowance rules, Ross B. 2:05¼ and Lizzie Brown 2:05¾, the former having a 1916 winrace of 2:05¼ to his credit.

✤ ✤ ✤

BEST POLICY.

Mr. R. O. Newman of Visalia sustained a severe loss in the death of his good horse Best Policy which died on the 29th ult. Best Policy was one of the best bred horses in the world. Sired by Allerton 2:09¼ out of Exine by Expedition (sire of Exalted 2:07¼, Bi-Flora 2:09¼ and Bon Voyage 2:08), next dam Euxine (great brood mare), daughter of Axtell and Russia, a full sister to Maud S. 2:08¾, he was a great acquisition to the trotting horse interests of this coast, and at the time of his death was just beginning to show his superiority as a sire of extreme speed.

✤ ✤ ✤

Bell Basler 2:20, by Robert Basler, dam Peerless Maid by Strathway 2:19, foaled on June 9 a bay filly sired by Best Policy.

VANCOUVER, B. C., ITEMS.

Arriving in Vancouver today I finished my business; then met Ed Burgoyne, owner of Bon Guy 2:09¼. Ed is high in his opinion of Bon Guy, and I believe he has a just right to be, for Bon Guy is in fine fix after a winter of good daily exercise to a Bailey buggy and an occasional brush. Last week Bon Guy won a matinee in 1:08 for half mile heats and last quarter in :32½, showing that he has his speed. His legs and feet look good and neither iodine nor any sort of dope has been on them since last fall. W. C. Brown took me to lunch at his club. After lunch we again met Burgoyne and took a motor ride out to Minoru mile track to visit Frank Loomis. Just as we arrived Mr. Loomis was finishing a workout on Frank D. Nichol 2:20¼, the big bay son of Cresceus 2:02¼. Frank D. is going good and while he has not been a fast mile yet, at the end of a mile in 2:32 he can sprint the last eighth in 16 seconds. Mr. Loomis has eight head. One that especially takes my fancy is a little granny of a bay mare named Caress by King Patchen, a son of Mambrino King, and out of M. S. Rose's old-time pacing mare, Carrie S. 2:17, by Altamont 2:26. I knew Carrie S. when it took a good pacer to beat her and Caress is a duplicate of her dam in type. Mr. Loomis speaks highly of Caress; says she acts like a good pacer. Her best mile this year is 2:30.

Red Squirrel is a chestnut dude by Bland S. 2:03¼, dam Chipmunk by Copo de Oro 2:01, and this red scamp is a trotter; has been a mile this spring in 2:40. Red Squirrel started out as a pacer but has changed. He is a perfect individual and has a nice way of going.

Kinney Patchen is a five-year-old bay gelding by Bonnie McKinney, dam by King Patchen. This horse is a very elegant trotter. Mr. Loomis likes him. His best mile this year is 2:38.

Bland M. is a bay pacer by Bland S. 2:03¼, dam Nellie Wilkes 2:16, half sister to William 1:58¼. Now here is one that has a right to be fast, and while only a baby horse has been a mile on the pace in 2:55 and does it nicely.

Nigger Boy is by Glendor 2:11¼ out of a King Patchen mare. This three-year-old has been a mile in 2:46 on the pace and is a good looker and had a real race horse for a sire. I don't know much about his mother.

Mr. Loomis has had sickness in his stable; this and the late spring has kept him back, but it's a cinch that Loomis will be close up when the first race is over.

Mr. W. C. Brown's horse, Prince Malone, has been a very sick horse and is just rounding to. It's to be hoped he will improve, for W. C. Brown has been a good owner to Prince Malone.

Robt. Dixon, of Carrie S. fame, is at Hastings Park, the association half mile track. Bob has a very classy four-year-old gray filly; one he bred and raised. She is out of the fast pacer Lady Patrick and sired by that very good, game and fast pacer, Dr. S. P. 2:06. She is a pacer and a nice one. She has been a mile in 2:30 for Bob so far.

Bob also owns a nice green pacer in the five-year-old gelding Del Marsh, by Belmar, son of Moko, and out of the Eastern Canadian race mare Delbars 2:11¼, by Monbars. This is a fast pacer. His fastest mile is 2:20.

John Foster, of Victoria, B. C., is here with—

Lady Tango by Belmar; dam Delbars 2:11¼ by Monbars; an extra fast pacer, a game one and a great looker.

A bay pacing stallion by McEwen; this bay destroyer is a product of Tennessee, and while this is a fast steed he has been contrary. I hope he will do honor to his good breeding this year,—pace fast and behave, for Foster is a good owner.

Things at the Exposition grounds are in good order. A big matinee is to be held on July 2d. I hope to be here to see the fun, for I always enjoy myself here.

Geo. Hardy is breaking his two-year-old Bonaday filly out of Silk Cress by Cresceus. This is an elegant looking and well bred filly and owner Hardy is a booster of the game.

Mr. Rollston, the hustling secretary, is enthusiastic over this year's prospects, notwithstanding the hardships caused by the war.

Horsemen here are pulling together and boosting the game, and that's what the game wants.

C. A. HARRISON.

June 27, 1917.

The most sensational performance of the half mile track racing to date is that of the bay pacing mare The Pointer Queen, which won a heat at Mt. Clemens in 2:07½. The bay mare is owned by R. J. MacKenzie, the California-Canadian sportsman, also owner of such well-known thoroughbreds as Buckthorn and Leo Skolney. She is in the stable of Dick McMahon and is one of the few free-legged pacers in the stakes on the half mile tracks. The big majority of the pacers racing on the two-lap tracks wear the "Indiana harness," and there are those who predict that The Pointer Queen will have to be thus equipped, as she is inclined to make breaks. In her winning heat at Mt. Clemens she got off in front and never was headed in the mile, finishing rather easily. She looks like a coming two-minute mare over a mile track, and she will be given the chance, as she is named in early-closing events on the "raging Grand," including the Blue Grass Stake for 2:09 pacers at Lexington.—[Tom Gahagan.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July2, 3—Vancouver, B. C., Can. Vancouver Gun Club, Chas. Bowers, Secretary. "Old Policy."

July 23—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 10, 11, 12—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Tuna Club Tourney.—The Tuna club of Santa Catalina island has made its first official announcement of its annual summer tournament. This is the nineteenth annual tourney. The official closing date is September 30.

On the day after the closing of the annual summer tournament, or October 1, the annual winter tournament will be officially opened. This event will remain open until April 30.

There are forty-three prizes up for competition this year. This list includes medals, gold, silver and bronze; beautiful loving cups, reels and tackle.

These prizes will be given for tuna catches, both the largest caught on heavy tackle and the largest landed with light tackle. Prizes will be awarded for catches of tuna, swordfish, spearfish, giant bass, white sea bass, yellowtail, albicore and dolphin. If an angler brings in any one of the above mentioned fish that exceeds the present record there will be an extra prize in store. The latter prizes are put up in every case by the present record holder.

Following is a list of prizes to be awarded this season and classes and catches for which they will be given:

For tuna—McMillan medal, Burns cup, Club medal, Earlscliffe cup, Banning cup, Brock cup, Morehous cup, Coxe consolation cup. For swordfish and spearfish—Hugo R. Johnstone swordfish trophy, Victoria Alden medal, two Griffith cups, C. G. Conn cup. For Giant bass—Tufts, Lyon cup, Rider-Macomber medal. For white bass—Potter tuna cup, Tufts, Lyon prize. For yellowtail—Simpson prize, Gillies medal, Eddy cup, John F. Francis medal, Western Hardware cup. Other white bass prizes—Nordlinger cup, Potter medal. For albicore—Montgomery Bros. cup, Whitley Co. cup, Hoegee Co. cup, Streeter Albicore medal. For dolphin—Mattison cup. For largest fish, regardless of variety—Eddy cup.

Seattle Association.—Only four shooters turned out for the events on Sunday, the weather being rather adverse to shooting and many of the club members visiting the Northwest Tournament at Portland, Ore. Gusty winds shifted the targets both high and low, making good scores impossible. Eighty and eighty-five per cent shooting was the best recorded. W. B. Taft and Jack Lewis stood high in the fifty-target race with forty-two each. In the hundred bird event Hugh Fleming climbed to the top with a total of eighty-six.

In an extra event of fifty targets Hugh Fleming finished with forty-seven to his credit and Jack Lewis with forty. The scores:

At 50 targets—W. B. Taft 42, J. B. Lewis 42, A. J. Gerrard 41, Hugh Fleming 41.

At 100 targets—Hugh Fleming 86, W. B. Taft 85, A. J. Gerrard 82, J. B. Lewis 81.

Hugh Fleming, Geo. Baker and W. B. Taft proved the stars at the mid-week shoot of the club Wednesday, June 20th, these three shooters finishing the regular fifty target program with forty-six to their credit. In the hundred target race Fleming shot a fifty straight and finished the bunch with ninety-six.

At 50 targets—Hugh Fleming 46, Geo. Baker 46, W. B. Taft 46, L. S. Barnes 45, C. E. McKelvey 45, C. B. Fitzgerald 44, J. H. Davis 43, S. A. Martin 42.

At 100 targets—Hugh Fleming 96, C. E. McKelvey 91, S. A. Martin 89, Geo. Baker 88, J. H. Davis 85, J. H. Hopkins 43x50, W. B. Taft 69x75.

Yours, E. A. FRY, Sec'y.

Green Lake Club.—Dr. King and W. H. Carstens tied at the Green Lake club shoot on Sunday, June 24th. C. B. Fitzgerald again won the silver spoon after some exciting shoot-offs with Dr. King, W. H. Carstens and E. Chantrell. Fitzgerald did not reign over Chantrell until the third shoot-off.

The record score of 21x25 with a 20-gauge gun for the Fisher trophy was put out of the running by a new high mark of 24 out of 25 by L. S. Barnes. Dr. King and W. H. Carstens each scored 22 out of 25. I. M. Fisher (professional) scored 22 out of 25. The scores:

Dr. King 49, W. H. Carstens 49, L. S. Barnes 48, C. B. Fitzgerald 46, Sam Martin 45, E. Chantrell 44, A. B. Kidd 40, T. B. Beck 26, B. J. Jones 22, *I. M. Fisher 47. (*Professional.)

Fish Shipped to England.—The English food supply is being supplemented with fish from Canada and the United States to an increasing extent. Late in May a steamer left Boston with several thousand boxes, said to be the first cargo of fish ever sent from Boston to England; and this is part of a 14,000,000-pound order recently placed with Boston firms by the British government, a large portion of it having been sent through Canadian ports.

Seattle fish dealers are at present handling a large amount of fish for shipment to England, much of which is being frozen in the Port of Seattle warehouse, as well as in private plants.

Dog Sets Traveling Record.—A wonderful record as a traveler has been achieved by Dash, the smooth fox terrier which accompanied Dr. M. A. Stein, the archeological explorer, throughout his great journey of 10,000 miles, undertaken on behalf of the Indian government, through Central Asia into China and back. Though the aggregate of the marches amounted roughly to 10,000 miles in two years and eight months, the actual distance covered by Dash, taking into account his canine habits of progression, may be estimated at well over 20,000 miles. Dash made that journey on foot practically the whole way, except when he went "pony back" for short distances at times of great heat. When in the Taklamakan Desert, Dash, like the rest of the party, had his water allowance strictly limited. It came from the supply carried on camels in the form of ice. Dash went over the mountain passes as high as 16,000 feet above sea level. Throughout the journey the dog kept well, and his menu was made up of scraps from the camp larder. Each night he slept in Dr. Stein's tent, and on occasions proved himself a very useful watchdog. On the high Thibetan uplands his chief recreation was chasing wild donkeys, yaks and the like. He managed to kill several hares and bring them in to supplement the store of food. Upon many journeys along the Indian northwest frontier, Dash has also been the comrade of his master, and he has probably seen far more of the world than most people. He has true British terrier blood in his veins, although India was his birthplace.

Trade Notes.—The Pennsylvania State Championship and the high amateur and high general averages at the Pennsylvania State shoot, Bradford, Pa., June 5-7, were won by Mr. Allen Heil of Allentown with the fine score of 443x450. He was also high gun on all targets, breaking 577x600, including 100 from the 23-yard handicap and 25 pair. Mr. Heil shot Peters "steel where steel belongs" shells.

At the South Dakota State shoot, Alexandria, So. Dak., June 6-7, Mr. Geo. Trent Jr. won high professional average, 289x300, and Mr. C. M. Buchanan of Sioux Falls won the State Championship event, both using Peters factory loaded ammunition.

High amateur average at Holyoke, Colo., June 7, was won by Mr. Franz Bendel of Sedgwick, 142x150, using Peters shells.

Mr. E. W. Varner of Adams, Nebr., won high general average at Wisner, Nebr., June 4, 196x200, using Peters shells.

High amateur average at Ogden, Utah, June 4-5, was won by Mr. H. S. Mills of Corrine, Utah, scoring 333x350 with Peters shells.

Mr. E. C. Griffith, well known trapshooter of Pascoag, R. I., was high amateur at the Rhode Island state tournament, Westerly, June 8, 144x150, using Peters shells.

At Moore, Mont., June 3-4, Mr. E. W. Renfro, using Peters shells, won the Parsons medal, 50 straight, the Klepetko double target medal, 37x20 pair, and was high amateur on all targets, including doubles, 338x365.

At Alliance, Nebr., June 10, Mr. Wm. Bowman tied for high general average, 169x175, with a long run of 123. Mr. Franz Bendel was second amateur, 167x175, and made the long amateur run, 69 straight. The three-man match was won by Messrs. Moritz, Thomas and Marsh, by a score of 72x75, and the Sand Hills Championship was won by Mr. Burt Moritz, 25 straight. All these gentlemen shot Peters shells.

QUICKNESS NEEDED IN USING DRY FLY.

Muscles of Arm Must Be Taught to Obey Command of Eye and Brain.

[By Ladd Plumley.]

In dry fly fishing there are advantages to the tyro angler over the use of wet lure, yet it must be admitted that when a fish has risen to the drifting feathers more accuracy of eye is required and far more quickness of the responding muscles of the arm is necessary than when fishing with the wet or sunken lure.

With lightning rapidity a quick fish sometimes makes its dash for a dry fly. There is a second only for hooking the quarry. And on the barb of a dry fly a trout seldom hooks itself. It can also be stated that the dry lure is rejected from the mouth of a trout with amazing quickness, far and away quicker than a trout rejects moist silks and feathers.

And here is where the inexperienced tyro must use his utmost endeavor if he would bring many trout to net. He has the necessity of training himself in perhaps the most difficult feat connected with any angling whatever—the feat of surely hitting a fish which has risen to the dry fly.

Let us consider for a moment what this feat means and the skill shown by the dry fly expert, who seldom misses his rising fish. The time limit for driving the steel into the jaw of the quarry is probably about one second at the very limit.

In this second the expert's eye has seen the trout, the muscles of the casting arm have responded, the top of the rod has been snapped back and the impulse given to the line has traveled to the barbed lure. And there are many dry fly experts who can be said never to fail in the hooking of a rising trout.

But notwithstanding the skill required for hitting a fish with the dry lure, let the beginner be encouraged by the fact that sometimes a trout is very hungry and is slow in rejecting the fuzzy deceit.

Also it happens that the line is stretched and strained by the currents of the stream so that the trout will hook itself. The latter, however, is rarely the case, so rarely that the tyro should not take it into his calculations.

For learning a prompt strike when using the dry lure it is suggested that the novice frequently practise his arm and wrist in the endeavor promptly to retrieve his line.

This should be done even when no trout has shown itself or any offer has been made at the feathers. Let the angler who desires to train his arm for a prompt recovery of the line imagine that a trout is making an attack on the fly.

At such times of practice let him instantly and with decision and vigor snap back the tip of the rod to the perpendicular. Whenever an opportunity seems to serve let him follow this practice. There are places in every stream where the angler meets with no encouragement and pushes onward.

Before he presses on to new water the angler can give a little attention to his strike. And he should do this whenever a floating leaf or twig near his fly attracts his attention. If he earnestly trains his arm to respond quickly to his mind he will be somewhat prepared for an actual attempt to hit the rising fish.

Solving a City Problem.—Progressive ideas are always welcome in trapshooting—just as they are in any other line of sport. The idea evolved by the Lincoln Park Gun Club of Chicago, Ill., is worthy of serious consideration by the gun clubs of all larger cities. The idea involves a six months' contest to determine the trapshooting champion of Chicago. The shoots will be held semi-monthly. They will consist of 25 targets at 16, 18 and 20 yards and 12 pairs from 16 yards. The winner of the greatest number of these contests will be labeled the champion and given a suitable trophy. Additional trophies will be given for the best scores made from each of the yardage marks and to the high guns. The winner will be worthy of the honor bestowed upon him.

Indications are that the wave of preparedness will give trapshooting quite a boost. There have been more beginners this spring than any other year since the sport became popular. It is the idea of being prepared to fight for Old Glory if called upon.

Fishing at Lake Tahoe.—Lake Tahoe, California, and its tributaries received 2,500,000 fish last season. Two million from the Tallac hatchery were placed in Tahoe Creek, Tallac Creek, Little Truckee, Green Bay, Emerald Bay and other creeks and lakes. Most of these were of the black spotted variety. Some eastern brook trout and rainbow were planted in Blackwood Creek, Antone Meadow Creek, Watson Lake, Griss Creek and Burton Creek. These creeks are all in the Tahoe district. The roads in the high Sierras are usually open about June 1, which brings the opening of the Tahoe district just at the right time. However, this date has not been set for the convenience of motorists, but to permit the late spawning of the black spotted trout which predominates in the Tahoe country. The Tahoe country provides all kinds of sport for the lovers of good fishing. There are many creeks for stream fishing, with the lake for those who are out after the big fellows. Many catches of single fish weighing up to twenty pounds are made during the season and there are fish over thirty pounds that sometimes get on a hook. The season opened June 1 and motorists are there and still coming to try their luck in catching some of these millions of trout.

JAMES W. SEAVEY WINS N. W. SHOOT.

Frank Van Atta Second With L. H. Reid High Pro.; W. J. Houser Takes Handicap.

Portland, Ore.—By breaking 98 out of 100 targets in the final day's regular event of the thirty-third annual trapshooting tournament of the Sportsmen's Association of the Northwest, on Wednesday, June 27th, James W. Seavey of Portland won the amateur high average honors for the three day shoot. He smashed 390 out of the 400 targets, beating Frank Van Atta of Vancouver, Wash., by a margin of eight birds. Frank Troeh of Vancouver, Wash., and William Hillis of Portland tied for third honors among the amateurs.

L. H. Reid of Seattle, Wash., was high professional for the three days with a record of 387 out of 400. Frank Riehl of Tacoma won second place by breaking 383, and H. E. Poston of San Francisco was third with 379.

The leaders are:

High Amateurs—J. W. Seavey, Portland, 390, F. Van Atta, Vancouver, 382; Frank Troeh, Vancouver, 280; William Hillis, Portland, 380; P. H. O'Brien, Butte, Mont., 377; E. J. Chingren, Spokane, 376; P. P. Nelson, Yacolt, Wash., 374; C. E. McKelvey, Seattle, Wash., 374.

High Professionals—L. H. Reid, Seattle 387, F. C. Riehl, Tacoma, 383, H. E. Poston, San Francisco, 379, F. A. Dryden, Spokane, 370, J. B. Bull, Portland, 370, P. J. Holohan, Portland, 360, E. B. Morris, Portland, 360, C. J. Schilling, Portland, 355, J. E. Reid, Portland, 351.

There was plenty of sensation for the spectators during the day, every event being hotly contested. P. H. O'Brien of Butte, Mont., W. W. McCornack of Eugene and H. McElroy of Spokane tied for second honors in the regular event, each breaking 97 targets. P. P. Nelson of Yacolt, Wash., smashed 96, and C. E. McKelvey of Seattle, William Hillis of Portland, Mark Siddall of Salem, and Frank Van Atta of Vancouver, Wash., each broke 95 per cent. Seventeen other amateurs registered scores of 90 per cent or better.

Charley Leith of Woodburn, Ore., won the beautiful G. L. Becker trophy by shattering 47 out of 50 targets, including 10 pairs of doubles. In the single targets of this event, Leith broke 28 and in the doubles he missed his first target and then went straight, giving him a 47 marker. W. W. McCornack of Eugene was second with 45, McCornack also breaking 19 in the doubles, but his shooting in the singles was below par.

W. J. Houser of Pomeroy, Wash., won the northwest handicap event by breaking 49 out of 50 targets from the 20-yard line. J. H. Davis of Seattle, shooting from 16 yards; B. G. Mann of Spokane, shooting from 16 yards, and M. Rickard of Corvallis, Ore., on the 19-yard line, each broke 48 out of 50 targets.

The three-man team event brought out ten entries, the Portland Gun Club team, consisting of E. H. Keller, Frank Templeton and J. W. Seavey, winning the trophy. The Portland shooters scored 58 out of 60 targets, Templeton and Seavey each missing one bird. This makes the third victory for the Portland experts in team competition. In the three events they have missed but seven targets.

The Ogden, Utah, and Albany, Ore., teams finished with scores of 57 out of 60. Each team lost a chance to win the event by dropping one target on the last peg. The La Grande team scored 56.

The tournament was one of the most successful ever staged under the auspices of the local trap organization. The scores on 100 targets, June 27:

*L. H. Reid, Seattle, 94; G. Anderson, San Jose, 72; C. E. McKelvey, Seattle, 95; J. A. Dague, Tacoma, 90; William Hillis, Portland, 95; *P. J. Holohan, Portland, 90; *J. Reid, Portland, 84; Frank Troeh, Vancouver ,95; H. R. Everding, Portland, 83; J. A. Troeh, Vancouver, 88; *C. J. Schilling, Portland, 93; H. H. Veatch, Cottage Grove, 81; C. G. Dodele, Albany, 91; G. B. Baker, Seattle, 82; J. H. Davis, Seattle, 74; F. Templeton, Portland, 92; J. W. Seavey, Portland, 98; E. H. Keller, Portland, 91; C. L. Templeton, Seattle, 92; J. H. Hopkins, Seattle, 92; J. R. Owens, Wenatchee, 79; Gladys Reid, Portland, 79; C. P. Preston, Walla Walla, 73; J. G. Clemson, Portland, 73; George Stacey, No. Yakima, 93; L. Rayburn, La Grande, 86; O. Berg, Heppner, 82; T. J. Mahoney, Portland, 83; B. R. Patterson, Heppner, 91; *H. E. Poston, San Francisco, 93; P. H. O'Brien, Butte, 97; M. Siddall, Salem, 95; H. B. Newland, Portland, 79; R. S. Avery, San Francisco, 84; P. Whitney, Woodburn, 91; E. G. Hawman, Woodburn, 80; F. O. Joy, Portland, 62; Mrs. A. Schilling, Portland, 91; A. W. Strowger, Portland, 83; M. A. Rickard, Corvallis, 92; A. L. Zachrisson, Portland, 82; G. K. March, Spokane, ——; *H. H. Ricklefson, Portland, 83; L. Templeton, Albany, 83; *F. Dryden, Spokane, 85; J. Taylor, Ogden, 86; G. L. Becker, Ogden, 93; E. Fard, Ogden, 82; J. Doon, Ogden, 88; H. McElroy, Spokane, 97, E. J. Chingren, Spokane, 87, C. A. Fleming, Spokane, 84; C. A. O'Connor, Spokane, 92; B. G. Mann, Spokane, 85; P. P. Nelson, Yacolt, 96; Al Seguin, Portland, 82; F. Riehl, Tacoma, 96; Dr. E. R. Seeley, Medford, 90; *Ed Morris, Portland, 91; E. P. Troeh, Vancouver, 92; H. A. Pollock, Portland, 83; Dr. C. E. Cathey, Condon, 87; J. Lewis, Salem, 88; B. Pearson, Turner, 77, J. C. Morris, Portland, 75; R. Dill, Saskatchewan, Can., 85; *J. P. Bull, Portland, 89; W. W. McCornack, Eugene, 97; J. S. Crane, Portland, 57; B. Compp, Eugene, 98; F. Van Atta, Vancouver, 95; D. B. Harvison, Palouse, 83; C. Leith, Woodburn, 87; W. J. Houser, Pomeroy, 92; C. Hahn, Lewiston, 90; J. Gilbert, Pomeroy, 75; N. Wann, Lapwai, Idaho, 89; F. M. Robinson, Pomeroy, 89; F. Friedlander, Portland, 50; R. P. Knight, Portland, 74; G. C. Haworth, Portland, 51.

Practice Day, Sunday.

Fifty-nine dollars was sent to the American Amateur Trapshooters' Association by the officers of the Portland Gun Club as a result of practice day on Sunday, June 24th.

One-half cent on each target trapped went toward the Red Cross fund to purchase a complete ambulance outfit to be taken by the American troops to France. The targets trapped amounted to $34 and William C. Bristol, one of the directors of the club, donated $25 to the cause, making the total read $59.

High amateur for the day was G. L. Becker, of Ogden, Utah, who dropped only two birds out of the 100 thrown him. He even went better than any of the professionals, Les H. Reid, of Seattle, topping the pros with 97 out of 100. The scores:

*Les H. Reid 97, Miss Gladys Reid 82, C. E. McKelvey 88, J. Davis 78, *James E. Reid 87, A. Woelm 74, D. C. Dodele 91, F. E. Dodele 82, J. G. Clemson 68, J. C. Morris 76, J. S. Crane 60, Al Seguin 85, W. K. France 80, F. O. Joy 74, *H. H. Ricklefson 81, *James B. Bull 85, Guy Egbers 93, A. L. Zachrisson 76, R. E. Martell 80, J. R. Owens 82, Wynn Huddleston 61, H .A. Pollock 86, Mrs. Ada Schilling 86, Henry R. Everding 73, G. E. Stacey 95, Lou Rayburn 94, C. Mackey 81, H. Becker 84, C. Becker 71, *C. J. Schilling 85, *Frank C. Riehl 96, C. B. Preston 67, H. N. Welch 84, J. B. Adams 89, *F. A. Dryden 95, J. Taylor 85, G. L. Becker 92, E. Fard 92, J. Doon 79, F. M. Templeton 94, L. Templeton 90, E. H. Keller 89, G. Scripture 96, J. H. Hopkins 92, G. B. Baker 78, Dr. F. C. Cathey 88, R. Dill 83, *E. B. Morris 92, W. Hillis 90, *Hugh E. Poston 93, P. H. O'Brien 91, Mark Siddall 89, H. B. Newland 89, R. E. Avery 81, R. P. Knight 90, G. H. Anderson 86, P. Whitney 84, A. W. Strowger 88, D. B. Harvison 79, *P. J. Holohan 91, Dr. O. D. Thornton 84, F. M. Troeh 97, J. H. Troeh 90, F. VanAtta 88, T. J. Mahoney 73, L. Broadhead 69, E. C. Bendixen 32x40. (*Professionals.)

First Day, Monday.

E. J. Chingren, shooting from the 22-yard line, was the big star in the first day's shooting, Monday, June 25th.

In the amateur class Frank Troeh, the Vancouver, Wash., artist, broke 145 out of 150, with E. J. Chingren, of Spokane, dropping 6 and finishing with 144. F. C. Riehl, of Tacoma, was high gun for the day, with 147 out of 150. with L. R. Reid turning in a 146 out of the 150. J. P. Bull, the Portland shot, got 141 in his try.

E. J. Chingren and Dr. O. D. Thornton, of Portland, tied with 19 out of 30 for the Walla Walla Brownlee medal, but in the shoot-off Chingren got 17 to Thornton's 14.

E. J. Chingren again had a tie when he and G. B. Baker, of Seattle, broke even for the Dupont Anaconda trophy with 20 straight. Chingren also won this event by breaking 19x20 against Baker's 17.

Six of the shooters tied with perfect averages for the Dayton medal, with 20 straight. A. W. Strowger, of Portland; Lou Rayburn, the La Grande crack; C. P. Nelson, of Yacolt; H. Becker, of Cove; P. Whitney, of Woodburn, and Dr. C. E. Cathey of Condon were the lucky individuals. In the shoot-off for the medal H. Becker again broke 20, with Whitney 18, Cathey 17, Strowger 16, Nelson 16 and Rayburn 16. The scores, 150 targets:—

*L. H. Reid 146, G. H. Anderson 102, C. E. McKelvey 134, Guy Egbers 135, William Hillis 140; *P. J. Holohan 138, *J. Reid 135, Frank Troeh 145, H. R. Everding 118, J. H. Troeh 131; *C. J. Schilling 131, H. N. Welch 134, J. B. Adams 134, G. B. Baker 118, J. H. Davis 113; F. Templeton 140, E. H. Keller 139, J. W. Seavey 143, Dr. C. L. Templeton 133, J. H. Hopkins 141; J. R. Owens 123, W. K. France 134, Gladys Reid 116, C. B. Preston 95, J. G. Clemson 114; G. E. Stacey 126, L. Rayburn 134, C. Mackey 129, H. Becker 133, C. Becker; *H. E. Poston 140, P. H. O'Brien 141, Mark Siddall 125, H. B. Newlands 124, R. S. Avery 127;; P. Whitney 133, E. G. Hawman 118, F. O. Joy 107, Mrs. A. Schilling 135, A. W. Strowger 126; M. Rickard 139, C. G. Dodele 125, W. G. Ballack 121, F. E. Dodele 120, L. C. Templeton 122; *F. Dryden 136, J. Taylor 129, G. L. Becker 138, E. Ford 133, J. Doon 126; H. McElroy 138, E. J. Chingren 144, C. F. Fleming 120, C. A. O'Connor 133, B. G. Mann 125; J. A. Dague 132, A. Seguin 122, *F. C. Riehl 147, Dr. E. R. Seeley 131, E. Nickerson 133; *Ed Morris 135, B. R. Patterson 123, O. Borg 124, Dr. Cathey 133, J. W. Lewis 116; B. Pierson 121, J. C. Morris 122, R. Dill 135, *J. P. Bull 141, W. W. McCornack 133; W. L. Cochran 124, Fred Jacobs 137, F. M. Robinson 127, D. B. Harvison 118, F. VanAtta 143; N. Wann 120, C. Hahn 139, W. P. Houser 139, J. Gilbert 105, J. W. Spence 136; P. P. Nelson 137, A. Zierlof 90, O. J. Wirkkala 108, W. A. Harrison 104.

High amateurs—F. Troeh 145, E. J. Chingren 144, F. VanAtta 143. High professionals—F. C. Riehl 147, L. H. Reid 146, J. P. Bull 141.

High runs—F. C. Riehl 176, F. A. Dryden 86, G. L. Becker 75, F. Templeton 51, Lou Rayburn 51, J. E. Reid 64, F. Troeh 63 and 73, J. W. Seavey 54, Dr. Templeton 51, L. H. Reid 51, P. H. O'Brien 70.

Second Day, Tuesday.

J. R. Owens, the Wenatchee crack shot, repeated his performance of 1916 and won the Smails cup with a record of 25 straight in the second day's program. C. A. O'Connor of Spokane tried hard to win two championships, but had to be contented with one after some excellent shooting. In the shoot for the Multnomah medal, O'Connor tied with C. L. Templeton, of Seattle, with 20 straight, and in the shoot-off won the event with a score of 18 to Templeton's 16.

Mr. O'Connor, C. Mackey of La Grande, Pete O'Brien of Butte, Mont., and W. Wann, of Lapwai, Idaho, tied for the individual championship with 20 straight. Mackey seemed to want this event for his own, so in the shoot-off kept up his good work by getting 20 straight, while O'Brien and O'Connor dropped one for a 19.

J. W. Seavey, the Portland expert, had the high run of the day among the amateurs with 147 out of 150, finishing with the remarkable score of 149. R. P. Knight, another Portlander, had the second best high run with a 95 score. The scores:

L. H. Reid 147, G. Anderson 116, C. E. McKelvey 145, J. A. Dague 130, Wm. Hillis 145, P. J. Holohan 141, J. Reid 132, Frank Troeh 141, H. R. Everding 135, J. A. Troeh 137, C. J. Schilling 139, H. H. Veatch 128. J. B. Adams 139, G. B. Baker 128, J. H. Davis 115, F. Templeton 140, J. W. Seavey 149, E. H. Keller 133, C. L. Templeton 132, J. H. Hopkins 139, J. R. Owens 129, W. K. France 137, Gladys Reid 130, C. B. Preston 115, J. G. Clemson 100, G. E. Stacey 136, Lou Rayburn 134, C. Mackey 120, H. Becker 127, C. Becker 128, *H. E. Poston 146, P. H. O'Brien 139, M. Siddall 138, H. B. Newland 119, R. S. Avery 118, P. Whitney 137, E. G. Hawman 135, F. O. Joy 99, Mrs. A. Schilling 139, A. W. Strowger 123, M. Rickard 139, A. L. Zachrisson 115, W. G. Ballack 42x60, J. Searcey 73x 90, *H. H. Ricklefson 125, L. C. Templeton 126, *F. A. Dryden 147, J. Taylor 127, G. L. Becker 134, E. Ford 130, J. Doon 127, H. McElroy 137, E. J. Chingren 145, G. A. Fleming 128, C. A. O'Connor 132, C. B. Mann 129, P. P. Nelson 141, Al Seguin 131, *F. C. Riehl 140, Dr. E. R. Seeley 132, E. Nickerson 133, *Ed Morris 134, E. P. Troeh 136, C. G. Dodele 137, Dr. Cathey 129, J. W. Lewis 129, B. Pearson 119, J. C. Morris 119, R. Dill 140, *J. P. Bull 140, W. W. McCornack 140, J. S. Crane 102, D. Kompp 140, F. VanAtta 141, D. B. Harvison 116, W. Wann 135, A. Zierlof 103, W. J. Houser 133, J. Gilbert 132, G. K. March 131, R. P. Knight 141.

C. A. O'Connor, Spokane, and C. L. Templeton, Seattle, tied for Multnomah medal with 20 straight. O'Connor won shoot-off with 18. Templeton scored 16.

C. Mackey, La Grande; J. O'Brien, Butte; C. A. O'Connor, Spokane; W. Wann, Lapwai, Idaho, tied for individual championship with 20 straight. In shoot-off Mackey 20, O'Brien 19, O'Connor 19, and Wann 17.

Smails cup, J. R. Owens, Wenatchee, 25 straight.

Long runs—J. W. Seavey 55, 54, 147; E. G. Hawman 51; William Hillis 51, 57; J. H. Hopkins 55; Fred Dryden 53, 76, 54; E. J. Chingren 60; P. P. Nelson 56, E. P. Troeh 55, R. P. Knight 95, H. McElroy 50, C. A. O'Connor 53, L. H. Reid 50, 83, H. E. Poston 53, C. E. McKelvey 55.

✤ ✤ ✤

The fishing along the Feather River, California, is said to be growing better every day. The river at Blairsden is almost normal and at Keddie the streams are lowering and clearing with quite a number of catches reported. Many limit catches are being made at Belden and the river is lower and clearing. Fishing is good in the creeks, helgamites and salmon flies being mostly used. At Pulga the water is still high, although some fair catches are being made with salmon flies and eggs as bait. Several good catches have been reported at Rock Creek, but owing to the abundance of natural food the fish are not striking as well as they will a little later in the season.

✤ ✤ ✤

Alameda Elks' Club.—Charles Lindemann ran fifty straight and took the honors of the monthly trap shoot of the Alameda Elks' Gun club across the bay last Sunday. There was an exciting race for the American Amateur Trapshooters' Association spoon. Six tied. George Thomas and H. C. Peet did not wait for the shoot-off in which Al Durney and Frank Blum scored 24 out of 25 and H. A. Ray got 23 and Charles Lindemann 22. In the second shoot-off Durney beat Blum, 24 to 23, and took the spoon.

There was some high class shooting in the regular program in addition to the sensational shoot-off for the spoon. Right behind Charley Lindemann's straight run of 50, came Ted Handman with 49 and Al Durney and George W. Thomas knocked out 48s. Frank Blum sprang into prominence among the professionals by running a neck-and-neck race with Al Cook for the honors, each getting 48.

There were only thirty shooters on the grounds and the club decided to donate $25 to the Red Cross and perhaps hold a tourney later on to raise more money for the worthy cause. The members did not have sufficient time in which to work up the Red Cross feature. The scores on 50 targets were:—

*W. Ellis 44, P. T. Herrlerm 38, T. W. Parsons 39, J. H. Walker 40, H. G. Meinecke 44, W. L. Koch 43, H. A. Ray 47, H. R. Phinney 44, H. Stelling 44, *L. Middleton 42, G. W. Thomas 48, Pop Merrill 38, A. M. Gerhardt 41, Ted Handman 49, George F. Bester 43, *J. W. F. Moore 33, Charles Lindemann 50, *F. W. Blum 48, A. A. Durney 48, H. C. Peet 45, Barney Worthen 47, F. E. Hillyer 40, G. H. Morrison 46, P. F. Noonan 36, W. H. Price 37, *H. J. Truscott 43, C. Carman 44, P. H. Haskins 33, *J. A. Cook 48.

(*Professionals.)

Sportsmen's Row

Eddie Keller annexed his first run of over the century mark on June 27th, when he broke 148.

✤ ✤ ✤

E. J. Chingren, the Spokane crack whose shooting featured Monday's events, was off color Wednesday.

✤ ✤ ✤

President John G. Clemson of the Portland Gun club was greatly pleased with the result of the tourney. Practically all of the shooters who attended the northwest event signified their intention of participating in the Indian tournament in July.

Mrs. Ada Schilling did some very remarkable shooting during the N. W. tournament, breaking better than 91 per cent of the 400 registered targets. Miss Gladys Reid, the only other member of the fair sex to enter the tourney, also shot well.

✤ ✤ ✤

Next month the tablet in honor of Charles Frederick Holder, noted angler, which is now at the Art Museum, Exposition Park, will be taken to Avalon, Cal., and placed near the entrance to the Tuna Club, which he founded.

✤ ✤ ✤

Sharks have been destroying many nets on the Southern California coast during the early part of June, one man-eater being brought in on June 5th which weighed 500 pounds. Two other large sharks were caught about the same time, the meat being sold to the Japanese markets for one cent per pound.

✤ ✤ ✤

The Golden Gate Club will stage a tourney on a week from tomorrow. The Alameda grounds is expected to be the scene of much activity. It is up to the Golden Gaters to schedule some events to raise funds for the Red Cross to follow the example set by devotees of other sporting competitions.

✤ ✤ ✤

The annual championship tournament of the National Association of Scientific Angling Clubs, to be held in Washington Park, Chicago, August 31 to September 3, has attracted entries from clubs in the following cities: New York, Newark, St. Louis, Cincinnati, Kansas City, San Francisco, Los Angeles, Seattle, Portland, and Tacoma.

✤ ✤ ✤

Reports received from 209 of the licensed hunters and trappers of Maine last year show that the following fur bearing animals were taken by virtue of their licenses: Bear, 203; fox, 734; mink, 954; skunk, 221; otter, 89; sable, 30; weasel, 2,784; fisher, martin, black cat, 94; muskrat, 2,198; racoon, 80; beaver, 123; lynx, 8, and bobcat, or wild cat, 88.

✤ ✤ ✤

The chief activity at the Mount Shasta Hatchery near Sisson, Cal., at present is the shipping of salmon fingerlings for planting in the far reaches of the Sacramento and Klamath rivers. A large number of salmon are in the new rearing ponds at the hatchery preparatory to extensive planting of young salmon next fall. Conditions for propagation and planting are normally favorable this season thus far.

✤ ✤ ✤

Washington, D. C.—William C. Redfield, Secretary of Commerce, has supplied the President and each member of the Cabinet with sablefish and has advised the bureau that they were much appreciated and highly regarded. The iced fish are shipped from Puget Sound and arrived in such excellent condition that it is evident that all parts of the country can be readily supplied with this desirable species.

✤ ✤ ✤

Fred W. Smith of Portland will probably be the next honorary president of the Salmon Club of Oregon. Fishing twelve miles from the mouth of the Clackamas river, he recently landed a forty-four and one-half pound chinook salmon, the largest ever caught in that section with light tackle. In addition to catching this fish, which entitles him to a gold button, Smith landed a silver and bronze button fish.

✤ ✤ ✤

A project is being initiated by the California Fish and Game Commission to clear all the overflowed basins of the Sacramento river of fish during the winter months. Seiners will be employed for this purpose and the large food fish obtained will be given the public and private charitable institutions of the state. The smaller fish will be used to stock waters where they may later be caught for food. If left in the basins through the year, the fish would perish when the water goes down in the summer.

✤ ✤ ✤

Three of the finest trout taken by fishermen in central California this season were hooked in the Uvas a few days ago by A. F. Marigot and W. J. Juarez of San Jose. Two taken by Marigot were twenty-eight and one-half inches and twenty-one inches respectively, while Juarez managed to land a steelhead twenty-three inches in length. The larger trout caught by Marigot was a rainbow and the smaller a steelhead. The rainbow, which was hooked in the large pool below Mattias' dam, put up a tremendous fight and an hour and a half elapsed from the time that the fish took the bait until it was lifted from the water. These three fish were the only ones taken of any size. The remainder of Marigot's and Juarez' baskets were made up of small trout.

Baffled by Hand-Trap.—Until recently there were trapshooters a-plenty, who verily believed that there were no more worlds to conquer, or, to put it another way, there were no methods of trapping the elusive clay discs which would hold scores below the 90 per cent mark.

Incidentally, it is a good thing for the veteran saucer smashers that Jack Fanning, the famous New York shot, is not a gambler; otherwise Jack could have pulled in a lot of the long green via the hand-trap route.

It all happened this way: Jack has been amusing himself by toting to the big shoots a contrivance that, in general appearance, resembles an overgrown horse-pistol and, of course, is calculated to arouse the curiosity of the gun clan.

"What you got there, Jack?" asks a shooter.

"Why, that's a hand-trap. Want to try hittin' some of the birds it throws?"

The expression on the face of the shooter changes from inquisitiveness to the disdain of a big boy when his "kid" brother tells of a projected expedition to kill Indians with a cap pistol. "Quit kiddin'," says the shooter. "I ain't kiddin'," Jack replies, "and I'll bet you a good smoke that you can't break fifty per cent of the targets it throws."

The bet is on, the crowd gathers, and with much winking and many asides the club members prepare to see the laugh put over on the New Yorker. Fanning sets the trap, and at the word "pull" from the shooter Jack swings the pistol-like affair from below the right hip to a point on a level with his left shoulder, at the same time pulling the "trigger" that releases the clay pigeon.

"Bang!"

"Lost," the referee calls.

The performance is repeated time and again with variations of targets thrown upside down, on edge, high in the air, and on a straight line close to the ground, while right-quartering and left-quartering birds soar 75 yards instead of the 50 yards from the big stationary traps.

When it is all over, the score sheet shows 20 goose eggs out of a possible 25. Jack pockets the cigars and the crowd laughs at the shooter's explanation of why he fell from the 90 per cent to the 20 per cent class.

And yet shooters will tell you that Jack Fanning is the one man in trapshooting circles who can not appreciate a joke. To which may be added, there are jokes and jokes.

Eastern Handicap Winners—Scores of various Eastern winners are reported as follows:

Connecticut Introductory—First, F. S. Tomlin, of Pennsgrove, N. J., 147; second, J. Clark Jr., Worcester, Mass., 146; third, W. E. Corfield, Utica, N. Y. 144.

Hartford Special—First, Fred Plum, Atlantic City, N. J., 98; second, C. B. Platt, Bridgeton, N. J., 97; third, D. K. Dickinson, Kansas City, Mo., 97.

Preliminary Handicap—First, F. A. Johnson, Philadelphia, Pa., 18 yds., 96; second, F. S. Tomlin, Pennsgrove, N. J., 21 yds., 95; third, F. A. Baker, New York City, 17 yds., 92.

New England Overture—First, J. L. Snow, Boston, 100; second, H. O. Allyn, New York, 98; third, F. B. Stephenson, New York, 98.

Eastern Handicap—First, K. B. Noble, Hartford, Conn., 18 yds., 97; second, C. H. Daley, Danbury, Conn., 18 yds., 96; third, F. S. Tomlin, Pennsgrove, N. J., 22 yds., 95.

Yardage—16 yds., H. M. Pierce, Fall River, Mass., 91; 17 yds., L. B. Smull, Port Washington, N. Y., 93; 18 yds., H. C. Barstow, Rockville, Conn., 94; 19 yds., C. Z. Vaughn, Handonfield, N. J., 94; 20 yds., S. G. Vance, Tillsonburg, Canada, 94; 21 yds., E. L. Bartlett, Baltimore, Md., 94; 22 yds., Fred Plum, Atlantic City, N. J., 93.

Billings (Mont.) Shoot.—The scores at the registered tournament of the Billings, Montana, Rod and Gun club on June 17 and 18th were as follows:

At 150 targets—W. A. Mores, first day 126, second day 125; C. C. Esgar 112—119, E. A. Sanborn 133—129, A. Schlechten 131—126, E. W. Renfro 132—138, T. W. Harker 134—139, G. F. Shea 130—144, R. A. Prater 135—145, F. A. Weatherhead 135—144, T. E. Shipley 129—116, E. J. Boos 115—122, Jos. Keeler 113, C. A. Russell 113, C. L. Parsons 137—132, C. P. Tilzey 135—140, W. R. Sharp 117—132, E. W. Vickroy 126—132, J. C. Norris 137—137, W. A. Selvidge 130, R. E. Brown 126—117, G. W. Church 71, W. K. Moore 121, L. D. Coon 40x75, Chas. Olson 63x75—96x120, W. F. FitzHenry 25x45, Geo. Garlow 116x135, A. D. Mars Jr. 112, H. E. Clifford 115, H. M. Brown 100—104, R. B. Brubeck 107—130, H. Schnack 139—142, R. L. Dalke 116—136, E. J. Ryan 122—125, H. C. Carpenter 139—132, J. C. West 126—120, E. K. Winne 123—126, H. S. Mendenhall 142—143, B. C. Lee 115, E. G. Morse 118, J. B. Arnold 132, J. H. Bradfield 133.

Professionals—Wm. M. Bowman 135—141, L. C. Booth 133—133, C. L. Flannigan 136—141, Rush Razee 146—146, E. J. Morgan 139—142.

Avalon, Cal.—N. S. Munn of Vermejo Park, N. M., was presented the other day with a rod. He used it the next time he went fishing. On it he landed the largest white sea bass of the season, a forty-six pound fish. Then he went to the clubhouse to weigh in the fish and the rod, to make sure that the size and weight of the rod were within the specifications of the Tuna Club. The rod was half an ounce overweight and Mr. Munn lost the honor of the record catch.

PYRAMID LAKE FISHING IS BOOSTED.

Professor Explores New Waters; 13¾ Pound Trout, Second Largest of Season, Is Caught.

It appears not to be generally known that Pyramid Lake, Nevada, is good trout water. The fishing season is now at its height. During a recent visit to the lake by Dr. Evermann, director of the Museum of the California Academy of Sciences, he saw two anglers come in at the end of a half day's fishing with twenty-five trout, ranging in weight from two to twelve pounds. The largest one was twenty-seven inches long.

The fishing is done by trolling from a rowboat, and any sort of trolling spoon seems to be killing. The trout are all in excellent condition and are said to be as game as one could wish, or could expect them to be, with that method of fishing.

The artificial fly appears not to be much in use at Pyramid Lake, but there is no apparent reason why fly fishermen should not be able to get good results.

The second largest trout reported so far this season was landed last week at Lake Almanor by C. R. Mendelson, a local angler. There was a fight to land the big fellow. Richard Wall assisted with the net and the pair had a long, hard fight before they got their prize in the boat. Several times they were in danger of being upset. J. F. Daniels, Paul Sprague and George S. Brackett were in the party and hooked some two to eight-pounders. Fishing in the Feather river country is now good. The prize trout of Mendelson's is now on exhibition in a cake of ice at the Western Pacific window. The record trout is a thirteen and three-fourths pounder, landed by an Oakland man.

Benny Baum and party, consisting of Mrs. Baum, George Silverstone, Roy Muller and Herbert Bauer, had some great fishing in the McCloud river country. They also fished at Castella with success.

Fishing in the High Sierra of Yosemite National Park is especially good this year, according to D. J. Desmond, president of Desmond Park Service Company, who returned last week from a tour of the Merced Lake country, Yosemite. It is less than an hour's work to catch the limit of trout at Merced Lake or Washburn Lake near by. These splendid fishing spots are sixteen miles distant by trail from Yosemite Village.

The High Sierra country, which has numerous unnamed and trout-filled lakes, is yearly becoming more popular with anglers. May Lake, which is close to the Desmond Tenaya Lake Lodge, is plentifully stocked with several varieties of trout.

Los Angeles Club.—An overflow crowd of Los Angeles scatter-gun enthusiasts turned out at the Los Angeles Gun Club last Sunday morning, when the 100-bird distance handicap shoot for the E. K. Mohler trophy was held. E. K. Mohler, shooting from 20 yards, Owen A. Evans, shooting from 19 yards, and J. F. Dodds, shooting from 20 yards, tied for the trophy, each with a score of 95x100.

The trio shot off at 25 targets. All broke perfect frames of 25x25 in the first round. Evans won the trophy by shattering 24x25 in the second frame. The other two shooters broke 23x25.

Gold take-home trophies were awarded to Bob Bungay, Dodds, Council and William Kennedy. Wilson, Nelson, Mohler and Sargent won silver take-home trophies.

In the previous Sunday's competition, Bob Bungay, the victor, made an unfinished high run of 89 from 20 yards. He completed his run, breaking a total of 107 straight.

Tomorrow the Henry Pfirrmann Jr. trophy will be contested for in a 100-bird distance handicap shoot. Four silver and four gold take-home trophies will also be up for high scores in each frame of 25 birds of the century contest.

Following the Mohler competition, the H. E. Sargent trophy was shot for in a doubles tourney at 25 pair of doubles targets.

J. F. Dodds won, breaking 44x50. He was tied for high gun by the donor of the trophy, also with 44x50. The results:

E. K. Mohler, 20 yards, broke 95x100; O. A. Evans 19—95, J. F. Dodds 20—95, R. H. Bungay 21—91, H. E. Sargent 19—91, Wm. Kennedy 16—90, O. Council 18—90, S. H. Wilson 17—89, F. E. Andreani 16—89, J. L. Brown 16—89, N. W. Nelson 16—86, T. B. Sloan 16—86, V. A. Rossbach 17—86, S. B. Friend 16—67x75, Mrs. S. B. Friend 16—64x75, C. M. Wood 16—49x50, E. C. Crossman 16—47x50, M. D. Tower 16—42x50, J. Mann 16—41x50, J. W. Gaffney 16—39x50, J. G. Griffith 16—22x25, O. S. Gault 16—20x25, M. Steel 16—19x25.

Doubles Shoot—H. E. Sargent 44x50, J. F. Dodds 44, E. K. Mohler 43, R. H. Bungay 42, V. A. Rossbach 40, O. Council 39, O. A. Evans 38, F. E. Andreani 36, Wm. Kennedy 35, S. H. Wilson 34.

Denver, Col.—The Biological Survey has destroyed so far this year 35,000 coyotes in the Great Basin region. In operations around this city it was found that coyotes feed quite extensively on the ringneck pheasant.

Ellwood, Ind., claims title to the oldest active maker of guns in the world in A. E. Chamness. He is 80 years of age and has been making guns every day for 60 years. Chamness says he is the only man in Indiana who can make a gun from start to finish.

BETTER LIVE STOCK

THE SHORTHORN AS A BEEF MAKER.

By John J. Lawler.
[Reprinted from Shorthorn World, Jan. 25, 1917]

Editor's Note.—John J. Lawler is the heaviest individual buyer of cattle in the United States, his purchases on the Chicago market last year approximated 5,800 weekly. He owns about 29,000 acres of land in Jasper and Newton counties, Indiana, and Cook county, Illinois; supplies hundreds of cornbelt and Eastern feeders with thin cattle, and is himself a feeder and grazer on an extensive scale. His wide and long experience makes his endorsement of Shorthorn cattle as the most profitable for the farm feeder of value, as his authority will not be questioned.

At the outset I will disclaim breed prejudice. I am not a breeder and have no interest in any breed. Any cattle that put on weight are suited to my purpose provided the gain is on the right part of the carcass. And an experience of more than a quarter of a century has taught me that the Shorthorn is the most profitable steer for the grazier and feeder. In making this statement I refer to cornbelt conditions such as exist in Northern Indiana and Illinois where our feeding is done. For that purpose the Shorthorn is undoubtedly the best breed and I make this statement without reservation or qualification. If necessary I would supplement my own testimony with that of hundreds of my customers, men who handle cattle profitably year after year and would have none but Shorthorns on their pastures or in their feed lot. So satisfied am I of Shorthorn superiority that 90 per cent of the cattle we use are of that breed, by which I mean that they show a preponderance of Shorthorn blood and are of Shorthorn type. We do not buy cattle for faces or color; too many follow that policy with unsatisfactory results.

I can advance three substantial reasons for Shorthorn preference. One is that in buying stock cattle at the market, it is possible to make a better selection than in the case of other breeds, and this is an advantage not to be ignored. Secondly, the grade Shorthorn is a superior steer to the grade showing a preponderance of the blood of other breeds. Even a moderate infusion of Shorthorn blood imparts the scale and spreading capacity that make the Shorthorn a profitable animal. In the third place, a Shorthorn will at three years of age give us at least 200 pounds more weight than a steer of any other breed, and, fixed charges being the same, that added weight means profit.

There is nothing that savors of sentiment about this proposition with us. We lay in our cattle at the yearling stage, carry them two years and market when three years old. Our herd averages 3,800 head and an additional 100 pounds yearly means a lot of money. That is the principal reason we handle Shorthorns and why we recommend them to our customers. The hundred-pound advantage I speak of is a conservative statement, as the majority are equal to an even better performance. We have tried the matter out repeatedly, and results have been practically the same, Shorthorns and other breeds run on the same grass, proving conclusively that the "red cattle," as they are popularly known, produce the best results.

As a rule feeders secure their cattle at the central markets and pay a premium for making selections. The bane of the finisher is the counterfeit steer, admittedly an unprofitable animal. In plainer language, he is a mongrel. It is to avoid buying that kind that feeders resort to selection and in this process they have a distinct advantage when buying Shorthorns. We rarely get an objection from our customers in the case of Shorthorns and even when a protest is elicited, it is usually retracted before the cattle go to market. This, I consider, a distinct advantage, especially in these days of hard picking for the feeder buyer. It means that a grade Shorthorn is better than a grade of any other kind of cattle. Feeders have little knowledge of pure bred cattle or even stuff that approaches that standard. They go into the open market, buy as they best can from the rank and file of commercial offerings, and my own experience has taught me that when I buy Shorthorn cattle I always get the best value for the money expended, at the same time securing cattle that will give best returns for grass and feed.

In my experience with feeders all over the country I find this sentiment dominant. The old line feeders demand Shorthorns. They come to market year after year with specifications attached to their order and never change. It is the only effective method of getting uniformity in quality and weight. Other cattle are a gamble; the Shorthorn is a certainty, and my advice to feeders who desire to avoid going wrong is to buy that kind. Another thing about Shorthorns is that plain cattle of that type are more useful than others. At present good Shorthorn feeding cattle are worth $8 and $8.50 per cwt., while a plainer grade can be had at $7.75. Such cattle are useful and worth intrinsically $1 per cwt. more than similar steers of other breeds. The plain grade Shorthorn is growthy and stretchy, while similar steers of other breeds rarely give adequate returns for their board bill.

Much of the beef making done in the United States is in the northern half of the country where low temperatures prevail. Here, by reason of its coat and constitution, the Shorthorn does well. It is preeminently the steer for the farm and small ranch. They will outgain any steer bred on the same feed and at the new cost of grain this must be reckoned with. The profit in all kinds of live stock, cattle, hogs, or sheep, will be found in making the most weight at the lowest cost for feed. The Shorthorn will make better returns for farm roughage and so-called waste than any other bullock. For silage feeding they have no equal. We have had better results with Shorthorns carried on silage than our other cattle, especially in the feed lot during the summer months, a method that promises to become popular owing to the advance in cornbelt land, which makes summer grazing of doubtful economy.

We should have more Shorthorn cows on our cornbelt lands. I do not mean that those specializing as dairymen should have Shorthorn cows, but for the farmer's purpose they have no equal. The male calves can be matured, thus materially adding to the commercial beef supply, and when the cow has outlived its usefulness it can be fattened for beef. I sold cows that got too fleshy off grass last July at $125 per head that had raised two calves worth $30 each at weaning time. I have Shorthorn yearlings worth $75 each that grew up on the place and cost little. With other breeds such results are impossible. The cow of any of the dairy breeds that has passed its usefulness is merely a canner when it goes to market; the Shorthorn is beef. If I was starting a dairy herd tomorrow, it would be composed of Shorthorn cows, as I believe the value of the steer calves, plus that of the cows that went to market for beef, would produce better net results than a herd of Holsteins or Jerseys.

Anything that grows on the farm makes money and no cattle grow like the Shorthorns. They are good dressers and beef men like their carcasses, but the strongest argument is that they are easy keepers. The cows of the breed actually gain weight while raising a calf. I had three Shorthorn cows that nursed calves all summer and weighed more than in early spring. At a conservative valuation the calves were worth $30 per head at six months of age, which meant $5 a month for pasture actually worth $1.50 per month. Such a cow will gain 300 pounds in three months and fetch a beef price which is materially different from selling a canner for a mere song.

For all practical purposes the Shorthorn has no superior. It is the best steer on grass and in the lot gives maximum results for the feed. The cows of the breed will yield more revenue than any other when milk and beef are taken into the reckoning. Anyone with experience will reach the same conclusion.

Our method of handling cattle has for its object securing growth. We aim to be producers, not gamblers, depending on a favorable turn in a fickle market for profits, and it is because the Shorthorn insures a maximum gain that we like that breed. We buy our cattle when prices are low and selection easy. Every year toward the approach of winter cattle markets go through a period of demoralization. It seems unavoidable, and probably will continue, but that period is the opportune moment to buy stock cattle. When every market in the country is congested with light steers, feeders do not encounter the keen competition from packers that is certain at other seasons. There is an element that never makes provision for wintering cattle, and at the first storm the stock yards are flooded with their product. At that time it is usually possible to lay in stock cattle around $6 per cwt. that toward the following spring are worth $8 and $8.25. In the fall the feeder is able to make a better selection.

By utilizing roughage and silage the wintering process is profitable, and the feeder, instead of being under the necessity of going into a competitive market in the spring, has his cattle acclimated, thrifty and ready for summer feeding either on pasture or in the drylot. They have been paying their way with daily gains, meanwhile, if properly handled, and will show a profit at that stage. We buy our cattle on this system, and twenty-five years' experience has demonstrated its soundness. Such cattle can be put in decent flesh for the early summer market when killers are not particular about quality and pay the highest prices of the year for bullocks decently covered with beef. It is an infallible system, because fall gluts of light cattle occur as regularly as the season comes around, but along toward the rise of grass the following year such steers attain a maximum value.

I have already alluded to the manner in which Shorthorn cattle thrive on silage, both summer and winter. Making profitable gains with silage is a certainty if the proper kind of cattle is used. Thinfleshed steers, bought in the fall, roughed through the early part of the winter, then put on silage, and fitted for the early summer market, before grass becomes a supply factor, will invariably pay a substantial profit. We feed silage to such cattle as run in pasture during the summer, reducing the quantity one-third. This is profitable, especially during such dry seasons as 1916, cattle going right along as though grass were plentiful. The silo is an effective insurance against dry season handicaps, and if this system were in general use, much of the ruinous liquidation that is imperative during droughts would be unnecessary.

A silo should be part of the equipment of every farm. Our silos cost $900, are of concrete construction, and hold about 550 tons. They are 20 feet in diameter and 62 feet in height, with 6-inch walls. The interest charge on such a silo is only $45 yearly and it is the best investment we have. I believe the time is not far distant when every acre of arable land in the cornbelt will be under plow, pasture being confined to rough areas, and that it will be profitable to feed silage to cattle on grass.

The best advice I can give cattle feeders is to lay in cattle with as much Shorthorn type as possible, use silage and farm roughage to make gains and get all the growth possible. Anyone can take a bunch of light stock cattle through the winter on silage and roughage, and if he has bought the right kind at the right price, he cannot lose money. It is axiomatic that the profit is in the gain, and when I double the weight of a bullock while he is in my possession, even if I keep him a year to do it, close figuring is not necessary to determine that he has been profitable, if he has subsisted mainly on such home-grown feeds as we use. Complaint has been made that feeding has degenerated into a gamble. This may be true, but those who have reduced it to that condition of uncertainty have departed from rational methods.

PORK—THE PRINCIPAL MEAT OF THE ARMY, CITY, AND FARM.

The quickest and surest way of augmenting the meat supply, next to the raising of poultry, is by raising hogs, the United States Department of Agriculture points out. The hog is the most important animal to raise for meat and money. He requires less labor, less equipment, less capital, makes greater gains per hundred pounds of concentrates and reproduces himself faster and in greater numbers than any other domestic animal. As a consumer of by-products the hog has no rival. No other animal equals the lard hog in its fat-storing tendency. The most satisfactory meat for shipping long distances on train, boat, or wagon, and for long storage after reaching its destination, is mess pork. There is no animal which produces more meat and meat products than the hog.

Pork finds ready sale because packers have discovered many ways of placing pork on the market in attractive and highly palatable form combined with most excellent keeping qualities. There is no other meat from which so many products are manufactured. Very near fifty per cent of the total value, in dollars and cents, of the meat and meat products slaughtered in the packing houses of the United States is derived from the hog. Our country leads by far all countries in the production as well as in the consumption of meat and meat products. Three-fourths of the world's international trade in pork and pork products originates in the United States in normal times, and the war greatly has increased this proportion. According to the estimates there was an increase of 9,580,000 hogs between 1910, the census year, and 1916, inclusive. The increase at the end of 1915 was 3,148,000 over the preceding year, while it is estimated that there was a decrease at the end of 1916 of 313,000 hogs compared with 1915.

If we expect to continue to provide meat to foreign peoples as well as our own people, every farmer must put forth the best effort to produce more hogs. Hogs can be kept profitably upon many farms where they are not found today. Farmers who already raise hogs can produce many more, for there is not much chance of producing meat this year in excess of the requirements.

More dairy farmers should raise hogs, for they fit in especially well upon dairy farms where skim milk, buttermilk, or whey is fed upon the farm. A man who has skim milk is in a better position to raise pigs than a man who has none.

Refused $9,000 for Four Cows.

In a letter to the editor of the Breeder and Sportsman, Hon. N. H. Gentry, of Sedalia, Mo., former active member of the Missouri State Fair Board, a member of the American National Live Stock Exposition and of the International Live Stock Exposition, declares that the crops in Missouri are very encouraging and that Missouri with its usual amount of moisture for the next few weeks, will not disappoint the world in its great "quota" of produce. Mr. Gentry, who by the way, is referred to by breeders as the "father of the Berkshire breed," a few days ago refused $9,000 for four Shorthorn cows, with calves at foot, and says he could not afford to sell them.

AN APPEAL FOR LIVE STOCK FARMING.

[By George Frerichs of Iroquois County, Illinois.]

Thirty-five years ago I landed in this country with twenty-seven dollars. Since then I have raised eight children and now own over 700 acres of land worth $300 per acre. Careful live stock farming has made the money.

I first took to the growing of big crops, for without that no man can make a success of farming. A half crop won't do. Some people seem to think that if they get a good living that is enough. If the farmer only stops to think, he can plainly see that it takes a good deal of money to carry his farm from one year to the next, and that if his farm is not made to produce maximum crops it is not making all for its owner that is possible to get out of it. If you own your own farm, your money is invested in that land. If you make the soil respond in big crops, you may credit your profits in terms of interest on the investment. If you only half farm it, the expense is greater than the crop will bring when sold. In that case, a farmer is not only being deprived of his interest, but he is being compelled to use up some of the principal. I need only to mention this fact, for all of us know dozens of farmers of our own acquaintance who are standing still financially, and some of them going backwards for the very reason I have pointed out.

To grow big crops, it is necessary to have rich soil and to have the land properly tilled. After that comes the careful preservation of the ripened product, grain, hay or whatever it may be. Rich soil is made where manure and leguminous roughages are found in abundance. Live stock farming provides for both of these. We ordinarily have around 300 acres of small grain to thresh, and instead of seeing how much of this straw we can have on hand the next spring, we see how much of it we can use. We sell straw to teamsters in Gilman, near by, at $2 a load, and they return us a load of manure when they come for more straw. We bed all our live stock generously during the winter, so that we usually have little straw left the following June. We keep a good many horses and cattle, which makes a good deal of manure, and by using plenty of straw we are able to save this manure and get it onto our fields, instead of leaving it to deteriorate or to be lost entirely around the barn lot. Because we need lots of alfalfa and clover hay for our Percheron horses and Shorthorn cattle, we have an abundance of leguminous roughages to keep up the fertility of our land. Here again maintaining the productive power of the soil and the growing of live stock together most advantageously. The more live stock we keep, the more of this kind of feed we need, which means more nitrogen returned to the soil from whence it came. Live stock farming, rightly carried on, never robs the fertility of the land, but always adds to its richness.

We are able to till our land well because we use big draft horses. They are able to pull the big machinery, and we don't have to be afraid to let our plows in the ground or set the harrows straight. When five or six of these big mares, weighing 1700 pounds or more, are hitched to one implement and driven across the field, one can see what has been done. It is not only a big advantage to a crop to be placed in a seed bed that has been thoroughly pulverized, but there is the added factor of having the crop in on time. By using plenty of horse power we stir our soil up well, and we do it in a hurry. With the seasons like they have been for the past three or four years, we find that we can outdo our neighbors who use small horses, because our equipment in horses and tools enables us to get our crops planted in better shape and in a good deal less time. We have the same advantage when it comes to harvesting a crop. There was a time when a young man thought all he needed to start farming was a twelve-inch walking plow, a ten-foot harrow, a wagon and a pair of plug horses. That won't do any more, though. He can't rent a farm in the better farming sections unless he has better equipment than this. The reason is that with present prices of all food products and the expense of operating a farm, no man can make money for himself, or his landlord, either, unless he is equipped to till the farm well and get crops in at the right time. I feel positive that a great deal of the money I have made should be credited to our good outfit of horses and tools.

The crop, once raised, should be marketed through live stock. Instead of selling off the fertility of the soil, every possible bit of richness should be turned back to the land. Even when crops are fed to live stock and the manure is carefully saved, only about 75 per cent of its fertilizing value can be returned to the fields. Leguminous crops, so beneficial to our soil, are the most desirable roughage for growing draft colts and cattle. I have kept an account of the amount of oats our foals have eaten over a period of years, and the figures show that I have gotten a dollar for every bushel of oats the youngsters have consumed. Grow plenty of grasses, pasture them off, and get the manure out on the land without any expense or trouble in handling it. Cover crops conserve soil moisture in the fall and make excellent feed for growing animals when the regular grasses are burned up with the blazing August sun. Grasses, and roughages particularly, bring several times their value if fed into good live stock instead of being sold on the market as a separate product.

The kind of live stock one keeps determines the profits from the farm business. The best always make the most money in the end, if rightly handled. Cattle and hogs go together. The fat or lard type of hogs fits in best with the cattle business under cornbelt conditions. I have always been a strong advocate of the cow that will produce a good beef calf and in addition enough milk to raise it well and have some left for the table. If more of this kind of cattle were used through the country we wouldn't have the present shortage in beef. The cutting up of ranches in the West into smaller holdings, and poor crops thru the cornbelt states, have curtailed this industry alarmingly. The time is upon us when every farmer ought to be raising a few good beef calves every year, and there is no mother that will do it so well nor so cheaply as a good milking Shorthorn cow.

I have always been interested in good horses and I suppose I always will be. When I came to this country, I set about to breed the best class of draft horses I could produce. In fact, I was the first man to sell a grade draft horse out of this county for $300, and, so far as I know, I am the only man who ever sold a grade team of drafters from this community for $775 the pair. I have bought and sold weanling Percherons for $400 to $500 a head. Last fall I sold a six-year-old imported Percheron stallion for $7,000. It is true he is a good individual and a great breeder, but I woud never have been able to consummate this sale if I hadn't selected good mares to mate with him and then given the offspring the very best attention in feed and care. The great secret in producing draft horses successfully is to know how to develop them. Breeding is equally as important as feeding in making good draft horses, but the average man needs to pay more attention to the feed. Most anybody knows that the better animals we mate together the better colts we will get, but people almost invariably neglect nourishment after the youngster leaves the teat. If a man knows how to take care of draft horses, the better kind he keeps the more money he will make. Cornbelt land has become too high priced to use common grade stock and make the greatest profits possible. I am referring now to horses in particular, but the same rule applies to all other classes of farm animals. I could use good grade draft mares and do my work just as efficiently as I do it with pure-breds, but the colts the grade mares would produce wouldn't bring over one-third as much as average pure-breds. If you had an extra good pure-bred he would sell right off the mare for five or six times as much as a grade colt.

The one kind do not eat any more than the other; it is just as much trouble to raise a grade colt as well as if he were a pure-bred; but there is a wide margin in the selling price. Furthermore, pure-bred colts, if they have been well fed, sell readily at weaning time, whereas grade colts have to be top-notchers to sell very easily at that age. They wouldn't bring over $75 to $100, and the other kind find good homes at $300 to $500, and even sometimes above that figure. I have enough confidence in the horse business to believe that even a renter, if he takes good care of his horses, can well afford to use pure-bred mares. I am very certain that if I were to begin all over again I would begin that very way. The one question a farmer should ask himself and decide upon before going into the pure-bred draft horse business is, "Do I know how to take care of horses rightly?" If you do, then you can't go wrong. Select the breed you like best. I chose the Percheron because it is the most popular breed in America, and I know every time I produce a good colt of that parentage, I won't have to hunt or beg for a buyer.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

HIGH-CLASS FILLIES FOR SALE.

BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

A GREAT COLT FOR SALE.

Rare breeding and individuality are combined in LOUNISKA BERBELLS, a large, handsome 2-year-old, coal-black, standard bred trotting stallion by Rappallo 2:17¼, trial 2:07, by Greco B., trial 2:12, by McKinney 2:11¼ (sire of Sweet Marie 2:02). Greco B.'s dam is Alleen (dam of 4) by Anteeo 2:16 (sire of the dam of Sonoma Girl 2:04¼) by Electioneer (grandsire of Maj. Delmar 1:59¾ and Azote 2:04¾, each of which was champion trotting gelding of his day); great-grandsire of Uhlan 1:58, present-champion trotter and great-grandsire of dam of Lee Axworthy 1:59¼, present champion trotting stallion). Greco B.'s second dam is Lou Milton (dam of Lou Dillon 1:58½, first 2:00 trotter and present champion trotting mare), granddaughter of Happy Medium (sire of Nancy Hanks 2:04, first 2:05 trotter, only 2:05 mare to produce a 2:05 trotter, Admiral Dewey 2:04¾, sire of Lord Dewey 2:03¾). Happy Medium is grandsire of Peter the Great 2:07¼, sire of 7 in 2:05 and champion extreme speed sire. Rappallo's dam Oniska is dam of San Francisco 2:07¾, trial 2:04¼ (sire of St. Frisco 2:03¾ and Mary Putney (3) 2:04¾) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½) by Guy Wilkes 2:15½ (sire of dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼), full brother to William L. (sire of Axtell (3) 2:12, the only 3-year-old to hold world's trotting championship, sire of Axworthy 2:15¾ (grandsire of Lee Axworthy 1:59¼ and sire of Hamburg Belle 2:01¼). Guy Wilkes is grandsire of Sonoma Girl 2:04¼, Maymack 2:04½ and John A. McKerron 2:04½. Rappallo's 2d dam, Bay Line by Direct Line, by Director 2:17 (sire of Directum 2:05¼, ex-champion trotting stallion and the dam of John A. McKerron 2:04½), son of Dictator (sire of Jay Eye See 2:10, first 2:10 trotter) and Dolly, dam of Onward, great-grandsire of Nervolo Belle (dam of Peter Volo 2:02 and Volga (3) 2:04½). Direct Line is out of Lida W. 2:18 (dam of Nutwood Wilkes) by Nutwood, champion brood mare sire. Rappallo's 3d dam, Puss by Cal. Nutwood (son of Nutwood and Fanny Patchen, granddaughter of George M. Patchen 2:23½, ex-champion trotting stallion); was out of a granddaughter of Williamson's Belmont (grandsire of dam of Directum 2:05¼ and grandsire of grandam of sire of Lee Axworthy 1:59¼. Rappallo's 5th dam was by Gen. Taylor, champion 20-mile trotter. Louniska Berbell's 1st dam, Beautiful Bertha, is by Moormont, grandson of Electioneer and Beautiful Bells, dam of 11 trotters including 4 champions. 2d dam, Abbie McNutward (dam of Greatness (3) 2:10¼ and Derby De Oro, trial (3) 2:19) by Guy McKinney (sire of Vernon McKinney 2:01½), son of McKinney 2:11¼ and Flossie D. by Guy Wilkes 2:15½; 2d dam Blanchward (dam of China Maid 2:05¼) by Onward (grandsire of Spanish Queen 2:04¼); 3d dam by Mambrino Patchen 58; 4th dam Lady Blanche, dam of Jaywood 6557, sire of dam of William 1:58½, champion 4-year-old pacing stallion).

Louniska Berbell's 3d dam, Lady Irene 2:14½, by Diablo 2:09¼, ex-champion 4-year-old pacing stallion, son of Chas. Derby 2:20 (sire of Jim Logan 2:01¾ and Don Derby 2:04½) and Bertha (dam of 2 in 2:05, 5 in 2:10 and 14 in the list, champion speed producing mare. 4th dam, Geraldine 2:16½ (dam of Leata J. 2:03), is by Mount Vernon 2:15¼, son of Nutwood and Daisy (the 4th dam of Maymack 2:04½) by Chieftain 721. Daisy's dam was by Doc 449 (sire of Occident 2:16½, ex-champion trotting gelding) by St. Clair. Geraldine's dam was Edith C. by Gen. McClellan 144 (sire of dam of Mack Mack 2:08 and 2 dams of Bernon McKinney 2:01½, Leata J. 2:03, and Lynwood W. 2:20½ (sire of Sonoma Girl 2:04¼. Geraldine's grandam was by Rifleman (sire of Col. Lewis 2:18¼) by imp. Glencoe.

Analysis shows that most of the blood of the entire 6 2:05 trotters produced in California is embraced in this pedigree. That of the 7 sons of Hambletonian 10 with tail male descendants in the 2:05 trotting list, 6 are here included, and that of the 55 2:05 trotters 52 are descendants in tail male of sires here tabulated. I am sick, however, and he is for sale cheap, as are also his dam and his half-brother, Derbertha Bells 60907. The first man who sees him that wants a good colt and has the money to pay for him will lead him away. Take Melrose Electric at the Mole, get off at Seminary Ave., walk south. Take Elmhurst, San Leandro or Hayward car in Oakland, get off at Seminary Ave., walk north.

J. W. PENDLETON,
1601 Seminary Ave., Oakland, Calif.

ARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10 ¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, including

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE.
EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN
P. O. DRAWER 447, SAN FRANCISCO, CAL.

Pedigrees Tabulated

BREEDER AND SPORTSMAN, 386 PACIFIC BLDG. SAN FRANCISCO.

Revel L. English, of Chino, Cal., owner of the Sierra Vista Stock Farm, one of the leading saddle horse nurseries of the country who is also is establishing a herd of pure-bred beef cattle, which will be second to none in the state.

Two Pounds of Butter Daily Yield of Cows in University Competition.

A remarkable demonstration of the rich productiveness of which the dairy cow is capable in California is the fact that the 253 cows which competed in May in the University of California State Dairy Cow Competition gave an average of about two pounds of commercial butter daily per head, worth at present market prices more than $20. The skim milk increases the income per cow at least $2.50 per month. The average daily production of milk of these cows was 1,310 pounds; of butter-fat, 56.66 pounds.

The stingiest cow in the competition gave 17.95 pounds of butter-fat during the month, and that is better than the average for all the dairy cows of California. One cow, however, gave six times as much butter-fat as that during the month, or 102,858 pounds. This was "Alice," a grade Holstein, owned by F. Stenzel of San Lorenzo. Mr. Stenzel won the Pacific Rural Press Prize for May for the production of five grades in his herd—2177 pounds of milk, and 84.64 pounds of butter-fat (116 days from last calving).

The Napa State Hospital, by the achievements of "Monte 1st," a grade Holstein which produced 97.183 lbs. of butter-fat, won the McAlister and Sons' Prize for the highest production of butter-fat by a grade cow. Six other grade cows produced more than 76 pounds of butter-fat during the month.

It would mean many millions to the dairy farmers of California, the College of Agriculture points out, if the average cow were so fed and cared for that her production would be increased by as little as one-fourth. Such an improvement for California as a whole would be entirely practicable if all the dairy farmers of the State would so handle the cows they now have as to bring them up to the highest production of which they are capable . A far greater improvement than that could readily be secured if every dairyman would get rid of the cows which fail to earn their keep, and if every dairyman would use only good pure-bred dairy bulls in his herd.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

FOR SALE

Entered and ready to Race

Owing to the fact that Mr. A. W. Longley is unable to be in California, he is offering Pedlar Direct 2:09¾ for sale. Pedlar Direct is a brown stallion foaled 1910 by Baron Direct 42841 (sire of Braden Direct 2:01¼, Dexter Direct 2:08¼, Direct Line 2:08¼, etc.); first dam Miss Episode by Pedlar 2:18 (son of Electioneer); second dam Episode by Ambassador; third dam Santos (dam of Peter the Great). This is an unusual opportunity for anyone desiring to purchase a young stallion bred in the purple, and one which last season proved himself to be a race horse in his only two starts. The horse is now at Pleasanton, where he can be seen. He has been working well and is entered in the 2:14 and 2:20 paces at Sacramento and the 2:20 pace at Fresno; first payments have been made at both places and may be included in the price, which is only $800—and far below his actual value.

Address for further particulars,

S. C. WALTON,
Pleasanton, Cal.

HOUGHTONS at MARIAN

(Colleen drew the above sulky in 2:06¾, the season's record.)

The following sulkies were drawn at last week's Marion race meeting:

	Mon.	Tues.	Wed.	Fri.	Sat.	Totals
Houghtons drawn	17	8	11	12	15	63
Nearest competitor	5	8	8	6	10	37
Third competitor	2	1	0	1	3	7
All other competitors...	3	3	1	3	1	11
Totals	27	20	20	22	29	118

Fifty-three per cent of all sulkies used were Houghtons—more than all other makes combined—and almost twice as many as our nearest competitor. If you want to be "in the swim" ride in a Houghton. Send for sulky catalogue No. —— or speed cart catalog No. ——.

Ask Dad for A Rifle!

Dad knows that it is just as important for his boy to learn how to handle a gun safely as it is for him to know how to swim. Dad also knows that a gun will teach his son responsibility, self reliance and self control.

Tell Father you want a Winchester .22 caliber rifle. Remind him that a boy's natural interest in a gun is going to make him get his hands on one sooner or later. It is going to be mighty fine if Dad can get out to enjoy the the sport with you and teach you the correct use of a rifle.

Have you heard about our Winchester Junior Rifle Corps? If not, ask your nearest dealer for a booklet explaining how any boy or girl under sixteen can earn a silver "Marksman" or gold "Sharpshooter" medal. At the same time get the proprietor of the store to let you "try on" a Winchester .22 rifle.

In case your dealer cannot supply you this information write direct to us.

BREEDER AND SPORTSMAN

VOL. LXXI. No. 2. SAN FRANCISCO, SATURDAY, JULY 14, 1917. Subscription—$3.00 Per Year

O. U. C. 2:07½, entered in 2:08 Pace, $1000, at the State Fair.

C. D. Hyland is growing two varieties of dry land alfalfa on his farm near Oakville, in Napa county, from seed brought from Russia by Prof. M. E. Hansen of the Agricultural Experiment Station, South Dakota. One variety, the Semapalatinsk, is inclined to creep, but the other, the Cossack, stools out and stands erect. The seed from the second crop of Cossack is now ripening. Mr. Hyland plants seed in beds and transplants in spring or fall, planting 2½ feet each way.

A new stallion law has been passed in Illinois. This is an enrollment act, which supersedes the one which has been in force for several years. All stallions must be licensed as heretofore, but an owner can, if he so desires, present his own affidavit instead of callingin a veterinarian. If he does not feel competent to pass on the soundness of his sire, he can present a veterinarian's affidavit, but it must be from a veterinarian approved by the State Department of Agriculture. If the horse is not sound, the nature and extent of his unsoundness must be specified in the affidavit.

Overhead racks are bad for the horse's eyes and make the horse inhale dust.

A quart of canned peaches or tomatoes on the shelf is worth a bushel rotting on the ground.

FOR SALE

Entered and ready to Race

Owing to the fact that Mr. A. W. Longley is unable to be in California, he is offering Pedlar Direct 2:09¾ for sale. Pedlar Direct is a brown stallion foaled 1910 by Baron Direct 42841 (sire of Braden Direct 2:01¼, Dexter Direct 2:08¼, Direct Line 2:08¼, etc.); first dam Miss Episode by Pedlar 2:18 (son of Electioneer); second dam Episode by Ambassador; third dam Santos (dam of Peter the Great). This is an unusual opportunity for anyone desiring to purchase a young stallion bred in the purple, and one which last season proved himself to be a race horse in his only two starts. The horse is now at Pleasanton, where he can be seen. He has been working well and is entered in the 2:14 and 2:20 paces at Sacramento and the 2:20 pace at Fresno; first payments have been made at both places and may be included in the price, which is only $800—and far below his actual value.

Address for further particulars,
S. C. WALTON,
Pleasanton, Cal.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

WM. H. NESMITH, Humphreys, Mo.

See that your garden produces dry beans, cabbage, potatoes and root crops that can be kept without canning.

The Owner-

of one of the most select and magnificently bred stables of saddle horses in the UNITED STATES has commissioned me to dispose of the entire stable.

INCLUDING
STALLIONS, MARES, AND GELDINGS

Horses

for the show ring, for the park and for useful vocations. Not only some of the most remarkable and promising prospects I have ever seen, but a stallion and a mare which have won some of the most valuable stakes in the country.

The Permanent Retirement

of the owner makes it possible for any one desiring horses which have been trained by one of the foremost trainers in the country; bred in the purple and right in every way, to secure them at a CLOSING OUT PRICE.

The Stallion

one of the most noted of all the Denmarks, can be purchased at a price which will permit of his owner paying for him the first year in the stud. He is, in addition to his show and breeding qualities, one of the few saddle stallions of this class that can be ridden with absolute secureness by any one who can ride anything. He is worth more as a pleasure horse, forgetting his enviable show ring record and breeding ability, than I am commissioned to sell him for.

Brood mares, gelding, fillies and colts at tempting prices.

PRICES NOT BASED ON SENTIMENTAL OR PROFITABLE FIGURES, BUT MADE TO ATTRACT QUICK BUYERS

REGARDING RACE REPORTS.

We believe it is the desire of every horse journal to present race reports accurately, but we doubt very much if readers comprehend how very difficult it is to do this in many cases from the reports made by secretaries or other representatives. We can, perhaps, present the situation truest by stating that it is the exception when a report is received from an association properly made. In the majority of instances the breeding is either left out or not given correctly or legibly, and this with the annual lot of green horses necessarily causes trouble. In the case of the record horse, the breeding may easily be supplied in the office, but in the case of the green performer the situation is quite different . Very often the name of the owner is written in the space intended for the driver's name, and this is constantly creating confusion, for even though one may have ideas concerning the identity of the driver the knowledge that certain horses are in certain stables is often not a true guide in placing drivers.

How much confusion might be saved, and how much accuracy might be added to published racing reports with proper care in attending to these details, only the ones engaged in their publication throughout the season can say. In this journal, for instance, there are several hundred race reports to handle during a period of approximately three months. In endeavoring to publish these at the earliest date, as we invariably do, the work becomes hurried. The time between the receipt of the report and the first issue succeeding is very short, and when extraordinary labor is piled upon the compiler it is certain that accuracy and completeness will not characterize all reports in published form.

We aim to take all the pains possible in making race reports correct, in justice to both the associations and our readers, but it can readily be understood that we can not attain the degree of correctness desired when reports reach us with deficiancies that we are unable to supply.

There are a considerable number of secretaries and correspondents to whom these remarks can not apply, for their reports are filled out as completely as is possible under the circumstances. But to those who are negligent in this respect we would urge that it is our earnest desire to present a correct report of the meetings they represent and ask that they use care in filling in the blanks so that our publication may not present a misleading story in the presenting of the summaries. We will greatly appreciate such assistance and we believe the correspondents, themselves, will feel that their extra attention is repaid in the better service they receive.—[Western Horseman.

THE LIGHT OF PUBLICITY.

One reason why we as farmers have not been able to market our products better, secure financial assistance when this was needed and purchase our necessities upon better terms, says Farm and Ranch, is because many of us lack business training that is indispensable to business transactions. There was once upon a time when this was not so important. When farmers produced most of what they used at home there was little buying and little selling. But farming is now upon a commerciai basis. We buy and sell; have deposits in the banks; advertise our products for sale and buy from advertisers. This makes it imperative that farmers have a knowledge of business affairs.

Those who had few advantages for education and little opportunity for business dealings should get in touch with the business world. Visit the bank and open an account; consult the banker, the lawyer, the doctor, the merchant and the editor of the local paper. Get acquainted with business men and establish relations with them. They will be equally glad to meet one who knows farming and will be interested in what you say about live stock and crops. These business and professional men are usually glad to meet farmers, for they realize the value of a good farmer. And when the farmer needs business information most of them are glad to help him.

The farmer of tomorrow must be a business man. He knows how to buy, sell, invest, advertise and meet the demand of progressive society. To do this, he should have as wide acquaintance as possible and have an understanding of some of the simple principles of business.

Many of the complaints against corporations, firms and individuals could be traced to a misunderstanding of business. Not many firms are dishonest. Dishonest firms can not advertise and stay in business. The swindler must hunt a new victim every time and this must be where there is no publicity. Advertising is a protection both for the buyer and the seller. Articles that are advertised must be better than those not advertised and advertisers are men who believe in their articles. They are men who have to put their money and brains into their manufacture and are not afraid to stand behind their products with their guarantee.

REORGANIZATION OF VENTURA COUNTY FAIR ASSOCIATION.

..Ventura, Cal., July 7, 1917.—The Ventura County Fair Association is undergoing reorganization, President A. Camarillo and Secretary L. P. Hathaway having tendered their resignations. The work of reorganization is in the hands of a committee consisting of such well-known men as James Hitch, specialist in mules and lima beans; Frank E. Jones, druggist; Walter Hempel, owner of Pierpont Inn; Watson Bonestel, pioneer lumberman; T. J. Donovan, dry goods merchant; David J. Reese, publisher and member of the California Civil Service Commission; Thomas McCormick, bean grower, and Thomas A. Rice ,Oxnard banker.

This committee will announce its selection of directors and nominations for officers at a meeting to be held July 14 at the Chamber of Commerce rooms, in the Ventura County Court House.

It is understood that a number of members of the committee, which ran the fair for three years and left it with a treasury balance of more than $500 and some $2500 in valuable equipment, will assist in the work of running the fair of 1917, dated for September 26-29 (inclusive), although each member of said successful committee has indicated that in pioneering the venture he has done sufficient work to entitle him to a rest from committee and official duties. The retiring committee consisted of A. Camarillo, millionaire rancher and banker; E. P. Foster, millionaire banker; John Lagomarsino, Sr., Banker and merchant; Frank E. Davis, capitalist and land owner, and Wilbur E. Stiles, rancher and capitalist.

The retiring secretary, Lewis P. Hathaway, is coroner and public administrator of Ventura county; secretary and manager of a three-million dollar mutual fire insurance company, and interested in many lines of local promotion work, and he insists, like the directors, that he has already done his bit for the great autumn show that brings the people of the county together for friendly rivalry and social intercourse.

The Ventura county fair grounds, at Seaside Park, city of Ventura, together with all stationary equipment, is owned by Ventura county. The site was donated to the county a number of years ago by E. P. Foster, one of the retiring directors, and since then the place has been parked, handsomely beautified with appropriate trees and shrubbery, until it is now one of the real beauty places in Ventura county.

The new committee, aided by the experiences of the retiring committee and officers, is working with splendid enthusiasm and is thoroughly confident of its ultimate success in the fair of 1917 and future fairs. Many of the members are racing stock owners and that they will vote an unusually large speed purse is certain.

CO-OPERATION AMONG HORSEMEN.

Horsemen believe in co-operation. Everywhere they are pulling together for some needful end. Co-operation does not necessarily mean organization. Neither does organization necessarily mean co-operation. Co-operation means that men help each other for mutual benefit. There is a selfishness which is justifiable in co-operation. It is the selfishness that leads a man to expect better results for himself through his having assisted his fellow. Herein lies the principle of business upon which successful co-operation is built. No one would decry organization. It is one of the tools of successful co-operation. Any small number may co-operate without articles of agreement or written understanding of any sort. But as the co-operative enterprise grows the more necessary is organization.

There are those who would tell us that co-operation among horsemen is a failure. They cite instance after instance of failure. The trouble in nearly every case is that there was too much organization and too little co-operation. A common example of failure is that of the farmers' companies which have purchased stallions. Those companies were doomed to failure, and their failure is a boost to co-operation rather than an objection. They were organized by a professional peddler. Oftentimes the men composing the company never met and never talked with each other. The deal was put through because the salesman had something to sell, not because the farmers were purchasing something they needed. There was no co-operation in a true sense. Had the farmers come together in a true co-operative spirit they would no doubt have seen the evil that was about to befall them and would have saved themselves from an expensive mistake.

Co-operation among horsemen can accomplish almost any worthy object. Co-operation with a purpose is the kind that wins. A group of men in eastern Minnesota has for five years held to a steady purpose of holding an annual horse show that would attract the attention of the entire country. They are accomplishing their purpose to a reasonable degree. In another state a small group of men composing a state draft horse association decided that their state must have a stallion enrollment. Forthwith they went to the state legislature; the desired law was secured. A county association in Illinois decided to hold a public sale of purebred stock in which only animals of distinct merit would be offered. It succeeded so well and so strong a demand was created for the surplus stock on their farms that they do not possess a sufficient number of surplus animals to permit them to hold another sale. Co-operation is on the increase and is greatly aiding progressive horsemen in all their work.—[H. E. McCartney, Indiana Stallion Enrollment Board, in Breeders' Gazette.

CALIFORNIA STATE FAIR PROMISES TO BE BRILLIANT AFFAIR.

The premium list of the California State Fair, which is just issued, is a timely example of the efforts of Secretary Chas. W. Paine and his assistants. Paine is a worker who believes in rolling up his sleeves and wading in and has selected for his assistants the same type. The catalogue throughout shows how efficiently and diligently Secretary Paine has worked. Every department is well up to its usual class and visitors at Sacramento, September 8 to 15, will find "Business As Usual."

This is California's sixty-third fair. It is a genuine State fair. It will be the Golden State's Show Window. The race program, always the leading feature at this great fair, filled better than in a number of years and the quality of the entries is up to that very high standard so long maintained in the State Fair races. The live stock and agricultural classification is broader in scope and more liberal in premiums than heretofore, and with California's greatest advance in the breeding of better stock just passed since the last fair, of any time since the organization, it is to be expected that this year's show will be the banner stock show of all time on this coast.

It is now conceded by the directors of this great institution that the saddle classes and the night horse show furnish one of the real features of this show, and the horse show of this year will attract a better lot of horses and bigger classes than at any previous time. More than $1,000 in cash premiums will be paid by the association this year for five-gaited horses. This, with the California State Fair $3,000 Gaited Saddle Horse Futurity; the Pacific Coast Saddle Horse Breeders' Association Futurity and the State Fair Futurity No. 2, will make these shows the most interesting ever seen at this fair. The classes for three-gaited horses, too, are very liberal and the classification well divided. The harness horse classes and pony events will give the show a lot of tone and class and give the audience as diversified a program as is ever seen.

If you have a horse that comes out sore and stiff after a race, just try one bottle of Tuttle's Elixir to two quarts of water on him in this way: Wash his shoulders, chest and legs with the lotion, scrape him out, put on an extra blanket, fold back and pin around his chest. Bandage his legs. Rub a little of Tuttle's Elixir full strength with the hands on the coronets and put some swabs around them.

Thoroughbred Matters

SEVEN THOUSAND FOR A YEARLING.

The best sale of yearlings so far this season was that conducted by the Powers-Hunter Company at Durland's on Tuesday, June 23, in which the yearlings of John H. Morris, Lucas B. Combs, Mrs. K. P. Shipp, Milton Young and John B. Gorham were disposed of, the star of the sale being the Plaudit—Wild Thistle colt, which went to G. M. Odom's bid of $7,000. The next best price of the sale was obtained for the Fair Play—Golden Fancies filly, also in the Morris consignment, when Emil Herz secured her for $2,550. Lucas Combs got $2,200 for his Ballot—Lychee Nut filly, and $2,000 for a bay filly by Cunard—Skyo, which went to Phil T. Chinn. A brown colt by Sweep out of Hazel Burke, property of Young and Gorham, fetched $2,000.

Twenty-three yearlings were sold for a total of $27,425, or the splendid average of $1,182. The Morris yearlings, numbering eleven, realized $15,850, averaging $1,440, while the four yearlings sold by Lucas Combs, the Ben Brush—Olvido colt in his consignment being the property of W. S. Hunter, netted him an average of $1,610.

HORSE-RACING TO DATE.

That horse-racing has survived in this State is proof of the sport's strength in the face of hostile legislation actually, though not ostensibly, directed at its destruction. It has lived on and this year has assumed a character that ought to put it well beyond attack. There has been an emphasis placed upon the development of the horse and a repression practiced with regard to the usual concomitant of betting.

It is, of course, true that wagering is still indulged in on the race-courses, but it is of a legal and private nature. No provision is made for all comers. In this way the sport is no different from baseball, football, tennis or rowing. In fact, it is a certainty that more money is wagered by a number of people on each of the great football games than is wagered on any one day at the race tracks.

Due to a real love of racing, the men who were charged with responsibility for the sport have brought it through the dark days, and if it succeeds in giving us the answer to our remount problem, as indeed experts say it is already doing, it deserves well not only of this community, to which it contributes a fascinating aspect of metropolitan life, but of the country as a whole.—[New York World.

Jockey Earl Pool has left for New York to get back in the saddle. Pool has been engaged to do the riding for Geo. Wingfield's Nevada Stock Farm Stable. Pool was the leading jockey at Tia Juana in 1916 ,but was out of form last season.

♣ ♣ ♣

Borrow, in running the mile and a furlong in the Brooklyn Handicap in 1:49 2-5, broke the world's record for the distance and set a mark that may last for some time to come. The old mark (1:49 3-5) was set by Roamer, at Laurel Park, Md., on October 10, 1914, when he was a three-year-old carrying 124 pounds. In England, the cradle of the thoroughbred, the best time ever recorded for the distance (1:50 4-5) was made by Frusquin's Pride, at Newmarket, on Oct. 6, 1916. Frusquin's Pride was a three-year-old and carried only 95 pounds. In Australia the record is held by Perkeo, which with 100 pounds up ran the distance in 1:52¼. That mark was established on Sept. 12, 1908. The Canadian record is 1:50 2-5 and was made by Watervale, a three-year-old carrying 112 pounds, at Fort Erie, on July 5, 1911. It is a peculiar fact that all the foreign records as well as the previous American record were made by three-year-olds.

♣ ♣ ♣

When Dr. Samuels led his field home by two lengths in the sixth race at a mile in 1:39 4-5, on Monday at Latonia, he made it a double for J. Claude Ridgers' splendid young mare Lardella (by imp. Lackford out of Clio by that successful broodmare sire, Rayon d'Or) as her two-year-old filly by Sweep, March Wind, had just as easily accounted for the first race on the card. The showing of this mare's produce during the Latonia meeting must be indeed gratifying to her owner, as three of them by different sires have been returned winners, namely Arthur Middleton (formerly Dr. Moore) by Disguise, March Wind by Sweep and Dr. Samuel by Bryn Mawr. Lardella belongs to the famous Maria West family, which perhaps accounts for no little of her excellence as a broodmare and in sending her to Sweep for three consecutive years Mr. Rodgers was probably influenced by the remarkable success that another son of Ben Brush in Broomstick, had achieved when mated with a representative of the Maria West family, namely Jersey Lightning, the dam of the peerless Regret, Futurity winner Thunderer, etc.

Mr. Rodgers now has at his farm, near Midway, a corking-looking yearling colt by Sweep out of Lardella and she was bred this spring to Hon. J. N. Camden's Light Brigade.

GOOD PRICES FOR YEARLINGS.

Home-bred yearlings outsold the imported ones at the sales of Arthur B. Hancock and Hon. J. N. Camden in New York on Thursday, June 21. The stars of the sales were a chestnut filly by Celt—Network, offered by Mr. Hancock, which was knocked down to P. A. Clark for $4,300, and a brown colt by Ben Brush—Waldena, consigned by Senator Camden, which went to Thomas Welsh's bid for $4,000. A good average was maintained, forty-one head selling for $45,075, an average of $1,099. Mr. Hancock's thirty-four brought $36,550, averaging $1,075, while the seven from Senator Camden's Hartland Stud aggregated 08,525, average $1,217.

LATONIA NOTES.

Latonia, Ky., June 30.

George J. Long achieved a popular victory when his Free Cutter won the rich Cincinnati Trophy, worth $5,840 net to the winner, from the best juveniles that could be mustered in these parts. American, an extreme outsider, landed in second place, and the top-weighted Escoba finished third. The finish was a thriller, the trio of placed ones landing noses apart, while the overwhelming favorite, Viva America, was far in the rear, having completely given up the struggle in the last furlong. Prior to that she had shown high speed and enjoyed a good lead, but when called on for her best effort she curled badly.

Today's splendid racing offering was responsible for the presence at the track of an attendance of almost record proportion. The racing was enjoyable, but the outsiders scored in most of the dashes. All the finishes were exciting and close. In the six-furlong handicap Blind Baggage, though carrying top weight, was a handy winner, with Squeeler in second place and Chalmers in front of the others.

Additional favorable advances relative to Jockey Goose's condition was received this afternoon. The doctors now feel hopeful that he will recover, but it is unlikely that he will resume riding for some time.

W. H. Baker this afternoon took over the contract on Jockey Barrett that P. M. Civil held, and will take the youngster to New York, where he will do the light riding for the Baker stable.

R. D. Williams, represented in the second race by Mike, claimed Impressive out of the race for $1600. Williams lost this filly via the claiming route in her last start.

Jockey Stearns had to cancel his riding engagements after dismounting from Fox Ridge in the opening number on account of illness.

Jockeys Dishmon and Gruber were each suspended for the remainder of the meeting on account of misbehavior at the post.

Belgian Trooper was acquired this afternoon by Knebelkamp & Howerton at private sale.

A number of the owners will ship tomorrow to Grand Rapids for the racing there. Others will send consignments to Fort Erie for the racing which also begins there the Fourth of July.

H. Fink, who acquired County Court yesterday, used him as a medium by which to claim Water Witch out of the last race for $2,400.

S. K. Nichols, whose Velvet Joe also started in the race, claimed Clare for $2,000.

Jamaica Racing Statistics.

The Metropolitan Jockey Club's second meeting of six days began June 18 and ended June 23. Thirty-six races were decided and $39,125 distributed in stakes and purses. The daily average distribution amounted to $6,522. August Belmont was the leading money-winning owner, his horses accounting for a total of $5,980. M. L. Schwartz was also quite successful, finishing second with $5,112 to his credit.

London, June 30.—Bayardo, one of the most famous English stallions in recent years, owned by A. W. Cox, who races under the name of "Mr. Fairie," is dead from paralysis. As a two-year-old he had a brilliant record, winning all seven races he competed in. In 1909 he ran fourth in the Derby, which was won by King Edward's Minoru, but in eleven other races during that season he did not suffer a single defeat. As a four-year-old Bayardo was only beaten once, this being in the Goodwood Cup, when Magic very luckily upset the long odds laid on the son of Bay Ronald. He was the sire of several smart horses, including Good and Gay. All Boy and Gay Crusader, who won the Two Thousand Guineas last month.

♣ ♣ ♣

After the running of the Great American Thomas Healey sent the good Richard T. Wilson three-year-old Campfire out on the track and he was permitted to step along for a fast mile as a part of his Brooklyn preparation. He stepped the mile in 1:39 and the early pace was remarkably fast. The fractions were: :11 2-5, :23, :34 1-5, :47, 1:12 3-5, 1:25 3-5, 1:39.

♣ ♣ ♣

Tommy Davies, who formerly rode for Captain E. B. Cassatt, but who was transferred to Mr. Butler's stable some time last season, was taken seriously ill very suddenly Friday afternoon. He was in great pain the following morning and Dr. Ross, of Queens, who was called in, pronounced the ailment a severe case of appendicitis, and decided upon an operation as soon as practicable. The intention was when Davies's home in Queens was communicated with, that the operation should be performed at once.

LATONIA GOSSIP.

[By Alves.]

It begins to look now as though the proposed meeting of the State Racing Commission before the end of the Latonia race meeting will fail of realization after all, and nothing definite will be known as to the racing dates for the coming fall.

Sickness prevents the presence of Senator Camden, while General Haldeman is busy with the ouster suit against his brother, Bruce, at Louisville, and Judge Young was hurriedly called away to some far end of the state just before Judge Harbison handed down his decision compelling the County Commissioners of Kenton County to deed to the parties behind the new race track enough space on which to erect their plant.

Last fall the County Commissioners voted against selling this land to the promoters of the new track, Leo Mayer, John Payne and Joe Rhinock, but the matter was taken to court and last Monday the decision was handed down.

Our present Racing Commission has repeatedly declared there was too much racing in Kentucky, and at every meeting granting future dates, has pared off a day here and two days there in an effort to reduce the total number of racing dates in the State for the year.

Last fall at the meeting of the Commission granting spring dates—which meeting was open to members of the press—General Haldeman stated that he had received many letters from business men in Louisville and Lexington urging him to use his influence in reducing the number of racing days in Kentucky, as it was too much of a drain on the citizens of the state to support it. In accordance with this widespread request, Lexington, both Louisville tracks and Latonia each were allotted fewer days for the spring just ending than had been the case in 1916.

It is hardly reasonable to assume that experienced men in the business like Messrs. Mayer and Payne are going to take a chance on promoting a plant that is bound to cost a quarter of a million or such a matter unless there is at least a tacit assurance of racing dates to be granted them. If this new venture goes through what is to prevent Canadian interests, for example, putting up a plant at say Paducah, and demanding dates for that plant?

Kentucky would indeed have too much racing then, and the greatest industry in the State, Thoroughbred Breeding, would be seriously endangered, for breeding cannot successfully exist without racing to give it life, and too much racing encourages the wrong kind of handling of the sport, resulting in the death of the sport eventually, as witness the St. Louis, Chicago, California and Tennessee racing of the recent past.

Every Kentuckian who has the good of the greatest of all sports at heart thoroughly agrees with the members of the Racing Commission in their wish to not have the thing overdone in this State, and it is to be hoped that the political influence working back of the promoters of the proposed track will not prove stronger than the desire of the members of the Commission to do what is best for racing in Kentucky.—[Thoroughbred Record.

Latonia, Ky., June 26.—A spill in which Jockeys Roscoe Goose, Jack Hanover and F. Stevens went down in the second race, marred the sport at the local track today. The horses to go down were Kenward, on which Goose had the mount; Mab, ridden by Stevens, and Leoneldia, with Hanover up. The mishap occurred between the five and one-half and five furlongs poles and it was due to Trusty bearing over on Sister Emblem, causing the latter to crowd Kenward to a fall. Mab and Leoneldia fell over Kenward.

Jockey E. Graves, who rode Trusty and finished second with him, was suspended for the remainder of the meeting by the stewards. Jockey Frank Murphy, who was astride of Sister Emblem, said that Goose yelled to him to pull out as he was afraid Kenward was going to be thrown, but he was unable to pull out because Trusty had his mount hemmed in.

Goose sustained an injured back, a small bone being splintered in his spine, and Hanover severe lacerations about the face. Stevens rode in another race after the fall, but the other two riders will in all probability be out of the saddle for some time.

♣ ♣ ♣

MEETING OF JOCKEY CLUB STEWARDS.

New York, June 28.—At a meeting of the stewards of the Jockey Club, held before the races today, W. H. Baker, whose previous applications have been denied, was granted a trainer's license. E. T. O'Sullivan, who formerly raced a stable in Australia and is best known as the manager of the late Les Darcy, was also granted a trainer's license.

The application of Jockey Chas. R. Peak for a license was denied. R. Goose was the most prominent of the riders to be licensed.

The full list is as follows:

Jockeys' licenses granted: Herbert Bullman, Daniel Connelly, Roscoe Goose, Albert Mott, L. Willie.

Denied: Chas. R. Peak.

Trainers' licenses granted: W. H. Baker, R. Colston, John L. Coyle, T. J. Donohue, F. W. Forsting, S. M. Henderson, John Hogan, G. A. Marshall, James T. Mooney, E. T. O'Sullivan, William Perkins, John F. Schorr, F. D. Weir.

Harness Horses and Horsemen

ARION AND CHARLEY HERR.

There have recently passed away two trotting stallions of international fame, and about each there is a romance and story that will live and be a part of the history of the light harness horse as long as this type of the equine race holds a place in the affections of the American people. Arion 2:07¾ and Charley Herr 2:07 are dead, and with their death there passed two of the most remarkable trotters ever foaled. Arion was, all things considered, the greatest two-year-old the world has ever known, not only because he was the first of that age to trot near the 2:10 mark, but from the fact that he was immeasurably superior to any trotter of the same age ever foaled up to his time. He was something new among two-year-olds, and this can be said of none other of the breed. When Arion gained the record that immortalized him, he lowered a mark of 2:18, which in itself was regarded as extraordinary, and was more than seven seconds slower than the one he established. At that time the record for three-year-old trotters was 2:10½, made by his near relative, Sunol 2:08¼, and yet this wonderful colt, which had never received the severe preparation so frequently given the youngsters at Palo Alto, lowered the record for trotters of his age to 2:10¾ to a high wheel sulky, or within two seconds of the fastest record for aged trotters. Such a performance to be appreciated in this day and generation would be a mile in 2:00 by a two-year-old, two seconds slower than the world's record for matured horses, and about four seconds faster than the existing mark for trotters of that age. In the natural course of events, the two-year-old mark will be lowered to 2:00, and even that record will be passed, but, when Arion trotted in 2:10¾, he accomplished something that very few aged trotters could do, and set forward the record eighteen years ahead of his day.

It seems strange that the death of one of the greatest horses ever foaled, as well as a sire of note, and from which have come in succeeding generations champions of genuine merit, should pass unnoticed as has that of Arion, which occurred last month at the farm of his owner, Lister Witherspoon, of Woodford County, Kentucky, to whom the horse had been given by his late owner, M. W. Savage. Arion left no son of great merit to continue the strain of the male line, but his daughters have done wonders in the stud, and he himself was by no means a failure as a sire. The best trotter got by him was Nico 2:08¼, winner, among other races, of the Walnut Hall Farm Cup, and one of the fastest trotters ever seen up to his day. His daughters have produced the crack, Etawah 2:03, winner of the Kentuckq Futurity and Transylvania, and now a promising sire at Castleton; Sadie Mac 2:06¼, an absolutely first-class trotter, unbeaten during her lifetime; Margaret Parrish 2:06¼, a mare capable of a mile in 2:04, etc. Arion was by Electioneer, and his dam was Manette, by Nutwood 2:18¾, these crosses representing the acme of fashion during the era in which the horse immortalized himself as a colt trotter. He was bred at Palo Alto Farm, from which establishment he was sold for $125,000 to the late J. Malcolm Forbes, of Boston. When the colt first appeared in the East he was much admired, and with good reason, for he had quality, substance and finish to a marked degree. Arion was very like his sire in conformation and general appearance, although he was not as well made as Electioneer, which horse carried a straighter hind leg than his son, and a bigger barrel. But for the fact that the champion of his day "toed out," and in consequence banged his knees, he would undoubtedly have gained a faster record, and it is quite probable that his immediate get would have accomplished greater things as race horses, for a large majority of his sons and daughters struck their knees from the same cause as their sire.—[American Horse Breeder.

EARLY DAY HORSEMANSHIP IN GOLDEN GATE PARK.

In 1872 the possibilities of Golden Gate Park were being considered, disputed and demonstrated, and another gait of great importance to the future of the coast was being earnestly developed by our pioneer horsemen, who were busy with the trotters over the Point Lobos clay road, sometimes called the "Yellow Road," beginning with a toll-gate at the terminus of the Geary street road and ending with another toll-gate on the hill just below the Cliff House. On the right side going west was the speedway, on the left the carriage drive; the distance being broken by several well patronized road houses. The "Turf House" was kept by Mr. Staniels and the "Homestead" by genial Ned Forster. On the opposite side of the road a half mile track was built and presided over by the well remembered Jim Eoff, known as the "King of Drivers." As was remarked in an earlier article, every driver and horse was known, all were chummy, and a newcomer could not long remain a stranger; a good horse was a sure passport. The sport began early in the morning; the busy hours being from seven until ten a. m. and from one in the afternoon until midnight. During the moonlight, the hours were chased with flying feet all night long. Many of this jolly company have joined the great majority, but their names are still familiar, and will always be associated with early San Francisco. They also "knew how." These men did not form an exclusive circle, but one that was replete with the good-will and kindred spirit always generated by a love of animals and outdoor sports. Neither money nor position drew a dividing line; the only introduction needed was a speedy horse, and the ability to handle him. A good looker without speed was soon relegated to the carriage-drive, while speed was the "open sesame" to fellowship. Lots of speed, continual brushes, plenty of fun and good-natured banter made life well worth living in the good old days of horse supremacy.

To the enthusiasm of these early horsemen California owes much of its fame for fast horses, and skilled drivers. Lack of space will limit the number of names that can be recalled.

Gov. Stanford sat behind Occident, whose speed was too well known to invite defeat. Mr. Gonzalos drive big gray Abe Edgington. J. B. Haggin and Monarch were conspicuous; Billie Lyle held the lines over Brother to Cairo; Michael Reese was constantly to be seen behind Old Trombone. W. S. O'Brien and Lady Thorn were familiar. Capt. Henry White piloted the pacer Onward. Capt. B. E. Harris was seldom beaten when behind Regulation. I. H. Madison threw dust with his pacer Taylor. Charlie Crittenden called out the best team, Shortboy and Longfellow, for his favorite patrons. I. N. Killip frequently showed the road with Lou Whipple. Col. Kellogg was happy behind Mountain Boy and mate, vying with with ex-Governor Milton S. Latham's $10,000 pair Lady Dooley and Lady Emmet. Hiram Cook handled to perfection Pride of the Bay.

George Kimball, builder of the celebrated Kimball buggies, sat behind a beautiful pair of bob-tailed grays. Each name suggests another equally well known, so that the list could be continued almost indefinitely. Horses that could go a mile in 2:40 gave the most sport and enough patronage was given the livery stables to justify the owners in keeping numbers of such teams for hire—notably, Johnnie Murphy, Billy Bridge, Lot Slocum, Chas. Crittenden and several others. More speed being developed served as a stimulus to greater effort, until a speed track in the now popular park seemed a necessity.

In 1887, after repeated discussions, a committee was formed, to devise ways and means, with Chas. Webb Howard as president and Hiram B. Cook secretary, also the following members: Adolph Spreckels, Albert Gallitin, F. C. Talbot, W. S. Hobart, W. W. Stow, Chas. Crittenden, Judge Levy, Daniel McCarty, R. B. Milroy, George Fiddes and W. E. Bridge. At a meeting Mr. Cook announced that over $30,000 had already been subscribed, headed by Gov. Stanford. It was then proposed to adopt the plan of the Chicago speed drive, and Mr. Forbes, civil engineer, was authorized to submit surveys, plans and specifications.

In the meantime the park commissioners had not been idle. John McKewen had been appointed by Frank Pixley to succeed Hammond Hall. The first tree was planted in the Panhandle on April 20, 1872, and enough results were shown to refute the assertion of the first Horticultural Society, that shade trees could not be grown in the sand, nor broad driving roads made made stable, useful, and ornamental.

BACK NUMBER.

ENTRIES FOR PETALUMA MEETING.

July 18, 19, 20, 21, 1917.

2:08 Pace, Purse $500.

Prince Zolock, b s by Zolock, H. A. Gardner, Walla Walla (Wash.); Lock Logan, br g by Zolock, J. E. Montgomery, Davis; Merry Widow, b m by Red Pac, Cliff Johnson, Raymond; Howard's Comet, b g by Teddy Rey, P. J. Howard, Alameda; Donello, br s by Washington McKinney, C. H. Sears, Bakersfield; Future Tramp, b g by Trampfast, V. P. Sexton, Oakland; The Demon, br g by Nearest McKinney, C. A. Stockton, San Jose.

2:20 Pace, Purse $500.

Hal Logan, br g by Jim Logan, J. E. Montgomery, Davis; Mountain Dee, b h by Charley D., La Panza Stable, Sacramento; Billy T., b h by Demonio, Richard Healy, Santa Rosa; Lady Bell B., b m by Demonio, G. W. Davis, Vacaville; Miss Rico, bl m by Manrico, W. G. Durfee, Los Angeles; Warren Dillon, b g by Guy Dillon, H. H. Heiman, Salinas; J. C. Simpson, b g by San Meto, Frank Goularte, Decoto; Directress Mac, bl m by Nearest McKinney, T. J. Ryan, San Francisco; Stockton Lady, b m by One Better, J. N. Jones, Stockton; Lady Alice T., br m by Geo. W. McKinney, Ed Lavin, Stockton; Beretta Dee, b m by Charley D., R. S. Irvine, San Francisco; Glenwood Mac, br g by Mac, Dan McGovern, Petaluma; Zomar, ch h by Zolock, Dearborn & Elerick, El Centro; Aviator, b g by Zombro, Marsh Thompson, Ventura; Harry R., s g by Armond Lou, Hemet Stock Farm, Hemet.

2:12 Trot, Purse $500.

Geo. N. Patterson, br h by On Voyage, Homer Rutherford, Pleasanton; San Felipe, b g by Zombro, and Eloise Dell, br m by Alconda Jay, C. F. Silva, Sacramento; Bon Cres, bl h by Bon Voyage, J. J. Campbell, Pasadena; Harold C., b g by Bon Voyage, Harold Cohen, San Francisco; Allie Lou, b m by Kinney Lou, Hemet Stock Farm, Hemet; Virginia Barnette, b m by Moko, C. J. Berry, San Francisco¼ Ella M. R., b m by Lord Alwin, Geo. J. Giannini, San Francisco; John Mack, b g by Geo. H. Fuller, La Panza Stable. Sacramento.

Free-for-All Pace, Purse $500.

Rastus, b g by Liberty Boy, La Panza Stable, Sacramento; Mack Fitzsimmons, s g by Bob Fitzsimmons, Ben F. Jaggar, Portland (Ore.); Rico, ch h by Manrico, and White Sox, b m by Del Coronado, C. J. Berry, San Francisco; Teddy Bear, b h by Del Coronado, and Bondelin, br h by The Bondsman, C. F. Silva, Sacramento; Ben Corbett, Jr., b g by Ben Corbett, and Mono Ansel, b h by Monicrat, Blosser & Finley, Santa Maria.

2:16 Trot, Purse $500.

Future Tramp, b g by Trampfast, V. P. Sexton, Oakland; Pegasus, b h by Zombro, I. L. Borden, San Francisco; Arista Ansel, b m by Prince Ansel, M. Barber, Santa Rosa; Miss Frisco, b m by San Francisco, Al Schwartz, Pleasanton; Don de Lopez, bl g by Kinney de Lopez, Hemet Stock Farm, Hemet.

2:14 Pace, Purse $500.

Verna McKinney, b m by Vernon McKinney, and Zoetrix, ch m by Zolock, Roy D. Mayes, Dixon; Paul, b g by Kinney Lou, Paul Johnson, San Juan; Bradmont, b g by Alto Leyburn, R. P. Roberts, San Francisco; Edith Light, b m, Frank Goularte, Decoto; Irene D., b m by Charley D., J. N. Jones, Stockton; R. W., br h by Wild Nutling, R. W. Earl, Santa Maria; Potreress, s m by Potrero Boy, J. P. McConnell, Santa Rosa; Demonio Prince, b h by Demonio, Will S. Peirano, Lodi; King Pointer, b g by Star Pointer, F. E. Burton, San Francisco; W. J. K., b h by Dexter Prince, Kenney & Smith, San Francisco; Frank N., b h by William Harold, John McGovern, Petaluma.

2:08 Trot, Purse $500.

San Felipe, b g by Zombro, C. F. Silva, Sacramento; Albaloma, b g by Almaden D., La Panza Stable, Sacramento; Zolock Zar, b g by Zolock, Marsh Thompson, Ventura; The Proof, b h by The Exponent, C. A. Spencer, Santa Rosa; Virginia Barnette, b m by Moko, and Esperanza, b m by Carlokin, C. J. Berry, San Francisco.

A GOOD DAY'S SPORT AT VANCOUVER.

Under the auspices of the Vancouver Driving Club and favored by one of the most beautiful days I ever saw, the harness horse fans of Vancouver had a good afternoon of sport at the Exposition half mile track, Monday, July 2.

The first race on the program was a special trot with two starters; Ferra Montana, black mare by Mentone Wilkes, driven by Charley Hawks, and the ex-California stallion Bon Guy 2:09¼. Bon Guy won the first heat in 1:09. The second heat also went to Bon Guy in 1:11. Mr. Burgoyne let Bon Guy finish the second mile out in 2:16, last quarter in 33 seconds, last eighth in 16 seconds.

The second race was a 2:40 trot with entries as follows: Bon Sadie, black mare by Bon Voyage, dam Magladi 2:07 by Del Monte, owned and driven by C. Tupper. Sweet Nut, bay mare by Burt Wood, dam by Dr. Maller. Miss Ronan, bay mare (3) by Belmar, son of Moko.

Miss Ronan won in straight heats in 1:21 and 1:23.

Second race—Free-for-All Pace:

Lady Tango, b m (6) by Belmar—Del Bars ....(J. Smith)	4	4	1
Bel Bars, b g (5) by Belmar—Del Bars .... R. Dixon)	1	2	4
Nellie Wilkes rn m by Jay Foot (Nellie Wilkes is out of the dam of William 1:58¼) ..... (J. McCullough)	2	1	4
Nick Nack, b g by Alcone—Kiona by Altamont ..... (C. Smith)	3	3	2

Time—1:10, 1:09, 1:08.

This race was a busy one. Bel Bars had the foot the first heat, closely pressed by Nellie Wilkes in the second heat; the latter would not be headed and won in 1:09.

The third heat Lady Tango began to show her class, and from away back on the outside she just paced down like a free-for-aller, stepping the last eighth in 15½ seconds and winning the heat in 1:08. Bel Bars, her full brother, was hemmed in and had Bob Dixon been able to get clear the time of the last heat would have been much faster. Bel Bars and Lady Tango are both nice pacers, sired by Belmar, a good son of Moko.

2:30 Pace:

Lady Patrick, b m by Zolock.....	1	1
Arthur Direct, bl s by Baron Direct—Episode by Ambassador ..... (Harris)	2	2
Special Blend, b g by Bland S.—Del Bars 2:11 ..... (Smith)	3	3
Delinda, br m by Penrose—Dainty Trot.....	4	4

Time—1:13, 1:10.

2:40 Pace.—This race was a fluke as the stallion Voltaire, a big chestnut stallion by Glendor, was said to be so good that he could win easily and the owners of the other four pacers said they would not start against him, and so Owner Westcot took his horse out, after honing him around a few miles at top speed. Then the other contenders came out and made such a poor showing that I won't make any report except to say, that they showed poor sportsmanship and lack of appreciation of the association's efforts and the audience who came out to see them.

While the time was not fast all the heats were close contests and the people were pleased with the day's racing. I enjoyed 1917 Dominion Day in Vancouver and hope I shall live to enjoy many more such days' sport among my Canadian friends.

C. A. HARRISON.

SADDLE and SHOW HORSES

Lee Bros., of Mexico, Mo., have in the chestnut gelding, Points McDonald, one of the best saddle horses they have brought out in some time. He is a red chestnut with blaze in face and white feet and one of the most striking looking animals ever seen. He was brought out by Johnnie Woods in 1915 as a two-year-old.

✤ ✤ ✤

Jas. D. Buford, Paris, Mo., last week sold to R. E. Thomas, of the American Sand and Gravel Co., Chicago, a good five-year-old saddle mare. Mr. Thomas has purchased several good saddle horses in Missouri and Kentucky this year. He is one of the best judges of the many amateurs in Chicago and has been very fortunate in picking winners.

PROMINENT JUDGE TO BECOME A BENEDICT.

The engagement of Charles W. Green, of Centralia, Mo., to Miss Mary O'Donna Jones, of Moberly, Mo., was announced in Moberly last week at a party given the bride-to-be by Miss Ruth Jennings. This news has been expected by Mr. Green's friends for some months and his friends, the majority of whom are horsemen in every state in the Union, have lost no time in wishing him well.

Charlie Green is a member of the firm of W. L. Green and Sons' Mule Company, Centralia, Mo., and also is one of the head buyers for the Guyton-Herrington Horse and Mule Company. He perhaps, has bought as many, if not more horses and mules for the Allies than any one individual. He is best known, however, as a judge of fine show horses and has acted in this capacity in many of the leading shows of the East, West and South. He also has been superintendent of the horse shows given at the Missouri State Fair and at the American Royal Stock Show for a number of years. He will officiate as judge at the Kentucky State Fair this fall.

Miss Jones is the daughter of Dr. and Mrs. T. H. Jones, of Moberly. She has been a great favorite in society circles of the younger set, not only in central Missouri, but in Kansas City and St. Louis, where she is a very frequent visitor. This is due not only to her pronounced charm of manner and beauty but to her varied accomplishments. In addition to painting and music she rides a great deal. Her mount, by the way, was selected by Mr. Green.

INDIANA REPLIES TO MR. HOUCHIN.

Indianapolis, Ind., July 2, 1917.

My dear Mr. Cauthorn:

With great interest I have read Mr. Houchin's answer to my query, and I am thankful that you did not sign my name, as I am not much on five-gaited saddle horses; the heavy harness stuff being my game, and as I sell a few of them—mostly to Eastern patrons—it would not do for me to criticise under my own name.

I thought that the show at Tulsa was great, especially when you take into consideration that only inexperienced people had hold of it. The president, Mr. Lewis, owns a good many fine horses and seems to be an enthusiast; the secretary, Mr. Jackson, is a cattle man, but a hustler and a man with just such a temper as it takes to run a show. The directors seemed to be overawed by the president and therefore did not say much, but all in all, they went for it and gave a most creditable show. I think the next one will be still better and run smoother. There were three harness stables there and Miss Long's stable stood head and shoulders above the others. Mr. Mooers was handicapped in not having the Spring herd to show, but still was always high up in the ribbons. Mr. Houchin had only two and I thought they received all that was coming to them. His Sporting Extra I knew many years ago, when Mrs. Fisher showed him. The mate is a stranger to me. The judging of Mr. Heyl, I thought, was the best I have seen for a long time, as it showed his perfect knowledge of the game and the conditions of the different classes.

As I said before, I am not up on saddle horses, but it struck me as funny that the saddle horse judge (I have forgotten his name) did not make the horses rack in the five-gaited Tulsa Stake, and I thought this was an important class. His decisions must have been pretty near right, however, as I did not hear any kicking.

Mr. Lewis showed a lot of saddle horses, and, I understood, they were all new acquisitions; but they ran up against the stable of Miss Long and that put them back to second place. I hope that this gentleman will stay in the game, and in time he will undoubtedly collect a stable that can head any summary.

There were some other stables present, but they really did not amount for much and consequently were not much in the money.

I hope that Mr. Houchin will bring some horses over to our Fair, where we have seen his stable before, and I am sure we will give him the best the State of Indiana affords. Certainly, if he shows Astral King in the great show you have gotten up for the Kentucky State Fair, the owners of horses everywhere will be excited. He is a great horse and I think his presence alone, in that stake, will attract crowds from everywhere. With the defeat of My Major Dare in Chicago last month, the stake looms more exciting all the time. Here's to every good horse and owner who enters there.

Yours very truly,

"INDIANA."

✤ ✤ ✤

Mrs. Grace Maxwell, of Denver, who has been in charge of Revel L. English's riding academy in Pasadena, has returned to her home in Denver for the summer.

French Field, of Mexico, Mo., the breeder of the now noted Eastern mare, Pretty Baby, has in Early Morn, a gelding by Grand McDonald; Marietta Field, by Rex McDonald, and several other youngsters, what is said to be the best horses he has ever brought out. They are being worked by Splint Barnett who is also working All McDonald and the three-year-old mare, Millicent, owned by Jack O'Brien, of Chicago. This filly is said to be the best three-year-old in that section of Missouri, where good ones literally grow on trees. Best Frolic, by Kentucky's Best, owned by A. W. Hunter, Walden, Colo., is another youngster that is going good for the Missourian.

SCHILLING DEPLORES FACT THAT MISSOURI FAIRS ARE OFF.

Breeder and Sportsman,
San Francisco, Cal.

My dear Jump:

Have just arrived out here after witnessing the South Shore Country Club Show, and it was a hummer. They beat My Major Dare, on what I don't know, but I often cannot follow the decision of the judges, probably because I don't know enough about horses; but still I love them. That was a good one on Ralph Hamilton, that he forgot to rack the horses in the Tulsa Show. I saw the question and answer of Mr. Houchin; but I cannot agree with him on a lot of what he has to say in his letter. However, that show has passed and we have to wait for the next one.

I understand that Missouri fairs are calling off a great many of their stakes and saddle classes. What is the use of breeding buying and educating Show horses? I am truly sorry to see the game go down, if such is the case, as it is the best sport I know of.

Weather is ideal out here and I must not leave here now until fall, except to go to market in Kansas City or Denver with the little pigs; and they are doing fine, even if they do eat this high-priced corn.

With best regards,

J. O. D. Ranch. D. SCHILLING.
Arroyo, Colo., June 30, 1917.

Dr. Honoria Austin, of Ruby, Ark., writes: "I am at last the happy owner of a registered saddle mare; Hilda Dare 6076, weighing 1,050 pounds, eight years old, 15:2 hands high, dark bay with black points. She is by Dare Chester 1619, by Chester Dare 10; dam, Lady Miller by Forest Squirrel 801, by Black Squirrel 58. I have been riding her for about two months now and though there have been few days in the last fifteen years that I have not been in the saddle, this is the finest horse I have ever ridden. She is the gentlest, gamest thing I ever saw; always ready to 'go yonder.' I. R. Hisel, of Fort Smith, whom I got her from, says that of all the horses he has handled there are only two—this mare and his stallion Red Rock—with so many good things. When I first rode behind Hilda I said, 'I guess with this trot she can't do much else,' but her walk, her slow gait and her rack and canter are certainly marvelous. She is also the dam of the Red Rock filly, Red Blossom, which won the saddle horse breeders' trophy at the Fort Smith Horse Show last fall. She has been re-bred to Red Rock and I am confident I will raise a winner."

LORD DENMARK 2801

LORD DENMARK 2801

Magnificent saddle stallion owned by Mrs. Thos. L. Johnson, Noyo Farm, Mendocino county, Cal. Lord Denmark is a red bay horse with four white ankles; a snip and a star. He is sired by Highland Denmark 730, by Black Squirrel 58; dam, Lady Glascoe 4008; foaled 1907. As a youngster in Kentucky he won some of the most important stake events in county and state fairs. He was brought to California by R. H. Whitten, of Los Angeles. Mr. Johnson presented him to his wife in 1912 and she has used him as a pleasure horse since. Lord Denmark and his talented owner are familiar sights in Golden Gate Park and along the beach, in San Francisco, where the Johnsons spend every winter. Mrs. Johnson also owns the beautiful five-year-old daughter of Emerald Ray, called Hazle Dazzle, one of the most beautiful ladies' mares in the country; King of Air, a two-year-old stallion by Bourbon King and out of Lady McDonald, the dam of champion My Idol. Lady McDonald also is the property of Mrs. Johnson and will soon foal to Lord Denmark. She has a number of well bred brood mares and several youngsters which have great promise, by these horses, and visitors at Noyo Farm are always assured of an equine treat.

Some things happen at auction sales that can never be explained. In the first place a good many are nervous and fearful of trusting their judgment. A sale is related by one of our exchanges that illustrates the point. A buyer bid the animal off at $108. The man to whom she was recorded as being sold refused her on the ground that he never bought her. She was resold immediately and went for $138, the man who refused her bidding up to $125.

Notes and News

MATINEE RACES AT OAKLAND.

The new Bay View track over which the Oakland Driving Club holds its matinee race meetings is being put in excellent shape. A. S. Hanks, the secretary, reports that on July 4th they had a big and enthusiastic attendance and that the races afforded interesting contests which the public enjoyed. The following were the results:

First race, 2:40 class, ½ mile heats: C. P. Abrott's Teddy 1-1-1; W. M. Ray's Andy O. 2-3-2; W. G. Burgelin's Frankie Burns 3-2-3. Time—1:28, 1:26, 1:26.

Second race, 2:20 pace: Mrs. Carlisle's Cleo Verne 1-1-1; W. Rutherford's Sleepy Dick 3-2-d; J. D. Johnstone's Beauty 2-3-2. Time—1:10, 1:15, 1:20.

Third race, free-for-all pace: H. Olsen's Little Dick 1-1-2; G. Schreiber's Allegro 3-2-1; Al Hanks' Shorty 2-4-4; G. Straus'Sidney. Time—1:08, 1:09, 1:09.

Fourth race, 2:25 mixed: T. L. Carey's Queenie Direct 0-1-3-1; E. Stinsen's Firebaugh 0-2-2-2; Geo. Hahn's Oakland Boy 3-3-1-d. Time—1:16, 1:10, 1:17, 1:17.

Fifth race, 2:35 mixed: Joe Murphy's Dolly Grey 1-1-d; W. E. Weyber's Ester Queen 2-2-1; O. Neubaumer's Sam 3-3-2. Time—1:16, 1:15, 1:21.

The entries for Sunday, July 15th, are as follows:

First race—2:25 pace, 1 mile heats: Mrs. Carlisle's Cleo Verne, T. L. Carey's Queenie Direct, Fred Straus' Sidney.

Second race—2:25 mixed, ½ mile heats: Geo. Hahn's Oakland Boy, Al Hanks' Shorty, E. Stinsen's Firebaugh.

Third race—Free-for-all pace, 1 mile heats: G. Schreiber's Allegro, H. Olsen's Little Dick, A. L. Hinds' Grand W.

Fourth race—2:40 class, ½ mile heats: Barney Hanley's Minnie H., C. P. Abrott's Teddy, W. M. Ray's Andy O.

Fifth race—2:35 class, ½ mile heats: Joe Murphy's Dolly Grey, W. E. Weyber's Ester Queen, J. D. Johnstone's Beauty.

OLD ROSEBUD WINS QUEENS.

H. C. Applegate's Old Rosebud, a homely horse, recently brought out of the West to show his speed on the Eastern tracks, made some of our very best look foolish in the Queens County Handicap at a mile, when he beat Mr. Miller's Roamer, the J. E. Widener Chiclet, H. C. Hallenbeck's The Finn and four other fair ones of the handicap division.

It was simply a case of Old Rosebud being best at the distance, for he took the lead away from R. T. Wilson's Ormesdale before the turn out of the backstretch was made and then led all the way to win by an easy two lengths, while Roamer, who was coming very fast, at the end, after an outside journey beat Chiclet, another one that ran a great race after getting the worst of the start, by a length and a half.

It was Ormesdale who showed the way after a long delay of six minutes at the post, during which time Loftus made many a wild dash on the Wilson horse in an effort to be first off. This one ran a speedy race for a great part of the journey, but curled up to nothing in the closing furlong and died away to last place.

Jockey A. Pickens, with whom The Finn was afflicted, seemed to ebb out on an exploration tour, for the only thing that kept him from going over into the infield and taking a try at the jumps was the fact that every time he weaved his way from the extreme outside over toward the inner rail he got himself into a pocket.

Pickens was reported to be a sick boy after the race and had the attention of Dr. O'Dowd. It was unfortunate ,so far as The Finn's chances were concerned, that his illness did not come on long enough before the race to have allowed a jockey to be substituted. There was nothing the matter with The Finn yesterday except Pickens. The son of Ogden was back in his old form. Messrs. Hallenbeck and Heffner are deserving of no sympathy, but The Finn is a great public favorite, and the public is entitled to see a rider on his back.

One of our readers has called our attention to classes for non-professionals to ride. The reader points out that this class was intended to encourage amateurs to show and therefore, become interested; but that by the ruling any one can borrow a well trained horse from another stable and show. If this class is meant for non-professional owners, it should be so worded, and I am sure the professional owners will ste paside and allow the class to be contested thus. For, as every progressive breeder knows, this is the man to be encouraged. They are the ultimate consumers; the hope and future of the business. For their pleasure and benefit horses are being bred and trained. Without them, it would all be useless. As it is there are not many classes for them, and certainly, where there is such an event, it should be left to theamateurs alone. If the classes referred to are not for the non-professional owner to ride, a class of that kind should be supplied.

MR. MADDEN'S VIEWS ON THE VALUE OF THOROUGHBRED BLOOD IN THE TROTTER.

Anent Mr. Madden's oracular asseveration that "All blood in the trotter that is not thoroughbred is scrub," or words to that effect, it may not be out of order to recall the fact that the master of Hamburg Place has owned three of the most noteworthy trotters in American history in Hamburg Belle 2:01¼, Soprano 2:03¾, and Tenara 2:05¾. It is entirely within the realm of truth to say that this trio of trotting mares returned dividends of at least $100,000 to Mr. Madden. Hamburg Belle, after winning the world's race record, as well as the record for a first heat, a second heat and a two-heat race, which still stand, was sold to a foreign buyer for $50,000. Soprano won the world's record for the fastest fourth heat, 2:05¼, and also went to the foreign market for a prodigious price. Tenara was the largest winning trotting mare of 1913, with $24,140 to her credit, only $358 less than Etawah, the largest money winner of any sex that year.

Now let us see how much thoroughbred blood and how much trotting, or as Mr. Madden contemptuously designates it, "scrub blood," these mares carried. Hamburg Belle was sired by Axworthy (3) 2:15½, he by Axtell (3) 2:12, he by William L., he by George Wilkes 2:22, he by Hambletonian 10, he by Abdallah 1 (six standard and registered trotters, three with records). Abdallah was by Mambrino, and he by imp. Messenger, the first thoroughbred blood found in eight generations. The dam of Hamburg Belle is Sally Simmons 2:13¼, by Simmons 2:28, by George Wilkes, and again to Messenger, six generations away. Her second dam is Sally Adams, by John Burdine, by Almont, by Abdallah 15, by Hambletonian 10, etc., to Messenger, in the sixth generation. The further pedigree of Hamburg Belle is unknown.

Soprano was sired by Bellini 2:13¼, by Hambletonian 10, and is thus four removes from Messenger. Her dam is Operetta 2:26¼, by Elyria 2:25¼, by Mambrino King, by Mambrino Patchen, by Mambrino Chief. thoroughbred in the fourth generation, by Hambletonian 10, again four generations away from the thoroughbred, and her third dam is untraced.

Tenara is by Moko, by Baron Wilkes 2:18, by George Wilkes, by Hambletonian 10, six "scrub" crosses before we come to the golden thoroughbred. Her dam is Terrentia, by Expedition 2:15¾, by Electioneer, by Hambletonian, six other "scrub" crosses. Her second dam is Tricara, by Annapolis, by Woodford Mambrino 2:21¼, by Mambrino Chief, by Mambrino Paymaster, thoroughbred, only three trotting crosses. Her third dam is Bicara, by Harold, by Hambletonian, four crosses, and her fourth dam is Belle, by Mambrino Chief, who is only one generation away from the thoroughbred.

It will thus be seen that Hamburg Belle has eight crosses on her sire's side and six on her dam's; Soprano four on the sire's and four on the dam's, and Tenara six on each side, of the blood that Mr. Madden scorns as "scrub." Considering the results he has realized from these mares, would he, as an honest man, declare he might have done better had there been a few fresh infusions of thoroughbred? Does he think that Mr. Belmont will realize any such result by racing Proof of the Pudding? Mr. Madden raced Hamburg Belle on shares with Mr. Bedford. Would he submit a proposition to do the same with Mr. Belmont with the half-bred Peter the Great colt? Dare he try it? Mr. Madden's views on almost every aspect of horse breeding and racing are entitled to respect, but in this case his strained conclusion will not carry further than a tinker's whoop unless he is willing to put it to the test.—[Trotter and Pacer.

Harry Dowling, a young trainer of considerable experience, took charge of the Dr. W. A. Barber stable the past week. Dowling's home is in Louisville but he has trained horses in California and went to Ohio from Indianapolis. He has raced quite a few good ones.

✤ ✤ ✤

Only five paraded for the Great American, but they were colts well calculated to attract especial attention in any company. Naturally Mr. Belmont's Lucullite and Mr. Macomber's Tracksend attracted most attention, although the other three starters attracted no little attention and admiration. Both Lucullite and Tracksend have been seen and admired before, but that was before they became formidable rivals for honors among the two-year-olds of 1917. Both are grand looking colts and splendidly outlined, although they are of essentially different types. Lucullite is relatively much the more rangy of the two and is extremely racy in every outline, but he is not more bloodlike, nor does he look more like a real racehorse than his sturdy and compact rival. Tracksend, who shows both the Uncle and Planudess characteristics in his outline and general makeup. Both looked like real race horses, but of widely varying types. Neither of these horses won the big race, which illustrates the proverbial uncertainty of the racing game. Sun Briar, who surprised everybody by beating them, looked well in the paddock and seemed to be of fine size, substance and conformation. But how Henry McDaniels managed to patch up such a colt and make him land with those two ringbones ahead of two really good and sound colts, is a problem which still is puzzling many of the clever trainers on Long Island, and will be one of the wonders of the season of 1917.

SUN BRIAR WINS GREAT AMERICAN.

New York, July 1—And after all those arguments over whether August Belmont's Lucullite or A. K. Macomber's Tracksend was the better colt, with the question involved being as to which was the best two-year-old of the season, here comes along Sun Briar, an imported youngster from the barn of Willis Sharpe Kilmer, and beats them both in the order named in the Great American Handicap, the big thing in yesterday's racing at Aqueduct.

Is it any wonder that with all such things coming to pass from time to time, even from day to day on the turf, racing has its wonderful attraction for the sport-loving public?

And now that this great American has passed into turf history, the question is left more wide open than ever, as to which of this year's two-year-old division is the champion. Last year it was Campfire who won it, and he proved the real champion of the year, but it is a bit difficult to conceive of Sun Briar, with his unfortunate ring-bone ailment, being of championship caliber this year, notwithstanding his so recent defeat of Lucullite and Tracksend.

It was another proud day for Bill Knapp, who rode the winner of this year's Brooklyn, when he piloted Harry Payne Whitney's Borrow to victory on Aqueduct's opening day, for he was the pilot of Sun Briar in yesterday's big event, and his riding contributed some part to the winning of his mount. Big Bill made no mistake at any part of his short journey, and he was riding in masterly fashion to land his mount winner by a head at the end of a heart-breaking finish, where an army blanket could have been thrown over the first three to get past the finishing line.

The finish of the race was one that held the great crowd spellbound, and when it was all over there was a dead stillness while those who had watched it came into the realization that the two great two-year-olds had come in behind one given so scant attention.

Out of the field of six named in the entries, Sam Hildreth scratched Mr. Belmont's Drastic, evidently content with the chances of Lucullite, the brown son of Trap Rock and Lucky Lass, one that is American bred, as were all the others aside from the winner. G. W. Loft's Peter Quince and Phoebe G. colt, Papp, was one to go, as was Andrew Miller's The Spinner, a chestnut son of Textile and Miss Hudson. Mr. Macomber's Tracksend, chestnut son of Uncle and Planutess, because of his one victory over Lucullite, was held favorite at the finish.

The start was good enough, after a delay of two minutes at the post, and the red blinkers of Lucullite showed first in prominence as they sped away, while Tracksend and Sun Briar both were right there, as were the other two, for that matter. They were closely bunched as they showed into full view after the turn into the straightaway out of the chute, with Lucullite on the outside and Tracksend looming slightly in the lead over on the inner rail. Just as the straightaway was made Lucullite swerved and bore over to the outside, losing enough ground to account for his defeat, but Jockey Butwell brought him into line, so that there seemed a great chance of his overcoming this disadvantage with the speed he was showing.

When they had arrived within a quarter of a mile of home it was evident that a great race was on, although the pace was nothing of a sensational turn. It was then that Sun Briar was seen in front, and bearing to the outside along with Lucullite, while Tracksend was coming straight down on the inside. Then when they had reached the upper end of the stand, Sun Briar was well in the lead, but with the other two contenders coming fast. It was a case of ride, ride, ride all through the final hundred yards, and Knapp just managed to keep Sun Briar's head in front, while Lucullite just beat Tracksend by half a length, while a dozen lengths back The Spinner was loafing along a length in front of Papp. The time was 1:01 2-5.

A fair circuit has been arranged by the Montana Fairs Association. It includes half a dozen fairs, four of which are county events, and the series ends with the state fair at Helena. The circuit begins Sept. 3 and one or two events each week follow throughout that month. Pacing, trotting and running races are big features of these western fairs. The arrangement of fairs in succession is a convenience for cattlemen and exhibitors of other horses as well. It allows large entries. In this way the greatest possible presentation may be made of the live stock resources of the state. By no other plan is it possible for an exhibitor to bring his cattle, horses or other stock before so many people.

✤ ✤ ✤

Quite a number of California horses participated in the races at Marion, Ohio, last week. Baxter Lou by Kinney Lou, driven by Frank Childs, won the 2:16 class pace in straight heats, the fastest of which was in 2:12½. This was the Grand Circuit performoer's first start and he won handily. Colleen 2:05¾ paced the fastest mile of the year in 2:06¾ in the 2:08 pace but was beaten for the race by Knight of Strathmore. Spriggan, starting for the first time in his life on a half mile track, got third money in the 2:14 trot won by The Ace. Spriggan finished second in the first heat beaten a nose in 2:13¼. Peter's Queen, driven by Millard Sanders, started in the 2:20 trot and was third in the first heat and finished outside the money in the summary.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 10, 11, 12—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

Striped Bass Running.—Striped bass fishermen have been making merry for the past month with large catches. The gamy fish have been running in numbers. For a time the striped bass enthusiasts were a bit discouraged with the evident lack of their favorites in the waters, but now they are putting in an appearance. The Fish and Game Commission figures that the closing of net fishing in the sloughs for the past two years has had the effect of giving the big fish a chance and the results are now being shown. Striped bass have been especially numerous in the up-country rivers.

Woodbridge, near Stockton, is a favorite spot that has been attracting a number of rodsters. Dr. Henry Abrahm stopped off there the first part of last week when he motored down from the Truckee, and there were about fifty at the concrete water gate. The short time he watched operations four big bass averaging in weight from eight to fourteen pounds, were pulled in. Across in Marin county the regulars have also been in luck.

Paul W. Shattuck, secretary of the San Francisco Fly Casting Club, says that excellent sport has been had at the organization's lodge at Union Mills, on the Truckee, during the week. W. R. Gerstle and party of four, J. P. Wallace and party and C. P. Pomeroy have been among the casters who pulled in big trout. The fish are just commencing to rise to the fly. During the months of August and September Shattuck expects to see some of the best fishing on the Truckee experienced in years. It has been a late season all around and the patient anglers will be rewarded at last.

Ralph Lowe, the master angler from San Jose, is at his favorite spot at Brockway again, and as usual is making big catches. During the week he hooked a 9½-pounder and had great sport in landing him with light tackle. Stewart Manson of San Francisco pulled in a 6¼-pound silver trout at the same place.

Los Angeles Club.—W. H. Whitcomb captured the Heine Pfirrmann trophy at the Los Angeles Gun Club trophy at the club shoot on Sunday, by smashing 97x100 targets from the 20-yard mark. J. F. Dodds and R. H. Bungay tied for second place with 96x100, and Frank Mellus and Owen Evans tied for third with 95x100 smashes. All these shooters were competing from the 20-yard mark.

Heine Pfirrmann did not want to capture his own trophy, so decided to shoot from the sixteen-yard line. He ran ninety-nine straight, missing his last bird of the hundred.

The team of Mellus, Bungay, Dodds and Whitcomb broke 479x500 birds from the 20-yard line. Mellus, Bungay, Cornett and Cline won the solid gold trophies, while Dodds, Evans, Pool and Sloan captured the silver prizes. The scores:

H. Pfirrmann, handicap 16 yds., broke 99; W. H. Whitcomb 20—97, J. F. Dodds 20—96, R. H. Bungay 20—96, F. H. Mellus 20—95, O. A. Evans 20—95, Wm. Cornett 16—93, R. O. Pool 18—93, W. A. Cornelius 19—92, C. E. Groat 18—92, Geo. Tuckett 18—90, T. B. Sloan 16—90, H. W. Cline 18—88, G. Holohan 18—88, Jack Cudahy 16—85, Mrs. Pfirrmann 16—84, Wm. Kennedy 16—80, V. A. Rossbach 18—79, F. E. Andreani 16—77, C. C. Sultner 16—66, S. B. Friend 16—66x75, Mrs. Friend 16—65x75, J. L. Brown 16—60x75, J. A. Cowan 16—48x50, F. D. Saffell 16—44x50, M. D. Towne 16—42x50, C. T. Spradling 16—22x50, J. W. Gaffney 21x25, G. L. Ashton 21x25, H. W. Hawley 18x25, C. M. Wood 93x100, J. G. Griffith 41x50, M. Steel 31x50, F. H. Teeple Jr. 43x50.

Los Angeles Gunner's Challenge.—Secretary Fred H. Teeple of the Los Angeles Gun club has arranged with W. H. Laughlin of the Western Union Telegraph Company to forward to the local papers in all the large cities of the United States and Canada a challenge addressed to their gun club for a telegraphic two, five, ten or twenty-five man team race at 100 targets per man. Of course this challenge will be accepted by a number of clubs and the matches will be shot in the order of acceptances. Mr. Teeple suggests that Elmer E. Shaner, manager of the Interstate Association, appoint a professional shooter in each of the cities interested to take charge of the contests and see that interstate rules are lived up to as regards to the heights, angles and distances the targets shall be thrown, and to referee the match. It is also suggested that all matches be shot on the seventh day of the week.

Mrs. Topperwein Is Wonder.—The Topperweins have just completed a tour throughout the New England states, shooting before large crowds at every point. The following scores, which average 96.08 per cent, show that Mrs. Topperwein has been doing some tall shooting. This average is not to be sneezed at—eh, boys?

	Shot at.	Bke.
Westerly, R. I.	100	98
Brocton, Mass.	100	98
Providence, R. I.	100	97
Manchester, N. H.	100	97
Tedesco, Mass.	100	97
New Haven, Conn.	100	96
Danbury, Conn.	100	96
Waterbury, Conn.	100	95
Holyoke, Mass.	100	95
Belmont Springs, Mass.	100	94
Norwalk, Conn.	100	93
Exeter, N. H.	50	49

Grand American Handicap.—That "time flies" no one will attempt to dispute, and that the next six weeks will roll around almost before one knows it, all will admit; therefore, begin now to make your arrangements to attend the Grand American Handicap tournament which is to be held on the beautiful grounds of the South Shore Country Club, in Chicago, for it will be a trapshooting tournament worth going miles to attend, and one the like of which you may not in years, if ever, have another opportunity to attend. The club under whose auspices the tournament is to be held is one of the wealthiest in the West and has grounds most pleasantly located for the holding of such an event. The traps—ten or twelve in number—will face Lake Michigan, and no matter how warm the weather may be elsewhere, a pleasant and cooling breeze from the lake is almost sure to make your stay in Chicago most enjoyable. And besides the pleasures to be enjoyed while at the tournament proper, there are always plenty of first-class entertainments in Chicago in the evening where one can spend a couple of hours very pleasantly, and at the same time be near enough to his hotel so that he can get to bed in time to get plenty of rest for the next day's work. Nearly every trapshooter in the country likes to spend a few days once a year in the great metropolis of the West, and the Grand American Handicap tournament will be a drawing attraction this year.

Seattle Fly Casting.—Members of the Tacoma Bait and Fly Casters' club visited Seattle on July 1st and were entertained by the Seattle club in an inter-city meet. Despite the fact that they were on foreign soil they made a good showing in several events.

The Tacoma club will hold an inter-city meet at Point Defiance some time in August.

Scores of those who entered in the various events are as follows:

Fishermen's Contest (unrestricted line and reel)—Monnett, 97.7 per cent; Byler 97, Allen 96.3, Jameson 95.7, Lyttaker 95.6, Flamont 95.2, Bailey 93, Richards 90.2, Byers 89.9, Rosenfeldt 87.7, Hutchinson 86.2, Farr 81.3, Wisen 77.2, Gilkey 75.1.

Half-ounce Accuracy Test—Flamont, 98.3 per cent; Werner 97.8, Bailey 97.7, Allen 97.7, Parrow 97.3, Byler 96.8, Byers 86.2, Gilkey 96.1, Rosenfeldt 95.8, Lyttaker 95.5, Hutchinson 94.8, Richards 79.4.

Half-ounce Test for Distance—Werner, 161 feet; Allen 141 2-5, Monnett 138 3-5, Perrow 133 3-5, Bailey 116, Byers 107, Flamont 106, Lyttaker 93, Richards 80, Byler 77, Gilkey 59, Hutchinson 25 3-5.

Light Fly Tackle—Butler, 99 3-15 per cent; L. F. Hayes 98 14-15, Farr 98 13-15, Hutchinson 98 12-15, R. S. Hayes 98 12-15, Perrow 98 9-15, Lyttaker 98, Bailey 97 13-15, Wisen 97 9-15, Flamont 96 9-15.

Fly, Distance (light tackle)—Farr, 92 feet; L. F. Hayes 90, Wisen 90, R. S. Hayes 88, Lyttaker 85, Hutchinson 84, Butler 82, Bailey 80, Perrow 70.

HOW PACIFIC COAST SHOOTERS STAND.

Three Stars Have Won A. A. T. A. Efficiency Medals So Far This Season; Others on Their Way.

Editor Breeder and Sportsman:—

Only three trapshooters of the entire Pacific Coast have won the American Amateur Trapshooters' Association's 95% Proficiency Medal, which proves that it is no easy task.

To win a 95% Medal, a shooter has to break 48x50 or better thirty times after declaring before each thirty attempts his intention to shoot for an A. A. T. A. Medal.

The envied winners are:

L. A. Reid, Seattle, Wash, who broke 1459 x 1500;

C. E. McKelvey, Seattle, Wash., who broke 1456 x 1500; and

O. N. Ford, San Jose, Cal., who broke 1427 x 1500.

Local and other California trapshooters who have won their 75%, 80%, 85% and 90% American Amateur Trapshooters' Association's Proficiency Medals and who are now working for their 95% medal, together with their standing up to June 23rd are:

95% MEDAL RACE

(Requires 30 scores of 48x50 or better.)

George Anderson, San Jose; J. F. Dodds, Los Angeles, 10; William J. McKagney, San Jose; Henry Pfirrmann, Jr., Los Angeles; Thomas Wilkes, San Francisco, 16.

Those who have won their 75%, 80% and 85% medals and who are now working for their 90% medal, together with their standing:

90% MEDAL RACE.

(Requires 20 scores of 45x50 or better.)

E. H. Adams, Oakland, 6; Clem R. Arques, Madrone, 10; A. F. Baumgartner, San Jose; J. A. Cook, Oakland, 11; C. E. Grossman, Los Angeles, 10; A. A. Durney, Alameda, 14; Ray C. Hogg, Saratoga, 1; Hall McLachlan, San Jose, 14; E. K. Mohler, Los Angeles, 18; C. N. Nash, San Jose, 2.

Those who have won their 75% and 80% medals and who are now working for their 85% medal, together with their standing:

85% MEDAL RACE.

(Requires 10 scores of 43x50 or better.)

W. A. Cornelius, Los Angeles, 6; Owen N. Jones, San Francisco; W. A. Joslyn, San Francisco; Geo. E. Oliver, Los Angeles, 3; R. C. Reed, Berkeley, 5.

Those who have won their 75% medal and are now working for their 80% medal, together with their standing:

80% MEDAL RACE.

(Requires 10 scores of 40x50 or better.)

C. W. Clement, Pasadena; Frank Free, Pasadena; C. A. Haight, San Francisco; G. E. Holohan, Los Angeles, 5; G. H. Melford, Hollywood, 1; J. V. O'Hara, Vallejo; Hugh Poston, San Francisco, 6; E. B. Thorning, Alameda, 1.

Those who are just starting in the A. A. T. A.'s Proficiency Medal contest who are working for their 75% medal, together with their standing:

75% MEDAL RACE.

(Requires 10 scores of 38x50 or better.)

J. Brendon Brady, San Francisco; G. R. Coleman, Eureka, 2; C. E. Garratt, Alameda, 2; C. W. Lindemann, Alameda, 4; C. A. Merrill, Oakland, 5; T. W. Parsons, San Francisco; H. C. Peet, San Francisco; W. H. Price, San Francisco, 2; H. A. Ray, Oakland, 3; W. J. Terry, Oakland, 4; G. W. Thomas, San Francisco, 3; Dr. Edw. Topham, San Francisco, 2; Frank Webster, San Francisco, 9.

Of all the Pacific Coast cities, San Francisco leads in the number of shooters contesting for the American Trapshooters' Association's Proficiency medals. The different cities stand as follows: San Francisco 21, Spokane 20, Seattle 19, Los Angeles 11, Portland 6, San Jose 5. Yours truly,

A. A. DURNEY.

Trade Notes.—Thirty-two state trapshooting championships have been decided to June 22, and of this number twenty-one have been won by shooters who used either a Remington UMC gun, Nitro or Arrow Speed Shells.

Likewise with the three big Interstate Handicaps: the Pacific Coast, the Southern and the Eastern—all have been won by shooters of Remington UMC.

The new trapshooting champion of Pennsylvania for 1917 is R. McIntire of Butler, Pa., who won the title from a representative field of trapshooters on June 6th, with an unbroken run of 100 targets. The champion used a Remington UMC double gun and Nitro Club Speed Shells.

The runner-up in the Missouri State Championship was J. W. Akard, who broke 98 of his 100 targets. He used a Remington UMC pump gun and Nitro Club Speed Shells. The Grand Missouri Handicap was won by Wm. Lohmeyer, from 18 yards, with a score of 89x100, shooting Nitro Club Speed Shells.

The State Trapshooting Championship of South Dakota was won at Alexandria on June 7th, by E. T. Myers of Mitchell, with 98x100, shooting Nitro Club Speed Shells.

C. B. Platt of Bridgeton, N. J., won the New Jersey State Trapshooting Championship on June 7th, with a score of 148x150. Remington UMC Nitro Club Speed Shells were again the choice. The runner-up was F. S. Tomlin, score 146x150, with Remington Pump Gun and Arrow Shells.

After a shoot-off with the runner-up the State Championship of Ohio was won by F. Brint of Toledo, score 99x100, using Remington UMC Nitro Club Speed Shells.

WHY ARE TROUT SO UNRESPONSIVE?

Most Alluring Efforts of Anglers Often Fail to Get Results; Black Bass' Bad Moods.

[By Louis Rhead.]

Fly fishermen are well aware there are frequent periods varying in duration when trout and bass will not respond to their alluring efforts. The best fly in the world fails to tempt them at times, and however often we change the flies it is all in vain. There must be reasons for such peculiar conditions because we know most species of trout —and bass too— remain for considerable time in about the same locality after once choosing the best haunts where the greatest supply of food is obtainable.

How often it happens on certain days we have no luck in places where we have seen plenty of trout rising to flies the previous evening! The fish are still there, it is certain, but they are what many anglers call "off feed" for the time being. I shall try to prove by reason of my studies of trout insects, and firmly believe, that trout are rarely if ever "off feed" during April, May and June. Indeed I am certain it is directly the opposite and that this off feed period is but a change from visible to invisible feeding.

The thoughtful angler doubtless knows that aquatic insects are first creepers that live and feed in the bed of rivers and lakes. To attain maturity by change into the insect they must of necessity wriggle through the water up to the surface and of course in full view of the watchful trout, who keeps busy feeding on them with avidity as fast as they appear out of the mud, much more so because they are at that time perfectly full grown, luscious and wingless.

Thousands, nay, millions, in a day ascend to the surface when the "rise" period is at its height. Those wrigglers who do manage to escape the trout's maw after a very short period floating at the surface develop their wings and fly in the air for the purpose of fructifying. Others there are which float to the riverside, creep up stones and aquatic plants and there more slowly develop into maturity. The latter, usually stone flies, more often take wing after sunset.

It has often occurred to me that were it possible to secure some of these large sized wrigglers, like the caddis or the green drake, impale them on a small hook and let them wriggle in the water or on the bottom, it would surely prove successful in getting fish when flies are not effective. Perhaps some anglers have observed during the rise of the large May drake how the wrigglers (which have an outside case of little bits of sticks) creep on submerged rocks.

If taken from the case the creeper will be found to be quite large, and two on a hook make a fairly good bait of fair size and very active in their movements. It may be imagined by some that a wriggling earth worm would solve the vexed problem just as well. It rarely does, even if you use a small worm on fine hook and leader sunk to the bottom. The better plan if possible is to employ a bait like the natural food fish are then taking.

This theory applies to all, not only worms but flies, artificial lures or any baits whatever in the capture of game fishes. It is not always possible to get these caddis wrigglers during invisible trout feeding, although at times I have gathered a quantity and kept them for several days in cool water, taking out a few each day to use if artificial flies should by chance be unavailing to get a rise of fish.

To overcome a difficulty of this kind there is a fairly good substitute in the maggot or gentle, one of the most deadly live baits so popular in Great Britain for trout and grayling.

Big brown trout and brook trout do most of their feeding at evening and night, for the reason that in the daytime they are too shy to forage in the shallows after minnows, and also flies are thicker just after sunset and throughout the night . Trout are sensible enough to know that by wandering about they are unable to secure as much food as by lying still on the watch for passing food constantly washed over them by the water flow.

It has pleased the Conservation Commission lately to advance the opening trout season long before aquatic insects on the wing become abundant, and all anglers know the first two to four weeks of the season are almost barren of results in large rivers, where brown and large brook trout sluggishly refuse to move till snow and ice water have run off.

This condition makes small brook fishing the only thing to do early in the season, where fly fishing is invariably impossible, so that worm fishing becomes a very poor substitute for real sport, a pain to the true sportsman, who inadvertently hooks and destroys so many fingerlings.

With bass this periodical unresponsiveness is quite as bad if not worse, especially on warm afternoons and rainy days, when even live bait, crawfish, lampers and minnows will not entice fish to take them. The only thing then is to wait patiently till evening, when the feeding mood is more likely to be upon them.

Certainly these bad moods are just the right time to give the expert a chance to try all the harder his best skill—to find out by different methods and baits just what is the right thing to get fish responsive. We may try to flash the bait rapidly through the water in midstream, or let the live bait have its own free will by playing a waiting game on the bottom and then use the same methods on lures, plugs or flies.

Big bass are very wary. I have seen them in the clear water swim right close up to a wriggling lamper, examine it carefully and as slowly swim back to their resting place, then to repeat the trip twice afterward and at last take it in a very quiet sort of way, making no fuss whatever, except going farther away than usual because the line in its mouth would not go away from the bait in its mouth. When I thought the time ripe for a good strike in a moment after—Zip!—and he's through the surface in a jiffy.

George Thomas is making his associates sit up and take notice of the way he is making the smoke fly out of the rocks. George is getting around 48 out of 50 almost every time he turns out at the traps.

✣ ✣ ✣

Bears Are Protected.—Anyone having a desire to get into a personal argument with a he or she bear after August1 and until November 1, is warned that he had better be careful. Not only is there an element of danger attached at all times, but the Fish and Game Commission announces that the new laws passed at the last Legislature go into effect on August 1, and one of them specifically sets forth that bears are to be protected until November 1. The open season for hunting then will be from November 1 to March 2. Many campers usually go out after bears, but the big boys now have the advantage of the law on their side, in addition to some other advantages.

Local Trap Shots Improve.—Veterans of the gun have been marveling this season at the progress made by the recruits that have broken into the trapshooting game about the bay. They cannot explain why the youngsters are turning out at the traps and turning in higher scores than they are able to register with years of experience at their backs. Shooting is one sport where experience is supposed to cut some ice, and yet some of the shotgun marksmen who are comparatively babies at the game are among the high guns at the tournaments.

Charley Lindemann of the Alameda Elks' Gun Club only started sighting the blue rocks last season, and yet today he is turning in straight runs consistently, and is in the championship class. Only lase Sunday he was high gun, with fifty out of fifty, and beat out a number of veterans. H. A. Ray is another that ranks in the first class. George Morrison and Al Durney are just two more who have won their spurs. The old boys cannot understand the progress made by the beginners.

Among the young professionals "Onion" Jones and Bill Ellis have been going consistently, and now Frank Blum is having the pleasure of noting big improvement in his work. Bill Ellis is just back from a tour of Arizona.

Do Birds Do Damage?—Which are the worst enemies of the agriculturist—caterpillars, grubs, and insect pests, or birds, including pheasants? We do not think this question has ever been investigated. A caterpillar or grub or a fly will destroy an incalculable amount of produce, and do irreparable damage, because these pests attack the plant in the seed sprouting and growing stage and destroy it, before it has had time to produce fruit. A bird comes along, pecks out the grub, and a fine ear of corn develops. Then the bird may take a few grains of corn from the ear of corn, which would have never existed had it not been for his devouring the grub. Multiply this by millions of ears of corn so salved, and then realize what an infinitesimal amount of insurance the farmer pays against damage by insect pests when he sacrifices a few grains of corn for every ear saved. There is not the slightest doubt that the birds are the best friends a farmer can have, and he is a mean curmudgeon who begrudges the small payment for their inestimable services. We hear that a great plague of caterpillars has appeared in Derbyshire, and we believe that this may be due to the scarcity of birds caused by the extreme severity of the winter, which destroyed at least 50 per cent of insect-eating birds. The folly of slaughtering the birds will presently, we think, be made manifest to those who have clamored for their destruction.—British Sportsman.

Killed Buck Out of Season.—Vigilance of many months was rewarded when Deputy Fish and Game Commissioner John Barnett of Ventura arrested Fred, George and James Bay of Nordhoff with part of the carcass of a spike buck in their possession, for which Justice Harrison Wilson of Ojai imposed a total of $225 fine upon the three men.

A few hunters of the back country of Ventura have openly defined the game laws for some time, and Deputy Barnett has kept them under more or less constant surveillance. Last year he got Byron Secor above Fillmore. The Bay family paid their fines and were reported to have made a business of killing deer out of season, and boasted that they never would be caught.

On searching George Bay's house at Ojai Deputy Barnett found one spike buck with part of a hind quarter gone, and a fresh hide with about forty pounds of meat from another deer hanging in the cellar.

The venison was donated to the county hospital at Ventura. The fines, $100, $75 and $50 respectively, indicate a growing disposition on the part off the justices to support vigorous law enforcement work by discouraging violations.

MRS. ADA SCHILLING GIVES TIPS.

"Less Face Powder and More Gun Powder," Is Advice to Fair Dianas at Traps.

Mrs. Ada Schilling, the nervy little lady trap shooter of the Pacific Coast, expresses herself on trapshooting as follows:

"Less face powder and more gun powder!

"This is my recipe to women for health, fun and self-development.

"I mean trapshooting and field shooting.

"To steady the nerves, sharpen the judgment, whip up the red blood and banish the petty soul qualities there is nothing like it.

"It is a pity that only about one woman in 50,000 has yet discovered this—that men have so long been allowed to monopolize this exhilarating sport.

"Since I've smelled powder and felt the delicious little kick of a gun at my shoulder I have lost all interest in pink teas and women's usual gossip fests.

"Shooting teaches a woman to be steady, unruffled, sure of herself. It takes her out into the field and on the range on an equality with broadgauge men—a sportsman's exact equality which makes no flattering or derogatory distinction between the sexes. And American women can stand a little more of that!

"It is an absolute cure for that exaggerated self-consciousness that too often becomes monstrous selfishness for lack of engrossing outside interest.

"There is an indescribable fascination in breaking targets thrown at unknown angles by a trap. Eye, hand and brain must act together in perfect accord. You've got to think fast and act instantly. No time to muddle, to see-saw, to rely on woman's sadly overworked 'instinct' in facing and measuring life.

"You concentrate—bang!—and the target is shattered. You've got what you aimed at.

"To aim at a thing and to get it instantly—that appeals to a woman perhaps even more than a man. And it is for this reason, probably, that a woman becomes tremendously enthused about trapshooting after she's once broken her first target.

"Field shooting is even better for those who have no qalms about killing game. There is exhilaration in the tramp afield, excitement in stalking the game, a satisfaction in making the hit, and wholesome weariness and appetite at the end of the day.

"This is the day of the gun, in a readful and sinister sense, but American women can get something fine, inspiring and broadening out of the gun as a sport.

"I advise every woman who has any leisure for recreation, and enough money to buy a gun, to shoot —for the good of her soul as well as her body."

Vernon Club.—A fair-sized crowd competed in the Red Cross trapshooting tournament at the Vernon Gun Club. Silk honor badges were up as trophies.

The high score in the events, a 50-bird affair, was made by J. F. Dodds. He broke a perfect 50x50. Other badge winners were Harry Cline with 47x50, Owen Evans with 46x50, Bob Bole with 44x50 and Cal Foley with 44 50.

Two cents a target was charged the shooters, and the entire receipts will be turned over to the Red Cross Ambulance fund. The results follow:—

A. W. Bruner 46, H. Hoyt 39, Van Nest 34, Foley 41, Kimble 36, Bole 44, H. Cline 47, Dodds 50, Fisk 40, O. Evans 46, Pugh 43, Brawner 43, Andrant 37, Wilson 40.

Missouri State Shoot.—Scores set at the Missouri State tourney at Springfield on June 5, 6 and 7 were as follows:

First day, 150 targets; second day, 150 targets; third day, 250 targets:—

E. V. Fisher, 135, 143, 225; T. H. Ehler 140, 120, 227; Louis Seidner 137, 125, 237; Arthur Steeples 130, 129, 227; George Nicolai 128, 127, 232; J. R. Elliott 137, 134, 239; D. Dickinson 124, 129, 229; Al Koyen, 141, 149, 239; D. J. Holland 138, 138, 234; C. M. Powers 145, 145, 241; Harvey Dixon 147, 139, 246; Wm. Ridley 146, 143, 238; George Grubb 145, 146, 239; Howard Dawkins 118, —, —; H. F. Fellows 108x135, 116, 78x110; W. L. Ware 122, 129, 214; O. D. McMillan 124, 138, 222; S. E. McGeehan 136, 132, 235; O. K. Woods 138, 133, 236; Allen Dixon 117, 129, 208; T. Shelton 136, 134, 229; Geo. Boyless 122, 115, 206; Chester Dixon 128, 127, 219; B. H. Blocksom 40x50, —, —; B. P. Williams 131, 121, 216; C. B. Eaton 142, 140, 242; Peter Baggerman 139, 130, 234; J. A. White 129, 121, 216; H. J. Herrin 124, 41x50, 88x100; C. G. Wilson 114, 91x100, —; J. W. Akard 142, 137, 239; A. P. Hohstadt 133, 128, 229; C. Bergstresser 114, —, —; Ferd Knittel 127, 127, 225; A. Clas, 134, 140, 88x100; Wm. Lohmeyer 120, 132, 216; L. J. Robison 140, 135, 224; W. McGill 137, 21x30, 232; C. E. Delong 134, 118, 233; D. H. Simmons 135, 135, 225; Murray 49x65, —, —; S. T. Mallory —, 122, 221; E. E. Stone —, 128, 201; F. D. Steinhouer —, 133, —; O. W. Hiatt —, 126, 224; F. M. Plank —, 138, —; Guy Cooper —, 123, 223; John Gillespie, third day, 226; F. P. Steenbaney 124x150, D. M. Plank 230, J. A. White 92x100, Steiny 84x100.

Professionals—Homer Clark 146, 140, 145; D. D. Cross 142, 136, 143x150; J. L. Head 1738, 137, 136x150; P. R. Miller 144, 147, 242; W. R. Crosby 145, 144, 243; H. L. Winans 117, 111, 192; Art Killam 143, 145, 244; C. G. Spencer 146, 142, 245; C. E. Gardner 135, 142, 240.

Sportsmen's Row

In the California State Shoot 78,950 targets were trapped and the 90 shooters averaged 92 7-10.

✤ ✤ ✤

There were 142 entries in the Pacific Coast Handicap at San Jose, the high water mark for this event.

✤ ✤ ✤

Toney Prior has been spending his time fishing a lot this season and has missed a number of shoots, something that Toney rarely does.

✤ ✤ ✤

R. A. King, who recently won the championship of Colorado for the third time in succession, broke 189 straight in the Nebraska State shoot.

✤ ✤ ✤

Clarence A. Haight has been making a tour of the State, and just returned this week. He will be out tomorrow for the monthly tourney of the Golden Gate club.

✤ ✤ ✤

Mrs. George Morrison is the latest recruit among the fair Dianas. She has experienced the first sensation in the sport alluring and gives promise of developing like Mrs. A. G. Wilkes and a number of other local women shots.

✤ ✤ ✤

Captain A. W. du Bray, one of the best posted men in the trapshooting sport on the Coast, writes from Portland that the boys in the Northwest have been turning in some great scores. The captain has been pleased with the big scores turned in by shots who use the Parker gun.

✤ ✤ ✤

Richard Corkill of San Diego, Cal., while fishing off the Coronado Islands a few days ago, landed four big tuna with a light tackle equipment. The fish registered twenty-six, twenty-five, eighteen and sixteen pounds. B. Smith reported the catch of a five and one-half pound corvina at Ocean Beach.

✤ ✤ ✤

"What is the difference between a flounder and a fluke?" asked one United Angler League member of another who is particularly successful in taking both species.

"The difference is easily told," replied the other. "Flounders have small mouths, without teeth. Fluke have very large mouths with teeth."

✤ ✤ ✤

The Los Angeles Kennel Club, a newly formed organization, held a meeting last week to decide the dates for an open dog show to be held in Los Angeles during the month of November. The show will either be held November 15-16-17 or 22-23-24. The show will be the largest of its kind ever held there. Johnny Powers is president of the new club. The other officers are: William Cokins, vice-president; R. C. Halstead, secretary and treasurer; Freeman Ford and J. M. Danziger, directors.

✤ ✤ ✤

Clifford J. Spooner and Ray C. Winters, two prominent members of the Multnomah Anglers' Club, recently braved the waters of the Deschutes River between South Junction and Kaskela, a distance of eight miles, in a fourteen-foot canvas collapsible boat. There was a twelve-mile current in the river, and it was with the greatest of skill that Spooner kept the craft from overturning as they shot through the three rapids in the river. The biggest rapid was about a quarter of a mile in length, in which there was a drop of thirty feet. Whenever Winters would cast into a hole and land a fish, Spooner would tie up the boat and put out his line also. In one spot in the river they landed eighteen beauties in less than half an hour. This is the first time that anybody has made the trip through the rapids in a canvas boat. These two anglers covered themselves with glory by returning to the city with the finest catch of redsides taken this season. Their two creels had seventy-six fish in them, averaging twelve inches in length and weighing from three-fourths of a pound to two pounds. Practically all of the fish were landed with flies, only three or four being taken with bait.

Portland, Ore. F. S. B.

✤ ✤ ✤

Interstate Announcements.—The following named clubs have been presented by The Interstate Association, during the month of June, with trophy cups for "Team Competition":

Wausau Game and Gun Club, Wausau, Wis., and Wausau Gun Club, Wausau, Wis.

Greenhill Trapshooting Club, Wilmington, Del., and P. B. & W. A. A. Gun Club, Wilmington, Del.

List of "newly organized gun clubs" which were presented with trophy cups by The Interstate Association during the month of June (clubs organized previous to Dec. 1, 1915, are not eligible for these trophies):

Lancaster County Gun Club, Lancaster, Pa., John K. Herr, Secretary.

Garden Grove Gun Club, Garden Grove, Ia., C. E. Stuber, Secretary.

White Eagle Gun Club, Cincinnati, Ohio, George Miller, Secretary.

THE INTERSTATE ASSOCIATION,
E. REED SHANER,
Pittsburg, Pa. Secretary.

N. W. Association Election.—At a meeting of the Sportsmen's Association of the Northwest, held on Monday evening, June 25, at Imperial Hotel, Portland, Ore., the following officers were elected: Geo. B. Baker, Seattle, Wash., president; C. E. McKelvey, Seattle, first vice-president; J. H. Davis, Seattle, second vice-president; Dr. C. L. Templeton, Seattle, secretary and treasurer. Directors—P. J. Holohan, Portland; E. B. Morris, Portland; L. H. Reid, Seattle; F. A. Dryden, Spokane; F. C. Riehl, Tacoma; I. M. Fisher, Seattle, and O. N. Ford, San Jose, Cal.

The Seattle Trapshooters' Association was awarded the thirty-fourth Sportsmen's Association of the Northwest tournament for 1918.

Portland, Ore. H. R. EVERDING.

Federal Migratory Bird Law.—Washington, D. C.—Modification of the Federal migratory bird regulations prescribing a daily closed season on all migratory game and insectivorous birds from sunset to half an hour before sunrise, instead of from sunset to sunrise, is proposed by the Department of Agriculture, and if approved by President Wilson will be put into effect about October 15.

Another change proposed would make an open season for water fowl from September 16 to December 31, inclusive, in Pennsylvania, Wisconsin, Minnesota, North and South Dakota, Montana, Wyoming, Colorado, Nevada, Idaho and parts of Oregon and Washington lying east of the summit of the Cascade mountains.

These changes are designed to unify the season on water fowls in the Northern zone, and, in most instances, are made to conform with the open seasons under state laws.

Joffre Joins N. Y. Anglers' League.—One of the many pleasant features of Marshal Joffre's visit to the United States was the presenting to the idol of France honorary membership in the United Anglers' League of New York. The Marshal is an angler, and once remarked that his ambition after the war was to go fishing.

"Papa" Joffre, as his soldiers lovingly call the Marshal, has written a hearty and charming response to the United Anglers' League accepting membership.

Dr. Benjamin M. Briggs, president of the League, said that some time in the future the league hoped when Joffre came to America again he would spend a day fishing with the membership, and also address them.

When the Marshal was here the board of directors felt that he was engaged in too important a mission for the league even to suggest what they should like to have done—go fishing—so the league did the next best thing, asked the great soldier of France to accept an honorary membership in the organization.—[N. Y. Sun.

✤ ✤ ✤

Oxen Used in War.—In "A New Collection of Voyages and Travels," published in 1746, Astley, the author, says: "The Hottentots have a sort of oxen called Bakkeleyers, or Fighting Oxen (from Bakkeley, War), which they use in their wars, as the Asiatic nations use elephants, to break and trample down the enemy. These oxen are of great service to them in managing their herds, and defending them both against the attacks of the Bushi's, or robbers, and wild beasts. On a sign given, they will fetch in stragglers, and bring the herds within compass. Every kraal has at least half a dozen of them. They know all the inhabitants of their own village, to whom they pay the same respect as the dog, and will never hurt them; but if a stranger appear without the company of a Hottentot belonging to the village, the Bakkeleyer presently makes at him, and will demolish him, unless whistled off, or frightened by firing a gun. They train them by tying a young oxen and an old Bakkeleyer together by the horns, using also blows to make them tractable. What these animals perform is amazing, and does honor to the Hottentot genius." We wonder if these fighting oxen still exist in the kraals of South Africa.

✤ ✤ ✤

Green Lake Club.—High scores featured the session at the Green Lake un Club traps on July 1st. C. E. McKelvey finished high gun in the Red Cross ambulance shoot, bringing down forty-nine birds out of fifty. E. Chantrell, Dr. King and R. S. Searle were second with forty-eight each. The proceeds of the shoot will go towards the fund being raised to equip a Red Cross ambulance for overseas service.

The five honor badges donated by the American Amateur Trapshooters' Association for high guns in the Red Cross shoots were won by J. W. Geltz, E. Chantrell, C. F. Rinehard, E. M. McKelvey and J. H. Davies. The Hercules Powder Company watch fob trophies went to the first three named in the honor badges shoot. The scores made in the Hercules trophy shoot are the first to count on the Baker diamond prize shoot which continues through July and August. The scores:

C. E. McKelvey 49, Dr. King 48, R. S. Searle 48, E. Chantrell 48, J. H. Hopkins 47, C. B. Fitzgerald 47, *I. M. Fisher 47, *L. H. Reid 47, G. R. Farr 46, L. S. Barnes 46, A. B. 231,076 DOGS ON A. K. C. REGISTER.

Radical Changes Affecting Holding of Kennel Shows Have Just Become Effective.

Three radical changes affecting all dog shows held under a license from the American Kennel Club have just become effective, according to the N. Y. Herald. The new rules must be printed in the premium lists of all clubs announcing such shows, no matter in what part of the United States they may be situated, and to facilitate matters, as there were 109 licensed dog shows last year, the American Kennel Club has in press 50,000 leaflets containing the new rules, which will be furnished to the dog show clubs at cost, to be inserted in their premium lists. The changes affect every owner who enters dogs at shows, and as to date there are 231,076 registered thoroughbred dogs on the American Kennel Club roster, quite a number of individuals are concerned.

One reform is that show superintendents must hold licenses and that no person who acts in that capacity at a show may serve as a judge at any other show. Judges, from this on, must also be licensed. Practically the only two men whose activities will be curbed by this new rule are Frank F. Dole and Chas. G. Hopton. Among twenty others who have applied for their tickets as superintendents the best known are George F. Foley, George W. Gall, of the Westminster Kennel Club, and Wilbur H. Purcell, none of whom, however, has had many engagements as a judge. Hopton, although he was superintendent at the show of the Pekingese Club at Greenwich, has taken out a license as judge and Dole intends to do so. Both are opposed to the requirement on principle, for they contend that if a club and the exhibitors intrust the judging to any individual and support him by their entries it is an unwarrantable interference in personal rights for the American Kennel Club to limit a man's earning capacity by forbidding him to judge because at another show he has served as a superintendent. Three of the greatest men promoting the popularity of dog shows in the United States, it is pointed out, James Mortimer, E. M. Oldham and James Watson, alternated as judges and superintendents until their death.

Regarding the judges, about 200 have taken out licenses. The number will undoubtedly be increased to perhaps 500, but there are from principle a number of important absentees. Naturally, the "all-rounders," such as Dr. DeMund, Harry W. Lacy, Vinton P. Breese, A. McClure Halley and Theo. Offerman, Greeman G. Lloyd and George W. Quintard, whether amateurs or professionals, are on the list. Also such infrequent amateur experts to figure in the ermine as Colonel Jacob Ruppert, J. Bailey Wilson, Miss J. Ford Guess and Miss Nina Untermyer have applied. The experts who are said to have refrained from taking out a license on principle include Winthrop Rutherford, Tyler Morse, J. Sergeant Price, Dr. H. Jarrett and Charles Wood, one of the prominent members of the A. K. C.

Clubs giving shows need only offer classes for the breeds they are certain will attract a strong entry. The cutting out of many classes will reduce expenses and will permit a club offering money prizes, so that as in the old days a dog may win enough to defray its expenses through the show circuit. The exhibitors seem to be in a fair way of at last getting something of more value than thin and shiny ribbons or silver cups that are of the same sort.

The matinee dog show of the Seattle Kennel Club has been declared off on account of the unsettled condition of the country. As the matinee show expenses come out of the club treasury, a motion was made at the last meeting that the club instruct the secretary to draw a check on the treasury for $50 for the Red Cross Society, which was done. Those who attended the meeting were L. W. Brydon, president; J. Alvah Scott, vice-president; George Tinlo, secretary and treasurer. Board of governors, William Glydenfield, Dr. O. Hartnagle, Capt. Charles Tennant and Max Steinhauer.

✤ ✤ ✤

The 365-Day Sport.—Seasonable sports come and go with their respective seasons, but the trap game goes on forever, and 365 days a year at that.

When Thanksgiving rolls around football follows baseball into the discard and tennis, golf et al. reach the vanishing point close on the heels of football—yet trapshooting, being the "fittest," survives, this for the double reason that clay target shooting is no more hampered by weather conditions than is field shooting at live girds, and, too, because several hundred thousand red-blooded Americans require something a bit more strenuous and exciting than checkers, pinochle and other indoor games.

Time was when country club activities languished during the winter months and yacht clubs boarded up their clubhouses until the spring thaw; now, when snow or slush lies deep on the golf links, the lure of the traps draws erstwhile golfers to the club grounds to enjoy the shootin' game, while across the distant meadows come the popping reports of shotguns as yachtsmen blaze away at the flying saucers skimming above the frozen river.

In short, trapshooting not only holds country club and yacht club memberships together during the cold days, but actually recruits additional strength from the numbers of outdoor devotees drawn to the clubs by the fascination of the scatter-gun sport.

BETTER LIVE STOCK
and Agricultural Topics

All cattle under 30 months of age should be vaccinated. It costs only about ten cents a head and is easily done. Since the immunity lasts but six months, it is well to repeat it every spring and fall.

✤ ✤ ✤

Male calves that are to be fattened for the market should be castrated as soon after three days old as is possible. It shocks them less and they make better steers.

✤ ✤ ✤

At an auction sale of grade Shire geldings held at Sutterton, near Boston, Lincolnshire, England, on June 1, W. Dennis & Sons, noted potato growers, sold 67 surplus working geldings for an average of $460.

✤ ✤ ✤

H. O. Wickre, of Webster, S. D., sold last week to J. O. Southard, Comiskey, Kans., a two-weeks-old Hereford bull calf sired by Mr. Southard's noted herd bull The Mighty Monarch, for $500. The dam was Caroline 482609.

✤ ✤ ✤

At the Mount Pleasant, Mo., sale of big type Poland China hogs conducted by Gillis & Allender, King Joe Jr., champion boar at the Iowa State Fair and National Swine Show in 1916, sold for $2,000. King Joe Jr. is a full litter brother to King Joe's Masterpiece, the great herd boar owned by E. H. Carter & Son, of Mexico, Mo.

✤ ✤ ✤

Overton Harris, for years one of the most prominent of Hereford breeders, exhibitor, ex-president of the Hereford Association, member of the board of directors, and known probably to as many Hereford men throughout the United States as any other one man, after the dispersion sale at Harris, Mo., June 26 and 27, announced his retirement from active business as a Hereford breeder, but stated that the business would be continued by his son, Wood Harris, and his sons-in-law, Gird McCullough and O. H. Moberly, under the old firm name of O. Harris & Sons.

✤ ✤ ✤

Poland China breeders of the Pacific Coast are looking forward with much interest to The Progress Number of the Poland China Journal, which will be issued July 25. The Poland China Journal has, perhaps, done more to promote this popular type of lard hog than any other one factor in the breed. The new Progress Number is going to be the biggest thing in the way of a special issue ever perpetrated. The Journal is published at Kansas City, Mo., by C. H. Walker.

✤ ✤ ✤

Anthrax Continues to Spread in Maui.

Anthrax appearing in three widely separated places in Maui has aroused the people of that island to an indignation that bodes ill for the individual or persons who are spreading it with deliberate intent, if they be detected. "War Venom Touches Maui," says the News of Wailuku, mincing no words in its charges that the anthrax is due to some machination of the nation's enemies, while the Weekly Times, referring to the fact that the first cases of inoculation appeared in a paddock in the exact center of five main herds, says: "See the diabolical cunning of the perpetrator of the outrage."

The Hilo press is expressing alarm lest the disease appear on the big Hawaii ranches, where it could spread before being detected, and an agitation is on there to have the cowboys sworn in as special police, with power to arrest and hold any suspicious characters frequenting the ranges.

ONE BREED IN A COMMUNITY.

[By E. A. Trowbridge.]

Possibilities of future development and progress in livestock breeding for both the individual and the community will be greatly increased if a carefully thought-out and well directed community plan of development can be adopted and followed by the community as a whole. This means that those planning to engage in the livestock business should endeavor to make one breed or one class or one type of livestock predominate in the community. It also means that a smoothly-working organization should be put into operation.

The essentials of community breeding do not consist in constitution and by-laws, but rather in the spirit of co-operation in community development, fostered by general interest, and in a common project and public spirit.

The advantages of community livestock development are: Better males can be secured where a community system exists. General interest in a given project means more careful study, and consequently more thorough education in connection with all the phases of that subject. A community scheme increases market facilities, because a given product is available in sufficient quantity and in sufficient grades to make it fairly certain that buyers can find what they want without traveling over long distances. Community livestock development projects foster community development of better farms, better homes, and better communities, and this perhaps is one of their greatest values.

$13,000 HEREFORD BULL TO CALIFORNIA.

Repeater and Gay Lad Herefords, dispersed by O. Harris & Sons, Harris, Mo., June 26 and 27, made new altitude records in the flight of auction figures for the breed. The breeding cattle proper, consisting of 260 lots, brought an aggregate of $396,375, an average of $1,525. Of these 220 were cows of all ages and heifers, which sold for $268,450, an average of $1,220. The Harris sires and herd bull prospects, 40 in all, brought $127,925, an average of $3,198. The nine head of show and herd bulls, which were the expected features of the auction, sold for $101,250, an average of $11,140 per head. The purchasers of one buyer alone totaled $93,350 worth of the Repeater family. 120 head sold at $1,000 and over; 56 head at $2,000 and over; 24 head at $3,000 and over; 14 head at $4,000 and over; 8 head at $5,000 and over; 6 head at $10,000 and over; 2 head at $20,000 and over; top bull $27,500; top cow $10,000.

There was much speculation as to which bull would command the top figure, the favorites being Repeater 7th and Gay Lad 16th. The first offered was Repeater 7th, which went to W. A. Pickering, Kansas City, Mo., at $27,500. Gay Lad 16th was bought by Geo. G. Moore of New York City at $20,000. M. M. Marshall, Los Angeles, Cal., was the buyer of Repeater's Model at $13,000.

Owens & Flynn, of Livermore, Cal., delivered last Saturday to the Golden West Meat Co., at the Stockyards, Oakland, several hundred sheep and lambs, which they had been pasturing on Spring Valley Water Co. lands near Crystal lake, San Mateo county.

All the spring lambs except about 1200 Merino ewe lambs held in reserve by Owens & Flynn for breeding purposes have been sold. This is the first time in the history of the sheep industry in this section that the ranges have been entirely cleared of lambs. There has usually been a bunch of tail-enders left in the flocks at the beginning of summer.

Contrary to all expectations, the sheep have remained on the mountain ranges a full month longer than any year the past quarter of a century. One reason is because this has been an alfilaria year. When this feed prevailed in the local mountains thirty or forty years ago, the sheep were never moved to summer pasture until July 1st or later. The other reason for the delay in moving was the fact that grain stubble has not been available until very recently on account of the lateness of the harvest. The Livermore flocks are located for the summer as follows: P. Connolly, Natomas, north of Sacramento; J. C. Kelly, Grayson; Jas. Gallagher Jr., Westley and Vernalis district; John McGlinchy, Dougherty; Fragar Bros., Bonita; F. M. Kelly, Midway; J. J. Leonardo, Union Island; Owens & Flynn, Waterford. Peter Moy's flocks are now on the Whitehall Estate lands, but will probably be moved to Natomas, near Sacramento.

SELECTING THE BEEF BULL.

In selecting the beef bull, look first for the qualities of the individual himself, advises L. B. Mann, fellow in animal husbandry in the Kansas Agricultural College. These qualities include scale, substance, strength, masculinity, character, general quality, ideal blocky beef conformation, and type representative of the breed.

"The special purpose for which the bull is intended, whether for the range or to head a purebred herd, is an important consideration. In choosing a range bull special stress must be laid on size, substance, and ruggedness. Some of the quality and fine points imperative in the bull to head a purebred herd may be sacrificed to meet these requirements.

"The pedigree is important, especially with the purebred herd bull, in respect to both bloodlines and performance of the individual or his ancestors. With the range bull the bloodlines are of somewhat less importance so long as the performance of the individual, or of his ancestors—if his own merits are untried—be satisfactory."

The age of the bull to select depends considerably on the length of time the buyer has been in the business and the reputation of his business, stated Mr. Mann. For the new breeder, there is less risk and greater profit from buying an aged bull of tried merit than a young untried bull, provided the aged animal can be procured at a price that is not prohibitive.

It will take years to determine the merits of the young bull's progeny and consequently the merits of the sire, whereas those of the progeny of the aged bull are recognized. Hence less speculation results and good bull calves from the aged sire may be saved to take his place when he is past usefulness.

Can nothing that can be kept without canning. Dry such vegetables as corn, string beans, navy beans, mature lima beans, okra, etc.

Care For Mare in Fly Time.

It is often disappointing to a mare owner, when in the spring the mare in good flesh drops him a foal, which grows lusty and strong in the first month or six weeks of its life, and then during the summer months the mare falls off in flesh continuously, while the colt seems to come to a sudden stop in its growth. For the first month all indications gave rise to the hopes that there was going to be a good development of both mother and foal. The sudden stop and setback in this development is certainly discouraging.

This setback is often the result of fighting flies. During the hot hours of the day when the mare and foal should be eating and resting in turn, they must constantly kick, switch, and move about in the fight to keep the annoying, blood sucking fly away. This constant movement and nervous strain hinders them in their eating, cuts down their time of rest to practically nothing, and the constant movement causes a drain on their energies, which takes much of the nourishment that they would otherwise use in building muscle, bone or fat.

It has been found in some instances that it pays extremely well to house the mares and colts in dark, screened and well ventilated stalls during the hot hours of the day. In these stalls the animals may rest in a place that is cool, which has an ample amount of fresh air, and where they are unannoyed by flies. With the coming of the night hours, when the flies are not so active, the mares and colts are turned out to graze.

This little trouble will be well paid for, as it may mean a difference of several hundred pounds on the colts in the fall, as well as added weight and a better breeding condition for the mare.—[Ex.

✤ ✤ ✤

When the recent session of the Legislature of Florida passed a law creating a State Live Stock Sanitary Board and appropriated $150,000 for the biennial period to be spent in the eradication of ticks and control of hog cholera and other animal diseases, the campaign for eradicating the cattle fever tick took on new life and increased vigor.

✤ ✤ ✤

The United States shipped from August 1, 1914, to May 1, 1917, 756,529 horses to Europe and 41,260 to Canada, a total of 797,789 horses. During the same period 280,902 mules went to Europe and 28,461 to Canada, a total of 309,363 mules. The grand total of horses and mules shipped was 1,107,152. The Italians accepted horses as young as four years old and the English horses as old as fourteen years when they were active, thus giving all the horses in the United States the "once over" by the American inspectors for the Allied armies. Now our own country comes into the field of horse buying. Our army must have light and heavy artillery horses. Plans are well laid and will be executed with care and precision as there is no such present haste as will force the United States into inconsiderate care and precision.

✤ ✤ ✤

A steer feeding test recently completed at the University of Missouri College of Agriculture illustrates the possibility of reducing the cost of beef production by the extensive use of corn silage. Sixteen head of two-year-old steers fed for 130 days made an average gain in live weight of 32 pounds per head. They were fed 3.16 tons of alfalfa hay, and 503 pounds of cottonseed meal and old process linseed oil meal per steer. They received no corn other than that contained in the silage. By this method of feeding a fairly satisfactory grade of beef can be produced, and it is possible to fatten three steers on an acre of good corn instead of one, which was usual under former methods of feeding.

✤ ✤ ✤

FATTEN CHICKENS IN CRATES.

Sending chickens to market which have not been properly fattened is a wasteful practice. The weight of healthy, well-grown chickens can be increased from 25 to 50 per cent in two weeks by proper feeding. Three hundred and fifty to four hundred pounds of mash moistened wit hskim milk or buttermilk and properly fed to good fowls will produce 100 pounds of poultry meat in from 12 to 14 days. Proper feeding of the chickens before marketing improves the quality of the flesh. "Crate fed" and "milk fed" are synonymous with "high quality."

Chickens which have been milk fed in crates should sell for from 2 to 3 cents above the market price for unfattened chickens. At this price, they are cheaper to the consumer on account of the reduced waste in dressing.

Detailed information in regard to the construction of feeding crates, selection of the feeders, rations and methods of feeding may be obtained without cost from the Extension Service, Ohio State University, Columbus, Ohio.

✤ ✤ ✤

KEEP UP MEAT SUPPLY.

The live stock holdings of the farmers of the United States are already too low. It would be most unfortunate if these numbers be diminished further under the pressure of the present demand for food. Indeed, an early increase of the animal products of the country should be made. Such an increase must come chiefly through the enlarging of our food supply by more successful methods of feeding, and through more complete control of contagious diseases. Milk production, among other industries, could be increased fully one-fourth by more liberal and intelligent feeding.

THE FARM

A BOY SUCCEEDS WITH PERCHERONS.

[By E. J. Fennessy of Fulton Co., Ill.]

Back in 1874 my father took me into partnership with him, when I was only fifteen years old. A boy and a father make a great team when they work together and are interested in the same thing. I liked Percherons then and I still like them. Father never made a wiser move than when he got me interested in this kind of horse. It is true that there have been times since I started to breed them that the future looked pretty discouraging, but I kept on and have made money by it. The breeders who go out of business when prices decline and get back again when values increase never make any money. It takes five years to bring a horse to a serviceable age and in that time there are many chances for bad markets. It takes a man with a steady faith to succeed as a horse breeder, the same as it does in any other business.

Right now, there is a great deal being said about the need of more horses. Certainly there never was a time when farmers needed to know this more than now, but if a man expects to get cold feet and throw up his hands in a year or two and say, "The horsebusiness is going to the dogs," he might just as well let the horse business alone. The draft horse will always be in strong demand because he can do farm work better and do more of it than any other type of horse. If a man raises a good draft horse he can always be just as sure that somebody will want it at a good price as he is certain that he will want potatoes and meat for his own table. I realize that we have passed through a period since I was a boy when horses were low, but so was everything else. I feel confident that as we come to farm more intensively, we will use more heavy horses. When land and feed were comparatively cheap, we didn't care if we did have a few extra horses around that were not earning anything, for they lived on grass in the summer and corn fodder in the winter. Now that corn is $1.50 a bushel and other feeds in proportion, farmers are not going to let any land lie idle nor keep any horse boarders if it can be helped. The mare that can pull the big machinery every day and raise a good colt besides is what every farmer wants. As I try to predict the future by the present and past, I feel just as certain as night follows day, that draft horse breeders never had such an opportunity before.

A good brood mare is the best money maker a farmer can have working for him. Figure up the colts you have sold from your old mare that has been producing a colt each year and see if you haven't a similar statement to make. I sold an old pair of Percheron mares a few years ago after they had served their time as breeders. I raised both of them and they had worked on my farm for about fourteen years, besides raising me ten colts apiece. There were eight stallions and twelve mares. I sold five of Canotoka's colts for $300, $300, $400, $300 and $400, respectively, and six of Mollie Maguire's colts brought $400, $200, $325, $500, $300 and $300 apiece. Although none of these prices were high, the total amounts to $3,725 and I own a number of daughters of the old mares. I have heard people say that there never was a mare lived that was worth $1,000. This is a mistaken idea for I know mares that one could pay $2,000 for and still make money out of them. Take either of these mares mentioned, and neither of them was a show mare, yet if one could only get $200 a head for the 20 colts, there would be $2,000 apiece for the two mares in colts sold. In fact, I only sold one colt out of the eleven head mentioned that brought as low a price as $200, and some went up to $400 and $500. A good brood mare's influence doesn't stop with her own sons and daughters, for they too reproduce and the family characteristics are carried on from generation to generation. If the qualities are good so much the better, but if they are the opposite they show up in the descendants just as readily as the good qualities. To date Canotoka has 75 descendants that are registered, and Mollie Maguire 38, to say nothing of the grade colts that have come from the stallions descended of these two mares. I have lived my entire life on the farm and I haven't yet found any animal that would measure up to a good brood mare in returning profits per dollar invested.

Keep the spring pigs growing all through the summer. It is the pig's business during this time to develop a good frame, to grow bone, muscle, and vital organs, and to lay on fat. Plenty of pasture, some grain, exercise, and good sanitary quarters are all necessary if the spring pig is to be thrifty and profitable.

Records for wheat prices were established at Porterville when local brokers paid C. L. Crowe of Terra Bella ..6 per sack for 5,000 sacks of wheat of a high grade, making $30,000 for his crop this season. Last year the same acreage brought him $11,000.

There are now more than 30,000 pig clubs in the United States. The pig club is a scheme by which the bankers and the boys and girls of the country are enlisted for co-operation in food production. The bankers lend boys and girls money to engage in pig breeding and the obligation must be refunded in a certain length of time. Another scheme is known as the endless chain. By this system a banker provides a registered sow for a local club and at the end of the season receives two choice gilts in return, which he may put out with other boys and girls under the same arrangement. The result has not only been beneficial to the food supply but it has stimulated healthy interest in pig raising.

Equipment for raising sheep on farms need not be expensive. Elaborate and expensive structures do not insure economy in management and are not essential to the welfare of the flock. In mild latitudes, little housing of any sort is needed, but, where winters are longer and more severe, some protection from storms is required. Under such circumstances, the buildings in which it is proposed to house the sheep should be dry, well ventilated, and free from drafts, but no special provisions for warmth are required.

Where the flock contains 100 or more ewes, it is desirable to provide a separate building for it. Smaller flocks can be cared for in sections of barns which contain other stock.

With the exception of alfalfa on fertile soils, no other leguminous crop will furnish as much nutritious pasturage fro mearly spring until late fall as sweet clover, when it is properly handled. Live stock thrive on it. Animals which have never been fed sweet clover may refuse to eat it at first, but this distaste can be overcome by turning them on the pasture as soon as the plants start growth.

Farmers are urged by Assistant Secretary of Agriculture Carl Vrooman to make every effort to save the vast amount of valuable manure now allowed to go to waste in this country. Mr. Vrooman estimates that one-half the manure produced in the United States is not used as a fertilizer, there being an annual loss of material worth twelve hundred million dollars—once and a half the value of the country's 1916 wheat crop

"This is not a wild guess," he continues, "but a very shrewd and conservative estimate based on reliable statistics. It has been found that each horse or mule produces annually $27 worth of manure (as compared with commercial fertilizers) each head of cattle $20 worth; each hog $8 worth. Calculating from the 1910 census figures for number of animals on farms —62,000,000 cattle, 24,000,000 horses and mules, 58,000,000 swine, and 54,500,000 sheep and goats,—the total value of manure produced is found to be about $2,461,000,000."

Two dairy bills have been signed by the Governor and will become effective in August of this year. The Satterwhite bill was mentioned in the press recently, and is one of the bills to become operative. The Rose bill provides that cream must be cooled within one hour after the milk is drawn from the cows.

One hundred and fifty-nine grade farm cows produced over 60 pounds of butterfat each, in May, 1917, in the Ferndale Cow Testing Association. Of the 73 herds tested, containing 3,609 cows, the one belonging to Gilbert E. Trigg headed the list. In the previous month, five of Mr. Trigg's grade cows had won the State Dairy Cow Competition prize offered monthly by the Pacific Rural Press for highest production by five grades headed by a registered sire. They averaged 82.372 pounds butterfat from 1,744 pounds of milk, testing 4.7 per cent. This was the best record of nine herds competing.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

HIGH-CLASS FILLIES FOR SALE.

BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

A GREAT COLT FOR SALE.

Rare breeding and individuality are combined in LOUNISKA BERBELLS, a large, handsome 2-year-old, coal-black, standard bred trotting stallion by Rappallo 2:17¼, trial 2:07, by Greco B., trial 2:12, by McKinney 2:11¼ (sire of Sweet Marie 2:02). Greco B.'s dam is Aileen (dam of 4) by Anteeo 2:16 (sire of the dam of Sonoma Girl 2:04¼) by Electioneer (grandsire of Maj. Delmar 1:59¾ and Azote 2:04¾, each of which was champion trotting gelding of his day); great-grandsire of Uhlan 1:58, present champion trotter and great-grandsire of dam of Lee Axworthy 1:59¼, present champion trotting stallion). Greco B.'s second dam is Lou Milton (dam of Lou Dillon 1:58½, first 2:00 trotter and present champion trotting mare), granddaughter of Happy Medium (sire of Nancy Hanks 2:04, first 2:05 trotter, only 2:05 mare to produce a 2:05 trotter, Admiral Dewey 2:04¾, sire of Lord Dewey 2:03¾). Happy Medium is grandsire of Peter the Great 2:07¼, sire of 7 in 2:05 and champion extreme speed sire. Rappallo's dam Oniska is dam of San Francisco 2:07¾, trial 2:04¼ (sire of St. Frisco 2:03¼ and Mary Putney (3) 2:04¾) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½) by Guy Wilkes 2:15½ (sire of dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼), full brother to William L. (sire of Axtell (3) 2:12, the only 3-year-old to hold world's trotting championship, sire of Axworthy 2:15¼ (grandsire of Lee Axworthy 1:59¼ and sire of Hamburg Belle 2:01¼). Guy Wilkes is grandsire of Sonoma Girl 2:04¼, Maymack 2:04½ and John A. McKerron 2:04½. Rappallo's 2d dam, Bay Line by Direct Line, by Director 2:17 (sire of Directum 2:05¼, ex-champion trotting stallion and the dam of John A. McKerron 2:04½), son of Dictator (sire of Jay Eye See 2:10, first 2:10 trotter) and Dolly, dam of Onward, great-grandsire of Nervolo Belle (dam of Peter Volo 2:02 and Volga (3) 2:04½). Direct Line is out of Lida, W. 2:18 (dam of Nutwood Wilkes) by Nutwood, champion brood mare sire. Rappallo's 3d dam, Puss by Cal. Nutwood (son of Nutwood and Fanny Patchen, granddaughter of George M. Patchen 2:23½, ex-champion trotting stallion); was out of a granddaughter of Williamson's Belmont (grandsire of dam of Directum 2:05¼ and grandsire of grandam of sire of Lee Axworthy 1:59¾. Rappallo's 5th dam was by Gen. Taylor, champion 20-mile trotter. Louniska Berbell's 1st dam, Beautiful Bertha, is by Moormont, grandson of Electioneer and Beautiful Bells, dam of 11 trotters including 4 champions. 2d dam, Abbie McNutward (dam of Greatness (3) 2:10¼ and Derby De Ore, trial (3) 2:19) by Guy McKinney (sire of Vernon McKinney 2:01¼), son of McKinney 2:11¼ and Flossie D. by Guy Wilkes 2:15½; 2d dam Blanchward (dam of China Maid 2:05¼) by Onward (grandsire of Spanish Queen 2:04¼); 3d dam by Mambrino Patchen 58; 4th dam Lady Blanche, dam of Jaywood 6557, sire of dam of William 1:58½, champion 4-year-old pacing stallion).

Louniska Berbell's 3d dam, Lady Irene 2:14½, by Diablo 2:09¾, ex-champion 4-year-old pacing stallion, son of Chas. Derby 2:20 (sire of Jim Logan 2:01¾ and Don Derby 2:04½) and Bertha (dam of 2 in 2:05, 5 in 2:10 and 14 in the list, champion speed producing mare. 4th dam, Geraldine 2:16½ (dam of Leata J. 2:03), is by Mount Vernon 2:15¾, son of Nutwood and Daisy (the 4th dam of Maymack 2:04½) by Chieftain 721. Daisy's dam was by Doc 449 (sire of Occident 2:16½, ex-champion trotting gelding) by St. Clair. Geraldine's dam was Edith C. by Gen. McClellan 144 (sire of dam of Mack Mack 2:08 and 2 dams of Bernon McKinney 2:01½, Leata J. 2:03, and Lynwood W. 2:20½ (sire of Sonoma Girl 2:04¼. Geraldine's grandam was by Rifleman (sire of Col. Lewis 2:18¼) by imp. Glencoe.

Analysis shows that most of the blood of the entire 6 2:05 trotters produced in California is embraced in this pedigree. That of the 7 sons of Hambletonian 10 with tail male descendants in the 2:05 trotting list, 6 are here included, and that of the 55 2:05 trotters 52 are descendants in tail male of sires here tabulated. I am sick, however, and he is for sale cheap, as are also his dam and his half-brother, Derbertha Bells 60907. The first man who sees him that wants a good colt and has the money to pay for him will lead him away. Take Melrose Electric at the Mole, get off at Seminary Ave., walk south. Take Elmhurst, San Leandro or Hayward car in Oakland, get off at Seminary Ave., walk north.

J. W. PENDLETON,
1601 Seminary Ave., Oakland, Calif.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10 ¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, including

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE.
EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

NOTES OF THE SALINAS MEETING.

The opening of the California racing program of 1917 at Salinas Wednesday assured horse-lovers of one thing—that all the hot-stove arguments and boosting has not been in vain; for horsemen who know and who have not missed a good race in this state in twenty-five years told me they had seldom seen a higher class and brighter lot of starters. Every stable on the ground has something to feature; there is a star in every man's string, that is not to be discarded in summing up the dope for the season.

The best part of the meeting has demonstrated one thing; that no one stable is sure of having the entire program at any of the meetings.

When the bell tapped Tuesday afternoon a magnificent array of starters faced the wire. However, there was only a handful of people in the grandstand. The weather was the best seen in Salinas at any time this year; the track was much better than had been expected and everything was ready and raring to go,—but one, and that was the most important to the circuit, the officials and the horse business,—the attendance.

As the summary shows, I. L. Borden's recently acquired son of Zombro, Pegasus, won the race in one-two-three order. Driver C. A. Durfee certainly has his new charge on his toes and he demonstrated to the public Wednesday that he had not lost the art of picking out and making winners. This horse drew second position in the first heat and was soon out in front and led by a safe distance the remainder of the mile. He was not extended at any time in the three heats and while the best time registered was 2:10¾ every horseman present was sure he could have made a record had it been necessary. In my opinion, Pegasus, with Charlie Durfee at the wheel, will have a low mark and a lot of good wins to his credit before the season is far gone.

The Demon, by Nearest McKinney, also showed a clever and true way of doing his work, and I think with the opportunity this very good horse will be worth watching.

Wm. Ivey showed Sweet Bow, L. H. Todhunter's good daughter of Bon Voyage, to her best ability and the audience had their eyes on her at all times.

J. Brolliar with Great Policy, by Best Policy, was in the way every moment and demonstrated he could do his bit. He, too, will be in the running the remainder of the season.

Howard's Comet and Yoncalla were distanced in the first heat.

There was a run on the card, which was won by Ida Pinack. No little controversy preceded the running of the race, and Jockeys McIntyre and Riddle pleaded with the Salinas officials to apply for a sanction from the Tijuana Jockey Club. The officials will meet to discuss the matter. McIntyre and Riddle, however, would not take a chance until favorable action is decided upon, and as a result their mounts were taken by stable boys.

All the old faces of circuit years in the past were present. George J. Giannini, I. L. Borden, Willie Durfee, J. J. Ryan, Asa Mendenhall, M. L. Woy, Charley Silva, Fred Ward and Ritchie Roberts all greeted the return of the racing season.

The summary:

First race—to beat 2:25¼:

Mattie McK., blk m by Bonnie McK.—by Lemont .....(H. Helman)	Won		
Time—2:10½.			
Second race—2:24 class trot, purse $500:			
Pegasus, b h by Zombro....(C. A. Durfee)	1	1	1
Great Policy .....(Brolliar)	2	2	2
Sweet Bow .....(Ivey)	3	3	4
The Demon .....(Place)	4	4	3
Howard's Comet .....(Chadbourne)	d		
Yoncalla .....(Burton)	d		
Time—2:10¾, 2:13¼, 2:13.			
Third race—2:08 pace, purse $500:			
Potrero Boy, b g by Demonio....(Daniels)	1	1	3
A. B. C. .....(Chadbourne)	6	7	1
Lock Logan .....(Montgomery)	7	2	2
Pope Hartford .....(Finley)	3	3	6
Mack Fitzsimmons .....(Helman)	4	4	4
Merry Widow .....(Johnson)	5	6	5
Bold Harry Aerolite .....(Machado)	2	5	w
Time—2:09¼, 2:08¼, 2:11.			

Fourth race—Running, five furlongs—Won by Ida Pinack (Donovan); Pajaroita II (Imes) second; Von Dillon (Powers) third. Time—1:02¾.

Mack Fitzsimmons, the chestnut gelding in Henry Helman's stalbe, was picked for the winner of the 2:08 pace, but did not get away and go yonder as it looked like he should.

I think when Lon Daniels and Potrero Boy rushed to the lead and finished ahead by a good length in the first heat, Owner Silva was more surprised than any one. Potrero Boy took the lead at the first turn and all Silva said was: "Yes, he is ahead now but it's a long way home." However he came home in this as well as the next heat. He would, I should say, have done the same in the third heat had he not gone to a break on the last turn. At that, he came to his stride in a jiffy and made a great fight for the lead. However A. B. C. led in that contest with Lock Logan second.

Two weeks ago it was suggested that this good gelding be turned out; but Mr. Silva would not listen to it, and his winning the first race of the season makes it look good for his owner's judgment.

Mr. Chadbourne will get somewhere with A. B. C. before the season is well on, is the opinion of the "railbirds."

Lock Logan came in for the rear card in the first heat but finished second on the last two occasions.

Bold Harry Aerolite, with a whiz of a start in the first heat, finishing second, looked like he would be able to continue in that style for the remainder of the card, but could not do better than fifth in the second heat, after which he was withdrawn. This horse is going to be one of the stars of the circuit, however, in the judgment of many of those present.

Mr. Finley and Pope Hartford did not have the best luck in the world but this good-looking pair will be in the fray all the year. Merry Widow, the bay mare by Red Pac, that showed such remarkable form some years back, was not up to her old time class on Tuesday.

Second Day, July 12.

Salinas, July 12.—Lon Daniels and the steeds of Charles F. Silva of Sacramento were the whole show in the second afternoon's events of the new California harness circuit here today. Daniels completed the feat of winning the two events on the card in straight heats, which is as much as any person can do.

Altogether it was a day of old horses and old faces, marked by the return of William G. Durfee of Los Angeles, former premier race driver of these parts. The younger Durfee did not meet with his usual success, for in six heats he was six times second. But Willie kept knocking at the door with keen persistency and gave an inkling of how pesky he will get before many weeks pass by on this harness wheel.

What was noticeable in Daniels' success of today was his marked improvement with San Felipe. Not since the year Charley DeRyder marched through the whole circuit with San Felipe did the big son of Zombro show his true form.

From bad he went to worse, and he flitted from hand to hand until San Felipe was almost discarded as a has-been. But he was a powerful animal today, as his three heats in 2:09¼, 2:10½ and 2:12 will testify. According to the followers of form, it was the fastest bit of trotting that has been shown in the United States this season by 2:12 trotters.

In accomplishing his straight heat victory San Felipe trimmed Clarence Berry's $10,000 favorite, Virginia Barnette. Virginia looked well enough and did all that was asked of her during the pre-season, but, as Willie Durfee himself put it, she met too much horse in San Felipe. Virginia was persistent in her challenging, however, and she only lost the last test by a nose. The heat provided a great stretch duel between Daniels and Durfee.

John Mack, Allie Lou and George N. Patterson split third money. John Mack would likely have won the opening heat had he not broke ten yards from the wire.

John Malcolm had an easier time in the pace. He had the foot of his field and, as was the rule, he led from wire to wire. Oro Fino made a bold bid several times during the race, but Daniels was never forced to draw his whip on the son of Dan Logan. Bradmont, the same old "Braddie" of the Park Stadium, paced beautifully, but was evidently up against it.

Tom Woods won the run. He hails from the bushes near Santa Rosa and, aside from a few, no one even knew he was in the race. Yet he won by three lengths. The summary:

First race—2:14 pace, purse $500:			
John Malcolm, b g by Dan Logan (Daniels)	1	1	1
Oro Fino .....(W. G. Durfee)	2	2	2
Bradmont ..... (Roberts)	4	3	3
Irene D. .....(Jones)	4	3	3
R. W. .....(Finley)	7	5	5
Demonio Prince .....(Tryon)	3	d	
Paul ..... (Helman)	6	d	
Verna McKinney .....(Chadbourne)	8	w	
Time—2:08¼, 2:09¾, 2:12½.			
Second race—2:12 trot, purse $500:			
San Felipe, b g by Zombro.....(Daniels)	1	1	1
Virginia Barnett .....(W. G. Durfee)	2	2	2
John Mack .....(Tryon)	3	4	5
Allie Lou .....(Ward)	4	5	3
Geo. N. Patterson.....(Rutherford)	5	3	4
Miss Frisco .....(Schwartz)	6	6	d
Ella M. R. .....(Machado)	7	d	
Time—2:09¼, 2:10½, 2:12.			

Third race, running, five furlongs—Won by Tom Woods (Powers); Alice Teresa (Imes) second; Ida Pinack (Donovan) third. Cruzados Jr. and Bert Getty also ran.

———o———

* * * *

The Hemet Farm horse did not start the first day. Manager Ward has them looking like black molasses, however, and there will be something doing when they are given their opportunity.

* * *

Walter Tryon, too, has the Cowell string in the pink, and that he will gather in some ripe melons this week is almost as certain as though he had already won.

* * * *

W. G. Durfee, who by the way is accompanied by his wife, will be seen in several of the big events this week. He did not start Wednesday. "Billie" said he did not want to beat his dad; while "Pap" declared the Kid was afraid of him. There is honest-to-goodness rivalry between the two this season. Whenever a Durfee comes in the ring the crowd expects something. They will not be disappointed this year.

VIRGINIA BARNETTE 2:07¾
Clarence Berry's $10,000 mare now racing on the California Circuit.

* * * *

Chas. Silva, of Sacramento, and several members of his family are interested "railbirds."

* * * *

Walter Tryon, Elmo Montgomery, Will Durfee, W. H. Williams and several other well known horsemen are "chaperoned" by their wives.

* * * *

J. N. Jones of Stockton has his horses "raring to go."

* * * *

M. L. Woy, one of the most prominent owners in the state, is present but did not send his stable down. They will join the horses here next week. Mr. Woy reports them all in fine fettle and believes he has some of the best horses he has ever owned. They have done splendidly in training and he is justly proud of their ability.

* * * *

Roland C. Drake, formerly of Lexington, Ky., and a leading driver and breeder of harness horses for many years, is here in the interest of the Hartford Live Stock Insurance Co. Mr. Drake is the manager of the Hartford's Pacific Department.

* * * *

Judges were: R. L. Orr of Hollister, M. L. Woy of Fresno and Robert Garside of Salinas. Timers, A. Mendenhall, San Francisco, J. P. Nicholls and J. W. Storm of Salinas. Jos. Waddell is starter.

* * * *

While the first day's attendance was very small, better crowds are expected for the rest of the week.

———o———

The glory of winning the first race on the circuit of 1917 has been captured by I. L. Borden with his good horse Pegasus 2:08½ (by Zombro 2:11, dam La Belle 2:16 by Sidney) at the first day of the Salinas meeting. But look who was up!—that "grand young old man" Pop Durfee held the ribbons, and the combination was just naturally too hard to beat. Mr. Borden has been prominent in the harness horse game on this coast for many years, not only at the track where he has always entered his horses liberally, but as a breeder and officer of the various organizations formed to foster the interests of racing and breeding. He is a member of the State Board of Agriculture, Treasurer and Vice-President of the P. C. T. H. B. A., Treasurer of the California Fair and Racing Circuit, and always in the front ranks where he could do the most good for the cause, not only with his money but his best efforts. Mr. Borden is a millionaire farmer, banker, capitalist, and enthusiastic horseman who races his horses because he loves the sport.

✤ ✤ ✤

SINGLE G. vs. BEN EARL.

We find great interest at the present among the horsemen over the prospective match race between Single G. 2:00 and Ben Earl 2:00½, due to take place at Youngstown, Ohio.

Both horses have many followers among the supporters of the sport and each faction has the best of reasons to advance why their particular favorite will be certain to gain the victory.

Ben Earl is reported to have been in 2:06¼ and Single G., in a public performance against time, paced the Warren, O., track last week, on a day when the course was far from good, in 2:07½, last half in 1:02 and last quarter in 30 seconds.

Both horses are remarkable performers and the enterprise of Secretary F. D. Woodland in securing this event for the Youngstown meeting clearly shows the best of judgment on his part as it is certain to be a winner at the gate and, in the event of no mishaps, bears promise of being one of the most notable match races ever contested over a half-mile track, and some remarkable miles may be expected.

Such events as these are especially desirable as they attract other than regular followers of the sport, and to that extent tend to widen the regard for the pastime.—[American Sportsman.

BREEDER AND SPORTSMAN

VOL. LXXI. No. 3. SAN FRANCISCO, SATURDAY, JULY 21, 1917. Subscription—$3.00 Per Year

ESPERANZA 2:07¼
Clarence Berry's good race mare now racing on the California Circuit.

"Can It," Says the Department.

It is more important than ever this year that none of the surplus products of the garden should go to waste. The country needs food now and it will need food next winter, not only for itself but for the Allies. Home-canned products may never leave the house in which they are made, but their consumption at home will mean so much more food available elsewhere for those who need it. It is imperative also that the canning be done carefully as well as energetically in order to preserve the more perishable products.

RACE HORSES FOR SALE.

All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:

KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.

HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.

EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.

QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.

I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

FAIR BIG FACTOR IN AGRICULTURAL DEVELOPMENT.

A well conducted state, county or district fair is a strong factor in the formation of agricultural ideals and rural community upbuilding. No rural community can hope to make advancement or to remain progressive without some means of bringing before its people the products of that community. Furthermore, no man can hope to continue to make advancement in his chosen industry unless he learns from other men interested in the same field of operation. Farmers recognize now more than ever before, the importance of mingling with their neighbors, exchanging ideas, making criticisms, and gathering new information.

Fairs afford untold opportunities for those who will attend. There they meet as exhibitors in competition and as spectators. All learn to look at the fairs from the educational viewpoint as well as from the viewpoint of entertainment or what they win in money prizes as exhibitors. True, the money offered is a great inducement in the way of defraying expenses but many exhibitors might well have as much money in their pockets at the end of the week by leaving their exhibits at home. On the other hand, those who exhibit take home a new opinion of their own products, and have had established in their own minds revised standards which will aid them in selecting and preparing exhibits for the following year. In addition every exhibitor, whether a winner or loser, takes home more or less advertising. Advertising secured at fairs is considered one of the best, as evidenced by the many exhibitors and by the increased business which has come to those who exhibit. No breeder of purebred stock should neglect a single opportunity to place it before the public. The county fair is a good place to begin.

The livestock industry owes much to the many fairs held throughout the country. Much improvement in breeds has come as a result of these public exhibitions and ratings. Many have been encouraged in the production of better stock simply through the incentive gathered at the livestock shows. No man who hopes to continue as a producer of high class live stock can afford to miss a single opportunity to attend live stock shows. Unless he attends such shows he loses sight of the correct standards and gets behind the times. The fair circuit is the school of the constructive breeder. Few men have attained success as breeders who have not been close students of show ring standards and awards. These men must necessarily become fewer because of the rapid strides in breeding and the increased competition.

He who neglects to make use of his state, county or district fair not only weakens his own position but neglects to support a movement which is vital to the state or community in which he lives. On the other hand, the public should realize that nothing can do more to encourage better breeding, feeding and management of livestock than a successful fair. The fair is just what the people make it. By their attendance and support it can be made a great factor in state and community betterment. Without their support it must tell to those few who do attend the sory of a non-progressive, inactive commonwealth.

In A RECENT issue of this paper we emphasized the importance of combining the race meetings of California with stock shows and agriultural exhibits, making regular county and district fairs. Our opinion on this matter was strengthened when we attended the first meeting of the California Fair and Racing Association, which was conducted last week at Salinas. A splendid program of racing was furnished; good horses and horsemen, just as good as are to be seen on any track outside of the Grand Circuit, competed. The affair was managed on a high plane and with many of the leading citizens of the Salinas valley putting on the enterprise; however, the meeting must have summed up quite a balance on the wrong side of the ledger.

We have never visited in a more prosperous community, in our rather varied experience, than the Salinas valley. Good land, good stock, good climate, and therefore, good people, make it a community of rare possibilities for a good old-fashioned fair for farmers, not fakirs, and I believe had a liberal program been arranged for live stock, the country people would have come in droves. They would, naturally, have been attracted by the good stock and the result would have been that within a few years there would be enough show stock owned in that immediate vicinity to support a fair on their own account, and untold wealth would have been received from same.

As it is, the good men who got behind the race meeting will ,no doubt, feel a bit discouraged and will hesitate before putting up their good money again. The people did not realize what splendid entertainment was being furnished and on what a high plane the races were given and missed, too. When Salinas gets together and gives a fair, such as we have in mind, it will not be any trouble for the races to be successful. It is already planned and we believe that another year will see this great show an actual fact.

THE MEN WHO MADE IT POSSIBLE.

Herewith we present the names of the good liberal boosters and lovers of the American Horse, the saddle horse, who, by their liberal cash subscriptions have made possible our desire to see something brought about which would create a stimulus in the breeding of horses at this time, when it seems that our farms are bound to be depleted of the desirable type for the use which is now so necessary. The writer has worked for the successful termination of this event as he never worked before. We have dreamed, prayed and labored, and now that it is possible we feel well repaid for our efforts. However, the guarantors whose names appear below have my profound thanks and admiration and I trust that the stake will be such an event as to cause them to rejoice in that they have helped to make it possible.

This week we received a letter commending us for the plan of showing this in the sex class, then the final championship: for this we deserve no credit. The first stake of this kind originated with Rufus Jackson, of Mexico, Mo., in 1912, when he gave the Mexico Commercial Club's $1,500 stake and showed it thusly. It was the greatest event ever seen in Missouri.

We point with particular pride to the contribution of the Pacific Coast Saddle Horse Breeders' Association, as it is the only association which has helped. They have nothing to gain only as the other guarantors, as individuals.

THE RECENT catalogue for the California State Fair discloses a very unusual rule for the "Get-of-Sire and Produce-of-Dam" classes. Under the new ruling entries in the above classes must be made in the name of the owner of the sire and dam.

While it was perhaps intended by the above rule to place the credit on the sire and dam, in practice, the credit will go to the owner of the sire and dam, whether or not he is showing. In other words, if Mr. A. owns animals, the get or produce of a particular sire or dam that is owned by Mr. B., the entry must be made in the name of Mr. B.

This new rule, insofar as the editor's experience goes, serves to place the California State Fair in the unique position of being entirely in a class by itself. It will be interesting to note how exhibitors in general will view this rather strange ruling.

By this action of the directors of the California State Fair, it is entirely possible for a man who has recently purchased a noteworthy animal, and who may live on the other side of the continent; who is not showing at the fair at Sacramento, to win these coveted breeders' classes.

We have heard of some remarkable cures attributed to "absent treatment," but this is the first instance that has been brought to our attention whereby a man could win at an important State Fair by similar methods.

ANOTHER equally unusual ruling, it seems to us, is one concerning the immunizing of swine to be exhibited at the California State Fair. The rule, which was called to our attention by a prominent swine breeder, reads as follows:

"Immunizing.

"All swine exhibited at the California State Fair must have been immuned by either the double or single method. If by the double method it must have been done more than twenty-one days prior to the date of shipment, or if by the single method it must have been done less than twenty-one days prior to the date of shipment. In the absence of the certificate that swine have been properly immuned as above each hog must have been properly dipped at least ten days prior to date of shipment and an authentic certificate to this effect furnished. The State Agricultural Society will provide charcoal and sulphur for hogs while on the grounds."

To begin with, the rule starts out by saying "all swine exhibited at the above show must have been immuned by either the double or the single method." So far very good. The rule then says, that in the absence of the certificate, that swine have been properly immuned as above stated, each hog must have been properly "dipped," at least ten days prior to the date of shipment, and an authentic certificate to this effect furnished.

In view of the last statement, the "why" of the first statement is difficult to see; and vice versa, as either makes the other null and void.

Furthermore, it is interesting to know that the directors of the State Fair feel perfectly sure that a "dip" is all that is necessary to prevent an outbreak of hog cholera. However, in view of the teaching of the United States Department of Agriculture, the Guarantors to the $10,000 Saddle Horse Exhibit, various State Agricultural Colleges and the veterinary profession, we are rather of the opinion that the exhibitors will be serving their own interests if they do not lay too much stress upon the efficacy of the "dip," regardless of the fact that the board has very generously offered to supply, free of charge, charcoal and sulphur for the hogs while on the grounds.

LONGVIEW FARM BUYS EASTER CLOUD.

The editor of the Breeder and Sportsman received a message from Longview Farm, Lee's Summit, Mo., this week, that they had purchased from the estate of the late H. A. Greenwell, Lakeman, Mo., the magnificent saddle stallion, Easter Cloud.

The manager of the saddle horse department, John T. Hook, we have known, has had his eyes on this great horse for some time. A few years ago, when he was shown at the St. Louis Horse Show, his first important appearance, John Hook, then in business for himself, was crazy about him and arranged to buy him; but Hiram Greenwell beat him to it. In the Greenwell stable Easter Cloud has not had the best advantages on earth, as the Greenwells were breeders, not exhibitors. However, in 1915, under the ride of young Barham he defeated the champion of that year, Astral King, in Astral's last public appearance. Last year he was in Billie Shropshire's charge and was not shown but a few times. He was returned to Lakenan, and at the time of the death of the owner of Westview Farm, was retired, though a young horse. Hook tried to buy him at the dispersion sale in November, but the horse was bid in by members of the family. Since that time Easter Cloud has made a very good season for the Greenwell Estate, and Hook has been dickering for him since.

Easter Cloud is by McDonald Chief, that splendid son of Rex McDonald ,that has outbred his sire; being the sire of such noted horses as Jack Barrymore, Marshall Chief, Easter Cloud, Red McDonald, Rex Chief A., and a score of that class. He is one of the best doing saddle horses in America, and, under the care of John Hook will come, no doubt, to the fame he so justly deserves.

This purchase makes the approaching stake of the World's Championship at the Kentucky State Fair more interesting.

Thoroughbred Matters

AUTUMN DATES ARE APPROVED.

Latonia, July 4.—Autumn racing dates were granted the Kentucky tracks at a meeting here today of the State Racing Commission. The season will open at Lexington on September 11 and continue ten racing days. The Louisville meetings follow with seven racing days at Douglas Park and a like number at Churchill Downs. On account of conditions prevailing, Latonia was awarded twenty-five days, beginning October 12.

"Minutes of the meeting of the Kentucky State Racing Commission, held pursuant to the call of the Chairman at the clubhouse at the Latonia Agricultural Association this day at 11 o'clock:

"Present: Vice-Chairman T. H. Talbot, Judge Allie W. Young and Gen. W. B. Haldeman.

"Mr. Talbot called the meeting to order and presided.

"Dates for fall race meetings were granted as follows:

"Kentucky Association, Lexington, Wednesday, September 11, to Saturday, September 21, inclusive, ten days.

"Douglas Park Jockey Club, Louisville, Wednesday, September 25, to Wednesday, October 2, inclusive, seven days.

"New Louisville Jockey Club, Louisville, Thursday, October 3, to Thursday, October 10, inclusive, seven days.

"Latonia Jockey Club, Covington, Ky., Saturday, October 12, to Saturday, November 9, inclusive, twenty-five days.

"Gen. Haldeman voted against the allotment of the dates of the Kentucky Association, stating as his reason that those dates are in conflict with the dates already named for the State Fair at Louisville.

"Upon motion duly seconded and carried, it was resolved that owing to the extraordinary conditions prevailing in the racing field, and not as a precedent, Latonia be awarded twenty-five racing days this fall; this upon the condition that the Latonia Jockey Club add, as it has proposed, $15,000 in stakes and purses in addition to the daily distribution in stakes and purses as required by the State Racing Commission.

"Resolved further, That it is the unanimous opinion of this Commission that the construction of additional racing plants in Kentucky would be detrimental to the best interest of the breeding industry and the sport of racing, inasmuch as the tracks now in existence and licensed by this Commission are adequate to accommodate all the racing days the Commission is willing to grant.

"Upon motion duly seconded and carried, all jockeys and trainers' licenses approved by the License Committee were granted.

"Upon motion duly seconded and carried, the following resolution was passed: Resolved, That this Commission hereby directs that during the term of suspension of any jockey on any race track in Kentucky under the jurisdiction of this Commission, the badge of such jockey be taken up and he be refused admission to such course during the hours of racing.

"Upon motion duly made and seconded the following new rules were offered:

"'Two regular meetings of the Kentucky State Racing Commission shall be held in the city of Louisville on the first Tuesday in November and the first Tuesday in May of each year; these two stated regular meetings of the Commission to be held for the purpose of giving ample notice of the dates set for the spring and fall meetings of the various racing associations under the jurisdiction of this Commission, and for any other business that may come before the Commission. The dates for the spring meetings shall be passed upon at the November meeting and the fall dates at the May meeting, and the racing secretaries shall furnish a book for the dates asked for by each association at such meeting, stating the full conditions for each race each day for entire meeting, and no dates shall be assigned until this has been complied with.

"'When the stewards have reasonable grounds to believe and do believe that a horse entered in a claiming race has no chance to win or run placed, and that he was entered solely for claiming, he shall be ordered scratched and his further entry refused.

"'At a track located in a city in Kentucky having a population of 350,000, or within the distance of ten miles of the corporate limits of any city of such population situated in Kentucky or in an adjoining state, the average amount added to the overnight events each day shall be $1,000 in cash, or there shall be no race given to which is added less than $800 in cash, and no other stakes except selling stakes, to which is added less than $2,000 in cash.'

"Upon motion duly second and carried, the Commission adjourned to meet Wednesday, September 11, at 11 o'clock, in its office at Lexington, Ky."

W. R. Coe, always a liberal and enterprising turfman, has made an important purchase of yearlings in England. He has bought eleven yearlings from the Sledmere estate of Sir Mark Sykes in England. The sum reported to have been paid for these yearlings was $50,000.

With Borrow setting a new American record in a driving nose finish with Regret in the recent Brooklyn Handicap, with almost every horse in the race prominent at some stage of the journey, with a frenzied crowd lavishing praise upon horses and riders and owners and trainers, perhaps not more than a handful gave even a moment's thought to the man in the background who made this blood-stirring contention possible, namely, Walter S. Vosburgh.

"Weight brings 'em all together," is one of the axiomatic pillars of horse racing, and a knowledge of weight adjustment and the individual capabilities of thoroughbreds is what results in the best of sport. That no man has shown higher ability in this line in the last twenty years than Handicapper Vosburgh has become a byword of the turf. Vosburgh was among the first in this country to follow the English belief that a good horse should carry his weight. As a result consistent winners of a class were soon to pack weight that seemed beyond rhyme or reason. Owners set up a howl. Vosburgh more than once has been viciously assailed by owners who thought their charges had been handicapped out of events only to be proved wrong when the actual racing test came.

Vosburgh, quiet and unassuming, a thorough student of all that appertains to the Sport of Kings, has made for himself a name in the turf's annals that will endure as long as does the sport in America.

✤ ✤ ✤

It is a violent turn of the wheel of fortune that brings of necessity such prominent English sportsmen as Lord Roseberry to America with his string of race horses. Time was not so long ago, that the leading American turfmen were racing abroad. Quarters have been engaged for the shipment on the steamship Minnehaha. Frank Hartigan, Lord Roseberry's trainer, is coming along with the horses, and his brother, Capt. Hubert Hartigan, of the Royal Irish Volunteers, will be on the same boat. Lord Roseberry is one of the most successful racing men in England.

✤ ✤ ✤

Mr. Edw. Cebrian last Saturday shipped sixteen head of yearlings to the Fasig Tipton Sale which is to be held at Saratoga next month. The consignment is a picked lot of youngsters sired by Von Tromp, Tim Payne, Joe Carey, Rey Hindoo and Marse Abe and from well known producing broodmares, dams of Spring Valley, Sevia, Magic, So Eze, Zolzo, Buck Shot, Running Shot, Starter, Rebel, Little Ford, Brooklyn, Handy Andy and other frequent winners.

✤ ✤ ✤

James W. Coffroth, president of the Tijuana Jockey Club, announced this week that it has practically been settled that the Lower California meeting will open on Thanksgiving day for 100 days or more. Blanks for ten fixed stakes, with from four to six to be added later, are in the hands of the printer, and will shortly be distributed.

Coffroth, accompanied by Leon Wing, will leave for the East on August 1. He will go on to New York to interest the metropolitan horses and riders to come to Tijuana this season. He reports that he is assured of 1000 horses of class. Four hundred more stalls are being constructed at the Tijuana course to accommodate the expected reservations.

With a hurrah, the California Fair and Racing Association Racing Circuit was ushered in at Salinas during last week, and for the next four months the trotters and pacers will be busy competing at the district and State Fair meets. Prospects were never brighter for a more successful season. New cities were added to the circuit, and the class of horses compares favorably with those of former years.

One discordant note is that struck by James W. Coffroth in his effort to establish himself as the turf czar of the West. He has adopted a rule that all of the fair meetings, which programmed two running races daily, must secure a sanction from the Tijuana Jockey Club or the horses and jockeys competing would be barred from the Lower California track. Coffroth sent out an order that the associations, even the State Agircultural Society, must pay for their sanction and in addition pay a steward appointed by the Tijuana Jockey Club $20 a day for his services.

At the start it looked as if Coffroth was overstepping himself. "Sunshine Jim" has always been rated as a pretty shrewd promoter, but when he tries to tell the fair people what they must and must not do he is assuming a lot, especially in view of the fact that his track is not even in this country. The fairs only have little races with $100 purses and to pay a steward $20 a day to superintend them looks like an effort to harass the circuit.

As was expected the running races went on at Salinas without a sanction, but even if the thoroughbred men were afraid to take a chance the sulky sport could have gone right on its merry way. The Golden Gate Thoroughbred Breeders' Association with Charles W. Clark as president, has resented Coffroth's actions and has applied to the Jockey Club of New York, the parent turf body, for a charter and it may come to pass that the Tijuana track will come in for a looking over on the threat that horses racing there without a sanction would be barred from the Eastern tracks.

RACE MEETING AT ST. LOUIS.

St. Louis, Mo., July 3.—Announcement was made yesterday by Joseph A. Murphy that he had rented the Maxwelton track from August 29 to September 9 and would, in addition to holding a running race meeting of ten days, make the occasion the medium of calling into convention the breeders of light horses in the State for the purpose of co-operating with the Government in providing proper remounts for the army.

Mr. Murphy, who was a director of the National Remount Association organized some years ago, has taken the matter up with Geo. M. Rommel, Chief of the Animal Husbandry division of the Government. He has found that while Missouri is recognized as one of the greatest horse breeding states of the Union it has been practically ignored by the Government in its proposed establishment of remount stations. Virginia, Tennessee, Kentucky and New Hampshire, the latter for Morgan horses more especially, are the States that the Government is looking to for its breeding bureaus.

Mr. Murphy proposes to invite to St. Louis the breeders of saddle horses, standard and thoroughbreds of the State, and outline a plan of action that will call the attention of the Government to the advantages of the state as a breeding ground. It is believed that a breed bureau can be established and the registration of every mare of a light type in the State secured. Saddle, standard-bred and thoroughbred stallions could be secured by gift or purchase and assembled at some central point. During the breeding season they could be sent to the counties where the type of stallion best suited to the mares could be located and service given free to the farmers. The Government could be furnished each year with the result of the breeding and its agents furnished with a list of foals. It is believed that in a few years the Government would be looking to the state for its remounts. Capt. J. H. Ware has notified Mr. Murphy that the Schreiber breeding farm at Anglum is still intact and as the bureau expanded it might be taken over for an experimental station.

"We shall take no cognizance of betting," said Mr. Murphy, "except to see that the laws are strictly enforced. An ordinary bet on a horse race has never been made a crime in Missouri. With this essential fundamental we will let the public take care of itself, co-operating actively with Mr. Ralph and the county authorities to see that the law is not violated."

AQUEDUCT NOTES.

Judge W. H. Shelley attended the races at this track, having but recently arrived from Kentucky. He said that Mr. Schaumberg's eyes had been giving him so much trouble that it was feared he could not complete the work of racing secretary at Empire City, and in that event it had been thought wise to have him (Mr. Shelley) come up to be ready to complete the work which already had been well advanced by Mr. Schaumberg. "Should such a change become necessary," said Judge Shelley, "I will have enough to keep me busy, but I hope that Mr. Schaumberg will continue to improve so that he will be able to complete the work which he has so well begun."

The two-year-old colt, War Machine, from the Macomber stable, which Walter Jennings saddled in the paddock, attracted much attention and favorable comment. He is a good sized colt without showing any sign of being over-sized. In general conformation he considerably resembles Tracksend, having great substance for his inches and a smooth, compact and racy look all over. He looks like a racehorse of the old school, showing an admirable combination of range, substance, quality and finish. Oldtimers say he shows the signs of old Maggie B. B. in his general make-up, and turfmen of the younger generation pronounce him a typical Uncle, who was a direct descendant of Maggie B. B. in the maternal line. He is a rich bay, and looks like a colt which might be more favorably heard from before the end of the Saratoga meeting.

Although Lucullite has suffered two defeats in succession, he still has about as many friends as ever among the paddock frequenters. They point out that the time of the race showed conclusively that neither Lucullite nor War Machine had been afforded an opportunity of running his race, to say nothing of the complaints which were lodged with the stewards after the race. That the race was not a truly run one is no reflection on the stewards, according to the paddock critics, who say that it was unavoidable crowding which seriously affected the result.

James Shevlin, who since the death of the late Phil Dwyer has been the executive head of the Queens County Jockey Club, announces an enterprising and liberal policy for that popular racing organization. He says that all the profits from the operation of the racing plant will be expended upon improvements. A new clubhouse will be built, the grand stand will be thoroughly repaired, and all needed improvements will be completed before the opening of the racing season of 1918.

Col. Matt Winn returned from Kentucky and was in evidence at the track in the afternoon.

Jockey S. McGraw has been suspended for the remainder of the Aqueduct meeting. His offense was rough riding in the second race Friday. He had the mount on Starry Banner. G. Byrne was also set down for the remainder of the meeting last Thursday for rough riding.

Harness Horses and Horsemen

CLOSING DAYS AT SALINAS.

Friday, July 13.

Salinas, July 13.—It was left to the trot to furnish the real contest of the day, and it was won by "pappa" Charley Durfee and the bay horse Pegasus. Still, Pegasus did not escape with an unscathed record in this, his second victory of the meeting, for the Honorable Jake Brolliar won the final heat of the trot with Great Policy.

Brolliar's annexation of a heat was popular, mighty popular, in fact. Jake hails from Fresno and he is possessed of a "hick" tongue that would put the inimitable Will Cressey to shame. Inasmuch as Jake finds winning heats a most troublesome feat, he generally winds up by booting, whipping and pleading with his "hoss" to deliver in the pinch. He only had to fall back on his whip today, and though he won by a couple of lengths, he was still whipping at the finish.

Pegasus is a nice trotter. In the first two heats he won in 2:10¼ and 2:10½, which speaks well for his ability. He is a trotter, having a mark of 2:07¼ as a pacer. From all appearances he will fare well as a trotter.

Future Tramp took third money in the trot. He acted roughly in the opening heat, but trotted steadily after that. He needs more racing. Byron is the same wild-eyed critter, and like the other Willie Durfee horses will likely improve after a couple of starts.

Charley Durfee narrowly escaped being hurt before the start of the first heat when Pegasus reared back and crushed the sulky beneath him. The old man was pinned down for a time, but he was lifted to his feet and took his place in a new sulky.

The pace was almost a walkover for Elmo Montgomery and Hal Logan. The son of Jim Logan stepped along without any opposition, and Montgomery would send him along to win as he pleased. He won in straight heats, and aside from Beretta Dee there was little contention for him. Miss Rico, Willie Durfee's black mare who was a humdinger in her futurity years, suffered slight interference in the first heat and broke, to be caught by the flag.

The run went to Pajaroita II. He won with comparative ease. Tenderest was second and Lady McGregor third.

Jack Kay attempted to ride the wild and woolly Coyote between heats, but he was thrown to the ground and was fortunate to escape without any broken bones. They claim some one else will attempt to ride Coyote on the morrow. It is a good appetizer for what will follow at the Rodeo next week.

The summary:

First race, 2:25 pace, purse $500:

Hal Logan, b g by Jim Logan (Montgomery)	1	1	1
Beretta Dee .....(Chadbourne)	4	2	2
Lady Alice T. .....(Jones)	5	3	3
Zomar ..... (Elerick)	3	4	4
Warren Dillon .....(Helman)	2	d	
Miss Rico .....(W. G. Durfee)	d		
Lady Bell D. .....(Ivey)	d		

Time—2:10¼, 2:10½, 2:11½.

Second race, 2:20 trot, purse $500:

Pegasus, b h by Zombro.....(C. A. Durfee)	1	1	2
Great Policy .....(Brolliar)	2	2	1
Future Tramp .....(Smith)	5	3	3
Byron .....(W. G. Durfee)	3	4	5
Sadie View .....(Best)	4	5	4
Sweet Bow .....(Ivey)	d		

Time—2:10¼, 2:10½, 2:12.

Third race, running, three furlongs—Won by Pajaroita II (Donovan); Tenderest (James) second; Lady McGregor (Imes) third. Time—0:37½.

Saturday, July 14.

White Sox, winner of the $20,000 exposition pace and one of the finest pacing mares that ever wheeled in front of a western sulky, won the big Salinas feature, the free-for-all pace, here today. Fighting every inch of the way for the honor which finally became hers, White Sox was beaten down, nevertheless, in the last heat. She was trimmed by another exposition favorite, Bondelin.

This free-for-all pace on a California circuit has long been looked forward to as the center of the meeting. It did not fail on its past history, but instead furnished a race that will be talked of for some time to come. It was a classy field that faced the starter, and every entrant scintillated at some time or other during the race. White Sox may have been short, but even if she was, this same son of The Bondsman will give her lots of fight before the season comes to an end.

The pace was not only a contest between powerful stock, but a real event among drivers; to see Willie Durfee and Lon Daniels hook down the stretch is no passing event, and the great reinsmen fought it out today with all the strength and cunning at their command. There was another horse prominent in the race, Prince Zolock, and the black horse was up there, too, and only failed to trim White Sox by a scant head.

White Sox had her usual foot. Doubtless she could have held position the first part, but Durfee would take her back and let the others cut the wind. When he finally settled down to the drive in the first heat he found Prince Zolock a more powerful foe than he expected, and White Sox only took the black horse into camp by a nod.

The second heat found Bondelin coming into his own, and he closed a big gap to finish a bang-up second to White Sox. Once more the mare was taken around her field in the stretch, and, no doubt, this driving finally weakened her to bring about defeat in that final test.

The third heat was marked by the sudden awakening of Ben Corbett Jr., and Ben did a lot of pacemaking until turning for home. At this point Bondelin and White Sox took command, and they raced through the stretch as though their wheels were hooked. Bondelin was the stronger at the finish, however, and Daniels drove him across the line a neck to the good.

The other pace proved another easy victory for Hal Logan. As he did yesterday, Hal won in straight heats. Today he trimmed the San Francisco mare, Directress Mac. Directress put up a creditable contest and Jimmy Ryan looked as though he might have a winner until Hal Logan set sail each time to win with apparent ease. Mountain Dee took third money.

There was an amateur pace on the card, and it was won by a fair-looking mare named Choro Princess. She went big with the Hum town folks.

The mile run was taken by Pajaroita II., which is a considerable feat for the gelding. Seems that they can go all distances in all sorts of time in the bushes.

Some more bronco busting completed the card, and Jack McIrwin took his turn at being thrown from the back of the renowned "Coyote." The summary:

First race, Amateur pace for local horses, purse $250:

Choro Princess, b m by Morris A. (Stirling)	1	1	1
Star Lou .....(Nissen)	2	3	2
Mae N. .....(Norris)	3	2	4
Directress Jay .....(Holaday)	4	4	3

Time—2:18, 2:21, 2:20.

Second race—Free-for-all pace, purse $500:

White Sox, b m by Del Coronado.....			
.....(W. G. Durfee)	1	1	2
Bondelin .....(Daniels)	3	2	1
Prince Zolock .....(Helman)	2	3	3
Rastus .....(Tryon)	4	4	4
Ben Corbett Jr. .....(Finley)	5	5	5

Time—2:07½, 2:08¼, 2:11.

Third race—2:20 pace, purse $500:

Hal Logan, b g by Jim Logan (Montgomery)	1	1	1
Directress Mac .....(Schwartz)	2	2	3
Mountain Dee .....(Tryon)	3	3	2
Zoetrix .....(Chadbourne)	4	d	
Edith Light .....(Goularte)	d		
Stockton Lady .....(Jones)	d		

Time—2:12, 2:10½, 2:12½.

Fourth race—One mile, running—Pajaroita II. (Imes) won; Alice Teresa (James) second; Ida Pinack (Donovan) third. Time—1:45.

—o—

TOLEDO, OHIO.

(Half Mile Track.)

The summer meeting of the Toledo Racing Company opened Monday, July 2, under favorable conditions. The horsemen realizing that this would be the last meeting held over the famous old course, showed their appreciation of the past as well as present liberal treatment accorded them by the Toledo people by assembling in large numbers, so that the farewell to the good old racing plant might have a proper setting.

Monday, July 2.

2:25 trot; purse $500.

—o—

GOVERNMENT AID TO RACING IN RUSSIA.

Writing from Petrograd, Russia, the chief specialist of the Department of Agriculture of Russia takes a very gloomy view of the future of horse racing in that country. He regards the expropriation of the land of all the non-resident owners or landlords as a certainty and thinks that all race horses, including the Thoroughbreds, who are now owned largeby by this class, will be sold or taken for farm or city werk, instead tf being kept for breeding and racing purposes.

The new Russian Government has, it would seem, shown far more consideration for the trotters and runners than is customary in other countries. While all betting has been prohibited, the government has offered about two and a quarter millions of dollars for prizes of one sort and another. This alone should do much toward stimulating breeding, and should help keep the racing stables up to what they are at the present time.

Something over twenty thousand horses are now registered in the Orloff Stud Book of Russia, and there are said to be thousands that are part bred and not eligible for registration. These horses, as well as large nombers of those imported from this country, have been extensively used for breeding army horses suitable for cavalry and artillery use. In some parts of the country, English and American stallions have been crossed with Cossack ponies, and the result is said to have been quite satisfactory for cavalry and light artillery use.

World's Greatest Saddle Horse Exhibition

$10,000.00 Stake for Five-Gaited Saddle Horse at Kentucky State Fair Proposed by Hon. Mat S. Cohen, Comm. of Agriculture and Jump Cauthorn, Will Bring About Great Contest

The saddle horse has conquered! That the American people have acclaimed it their favorite type and breed on many occasions is admitted; however, when the public goes down in its pocket and donates $5,000 to see a contest between the stars of the tribe and a fair associations duplicates that amount and adds several hundred dollars for trophies; gives the stake without entry fees or any further expense, it must be conceded that the popularity of the AMERICAN SADDLE HORSE stands out pre-eminently above every other dumb animal in the hearts of the public.

The subscriptions are from rich and poor; breeders and dealers and just plain "hoss lovers." The majority of the money came from people who can not in any manner receive any benefit from the stake financially. They will also go from their homes in every State in the Union to witness the event. With all the popularity of the saddle horse, however, there is one great regret: usually, the progressiveness of any breed is demonstrated in the progressiveness of the association at its head. In every instance where some breed has been made profitable to the breeders, the associations have made it possible. They have shown the way for the breeders and exhibitors to come to the fore. They have boosted, plugged and worked and led in the development of the breed. However, in noting the subscriptions to this great stake it will be observed that THE AMERICAN SADDLE HORSE BREEDERS' ASSOCIATION, one of the oldest and most prosperous breed associations in the country, has donated — not one cent, nor have they used their influence to make the stake a success. Their subscription should have headed the list. Had the stake failed by several thousand dollars they should have, as other associations would, guaranteed it.

Commissioner Cohen went after the association with all his force, both in person and by letter, and by wires and telephone. Finally he asked them for the measley sum of $250; but NO, NO, NO, not one red cent, unless he required that every horse be registered in the association. It is very likely, almost a certainty, that every horse exhibited will be registered; however, this stake was gotten up to create interest, to renew life, and bring about an impetus in the breeding of the saddle horse, and Commissioner Cohen was just in his condemnation of their offer, which, after all, was no more than a bribe.

Association Has Outlived Its Usefulness.

The American Saddle Horse Breeders' Association, with its glowing bank account and magnificent offices, has outlived its usefulness. It is a white elephant to the breeding and development of the saddle horse, and the sooner it is overthrown and a democratic form of government installed the sooner there will be profit in the breeding of this most beautiful of all equines. They have failed in every manner to foster, advance and promote the interest under their guardianship; and when the thing is turned inside out, reorganized from bottom to top, and the progressive methods used by every other breed association in America instilled into its officials, just that much sooner will the American Public come back to the saddle.

One cannot pick up an agricultural paper ,a live stock journal, or even a country newspaper, during this age of better farming methods and improved live stock, that one does not find a brilliantly written article on some breed, showing its outstanding merits and giving the reasons that every breeder should have this type on his farm. Not the American Saddle Horse Breeders' Association, however. Who ever saw or heard of that association getting out and starting anything? They have pulled in the opposite direction for many years ,and in spite of their stubbornness and unprogressiveness the saddle horse has not only held its own, but come to the fore in the hearts of horse-lovers everywhere.

"Stunts" pulled by the officials of this association have done more to dishearten breeders, exhibitors and fair associations than all the other "bulls pulled" combined. The following is from a letter written the writer in response to a request for a donation to the big stake, from one of the most responsible breeders in America,--a booster, a really high class patron of the breed, who has done very much for the breed in a particular state:

"In reference to your request for a contribution to The World's Championship Stake, as you know, I have a little grudge against the officials of The American Saddle Horse Breeders' Association, because my horse won the 1916 $100 trophy at the state fair last year, which was supposed to have been given by their Association, and I did not get it. Even if it was an error, as they claim, on the part of the State Fair Association to publish the notice without an assurance from them that it would be given, after the class was really shown and a horse registered in their Association won it, it seems to me that the Kentucky people might have taken a sufficient interest in our state fair to have given the cup, and it is evident that they do not intend giving a cup this year, although, at least nine out of ten horses shown will be registered in that association. You know I feel strongly in reciprocity, and feel that the Kentucky and Missouri people have everything to gain by helping California breeders."

I explained to the author of this letter, that Kentuckians and Missourians had nothing to do with the association, except as stockholders; but that the officers at the head of the great business are not progressive and that they had failed utterly in doing anything to foster the breeding and showing of saddle horses.

To Mat. S. Cohen, president of the Kentucky State Fair, horsemen and horse-lovers are under obligation which can never be paid in regular money; but which can be more than paid by simply co-operating with him at this time, by entering their horses before August 1. Mr. Cohen has worked hard; he has succeeded in what wise ones said was impossible. It is to be hoped the horsemen, for whom all the work has been done, will show their profound appreciation of his efforts by nominating freely and abundantly. Do it now—it costs not one penny—nothing will be deducted from money winners. Make entries to Fount T. Kremer, Secretary Kentucky State Fair, Republic Building, Louisville, Ky., at once. Don't enter just one, enter every good horse you own. Show the world the breeders of saddle horses are progressive in spite of the wealthy and niggardly association which represents them.

TO OWNERS OF SADDLE HORSES EVERYWHERE.

This is to advise you that the $10,000 saddle-horse exhibit at the Kentucky State Fair, September 10th to the 15th, four divisions of $2500 each, beginning Monday night with stallions any age, Tuesday night, mares any age, Wednesday night, geldings any age, and on Saturday night the four money winners in each sex class will compete for the grand championship, with the money divided as in the sex classes. The first horse will receive $1000, the second $625, the third $375 and the fourth $250. In addition, the winner of each division in the sex class will be presented with a sterling silver cup valued at $250 to be known and inscribed "Championship of America" for each sex, and to the winner of the grand championship will be presented a silver trophy valued at $250 and inscribed "Grand Championship of America For Five-Gaited Saddle Stallion, Mare or Gelding Any Age."

There will be no entrance fee charged in any of the above stakes, nor will anything be deducted from the money winners, and each exhibitor may nominate and show as many horses in each division of the sex classes as he desires. The nominations to this wonderful event will close AUGUST FIRST, when the name of the horses must be sent to Mr. Fount T. Kremer, Secretary, Kentucky State Fair, Louisville, Ky., and since there is no entrance fee and you have everything to gain and nothing to lose, I earnestly hope you will make as many nominations, and exhibit, in each sex division, as it is possible for you to do.

The State Board of Agriculture believes, in fact knows, that never before in the history of the horse industry has an opportunity been given to the exhibitors to compete for such an amount of money as this exhibit represents, especially so in that conditions could not be more liberal, as it costs nothing to naminate and nothing to show, besides free stall and free bedding will be given to each horse actually contesting in the event. Therefore, permit me to insist that you make your nominations as liberal and as numerous in each division as you possibly can and mail them promptly in order that you may receive the benefit of the publicity and advertisement, which will necessarily be given to the nominators in this wonderful event.

Very sincerely,

MAT. S. COHEN,
President, Kentucky State Fair.

COMMISSIONER COHEN RAPS ASSOCIATION.

Breeder and Sportsman,
San Francisco, Cal.

Gentlemen:

Enclosed please find list of guarantors to the $10,000 stake for the five-gaited saddle horse which will be given at the Kentucky State Fair, September 10th to the 15th, 1917, and shows more than $5,000 has been subscribed by the gentlemen whose names appear, amounts guaranteed by each indicated opposite each name.

I am sorry to say to you and other owners of the five-gaited saddle horse that the American Saddle Horse Breeders' Association most positively refused to co-operate and lend its aid in helping the State Board of Agriculture stimulate the breeding of that class of horse in America.

In this connection, I wish to state that I called on General John B. Castleman, President, in person, also Secretary Lillard, and received from them their usual attempt-to-bribe-method, "if you require saddle stallions and mares registered in order to compete in the various classes at the Kentucky State Fair, the association will subscribe liberally toward the stake," which they both admitted would add greater stimulus to the breeding industry than has been given it for many years.

As I stated to them, the Kentucky State Fair is a State institution, owned, controlled and operated by the entire citizenry of Kentucky, and that I would not take the Kentucky tax payers' money and use same in promoting and advancing the interests of any breeding or live stock organization in this State, or in other words, I will not use the Kentucky State Fair as a feeder for the American Saddle Horse Breeders' Association, even if I am a member of same.

I later made several very earnest appeals to General Castleman by both wire and letter and did not receive even the courtesy of a reply to any of them regarding this matter, which is all right, insofar as man to man is concerned, but when the president of an organization like the American Saddle Horse Breeders' Association, which is fostered, maintained and supported by the saddle horse industry, fails and refuses to permit that association to come to the rescue of the breeding interests, which today and for the past few years has been at the very lowest ebb within its history, by a liberal donation toward adding such a stimulus, he places that organization in a position where I do not see how the association can, in the future, expect patronage through the medium of registration, and to my way of thinking virtually destroys the usefulness of the association, or rather the purpose and intent for which it was organized.

It cannot be disputed that we are now facing the greatest horse famine this country has ever known and that breeding within the past three or four years has decreased to an alarming extent, and now with this war on, which is rapidly devastating the horse supply of every warring nation, and knowing that when this war is over, every foreign nation so engaged, will necessarily have to come to America for the replenishment of their herds and new blood for their foundation stock, it was with a view of better enabling our people to be ready to meet that after-the-war-demand that caused the State Board of Agriculture to authorize the giving of this $10,000 saddle stake, feeling and knowing that it would take something extraordinary, of this character, to give the necessary stimulus to the breeding industry.

Therefore, it is only logical to conclude that the President of the American Saddle Horse Breeders' Association cares not for the breeders or their interests any more than to secure from them registration fees in order to foster and keep alive the association he founded.

I feel that under the existing conditions, every individual, every corporation, should add its mite in stemming the tide and to better prepare our people to meet the emergency and the demand which will be made upon them after the war is over. Those who fail and refuse to do that mite are slackers in the eyes of the world and should not be recognized by the patriotic, loyal and progressive people.

Yours very truly,

MAT. S. COHEN,
Commissioner of Agriculture.

Frankfort, Ky., July 12.

Notes and News

MATINEE RACING AT OAKLAND.

The large attendance at the races of the Oakland Driving Club last Sunday goes to show that the public really enjoys good races; these races are given by the members of the Oakland Driving Club just for the real sport there is in it and every heat is contested as though it was for blood.

The first race was the first mile heat race of the season and it was worth going to see, as every heat was finished very close and the time made was excellent for a half mile track; in the last heat Cleo Verne and Queenie Direct could have been covered with a blanket the whole mile.

The second race Firebaugh and Shorty went away in the lead, Firebaugh beating Shorty a narrow margin at the end with Oakland Boy close up; the second heat Shorty went to a break on the back turn and lost all chance, Firebaugh again winning from Oakland Boy. The third heat was a horse race: Firebaugh off in the lead and Shorty went to a break but was soon on his feet again and right after the leaders, who both broke and Shorty went into the lead. Oakland Boy was the first to recover and came down the stretch very fast, finishing a nose behind Shorty, who won the heat.

The third race was very well contested. J. D. Johnson's Beauty won with Esther Queen second. Dolly Gray set the pace most of the time but made some bad breaks, and had to be contented with third place.

There will be several new horses to start next Sunday and a good card for the afternoon is looked for. The horses are all getting into good shape and mile heats will prevail from now on. Summaries:

First race. Mile heats:

Queenie Direct.....(L. J. Carsen)	2	1	1
Cleo Verne .....(Mrs. Carlisle)	1	3	2
Sydney .....(F. Straus)	3	2	3

Time—2:24, 2:33, 2:20½.

Second race. Half-mile heats:

Firebaugh .....(E. Stinson)	1	1	3
Shorty .....(A. Hanks)	2	3	1
Oakland Boy .....(F. Hahn)	3	2	2

Time—1:12, 1:12, 1:14.

Third race. Half-mile heats:

Beauty .....(J. D. Johnston)	1	2	1
Esther Queen ..... (W. E. Wyber)	2	1	2
Dolly Gray .....(J. Murphy)	3	3	3

Time—1:15, 1:16, 1:16.

———o———

Will Durfee and wife, of Los Angeles, spent several days at The Palace, resting "between heats" of the Salinas and Petaluma meetings. They went to Petaluma Wednesday.

✤ ✤ ✤

Two 2:10 trotters were contributed to that list of extreme speed last week, at Lexington, one of them Leonard 2:07½, being a three-year-old. The other is the seven-year-old mare Hollyrood Kate, by Joe Dodge, son of Bingen 2:06¼, dam Kata Bonner, by Baron Review 2:21¼, which also took a record of 2:07½. Leonard's record is probably the fastest ever taken by a trotter of his age so early in the season. He is a bay colt and took a record of 2:29½ as a yearling, and one of 2:11½ as a two-year-old. He is a son of J. Malcolm Forbes 2:08, his dam being Mendosa Worthy 2:17¾, by Axworthy 2:15½, his second dam, Mendosa M., being by Mendocino 2:19½.

✤ ✤ ✤

The eighteen-year-old mare Ka 2:33¼, by Kremlin 2:07¾, that was sold for $275 in the Allen Farm dispersal at Madison Square Garden last November, bids fair to be distinguished as the dam of four trotters in the 2:10 list before the season is over. Only one mare, Paronella, has produced so many fast ones. Ka is the dam of Aquin 2:08, Aquill 2:08¼, and Brescia 2:09¼, while Binode, another of her foals, earned a record of 2:14¼ with seeming ease in a winning race on a half-mile track at Rockport, Ohio, a fortnight ago. By a curious coincidence the sire of Ka was by Lord Russell, full brother to Maud S. 2:03¾, while her dam, Rossignol, by King Wilkes 2:22¼, was out of Lady Russell, the full sister to Maud S.

✤ ✤ ✤

W. H. Williams' good mare White Sox trotted a mile in 2:10 at the Stockton track recently. She came back in :12 and made the last quarter in 31 seconds.

Friends of the Hemet Stock Farm's popular manager, Fred Ward, were pleased to learn, when they saw him at Salinas, that Mrs. Ward, who recently underwent an operation for appendicitis, was well on her way to recovery. Mr. Ward made a wonderful impression with several of the Hemet Farm horses. The three-year-old mare Zeta Lucille was an especially attractive member of the youngsters at Salinas, and that she will develop into one of the fastest mares the West has ever produced is the opinion of the railbirds. She has a two-year-old breeder's record of 2:12½. The Hemet Farm horses will be sold at the Chicago sale next winter.

RESULTS AT PETALUMA.

Petaluma, July 18.—The fast trotting and pacing on record for the Petaluma track was the order today when the first card of the California Fair and Racing Circuit meeting was run off. Standing out as the day's feature was the performance of "Pop" Durfee in winning the trotting race in straight heats with Pegasus. The big trotter accordingly keeps up his unbeaten record so far this season, making three victories in a row. In getting down in front, Pegasus reeled off the three miles in 2:09¾, 2:08½, 2:10¼, the second heat setting up a trotting record for the Petaluma track.

Jake Brolliar with Great Policy furnished the competition, but it was simply a case of Pegasus being too good. Sweet Bow came in for third money.

The pace also saw some fast pacing with a new track mark of 2:07 set up in the second heat. Prince Zolock, the handsome chestnut, was the winner by stepping down in front in the last two heats. Billy Durfee scored in the first heat with Rico, reeling off the mile in 2:07¾, but then Prince Zolock came along to cop. Potrero Boy, that was a star at Salinas, was right in the pacing, but was outfooted at the wire. Lock Logan was just nosed out in the record heat.

There were two running races on the card that filled well and stirred up a deal of enthusiasm. The summary:

First race, 2:08 pace, purse $500:

Prince Zolock, by Zolock.....(Helman)	5	1	1
Rico .....(W. G. Durfee)	1	4	4
Potrero Boy .....(L. Daniels)	2	3	2
Lock Logan .....(J. E. Montbomery)	4	2	3
Emmaline Dillon.....(W. A. Stewart)	3	5	7
Merry Widow .....(C. B. Johnson)	7	6	5
Julia M. .....(J. Sutherland)	8	7	6
A. B. C.....(Fred Chadbourne)	6	8	8

Time—2:07¾, 2:07, 2:09.

Second race, 2:20 trot, purse $500:

Pegasus, by Zombro.....(C. A. Durfee)	1	1	1
Great Policy .....(J. Brolliar)	2	2	2
Sweet Bow .....(William Ivy)	7	3	3
The Demon .....(R. M. Place)	5	4	4
Yoncalla, Howard's Comet and Miss Bond, dis.			

Time—2:09¾, 2:08½, 2:10¼.

Third race, running, five furlongs—Alice Teresa (J. W. Byrnes, owner) won; Cruzados Jr. (J. Evans) second; Tenderest (J. James) third. Time—1:02 4-5. Bert Getty and Von Dillon also ran.

Fourth race, running, five and a half furlongs—Bonnie Tess (J. T. Stride, owner) won; Pajaroita Jr. (T. Goulding, owner) second; Hands Off (S. Valentine, owner), third. Time—1:08½. Ida Pinack also ran.

Thursday, July 19.

Petaluma, July 19.—Virginia Barnette, Clarence J. Berry's $10,000 trotting mare, finally got going today on the sulky circuit and pulled down the 2:12 class circuit event in straight heats. Billy Durfee experienced little trouble, as the Moko trick seemed to be the class of the field. Every heat was turned in better than 2:10.

San Felipe, the "Big Train" that cleaned up the trotters in 1912, did not enjoy the success that was his at Salinas as Allie Lou, handled by Fred Ward, came along and took second money. In the second heat San Felipe gave the mare a tussle. Ella M. R., George J. G iannini's Stadium favorite, trotted a good race in the first heat but was withdrawn.

Elmo Montgomery made it three in a row with Hal Logan in the 2:20 pace by driving down in front in straight heats. A field of twelve went into Starter Joseph Waddell's hands, and they were forced to be sent away in tiers. Montgomery was lucky to be in the first division, and took the lead at the start and held it all the way. It was practically the same in the other heats.

Miss Rico, Billy Durfee's mare, that won some fame as a trotter in her two-year-old form, did a come-back after being distanced at Salinas to get second money. She paced consistently all the way. Directress Mac, J. J. Ryan's mare, that has raced at the San Francisco Park Stadium, also turned in a good performance to take third money.

The running races went on again, with two events on the card, and they aroused a deal of interest. Tenderest and Pajaroita II. were the winners. The summary:

First race, 2:20 pace, purse $500:

Hal Logan .....(Montgomery)	1	1	1
Miss Rico .....(W. G. Durfee)	2	2	3
Directress Mac .....(Schwartz)	3	3	2

Time—2:07¼, 2:07¼, 2:08¼.

Mountain Dee, Billy T., Lady Bell B., Zomar, Lady Alice T., Warren Dillon, Beretta Dee and Glenwood Mac also started.

Second race, 2:12 trot, purse $500:

Virginia Barnette.....(W. G. Durfee)	1	1	1
Allie Lou .....(F. Ward)	2	3	2
San Felipe .....(Daniels)	4	2	3

Geo. N. Patterson, John Mack and Ella M. R. also started.

Time—2:09½, 2:09½, 2:09¼.

Third race, running, one-half mile—Tenderest (J. James, owner) win; Cruzados Jr. (J. Evans) second; Rocky Boy (C. Dearborn) third. Time—0:49½.

Fourth race, running, five and one-half furlongs—Pajaroita Jr. (T. Goulding, owner) won; Bonnie Tess (J. T. Stride) second; Ida Pinach (J. Woodward) third. Time—1:09. Hands Off also ran.

IMPORTANT DATES CLOSE AUGUST 1.

The North Pacific Racing Circuit, of which there appears an announcement on page two of this issue, offers $75,000 in cash prizes to harness horsemen, and some of the most liberal classifications ever issued in the West. Beginning at Vancouver August 20, thence to Chehalis, Wash., Aug. 27; The Spokane Interstate Fair, Spokane, September 3 to 8; Gray's Harbor Fair, Elma, Sept. 5 to 9; Washington State Fair, Sept. 17 to 22, and the Oregon State Fair, September 24 to 29. The Circuit includes six of the most important cities in the Northwest and at the most delightful season of the year.

The ships are good ones and the circuit has been arranged to take the horses right down the line. It offers horsemen an opportunity to show for a lot of real money at a very nominal expense, the most important consideration to the owners and drivers of harness horses. The races of the Pacific Northwest have always been considered the most successful of their kind in the country; attracting many good buyers to each meeting. In fact, a horse that can win has a hard time going through the circuit without changing owners; the same with a youngster with possibilities.

The entries should be made direct to the fair secretaries. The usual terms will prevail. Send at once for the Stake Book, from your nearest fair, and remember, the last day you can enter is Wednesday, August first.

✤ ✤ ✤

OPENING OF THE GRAND CIRCUIT.

Cleveland, (O.), July 16.—Half-mile campaigners stepped into the limelight at the opening of the Grand Circuit racing season at the North Randall track this afternoon, and followers of the trotters and pacers who supported the favorites were a crestfallen lot.

A heavy rain soaked the track and held up proceedings for more than an hour, making it late before the last heat of the fourth event was raced. As a result of the weather conditions, the track was slow and the going was bad, particularly for the pacers.

The Edwards 2:10 $3,000 pacing stake, the feature event of the card, went to Colonel Armstrong, a half-miler and an outsider,, who was given a hard fight by A Game of Chance.

Box R., who also has been campaigning with the twice arounds, took the 2:06 pace after a hard battle with Knight of Strathmore. Young Todd, the favorite, got fourth money.

The Forest City sweepstakes for two-year-old trotters was a walk-away for Arrow Rock, piloted by McMahon, while Marion Guy took second money of the $2500 stake.

The Woodman, another two-lap star, took the 2:10 trot in straight heats. Miss Perfection, owned by R. J. MacKenzie of Pleasanton, Cal., was third. The summary:

The Edward, 2:10 pacing, value $3,000:

Colonel Armstrong, blk h by Walter Direct.. ..... (Edman)	1	1	1
A Game of Chance .....(Cox)	2	4	2
Ben Ali, b g by Wealth.....(Pitman)	5	2	3

Also started: Day Spring, Oregon Hal, Baxter Lou, Loyal W., Babe Cresceus.

Time—2:05¼, 2:07¼, 2:08¼.

The Forest City Sweepstakes, two-year-olds, trotting; value $2500:

M. Arrow Rock, b c by Azoff.....(McMahon)	1	1	
Miriam Guy, b f by Guy Axworthy.....(Hyde)	2	2	
John A. Forbes, br c by Todd Forbes.....(Dodge)	3	4	

Also started: Hollyrood Naomi, Will Albing.

Time—2:13¼, 2:15¼.

2:06 class pacing, purse $1200:

Box R., b g by Box Elder.....(Valentine)	4	1	1
Knight of Strathmore, ch h.....(Whitehead)	1	3	5
Thomas Earl, b h .....(Marvin)	2	4	2

Also started: Young Todd, Peter Pointer.

Time—2:08, 2:08, 2:08.

2:10 class, trotting, purse $1200:

The Woodman, br g by Empire Expedition..... ..... (Whitehead)	1	1	1
Brescia, br m .....(Rodney)	4	2	3
Miss Perfection, b m.....(McMahon)	5	3	2

Also started: Todd Temple, Binville, Col. Riser, Laramie Lad, The Guide, Glenwood B., Straight Sail.

Time—2:08¾, 2:09¼, 2:10.

Tuesday, July 17.

Cleveland, July 17.—Favorites stepped to the front today at the Grand Circuit meet at North Randall, but only two races were finished, a near-cloudburst flooding the track and forcing the postponement of the other three events on the card.

Mawitza, with Edman up, won the first division of the 2:19 trot in straight heats and easily outclassing the field.

It was different in the second division of the 2:19 trot, however, as Peter Chenault, with Murphy up, was given hot competition by Hollyrood King in the second heat and by North Spur in the third. Only a great drive down the home stretch by Murphy in the third beat gave the bay son of Peter the Great the heat and race.

After Kelly de Forest, the favorite in the betting, and driven by Markley, had won the first heat, the rain descended in torrents and turned the track into a veritable river. That ended the racing for the day. Results:

2:19 class trot, purse $1000 (first division):

Mawitza, br m by Crito Leyburn.....(Edman)	1	1	1
Peter Schuyler, br h by Prince Alexis..(Lyman)	2	3	2
Oscar Watts, b c by Gen. Watts.....(Hyde)	3	2	3

Also started: Balmacaan, Brother David, Red Top, Robinwood, Joffre.

Time—2:12¼, 2:14¼, 2:13½.

2:19 class trot, purse $1000 (second divisions):

Peter Chenault, b h by Peter the Great (Murphy)	1	1	1

(Continued on page 11.)

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July 22—Chehalis, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Chehalis Gun Club. Harry Quick, Secretary.

July 23, 24, 25—Portland, Ore.—Pacific Indians. F. C. Riehl, Secretary.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 10, 11, 12—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

N. W. Washington Shoot.—Dr. C. L. Templeton, with a total of 95 out of a possible 100 targets, furnished the high score at the Northwest Washington Trapshooters' League tournament held by the Seattle Trapshooters' Association at the Green Lake traps on July 8th. George Miller of Bellingham was second, with 94, and Matt Grossman was third with 93 breaks.

L. H. Barnes, secretary of the Green Lake Club, won the sterling silver flower vase offered by the Seattle Trapshooters' Association, with a high score of 49 out of 50 targets in the handicap event. Hi Everding of the Portland Gun Club tied with R. S. Searle for second place, with a score of 47, and won second place in the shoot-off, Searle dropping into third.

Barnes also captured the first honor ribbon in the Red Cross event. H. R. Everding was second, R. S. Searle third and F. C. Riehl and Fred Landwehr fourth and fifth, after being tied with William P. Anderson of Bellingham. Forty dollars was added to the A. A. T. A. fund to purchase and equip an ambulance unit for overseas service. L. H. Reid was the high professional, with his mark of 97, and Hugh Poston was second, with 95.

The Bellingham shooters won the team shoot, with a total of 224. George Miller, Ed Brackney, William P. Anderson, John Kienast and John Rice made up the team. The Seattle Trapshooters' Association was second, with 221, and the Green Lake Club third, with 219.

Following are the scores:

George Miller 94, Ed Brackney 88, W. P. Anderson 84, John Kienast 89, P. E. Rice 88, Matt Grossman 93, J. H. Davis 75, A. B. Kidd 76, Joe Bacher 84, Mrs. F. Dryden 54, *P. J. Holohan 87, R. W. Kinzer 90, Fred Landwehr 75, Hugh Fleming 81, J. S. Ruppe 88, George B. Baker 78, E. K. Van Vleck 88, *I. M. Fisher 87, W. B. Taft 85, *F. C. Riehl 84, *H. E. Poston 95, J. H. Hopkins 87, F. Dryden 95, F. Call 79, E. W. Kerr 89, *L. H. Reid 97, H. R. Everding 86, Dr. Templeton 95, Dr. L. Newton 95, L. H. Barnes 91, C. B. Fitzgerald 86, G. R. Farr 89, C. E. McKelvey 85, Charles Stadfeld 68, J. B. Lewis 90, W. H. Carstens 91, D. Reid 86, G. E. Dunkelberger 78, R. S. Searle 87, G. W. Armstrong 67, Dr. R. V. Mills 39x50, H. E. Gleason 40x50, A. W. Tacoma Club.—In one of the most successful shoots held in months by the Tacoma Gun Club on July 8th, C. F. Reinhard won the $50 Liberty bond. He broke 46 birds out of a possible 50 from 16 yards. Dave Bales, Jack Cooper and Allan Barlow tied for second place with 45 birds.

Cooper won the Dague trophies in the 21-yard competition, Barlow in the 19 and Fred Edwards in the 16.

Mrs. Bales had on her shooting costume and broke 40 out of 50 birds. She is rapidly forging ahead and is now shooting as consistently at the traps as any woman performer in western Washington. Score:

At 16 yards—*F. L. Griffin 43, A. W. Bagley 34, Mrs. Young 30, C. F. Reinhard 46, *F. Edwards 43, L. S. Mellinger 38, J. Van Koten 38, E. E. Young 41, C. Humphrey 28, Mrs. Bales 40, S. H. Richardson 38, L. E. Wilkeson.

(*Winner 16-yard medal.)

At 19 yards—Lee Raillinger 44, S. L. Lawrence 25x30, Homer King 34, E. Blanchard 38, *D. Bales 45, H. Burg 40, E. R. Wheeler 44, *Allan Barlow 45.

(*Winners 19-yard medal.)

At 21 yards—H. Berens 40, J. A. Dague 44, A. Z. Smith 34, *J. Cooper 45, A. Riehl 22x35.

(*Winner 21-yard medal.)

Women Trap Champions.—Not many years ago women were conspicuous by their absence in trapshooting matters, but such is not the case today. Thus far eight States have held women's trapshooting championship events, as follows:

Illinois, Mrs. A. H. Winkler, Chicago, winner.
Delaware, Miss H. D. Hammond, Wilmington.
Oklahoma, Miss M. Wilson, Tulsa.
Pennsylvania, Mrs. F. H. Mellon, Pittsburgh.
California-Nevada, Mrs. C. E. Groat, Los Angeles.
Connecticit, Mrs. F. F. Rodgers, Stamford.
New Jersey, Mrs. F. A. Johnson, Atlantic City.
Iowa, Miss E. Wettleaf, Nichols.

It will be a matter of a few years only when there will be a women's trapshooting event held in every State, the same as is held for men, and the women will have a little Grand American all their own. Trapshooting is an ideal sport for women and they should be encouraged in shooting at all tournaments.

The best score made by a woman in championship competition was by Mrs. Groat, in the California-Nevada shoot, when she broke 95 of the clay targets.

These fair Dianas and many more will be found in the Grand American trapshooting tournament, which takes place at the South Shore Country Club, Chicago, Ill., the third week in August. There will be special events for women in this tournament.

✤ ✤ ✤

S. F. Fly-Casting Club.—The San Francisco Fly-Casting Club held events at Stow Lake on last Saturday and Sunday. The weather was cold with a strong western wind blowing, but in spite of these handicaps the following high scores were turned in:

SATURDAY'S EVENTS.

	Delicacy Accy.	Del.	Pct.	½-oz. D.Fly Lure	Accy.
Col. Young	16	10	14	14	44
C. H. Kewell	17	20	18½	15	13
S. Forbes	11	5	8	16	18

Heavy tackle—C. H. Kewell 115, S. Forbes 112.

Light tackle, distance—C. H. Kewell 90, S. Forbes 104.

SUNDAY'S EVENTS.

Col. Young	11	5	8	47	14
Col. Burgin	27	5	16	21	19
Dr. Brooks	28	10	19	65	17
S. Forbes	14	0	7	21	9

Judge, S. Forbes; Clerk, H. L. Ellsworth.

Addition to Licensed Judges.—Several weeks ago a list of judges to whom licenses had been furnished by the license committee of the American Kennel Club was published. Since then the committee has made public a new list in which the following additional names appear of those licensed to officiate as judges at shows held under A. K. C. supervision:

Mrs. Ethel E. Anderson, J. Chandler Barnard, C. W. Barney, J. G. Bates, Mrs. Albert Brennan, J. J. Briggs, James Byrne, A. W. Caldwell, E. H. Carle, J. E. Carroll, F. J. Casey, Mrs. F. T. Clarke, H. D. Coghlan, Tyler Cruttenden, C. N. Denault, W. T. Drew, Mrs. W. T. Drew, Mrs. Frederic Edey, F. T. Eskrigge, J. C. Feder, Constantin Franz, J. L. Frothingham, C. N. Grey, Hamilton Hadden, Mrs. H. S. Henderson, J. E. Horrax, Paul Hahn, C. W. Keyes, H. D. Kirkover, W. F. Kubach, Effingham Lawrence, Mrs. M. H. McCurdy, E. G. Marquardt, William Moreland, William Neuhoff, H. T. Peters, W. R. Proctor, Jr., Mrs. M. J. Riddell, H. G. Rieger, John Sinnott, Mrs. F. D. Taylor, G. S. Thomas, C. E. Townsend, R. Vogt, Mrs. M. M. Van Beuren, Dr. J. W. Vaughn and John White. As in the original list, the list is mostly made up of fanciers living adjacent to the Atlantic Coast, but very few middle or far West names appearing in the list.

The list of licensed superintendents also has received several additions, among them Harry R. Burrell, James Cole, P. L. Emery, W. H. Gall and Walter B. Johnson.

✤ ✤ ✤

Trapshooters up and down the Coast have been active in staging events for the Red Cross. Quite a tidy sum will be realized when the money is in.

HIGH SCORES AT GOLDEN GATE SHOOT.

Andy Flickinger Leads With 49; Four Tie at 48; Len Hawxhurst Has Run of 125 Straight.

There was some smashing of the blue rocks ove at the Alameda grounds last Sunday when the Go den Gate Club held its monthly tournament. Fo consistent scores it is doubtful if any local shoot thi season has equaled it. Out of the thirty-three tha faced the traps only five fell below the 80 per cen mark, and they were just one or two away. On th other hand, Andy Flickinger of Vallejo, turned i the high tally of the day with 49 out of 50 breaks and four other amateurs had 48s. Seven others wer there with 47s and the rest were around the 90 pe cent figure. It was certainly a day of high scores— there's no doubt about that.

Right behind Flickinger came Bill Price and Toney Prior, veterans of many a tourney, with George Thomas and Henry Stelling right up with them. The 47 boys were W. E. Cooley, A. J. Williams, Al Durney, J. B. Brady, A. E. Stoneberger, C. W. Lindemann and Barney Worthen.

Not to let the amateurs outstrip them, the professionals on the ground had a pretty race themselves. Len Hawxhurst, fresh from a tour of the San Joaquin valley, showed that his eye was with him in smashing out 49 out of the fifty. During the day Len turned in a long run of 125 straight. "Oakland Al" Cook was one bird behind and "Sure Shot" Dick Reed and Frank Blum tied at 47s. This boy Blum is just coming ahead in leaps and bounds. Capt. duBray got back from the Northwest to knock out 40. "Just-Wait-For-Me" Moore had the satisfaction of going the first frame of twenty birds straight and finished up with 43. The scores were as follows:—

Targets—	20	20	10	Total
Toney Prior	19	20	9	48
A. M. Gearhart	15	14	6	35
C. A. Merrill	18	16	8	42
George Thomas	20	19	9	48
*E. Stressler	14	11	9	34
*J. W. F. Moore	20	16	7	43
Ted Handman	20	16	9	45
W. E. Cooley	20	17	10	47
H. A. Ray	17	18	10	45
H. Stelling	19	19	10	48
*Capt. duBray	18	14	8	40
T. W. Parsons	17	13	6	36
H. R. Phinney	18	18	9	45
A. J. Williams	18	19	10	47
W. H. Price	19	20	9	48
*R. C. Reed	19	20	8	47
C. C. Jester	16	19	7	42
A. A. Durney	18	19	10	47
A. G. Flickinger	20	19	10	49
F. Webster	19	17	10	46
*Al Cook	20	18	10	48
J. B. Brady	19	18	10	47
*F. W. Blum	18	19	10	47
Dr. Topham	19	18	9	46
J. Brickell	15	19	7	41
A. E. Stoneberger	18	19	10	47
J. H. Millett	15	14	7	36
C. W. Lindemann	19	19	9	47
Roy Avery	11	20	8	39
*L. S. Hawxhurst	20	19	10	49
B. Worthen	18	20	9	47
L. L. Fuller	13	14	10	37
H. Peet	15	17	10	42

(*Professionals.)

Fishing in Yosemite Valley.—Trout fishing in the beautiful Yosemite valley is now good, according to Floyd Judah, who has just returned from several weeks' stay at many of the prominent streams. At Wawona, on the south fork of the Merced, he fished with Clarence Washburn, and in one day they managed to get a combined basket of seventy-five beauties. The fish were of nice size and plenty of sport was had in taking them with the fly. Judah found that the brown hackle palmer tied was the best killing fly.

On the main Merced river, right in the heart of the Yosemite, Judah also had some exciting sport. The fish were harder to get, but were in the streams. The Bosqui hackle was used with good effect. Kirkham Wright, a local angler, has been there for the past month enjoying himself with good catches.

Milton F. Samis writes from the valley that some of the streams are still high and it will be a couple of weeks before the sport is at its best. Frank Wooster, a Los Angeles rodster, hooked an eighteen-inch rainbow trout within 100 feet of the Sentinel Hotel.

Local anglers are pleased with the additional good reports that fly fishing in the mountains is gradually on the improve. The water is high in many places, but it is anticipated that August will provide the best fishing produced in years. The beauty of the season, which is at least a month late, is that the fish are much larger than in former years.

W. H. Cameron was up in the Feather river country during the week and saw prospects of ideal conditions coming within the next couple of weeks. The trouble at present, he says, is that there is too much feed in the waters. The snow is also melting and the streams are a trifle high. Pretty soon the waters will start to recede and clear. Some good catches are being made now, and Bill managed to get a fair basket.

FEDERAL CHECK ON MIGRANTS FIXED.

Wild Fowl, Insect Life and Flowing Waters Subject to Similar Regulations.

[By George Shiras 3d]

In a recent article I showed that the migratory wild fowl law was for the public good, and gave the reasons why the Federal Government owns the migratory birds. I included with the statement that for more than a century the States asserted and maintained an exclusive jurisdiction (aside from navigation) over all internal waters.

In other words the attitude of each State toward all waters within its borders was exactly the same as Thomas J. Johnston's position toward all game within a State, in that no distinction was made between local waters and local game or that passing from State to State and in which all were interested.

In 1900 the United States Supreme Court, in Missouri against Illinois, held that the time had come when it was necessary for the public health of the States and the country that waters passing from one State to another should not be unreasonably polluted, and when this occurred the offending State could be restrained, by a Federal jurisdiction, under Article III., section 2, of the Constitution, providing for a "settlement of controversies between the States."

This decision was epochal, for it greatly enlarged the hitherto restricted scope of this provision. By this pronouncement the court set aside the contention of Illinois and other States that they could do as they pleased with all waters within their borders regardless of the harmful effect such an arbitrary control might have on waters passing from State to State.

A few years later, in Kansas vs. Colorado, the same court had before it the contention of the defendant State that it could use or waste all waters within its borders regardless of its use for irrigation in an adjoining State. But the court held that each State had a comity in waters flowing from another.

Later still the Supreme Court went a step further and decided in the Tennessee Copper Company case that no State had a right to so pollute or poison the atmosphere as to injure the health or property rights of those in adjoining States.

These decisions overruled the previously existing exclusive control of each State by making a jurisdictional distinction between local and interstate rights. Here then should be recalled the court's approval of Pothier's position—that flowing waters, the air and wild game were res communes, warranting a separate jurisdiction between things that are local and those that are common to two or more States.

Therefore it ought to be plain that whenever controversies arise between the States in an effort to protect common rights in migratory birds or migratory fish it becomes a justiciable controversy under the section of the Constitution quoted, whenever it appears that one or more States suffer a substantial or irrecoverable injury through other States disregarding such rights.

Were one State to place obstructions across a river, preventing fish from reaching one or possibly a dozen other States, thereby depriving the latter of their food supply or preventing the collection of spawn for fish hatcheries and upon which the perpetuation of fish like the shad or salmon depend, we would have instances where the Federal Government would surely assert its jurisdiction and grant relief.

As there can be no legal distinction between migratory fish and migratory birds or in the remedy when improvidently destroyed, it proves that there does exist a positive power in one branch of the Federal Government to regulate such harmful acts.

While this method of settling such controversies is primarily judicial, the courts have held that a legislative jurisdiction is inferable therefrom. Besides this right there are several others equally meritorious justifying Congress in assuming a supervision over migratory life.

Another regulatory power of Congress that has only been exercised in recent years and is now supplementary to or entirely displacing that of the States is a supervision over the inception or the spread of noxious insect life from State to State or nation to nation, and which in the past has proved so destructive to our plant and animal industries as well as mankind itself and which without the intervention of a central authority would imperil not only the prosperity of the entire country but even its very existence.

Millions of dollars have been spent by Congress in combating the boll weevil, the gypsy moth, the Hessian fly, chinch bug and hundreds of other harmful insects.

This jurisdiction in legal principle is precisely analogous to a Federal control over beneficial migrants and will be considered more in detail at another time.

Trade Notes.—The Eastern Handicap, premier trapshooting event of the East, recently held at Hartford, Connecticut with a representative field, was won by A. B. Noble of Hartford, Conn., with a score of 97x100 shooting from 18 yards and using Nitro Club "Speed Shells." F. S. Tomlin scored the high average with 343x500, using the Perfect Shooting Combination—Remington Pump Gun and Nitro Club "Speed Shells." Mr. Tomlin also won the Connecticut Introductory.

There was a good attendance at the Chicago Gun Club's tournament on June 10. C. D. McGary was high amateur, defeating a field of 65 shooters. He broke 149 out of 150 clays, shooting a Remington Pump Gun and Nitro Club "Speed Shells."

H. P. Herrman was in good shooting form at the State College Gun Club shoot held at the State College, Pennsylvania, on June 15. He made 99 hits out of 100 targets shot at. R. F. Rich was runner-up with 93x100. Both of these men shot Nitro Club "Speed Shells."

Thirty-five shooters faced the traps at the registered shoot of the Hagerstown Gun Club on June 28th. Vincent Oliver of Philadelphia, Penn., broke 149 out of 150 rocks, shooting the "Perfect Combination" of a Remington Pump Gun and Nitro Club "Speed Shells." He tied for high amateur with L. R. Beauchamp.

B. H. Worthen broke 49 out of 50 clays with Nitro Club "Speed Shells" at a recent shoot of the Golden Gate Club. He tied for high gun with J. Brickell and T. Handman.

The Sodus Rod and Gun Club had a good turnout at their shoot on June 28th. High amateur average was won by A. C. Shutt with 174x175. He shot the "Perfect Combination," a Remington Pump Gun and Nitro Club "Speed Shells."

GRAND AMERICAN HANDICAP.

Blue Ribbon Event Is Drawing Near; Entries Will Close on August 4th.

Where are you going to spend your vacation? Have you decided on the date? Are you a sportsman? If your answer to the first two questions is No, and to the last question Yes, then you should consider attending the Grand American Handicap which will be held at Chicago, Ill., during the week of August 20th to 25th. It is the greatest event of the trapshooting world and interests thousands of sporting men and women.

The place of action for this year's tournament is ideal, being the spacious grounds of the South Shore Country Club,—Chicago's million-dollar clubhouse. Sixteen traps will be used and the targets thrown over the rustling waters of Lake Michigan.

Crack shots from every state in the Union will compete for honors, and it is expected that there will be 1000 entries, to say nothing of the thousands that will be spectators only. When the classic was held in Chicago in 1915, Grant Park was used and 50,000 people attended. This year's attendance is expected to pass that record.

The officials of the South Shore Club are taking a great interest in the handicap and will endeavor to show all visitors that the club is more than a pile of stone and bricks, and that within its walls hospitality is a decided feature.

Mr. Everett C. Brown, the club's president, contemplates furnishing the trapshooters with plenty of entertainment when they are not facing the traps. Athletic events will be a side-line feature. Some of the best swimmers of the country will give exhibitions and track and field events will be staged. There will also be evening functions.

In addition, the gun clubs of the Windy City are working on entertainment plans and all the hotels and amusement centers are co-operating.

From all indications it will certainly be the greatest trapshooting event in the history of the sport.

Conditions governing the Grand American Handicap are:—

One hundred targets, unknown angles, handicaps 16 to 23 yards, high guns—not class shooting. Five hundred dollars ($500) added to the purse. Entrance money $10, the price of targets being included.

The winner of first money is guaranteed $500 or more and a trophy; the winner of second money is guaranteed $400 or more and a trophy; the winner of third money is guaranteed $300 or more and a trophy; the winner of fourth money is guaranteed $200 or more and a trophy, and the winner of fifth money is guaranteed $100 or more and a trophy. If first, second, third, fourth and fifth moneys fall below these amounts, the difference will be made good by The Interstate Association.

Regular entries must be made on or before Saturday, August 4, 1917, and must be accompanied by the full amount of the entrance fee ($10). Entries mailed in envelopes bearing postmarks dated August 4th will be accepted as regular entries.

Penalty entries may be made after Saturday, August 4th, up to 5 p. m. Tuesday, August 21st, by paying $15 entrance—targets included.

All entries must be made on application blanks, and they will be received by Elmer E. Shaner, Treasurer The Interstate Association, 219 Coltart Avenue, Pittsburgh, Pa.

1918 State Shoots.—It is customary at the annual meetings of the State Sportsman's Associations to select the cities in which the next State trapshooting championship tournaments will be held. To this date honors for 1918 have been heaped on these cities:

Washington—Tacoma. Pennsylvania—Lancaster. New Jersey—Lakewood. Florida—Jacksonville. Colorado—Colorado Springs. Ohio—Chillicothe. Maryland—D. C.,—Baltimore. South Dakota—Sioux Falls. Texas—Houston. Oklahoma—Sapulpa. Nebraska—Freemont. Mississippi—Gulfport. Kansas—Dodge City. Illinois—Peoria. Missouri—Kansas City.

TRAPSHOOTING CHAMPS FAIL TO REPEAT.

In the First 33 State Championships Decided Only Five of the 1916 Winners Were Able to Win.

[By Peter P. Carney.]

Trapshooting champions are finding it a difficult matter to repeat this year. In the first thirty-three State championships up for decision only five of the 1916 winners were able to put over another victory. These winners were King in Colorado, Staples in South Carolina, Pendergast in New York, Weaver in Rhode Island and Williams in the United States Navy, Atlantic Fleet.

By their victories this year King, Pendergast and Staples put over triple victories in a way, having won the State championship three years in succession. John Jahn, the Iowa champion, has also won the title in that State three times, but not in succession, as he failed last year after winning in 1914 and 1915. Williams, the Navy champion, has won the fleet title two years in succession. Barclay has won the Vermont championship two years running, and Weaver has the same record in Rhode Island. Dr. Richards, the Virginia champion, won the title in 1914, and Reilley, the Utah champion, won the title in that State in 1915. Elmer Reed, the New Hampshire title winner this year, was also the champion in 1915. The Tansil family had the Arkansas championship in their possession in 1914-15-16, but could not keep it this year.

There is still a possibility of a number of last year's champions getting in the National Amateur championship event because they are runners-up. Allen Heil, of Pennsylvania, last year's champion, broke 99 and lost. Foregard, of Texas; Eaton, of Missouri, and Speer of New Jersey, all champions of 1916, are runners-up this year. In New Jersey Platt, the runner-up last year, broke 100 straight. Last year Platt represented New Jersey in the National championship event because Speer could not attend. Nash, the runner-up in California, was also the runner-up last year.

Several of the championship events wound up in ties and shoot-offs were necessary. Four tied in Texas, two in Arkansas, two in Mississippi, three in Maryland, two in Georgia, and there were three shooters tied for second in California. A peculiar incident occurred in the California, Washington and Ohio State shoots. Troeh, the champion of champions, broke 284 straight in the Washington shoot; Pfirrmann, 1916 champion, broke 254 straight in the California state shoot, and Harlow, high average amateur for 1916, broke 148 straight in the Ohio shoot, yet not one of the three won the State championship or finished in the runner-up position.

1917 Trapshooting Champions: — Atlantic Fleet, E. P. Williams, tournament held on U. S. S. Solance, score of 90; Arkansas—J. E. Chatfield, at Texarkana, score 96; Arizona—C. P. Cooley at Holbrook, 87; Colorado-New Mexico, R. A. King at Delta, 99; California-Nevada, F. H. Mellus at Los Angeles, 99; Connecticut—W. A. Flynn at Greenwich, 98; Delaware—L. R. Beauchamp at Harrington, 94; Florida—G. W. Ball at Miami, 97; Georgia—W. H. Jones at Macon, 97; Idaho—D. J. Holohan at Burley, 96; Illinois—Mark Arie at Thomasboro, 98; Iowa—J. R. Jahn at Davenport, 98; Kansas—Steve Hoyne at Salina, 97; Missouri—Harvey Dixon at Oronogo, 99; Mississippi—Lloyd Matlack at Ocean Springs, 92; Maryland-D. C.—J. S. Michael at Aberdeen, 97; Nebraska—C. L. Waggoner at Diller, 95; New Jersey—C. B. Platt at Bridgeton, 100; New York—H. J. Pendergast at Phoenix, 100; New Hampshire—E. E. Reed at Manchester, 93; Oklahoma—George Lewis at Garber, 98; Oregon—J. W. Seavey at Portland, 98; Ohio—F. E. Brint at Toledo, 99; Pennsylvania—Ray McIntyre at Butler, 100; Rhode Island—W. J. Weaver at Edgewood, 97; South Dakota—E. T. Meyers at Mitchell, 98; South Carolina—J. H. Staples at Charleston, 96; Texas—F. W. McNeir at Houston, 98; Utah—C. H. Reilley, Jr., at Salt Lake, 97; Vermont—D. M. Barclay at Barre, 99; Virginia—L. G. Richards at Roanoke, 99; Washington—J. H. Hopkins at Seattle, 97; West Virgina—W. E. Myers at Richwood, 98.

Diamond Lake Stocked.—Klamath Falls, Ore.—That the stocking of fish in the beautiful Diamond Lake, in northern Klamath County, which had almost been given up as hopeless, has at last been accomplished is a pleasant surprise brought to this city by Deputy Game Warden Henry Stout.

This lake was stocked with fish from the Spencer Creek hatchery four years ago and again two years ago, but no evidence of results was seen until last week, when it was found that the lake was teeming with fish. They could be seen spawning near the shore and more than 400 were observed in one place. Many also were seen in Short Creek, Silent Creek and the Outlet, which all empty into Diamond Lake. There was five feet of snow on the divide when Mr. Stout and Gus Melhase went in and they were obliged to leave their car some distance this side of the lake and go afoot.

Diamond Lake is one of the most beautiful of the scenic attractions of Klamath county. It lies 90 miles north of here and can be reached by automobile over good roads during the short season. It is about 12 miles in circumference and is surrounded by mountain peaks on all sides. Sandy beaches line its shores, offering every inducement to campers.

Sportsmen's Row

Orvie Overall, the former Cub pitcher, is now one of the leading target busters in the vicinity of Visalia, Cal.

✤ ✤ ✤

Trapshooting is growing into America's leading sport because it is the direct expression of the inherent desire of every American man and woman to handle firearms.

✤ ✤ ✤

One of the contestants in a recent shoot of the Paterson, Cal., club was Senor Carolus Cavallo, of Valparaiso, Chile. He broke 75 per cent of his targets and enjoyed the sport so much that he promised to form a club on his return to Chile.

✤ ✤ ✤

Bulldog critics should be stirred in the Fall if the dogs shipped to America recently arrive safe and sound. At Last is one. He won a championship under George Raper at Cruft's last year. Irish Elegance is another which is emigrating to these shores. Maybe Mike O'Flannighan, Oak Nana, Astoria Baron and others will have to look to their laurels.

✤ ✤ ✤

Robert Vagt, owner of the Brighton, an English setter field trial winner, is responsible for the following: A friend of his told him that he had just bought a dog. "What kind is it?" asked Mr. Vagt, "an Ingersoll dog?" His friend bit hard when he asked what kind of a dog an Ingersoll dog was. "Why, he's a watchdog, of course," was the answer.

✤ ✤ ✤

One knows little these days of when the ships come in and when they go out, owing to the censorship, and the man who imports is taking a big sporting chance. Recently an Airedale, said by British critics to be one of the best ever, was shipped to the Chesney Kennels of Otto Lehmann, of Chicago. Chesney Duchess is the name of the dog. It is predicted that she will make her mark here.

✤ ✤ ✤

Surface fishing on Emerald Bay, which is usually only good during the month of June, has been wonderful during the past couple of weeks, according to all reports. Catches around twenty pounds have been quite frequent. Charley Bradley writes that the nineteen and a half pounder that he hooked and landed was "some fish" and was only taken after a tussle.

Argentine is bucking up in a dog way and the people of that country who have been paying fancy prices for the best horses are now going in quite strongly for the best dogs to be had. Not so long ago Mr. Unque, a big cattle raiser, imported a nice brace of wire haired fox terriers from England. They are well bred ones from Mr. J. Shepherd's kennels in London and will probably do a lot of good for the breed in South America.

✤ ✤ ✤

Elephants Used in Hunting.—In the course of a lecture on "Big Game Shooting in India" Mr. Alfred Ezra gave some interesting details in connection with elephants and their usefulness in hunting. He said the grass was so tall that shooting was all done from the backs of elephants. Both the animals and their drivers were highly trained, and when the Maharajah wanted a guest to have first shot, the tiger could be beaten out to any particular gun desired. It was a country where one came across tiger, bear, rhino, buffalo, bison, swamp deer and other game, and one advantage of hunting on the back of an elephant was that the animals, being accustomed to see wild elephants about, took no notice. Only a good elephant would stand the charge of a tiger; hardly any would stand that of a rhino. Out of eighty in the Makarajah's stables only half a dozen would do this. The mahout was partly responsible for the fact, as, if he thought the sportsman was a poor shot, and the elephant stood a chance of being gored, he would just touch the animal behind the ears with his toes, when the elephant would at once turn round and trot off. During the shooting season the elephant had a hard time of it; he would be out from six in the morning till eight at night. It might be ten at night when he got home and commenced feeding. Every elephant had three servants to wait on him—the chief man, who was in charge during the shooting; the second man, to whose care the elephant was turned over when he returned; and a little boy, one of whose functions was to feed the elephant with rice. This was given in addition to the fodder, which the elephant ate when stabled. The boy would wrap some rice in hay and give this to the elephant. This performance would go on by the hour. It was usual to mount by the tail: the elephant put out his leg, you scrambled on to his back. As for tigers, if the villagers brought in news that a cow had been killed, on going to the place the next day one was practically certain to get the tiger. The young tigers were much more destructive than the old, because they killed for practice; but the fully-grown tiger was usually satisfied with one kill. In some districts, the tigers showed much more fight than in others. There were tigers that would charge without being wounded, and others that, even when wounded, would not fight.—[British Sportsman.

One day last week Mrs. A. G. Wilkes and J. S. French engaged in a 100-bird race. The fair Diana emerged winner, but was forced to break 90 to French's 85. Mrs. Wilkes has been showing improvement right along.

✤ ✤ ✤

A. C. Freeman of Sacramento and party returned last week from a four days' outing at Santa Cruz. While at the resort Freeman tried his luck at fishing in the Pacific. The result was a fine ten-pound salmon caught with hook and line.

✤ ✤ ✤

During the Pacific Coast Handicap trap leagues were the source of much discussion and it wouldn't be surprising if there were a number of leagues in California next fall.

A suggestion offered is that the Pacific Coast Handicap be divided into two tournaments—the Northwestern and Southwestern handicaps. Reason for this is that the Northern shooters do not got to the South and vice versa, because of the great traveling distance and expense.

✤ ✤ ✤

Seattle Association.—An ideal day was offered the shooters on Sunday, July 15th, nine of them turning out for the regular program of the week.

C. E. McKelvey, shooting with a borrowed gun, finished the high score in the fifty-target program by breaking forty-eight out of the lot. Hugh Posten and R. S. Searle tied for second position honors by shooting forty-seven each.

McKelvey and Posten furnished the high score in the hundred target event, they each breaking ninety-three. Tom Wilkes furnished the second score in the hundred by finishing with ninety-two.

At 50 targets—C. E. McKelvey 48, R. S. Searle 47, *H. R. Posten 47, J. B. Lewis 44, Tom Wilkes 44, Hugh Fleming 43, *F. Dryden 43, Ralph Kinzer 41, J. H. Davis 38.

At 100 targets—C. E. McKelvey 93, *H. R. Posten 93, Tom Wilkes 92, *F. Dryden 91, J. B. Lewis 88, Hugh Fleming 88, Ralph Kinzer 85, J. H. Davis 75.

(*Pros.) Yours truly,
Seattle, Wash. E. A. FRY, Sec'y.

Sport at Lake Tahoe.—The fishing has veen very good at Lake Tahoe since the opening of the season. Many large silver trout are being taken in the shallow waters between the tavern and Brockaway. R. Lowe, a well-known angler of San Jose, who spends his summers at Tahoe, has caught many of these silver beauties so far this season. The fish were taken on a seven-ounce rod and with live minnows for bait. Mr. Lowe recently shipped a nine-pound silver trout to a friend in San Francisco. The gates at the Truckee River dam are now open, whih makecs the water unusually high. The river fishing has been exceptionally good. Several Loch Leven trout weighing from two to six pounds were taken recently and a San Francisco angler who fished the extreme headwaters of Ward Creek, with a light rod, took two native trout, one weighing two and the other five pounds. These were among the finest specimens of the lake variety that have been brought in. The smaller of these two fish was sent to San Francisco, where it was frozen in clear ice and placed on exhibition. Fishing in any creek or stream flowing into Lake Tahoe, or any other lake in District 23, within two miles extending from the mouth of said stream toward its source, is prohibited until August 1. This is done to protect the spawning E. W. S. trout. Sacramento, Cal.

Los Angeles Club.—Scoring 96 breaks out of the 100 targets shot at from distance handicaps of 20 yards, J. F. Dodds successfully scatter-gunned his way to victory in the Owen Council trophy trapshooting tournament held on Sunday at the Los Angeles club traps.

The shooters who fired from 20 yards, including Dodds, C. W. Fish, Henry Pfirrmann Jr., Owen Evans and Robert Bungay, broke 472 targets out of 500 shot at. This squad is one of the strongest in the United States, and Fred Teeple, secretary of the club, has challenged any club in the country to a telegraphic team race over any route.

Silver take-home trophies, which were up for shooters making high scores in the 25-bird frames of the century shoot, were won by Fish, Sargent, Bungay and Free. Gold trophies, up under the same conditions, were taken home by Pool, Pfirrmann, Evans, Mellus and Rossbach.

Squad 2, composed of Rossbach, Sargent, Pool, H. W. Cline and Louis Mellus, broke 461 out of 500. The first squad, the five artists who competed from 20 yards, broke 120 straight in the third frame. Bungay, the Venetian crack, fell down and was the only one to lose a target. It was his last one fired at.

The William Kennedy trophy will be contested for next Sunday at the L. A. club in a 100-bird handicap tournament. Sunday's results follow:

J. F. Dodds, handicap 20 yds., broke 96; C. W. Fish 20—95, R. O. Pool 18—95, H. Prrmann 20—94, O. A. Evans 20—94, H. E. Sargent 18—94, L. R. Mellus 18—94, Wm. Cornett 16—94, R. H. Bungay 20—93, J. L. Brown 16—93, V. A. Rossbach 17—92, H. W. Hawley 16—91, Wm. Kennedy 16—90, Frank Free 17—88, H. W. Cline 17—86, O. Council 18—86, J. A. Cowan 16—84, Mrs. Pfirrmann 16—82, C. M. Wood 16—48x50, M. D. Towne 16—41x50, Chas De Witt 16—41x50, M. Steel 16—40x50, A. C. Gardner 16—36x50, James Tindall 16—31x50, H. D. Clark 16—12x25, R. R. Reeve 16—11x25.

"WHY I TOOK UP TRAPSHOOTING."

Mrs. Topperwein Became Interested in the Sport Because She Wanted to Do Things Husband Did.

[By Mrs. Adolph Topperwein.]

[Mrs. Ad. Topperwein lives in San Antonio, Texas. She is the only woman professional trapshooter; is considered the peer of all woman shooters, and as good as the male experts with the shotgun. She earned distinction last December by breaking 1952 out of 2000 targets thrown in succession, and without changing guns.]

Shooting is like everything else—you have got to try it to like it. Once you get interested in this great sport of outdoors you will understand why so many men and women take up trapshooting. They say once a shooter, always a shooter.

To learn to shoot firearms of any sort means "out of doors." Out of doors means to anyone good health, especially to women. Of the outdoor games played nowadays trapshooting is the most fascinating, the most invigorating, and an accomplishment of which anyone should feel justly proud.

I have been asked many times how I became interested in trapshooting. The answer is very simple. My husband is a shooter and I concluded that I would like to do the same things he did. Once started, I discovered that there were so many little interesting points to learn that I have been at it ever since. That was ten years ago. At that time I was among the few women who took kindly to firearms and was looked upon as a freak. Today, however, we see things changed everywhere. At every trapshooting event we find women facing the traps, and we have now a standing army of over 500 women who can handle the gun, a large number of whom can hold their own with the best shooters of the sterner sex.

Anyone with systematic and intelligent practice can, in a short while, make wonderful progress. As a general rule most women have a natural horror of firearms, and are too timid to try, simply because they have never been encouraged in that line, but there is absolutely no reason why a woman should not shoot just as well as a man.

Nowadays a woman need not hesitate to attend a shoot at any of the many organized gun clubs. It is perfectly "proper," and she will always find a crowd of very courteous gentlemen who will not only be glad to see her, but also extend to her every possible courtesy.

The first important thing for the beginner is to have a gun of proper fit. A mistake often made by the novice is to try some gun, which, as a rule, is not suited to his particular make-up. If a lady, the borrowed gun is almost certain to be too long in the stock and as a rule too heavy; the result is that it is held in an awkward manner, the recoil received from the shot frightens the shooter and she loses all of her enthusiasm then and there.

Have someone who knows "fit" you with a proper gun, teach you the way to stand and hold, and when you have learned that you must "lead" your quartering birds, "line-up" your gun properly and shoot as quickly as you can. When you have learned to "concentrate" on each and every bird, forbetting the ones you missed, and look forward with grim determination to "kill" the next one, then you have the "makings" of a shooter.

Do not try to shoot too much to begin with. Twenty-five or fifty shots is enough, at least until your shoulder is accustomed to the recoil. Shooting when you are tired may cause you to flinch, a habit which has spoiled many a good shot.

While self-confidence and concentration are great factors, you must not get the idea that you can learn the game right away. Just because you were fortunate enough to get that last string of 25 straight does not spell that you are a past master in the game. We all have our good half hours and our bad ones, and the longer you stay at the game you will make the wonderful discovery that the "bad half hours" slip in very frequently.

The missing of one or more targets in an event, ever so often, is what makes trapshooting so interesting and one of the most difficult games to master. If you could get so proficient that you could break them all, all the time, you would soon lose all interest in the sport, but the fact that men like Crosby, Spencer and a host of other of our top-notchers who have been at the game for years and have shot thousands of targets, frequently have their "bad half hours," demonstrates that breaking targets, thrown from a trap, with a shotgun is a study which requires a great deal of practice, patience and a great deal of skill.

S. Christenson, secretary of the Pacific Coast Field Trials Club and well known in horse circles, has received his commission as a captain in the quartermaster's corps. He leaves this coming week for Fort Reno, Oklahoma, to report for duty. Chris will be missed at the Pacific Coast trials to be held at Bakersfield this coming January.

✤ ✤ ✤

The trap regulars are busily discussing the success that has been achieved this season by Harry Lorenson of Newman. It is ascribed to the fact that he has been using the same gun for his field and target shooting. Shooters are too apt to switch around firing pieces, and it ofttimes affects their work.

NOTES AND NEWS

(Continued from page 7.)

Northspur, b h by San Francisco.....(Cox) 3 4 2
Minnie Arthur, blk m by Mainsheet.....(Snow) 2 6 3
Also started—Hollyrood King, Judge Jones, Peter Grimm, Carrie New, Forest Bingen.
Time—2:10¾, 2:10¼, 2:11¼.

Fasig Sweepstakes, three-year-old trot, value $2500 (unfinished):
Kelly de Forest, b g by The de Forest.....(Murphy) 1
Harvest Gale, br f by The Harvester.....(Cox) 2
Worthy Velo, ch c by Axworthy.....(McDonald) 3
Also started—Winema and E. Colorado.
Time—2:10.

Wednesday, July 18.

Cleveland, July 18.—Ridgemark was the big surprise in a day of surprises at the North Randall Grand Circuit meeting today when Trainor piloted the bay son of Wilask to the front and captured the $3000 Ohio stake, the feature of the card. A rank outsider in the betting, Ridgemark paid the best price in the mutuels so far, those backing him to win getting $141.80 and the place price being $39.90.

Only two favorites were rewarded during the day. Felley de Forest in the first division of the unfinished three-year-old trot and Ruth Mainsheet in the Forest City sweepstakes, Tommy Murphy handling the reins in each instance.

Mack Forbes, driven by McDevitt, captured the 2:12 trot in straight heats. Colleen, the favorite in the 2:05 pace, was a poor third, Walter Cochato, an old-timer, winning handily. Edward P. captured the 2:12 pace. The judges were dissatisfied with the driving of Colleen in the 2:05 pace and declared off all wagers on the final heat and the race. Summary:

The Ohio stake, 2:08 trotting value $3000:
Ridgemark, b g by Willask.....(Trainer) 4 4 1 1
M. L. J., b g by Red Will.....(Leonard) 2 1 5 2
Wilkes Brewer, ch m by Nutwood Wilkes.... ..... (Jamison) 1 6 6 3
Also started—Sister Strong, Busy Lassie, Lucille Spier and Colorado Range.
Time—2:08¼, 2:09¼, 2:08¾, 2:10.

The Fasig Sweepstake, three-year-old trotting, value $2500 (first division):
Kelley de Forest, b c by The de Forest (Murphy) 1 2 1
Harvest Gale, br f by The Harvester.....(Cox) 2 1 2
Worthy Volo, ch c by Axworthy....(McDonald) 3 3 3
E. Colorado and Winema also started.
Time—2:10, 2:10¾, 2:13½.

Forest City Sweepstake, two-year-old trot, value $2500
Ruth Mainsheet, b f by Mainsheet.....(Murphy) 1 1
Miss Dewey Watts, b f by Lord Dewey (McDonald) 2 2
Louisa Fletcher, b f by Peter the Great (Thomas 3 4
Ramco B. C., Zapa, Peter C., Will Atbing and Hollyrood also started.
Time—2:17¼, 2:14¾.

2:12 class pacing, purse $1000:
Edward P., b h by The Northern Man....(Ray) 1 1 2
Peter G., b h by The Wolverine.....(Snow) 5 3 1
Battle King, b h by King Bellini..(V. Fleming) 2 2 5
Tramp-a-Bit, Joseph Jay, Direct Bell, Butte Hale, The Christian and Samuel also started.

2:05 class, pace, purse $1200:
Walter Cochato, blk h by Cochato.....(Floyd) 3 1 1
Jones Gentry, b g by Jno. R. Gentry....(Lyman) 1 2 3
Colleen, br m by Charley D. McKinney (Frost) 2 3 2
Kate McKinney and General Todd also started.
Time—2:07½, 2:06¼, 2:09½.

2:12 class, trotting, purse $1000:
Mack Forbes, blk g by Malcolm Forbes (McDevitt)1 1 1
Dr. Long, b g by The Tramp.....(Murphy) 2 3 5
Chilcoot, c h by San Francisco.....(Hay) 3 2 6
Onward Allerton, Bacelli, Tommy Todd, Ira C., Coastess Mobel, Mayor Todd, Jack Mooney, Hollyrood Kate and Lizzie Worthy also started.
Time—2:08¼, 2:09½, 2:09¼.

Thursday, July 19.

Cleveland (O.), July 19—Three favorites won at today's North Randall Grand Circuit meeting.

A new season's trotting mark of 2:05¼ was set by Mabel Trask, who made her first appearance of the year in the first trotting of the Jack Pot stakes. In addition, Adioo Guy, winning the 2:08 pace, covered a mile in 2:03½, establishing himself as the season's fastest pacer. Mabel Trask was given hot competition in the Jack Pot stake by St. Frisco, the latter almost nosing her out in the first heat. Zomrect was a good third and showed surprising form.

Murphy upset the predictions by driving Royal Mac, a second choice, to the front in the Tavern "steak." The summary:

The Tavern stake, 2:14 class trotting, value $3000:
Royal Mac, b g by Royal McKinney..(Murphy) 1 1 2
Early Dreams, b g by Richard Earl (McDonald) 3 2 1
W. J. Leyburn, br h by Crito Leyburn (Trainor) 2 3 3
Also started—Royal Knight, Ormonde Rose, Winnatoma, Cora Davis, Lu Princeton, Colonel Ricer, Allie Ashbrook and Peter Thornbill.
Time—2:08½, 2:07¼, 2:09¼.

Fasig sweepstake, three-year-old trot, value $2500:
Harvest Tide, br f by The Harvester (McDonald) 1 1
Trujolla, b f by Binjolla.....(Trainor) 2 4
Khorassan, b g by Silico.....(White) 4 2
Also started—Belle Kay, Symphony and King de Forest.
Time—2:14¾, 2:11½.

Jack Pot sweepstakes, 2:06 or better, trotting, value $1600:
Mabel Trask, ch m by Peter the Great.....(Cox) 1 1
St. Frisco, b h by San Francisco.....(Geers) 2 2
Zomrect, blk h by Zombro.....(McDonald) 3 3
Time—2:05¼, 2:06¼.

2:08 class pacing, purse $1000:
Adioo Guy, ch h by Guy Dillon.. .....(Gray) 4 1 1
Peter Look, br c by Peter the Great (McMahon) 1 3 3
The Savoy, blg g by Charley Hayt.....(Cox) 2 2 2
Also started—Dr. Burns Jr., Harvey K., Premier Witte, Castaway, Mussel Shell, Peter Greenwade and Freddie Welch.
Time—2:05½, 2:03½, 2:06¾.

2:17 class pacing, purse $1000:
John R. Gentry, b h by John R. Gentry (Thomas) 1 1 1
Minnie Anne, ch m by Post Breeze.....(Floyd) 3 4 2
Ardelle, ro m by Al Stanley.....(Whitehead) 6 2 5
Also started—Don F., Abbe Bond, Baymar, Spy Direct, Butbair, Bingo, Pat H., All McKinney, Olive R. and Marjorie Kay.
Time—2:07¼, 2:03¼, 2:09¼.

ENTRIES FOR DIXON MEETING.

Wednesday, Aug. 1—2:11 Pace, Purse $400.

Ben Corbett Jr., Hono Ansel, and Pope Hartford, Blosser & Finley, Santa Maria; Teddy Bear and Bondelin, C. F. Silva, Sacramento; Bold Harry Aerolite, Geo. J. Giannini, San Francisco; Potress, J. P. McConnell, Santa Rosa; Merry Widow, Cliff Johnson, Raymond; Emmaline Dillon, A. F. Conners, Santa Rosa; A. B. C., and Julia M., Jas. Sutherland, Pleasanton; Prince Zolock, H. A. Gardner, Walla Walla (Wash.); Rico, and White Sox, W. G. Durfee & Co., Los Angeles.

2:20 Trot, Purse $400.

Little Jack, C. F. Silva, Sacramento; Byron, and Manuelito, W. G. Durfee & Co., Los Angeles; Great Policy, Simas & Brolliar, Hanford; Sweet Bow, L. H. Todhunter, Sacramento; Belmar McKinney, R. C. Fitzsimmons, Fresno; Ben Nutwood, S. G. Gowell, San Bernardino; Harry Policy, H. E. Middleton, Oakdale; Howard's Comet, P. J. Howard, Alameda; Future Tramp, V. P. Sexton, Oakland; The Demon, C. A. Stockton, San Jose; Carlos, I. L. Borden, San Francisco; Miss Frisco, Al Schwartz, Pleasanton; Sadie View, Louis Sands, Glendale (Ariz.).

Thursday, Aug. 2—2:20 Pace, Purse $400.

Miss Rico, and Oro Fino, W. G. Durfee & Co., Los Angeles; Sheldon B., I. L. Borden, San Francisco; Edith Light, Frank Goularte, Decoto; Stockton Lady, J. N. Jones, Stockton; Lady Alice T., Ed Lavin, Stockton; Lady Bell D., G. W. Davis, Vacaville; Zomar, Dearborn & Elerick, El Centro; Glenwood Mac, Dan McGovern, Petaluma; Star Dillon, J. I. Frank, Pleasanton; Breezy Marie, A. H. Meigs, Fresno; Billy T., Richard Healy, Santa Rosa; Warren Dillon, H. H. Helman, Salinas; Beretta Dee, Irvine & Scott, San Francisco; Gay Tommy, J. R. Lambert, Phoenix (Ariz.); Hal Logan, J. E. Montgomery, Davis; Harry R., Hemet Stock Farm, Hemet.

2:14 Trot, Purse $400.

San Felipe, and Eloise Dell, C. F. Silva, Sacramento; Ella M. R., Geo. J. Giannini, San Francisco; Virginia Barnette, W. G. Durfee & Co., Los Angeles; Allie Lou, Hemet Stock Farm, Hemet; Zolock Zar, Marsh Thompson, Ventura; Bon Cres, J. J. Campbell, Pasadena; The Proof, Chas. A. Spencer, Santa Rosa.

Friday, Aug. 3—Free-for-All Pace, Purse $500

Ben Corbett Jr., and Mono Ansel, Blosser & Finley, Santa Maria; Teddy Bear, and Bondelin, C. F. Silva, Sacramento; Rico, and White Sox, W. G. Durfee & Co., Los Angeles; Vera Hal, H. Cohen, San Francisco; Mack Fitzsimmons, Ben F. Jaggar, Portland (Ore.).

2:17 Trot, Purse $400.

San Felipe, and Eloise Dell, C. F. Silva, Sacramento; Byron, and Manuelito, W. G. Durfee, Los Angeles; Great Policy, Simas & Brolliar, Hanford; Donello, C. H. Sears, Bakersfield; Pegasus, I. L. Borden, San Francisco; Sadie View, Louis Sands, Glendale (Ariz.); Mamie Alwin, Irvine & Scott, San Francisco; Don de Lopez, Hemet Stock Farm, Hemet; Geo. N. Patterson, Homer Rutherford, Pleasanton.

2:16 Pace, Purse $400.

John Malcolm, C. F. Silva, Sacramento; J. C. Simpson, Frank Goularte, Decoto; Irene D., J. N. Jones, Stockton; Harry R., Hemet Stock Farm, Hemet; Aviator, Marsh Thompson, Ventura; Miss Rooney, Rudolph Spreckels, Aqua Caliente; Vevo Hal, G. W. H. Davis, Tacoma (Wash.); Verna McKinney, Roy D. Mayes, Dixon; Zoetrix, Roy D. Mayes, Dixon; Paul, Paul Johnson, San Juan; Demonio Prince, Will S. Peirano, Lodi.

Roy Mayes, of Dixon, owner of Verna McKinney and one of the most prominent young sportsmen in California, was an interested visitor at Salinas. Mr. Mayes was accompanied by a party of friends and expects to "follow the flag" for the remainder of the season.

✤ ✤ ✤

A mare that looked good to the boys who assembled before the grand stand at Salinas for the morning work-outs was Great Ella, a five-year-old chestnut mare by Peter the Great, bred by Secretary Anderson, of the Salinas meeting, and now owned by John Storms of that place. Henry Helman has her up to the very finest form and expects to take her up and put the finishing touches on her when the circuit closes. After her first 16 days' work she juned a mile in 2:15. Her dam is that good mare, Della Derby, 2:11¼, by Charles Derby.

✤ ✤ ✤

Plans are being perfected whereby California will have two more very attractive horse shows this year. The week following the State Fair, Idora Park, Oakland, under the auspices of the Pacific Coast Saddle Horse Breeders' Association, will stage a very elaborate event. The week following, Fresno will give a horse show in connection with their great fair. The Fresno fair plans to give their show along the lines of the open air shows given by the Missouri county and district fairs, in the evening, before the grand stand. With these two great shows added to the already established and successful Sacramento show, this will undoubtedly serve as an opening for what will bring about a circuit of horse shows next year.

✤ ✤ ✤

Tim Sexton and H. G. Smith, of Oakland, came down to see and start The Future Tramp. The horse is in good shape and will be near the top with a few good races over.

Sutherland & Chadbourne, of Pleasanton, with eight head of the best horses in any one stable, will be found near the top in the final summaries at the end of the season. They have A. B. C., Bon Cres, Zoetrix, Julia M., Verna McKinney, Beretta Dee and Howard's Comet. R. S. Irvine, of San Francisco, owner of several horses in this stable, was an enthusiastic visitor. He perhaps bred more royally bred mares to famous stallions this season than any other private owner in California.

✤ ✤ ✤

One of the most interested parties at the Salinas meeting was G. W. Davis and C. J. Uhl, well known bankers-planters and horse lovers of Vacaville, Cal. Mr. Davis' mare, Lady Bell D., is in the stable of the popular trainer, Wm. Ivey, and while she is green and did not do well at Salinas, she knows she has the goods and with enough work under her belt will deliver. Mr. Davis owns six splendid young horses by Demonio. Mr. Uhl also owns several top-notchers, which he intends turning over to trainers this fall. He is best known as the owner of Salina Boy.

✤ ✤ ✤

While Chas. Durfee and the good Borden horse, Pegasus, were great favorites and made many friends during the week at Salinas, that they had a rival in Jake Brolliar and Great Policy was demonstrated in the trotting race of Friday afternoon. In the second heat Great Policy made an awful attempt to beat Pegasus under the wire, only losing by a head; however, in the third heat he got there with a good margin. The crowd was on tiptoes and both drivers got a rattling good hand. Great Policy finished the race well and when it is taken into consideration that he was only started this year, it must be admitted that he has a splendid future before him. He is a good looking bay gelding by Best Policy, has a splendid way of going and seems to know only one thing, and that is trot. His head, however, is his best asset—no one ever drove one with more manners.

✤ ✤ ✤

BIG DAIRY STOCK DISPLAY FOR STATE FAIR.

Secretary Paine Predicts Strongest Showing on Record Will Be Witnessed This Year.

The dairy cattle division of the State Fair this year will make the strongest showing on record, according to a statement made last week by Secretary Charles W. Paine. Additional show sheds will be erected to accommodate this stock. Many prominent breeders have asked for reservation of stalls, and the animals shown will equal the best seen in the country.

The famous Yakima herd of Aberdeen Angus cattle from Eastern Washington may be seen at the fair this year. Secretary Paine is in communication with the management regarding the proposition. There will be a number of high class county fairs in California this year, and as the dates have been arranged to allow time for shipments, many herds of live stock will be seen throughout the circuit. If the premiums offered for the breed will justify the expense, it is more than likely that the Washington herd of black cattle will be a factor on the California circuit.

Secretary Paine calls attention to the fact that California bred live stock is gaining prestige in the East. For many years the standard of quality remained east of the Rocky Mountains, but the progress made by breeders in this state has been so marked that western bred animals are now sought in the East. The winning of the University Farm and of Bishop Bros. at the International Live Stock Show last winter were positive proof that the California bred animal canhold an even place with the best of the country.

The swine breeders of the state have made such demands for space at the Fair that Secretary Paine has a force of carpenters erecting four new swine sheds. The porker is king in the solution of the meat foodstuffs problem, and the thousand or more pure bred hogs at the fair will be an exhibit worth seing.

The Pacific Coast Hereford Cattle Breeders' Association, which was organized at the University Farm at Davis in May, has aroused much interest among the followers of the "white faces." A number of leading Hereford breeders have commenced to fit their stock for the fair to compete for the premiums offered and the liberal special prizes to be given by the national association. The exhibit of Herefords will be the best seen at the State Fair for years, if not the best ever seen there.

The showing of poultry, pigeons, and pet stock will excel any previous effort in this line. Director E. F. Mitchell and his assistants are advised that the showing of standard poultry will be better in quality and larger in number than last year's fair, notwithstanding the raise in cost of feed, while the fact that the California Pigeon club members have already taken steps for a proper show of their birds, in addition to other fanciers, promises the best pigeon show ever given at a state fair. Judge R. V. Moore, who is an authority on the subject, states that the largest white runts in the world will be on exhibition at this show. Among them are the champions of the variety at the Panama Pacific International Exposition, and others of the same strain that are even better than the exposition winners.

THE FARM

DISCRETION IN REPORTING SALE PRICES.

(The American Breeder.)

During the month of June some very "high flying" was done in pure bred cattle "society." At quite a number of auction sales averages in the neighborhood of $1,000 and on up to $1,500 were recorded. No one breed had a monopoly on these high prices, for the peculiar conditions which brought them about are not limited to any one breed.

Without any doubt a number of extremely valuable animals changed hands in the course of this series of high sales, and the men interested, both as buyers and sellers, included a number of the most estimable and constructive breeders. Nevertheless it is our belief that in the long run the best interests of the pure bred cattle business will be better served if some discretion is shown in the publicity given to the extreme high prices reported. There are thousands of farms upon which more pure bred cattle are needed, and to which the introduction of pure blood should be made this year. If the impression becomes widespread that one cannot go into the better herds and buy average cattle without putting up $1,000 a head, thousands of the men who are in greatest need of such live stock, and who would accomplish the most good with it, will put off indefinitely the making of such purchases, and in a majority of cases perhaps turn their attention to entirely different lines.

The truth is that good, pure bred cattle, as good as are needed on any farm, can be bought at a great deal less than the $1,000 mark. Public sales of such cattle, made by breeders who are as reliable and reputable as any in the United States, have occurred frequently throughout the sale season, and to these sales we have tried to give such publicity as would help our readers to an appreciation of what pure bred cattle are worth without, at the same time, making them feel that the cattle were out of their reach. The ultimate purpose of all improving beef cattle blood should not for a moment be lost sight of, even in these days when speculation promises big profits and the temptation is great to cash in middle class animals at gilt edge figures.

We have no desire to make a general criticism of the public sales which have been reporting the extremely high prices, but so long as any of these prices are open to a suspicion of having resulted through some influence other than a natural and open competition for possession of the animals, no good purpose can be served by making such sales the most prominent feature of the current live stock news.

Encourage Boys to Love Horses.

Boys with an inborn love for and interest in horses take notice of each horse they see, intuitively making comparisons and estimating values. Such boys are fortunate indeed if they have the privilege of associating with men who know horses well, and the opportunity of attending fairs and visiting other places where good individuals may be seen. Careful observation with large numbers has resulted in remarkable ability on the part of some of these youthful enthusiasts and has been of great value in enabling them to make comparisons in the show ring and in estimating values at sales. School work in judging will not take the place of general observation and constant practice, but should supplement it and inspire it in the case of those who may lack interest.

FOR SALE OR TRADE FOR LAND.

25 head of mares and colts, all registered and guaranteed sound; sired by such horses as Baronidale 2:11¼, Zolock 2:07¾, Wonder 2:11¼, Dr. Bunelli 2:16¼, Baron 2:23, Aberdeen D. 2:16¼ and Pilot Hal and Abe Express 2:29½.

Tacoma, Wash.

PIGS AND PATRIOTISM.

(By D. O. Lively.)

If results are to be attained this year, no time can be lost. Except on irrigated ground, there is no chance for additional crops. On irrigated ground there is an opportunity for some of the grain sorghums, particularly Milo maize and Sudan grass.

If I were made the executor of the $15,000 advanced by the grocers would would try within the next twenty days to get in touch with the irrigation districts of the State where there is open ground, where grain hay has been cut, and would urge the speedy preparation of the ground in order that one of the quick-maturing kinds of sorghum might be planted. I would ask the press of California to announce that to every farmer who was willing to plant feed and grow it for them there would be sold without profit as many bred sows as he could accommodate on his farm.

Acording to what I have read, Germany saved herself from an exhaustion of her meat supply by concentrating on the production of swine. Meat and fats were as important as gasoline and powder, and within two years' time the supply of hogs in that country was sufficient to take care of the nation's needs in two leading necessities.

No product of agriculture will turn feed into money so rapidly or so profitably as the growing of swine. This is not a new suggestion or a new practice. A company with which I was connected in Oregon put a plan like this into effect with remarkable success. Carloads of bred sows were brought into the Northwest and distributed to the farmers thrpugh the medium of the bankers, who took the farmer's note and charged him 10 per cent. Inasmuch as the least money the farmer made was 40 per cent, the rate of interest was not out of reason. In some instances the returns showed about 300 per cent, and not only did this fill an immediate need but the result has been a fixed part of the agricultural progress of that section.

California agriculture is woefully deficient in animal husbandry. In the last few years a greater part of all the live hogs killed in California came from the Pacific Northwest. It would not take a great amount of the fund to put out these breed sows. The banks can be induced to pay for them when they are delivered and take the farmer's note. With the money received for the first carload another carload can be purchased and the fund originally invested could be made a revolving one until the annual deficit of from twenty-five to thirty millions of dollars which California now sustains in swine production could be effectually wiped out.

Along with the campaign for the growing of grain feeds for livestock and swine on every possible farm in California, there could be carried a propaganda for saving the heifer calves, for the use of purebred sires in beef and dairy cattle, and for a better conservation of the pastures of the State.

Owensmouth is to have the largest and finest herd of registered Guernsey cattle in the State. News has been received that D. O. Brandt of the Elliott-Brandt Rancho of Owensmouth shipped from Boston last week seventy-five registered Guernsey cattle for his California ranch. The shipment is valued at $50,000. Some of the cows are said to have cost $1,000.

The Buena Alta herd, formerly of Modesto, now of Emeryville, recently received fourteen head of registered Holsteins, which F. A. Heroux purchased at the Stevens Bros. and the National Breeders Worcester sales, June 7 and 8. In the lot are the following A. R. O. cows: Bonanza Pontiac Korndyke, a 29-lb. cow; Lady Ivaloy, a 26-lb. cow; Terracelawn Bests De Kol Pauline, with a record of 22 lbs. in 7 days at 26 months. The other females are young things and will be shown at the fairs. Mr. Heroux also brought some young bulls. One is a son of King of the Pontiacs, another is a grandson of King Segis, and a third is the grandson of Colantha Johanna Lad.

Every country family ought to provide for the winter eggs from the summer crop. This leaves more to sell during the winter without restricting the family the use of eggs for cooking when prices are high. There are several ways of keeping eggs for winter use, but the water-glass method is the easiest and the most popular. Sodium silicate, commonly called water-glass, is the active principle used in preserving eggs by this method.

In many households the butter left on the plates probably would equal one pat, or one-quarter of an ounce daily—scraped off into the garbage pail or washed off in the dish pan. If every one of our 20,000,000 households should waste one-quarter of an ounce of butter daily, on the average, it would mean 312,500 pounds a day—114,062,500 pounds a year. To make this butter would take 265,261,560 gallons of milk—or the product of over half a million cows.—Exchange.

European Demand for Eggs.

The British government has issued orders that for the time being, at least, no grain which can be used as food for human consumption is to be fed to horses, mules, swine, etc., except as rationed by the food commissioners, and they further recommend that no domestic fowls be kept except those which can be fed on table scraps and garden waste.

This means our allies must depend upon the United States and Canada for eggs for their homes, and there are countless thousands of sick and wounded soldiers who positively must have eggs. This is what has sent the price of our exported eggs soaring and will boost the values on poultry products here at home this coming winter.

There is no reason for poultry raisers to feel blue over the present cost of poultry food. Good judgment in feeding; a careful culling out of the drones and slackers among your layers and all those of inferior size and vitality, and an effort to improve the quality of your flock will mean profit for you in the future—such at least is the opinion of one of our most competent judges of this industry.

THE BEST LINIMENT

HIGH-CLASS FILLIES FOR SALE.

BIRDIE BOND, handsome seal brown, five years old, weighs about 1000 lbs. Very stylish, attractive, intelligent, and as fine a horse to drive as anyone could wish. Sired by The Bondsman, dam Lady Search by Searchlight.

LOU MASON, four years old, handsome bay colt with one white hind ankle, weighs about 1175 lbs., and is without doubt one of the finest put-up fillies ever bred in California. Absolutely perfect and would make a prize winning saddle animal. She is by Gerald G., dam Lady Search by Searchlight.

These fillies are at Sacramento. For price and further particulars address C. H. C., Care Breeder and Sportsman.

A GREAT COLT FOR SALE.

Rare breeding and individuality are combined in LOUNISKA BERBELLS, a large, handsome 2-year-old, coal-black, standard bred trotting stallion by Rappallo 2:17¼, trial 2:07, by Greco B., trial 2:12, by McKinney 2:11¼ (sire of Sweet Marie 2:02). Greco B.'s dam is Aileen (dam of 4) by Anteeo 2:16 (sire of the dam of Sonoma Girl 2:04¼) by Electioneer (grandsire of Maj. Delmar 1:59¾ and Azote 2:04¾, each of which was champion trotting gelding of his day); great-grandsire of Uhlan 1:58, present champion trotter and great-grandsire of dam of Lee Axworthy 1:59¼, present champion trotting stallion). Greco B.'s second dam is Lou Milton (dam of Lou Dillon 1:58½, first 2:00 trotter and present champion trotting mare), granddaughter of Happy Medium (sire of Nancy Hanks 2:04, first 2:05 trotter, only 2:05 mare to produce a 2:05 trotter, Admiral Dewey 2:04¾, sire of Lord Dewey 2:03¾). Happy Medium is grandsire of Peter the Great 2:07½, sire of 7 in 2:05 and champion extreme speed sire. Rappallo's dam Oniska is dam of San Francisco 2:07¾, trial 2:04½ (sire of St. Frisco 2:03¾ and Mary Putney (3) 2:04¾) by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½) by Guy Wilkes 2:15½ (sire of dam of Guy Axworthy 2:08¾, sire of Lee Axworthy 1:59¼), full brother to William L. (sire of Axtell (3) 2:12, the only 3-year-old to hold world's trotting championship, sire of Axworthy 2:15¼ (grandsire of Lee Axworthy 1:59¼ and sire of Hamburg Belle 2:01¼). Guy Wilkes is grandsire of Sonoma Girl 2:04¼, Maymack 2:04½ and John A. McKerron 2:04½. Rappallo's 2d dam, Bay Line by Direct Line, by Director 2:17 (sire of Directum 2:05¼, ex-champion trotting stallion and the dam of John A. McKerron 2:04½), son of Dictator (sire of Jay Eye See 2:10, first 2:10 trotter) and Dolly, dam of Onward, great-grandsire of Nervolo Belle (dam of Peter Volo 2:02 and Volga (3) 2:04½). Direct Line is out of Lida W. 2:18 (dam of Nutwood Wilkes) by Nutwood, champion brood mare sire. Rappallo's 3d dam, Puss by Cal. Nutwood (son of Nutwood and Fanny Patchen, granddaughter of George M. Patchen 2:23½, ex-champion trotting stallion); was out of a granddaughter of Williamson's Belmont (grandsire of dam of Directum 2:05¼ and grandsire of grandam of sire of Lee Axworthy 1:59¼. Rappallo's 5th dam was by Gen. Taylor, champion 20-mile trotter. Louniska Berbell's 1st dam, Beautiful Bertha, is by Moormont, grandson of Electioneer and Beautiful Bells, dam of 11 trotters including 4 champions. 2d dam, Abbie McNutward (dam of Greatness (3) 2:10¼ and Derby De Oro, trial (3) 2:19) by Guy McKinney (sire of Vernon McKinney 2:01½), son of McKinney 2:11¼ and Flossie D. by Guy Wilkes 2:15½; 2d dam Blanchward (dam of China Maid 2:05¼) by Onward (grandsire of Spanish Queen 2:04¼); 3d dam by Mambrino Patchen 58; 4th dam Lady Blanche, dam of Jaywood 6557, sire of dam of William 1:58½, champion 4-year-old pacing stallion).

Louniska Berbell's 3d dam, Lady Irene 2:14½, by Diablo 2:09¼, ex-champion 4-year-old pacing stallion, son of Chas. Derby 2:20 (sire of Jim Logan 2:01¾ and Don Derby 2:04½) and Bertha (dam of 2 in 2:05, 5 in 2:10 and 14 in the list, champion speed producing mare. 4th dam, Geraldine 2:16½ (dam of Leata J. 2:03), is by Mount Vernon 2:15¼, son of Nutwood and Daisy (the 4th dam of Maymack 2:04½) by Chieftain 721. Daisy's dam was by Doc 449 (sire of Occident 2:16½, ex-champion trotting gelding) by St. Clair. Geraldine's dam was Edith C. by Gen. McClellan 144 (sire of dam of Mack Mack 2:08 and 2 dams of Bernon McKinney 2:01½, Leata J. 2:03, and Lynwood W. 2:20½ (sire of Sonoma Girl 2:04¼. Geraldine's grandam was by Rifleman (sire of Col. Lewis 2:18¼) by imp. Glencoe.

Analysis shows that most of the blood of the entire 6 2:05 trotters produced in California is embraced in this pedigree. That of the 7 sons of Hambletonian 10 with tail male descendants in the 2:05 trotting list, 6 are here included, and that of the 55 2:05 trotters 52 are descendants in tail male of sires here tabulated. I am sick, however, and he is for sale cheap, as are also his dam and his half-brother, Derbertha Bells 60907. The first man who sees him that wants a good colt and has the money to pay for him will lead him away. Take Melrose Electric at the Mole, get off at Seminary Ave., walk south. Take Elmhurst, San Leandro or Hayward car in Oakland, get off at Seminary Ave., walk north.

J. W. PENDLETON,
1601 Seminary Ave., Oakland, Calif.

FARM and HORSES for SALE

ONE OF THE MOST COMPLETE AND ATTRACTIVE HORSE BREEDING PLANTS IN THE UNITED STATES. Unexcelled as to climate. One of the healthiest places in Southern California. Excellent half mile track. Good pastures and paddocks. Commodious barns and stables. Handsome buildings and fertile soil,—an ideal place where you can train horses the year round. The executors of the Estate of the late W. F. Whittier have decided to place the farm and horses on the market.

A PARTIAL LIST OF THE HORSES:

WILBUR LOU (3) 2:10 ¼

As a yearling, world's champion trotting stallion, record 2:19½—1910;
As a two-year-old, winner of all his engagements, record 2:19½—1911;
As a three-year-old, a famous futurity winner, record 2:10¼—1912;
As a five-year-old, a proven speed sire—one standard yearling—1914;
As a six-year-old, the head of a "futurity family"—four standard two-year-olds—1915;
As a seven-year-old, sire of world's champion yearling—eight in 2:30 or better, including

NATALDAY (2) 2:13½, Champion Two-year-old Trotting Stallion of the Pacific Coast;
ZETA LUCILE 2:12½, Breeder's Record, now three. Champion two-year-old filly Pacific Coast. Entered in all colt stakes on the Coast;
HEMET QUEEN 2:16¼, champion yearling pacing filly;

ALLIE LOU 2:12¼, separately timed at Phoenix last year in 2:07¼ as a 4-year-old;
DON de LOPEZ 2:16¼, now four, started in 15 races last year, won 12 of them. Could trot in 2:10 at Phoenix last fall;
LOUISE de LOPEZ 2:19¼, race record, now three. Started three times last year and never lost a heat. Entered in all colt stakes on the Coast.
EDITH CARTER 2:18¼, champion yearling trotter of 1916. Entered in all colt stakes on the Coast.
SEQUOIA, by WILBUR LOU, dam ERADIATE, now two. Great colt trotter. Entered in all Coast stakes.
HARRY R., green pacer, can pace half mile track in 2:10.

THE HORSES ARE ALL IN NICE SHAPE, WILL BE READY TO RACE.
EVERYTHING AT THE FARM IS TO BE SOLD.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Two Running Races Each Day --- $100 Each Race

Guaranteed Stakes Nos. 2, 3, 5, 6, 8, 9, 11, and 12, $1,000 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat, and $100 to the horse standing best in the summary. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. Usual five per cent. additional from winners in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered. Nominators required to claim time allowance in writing when making entries.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.

Colic, Lung Fever, Sore Throat, Shipping Fever, Curbs, Splints, Spavin, Lameness, Knotted Cords, Cockle Joints, Sprains, Shoe Boils, when first Started, Swellings, Founder and Distemper.

TUTTLE'S ELIXIR CO., 19 BEVERLY ST., BOSTON, MASS.

Mules will do more farm work than horses and do it easier, especially in sultry weather. They require less care, less feed, keep in better condition and are less trouble all around.

To keep a horse looking well he has to be thoroughly groomed. Let a mule have his roll at night after the day's work. He looks for it and it is almost as good as a grooming to him.

A CHANGE.

For more than thirty-five years, with the exception of three weeks following the earthquake and fire in 1906, the Breeder and Sportsman has been published every Saturday. This is the last time it will be issued as a weekly. From now on it will be published on the fifteenth day of each month. The tremendous increase in the amount of matter printed in the daily papers and the space that has been given in them to various departments devoted to special interests,—particularly sports of all kinds,—has lessened the value from the standpoint of "news" in the weekly class publications affected. The Forest & Stream, the oldest and best known publication in America devoted to field sports, was one of the first to realize the situation and to change from a weekly paper to a monthly magazine. The general advertiser finds that a monthly, coming out once a month, is nearly as valuable a medium in securing results as a weekly, with four issues in a month, and reaches the same people. The daily paper is read and thrown away; the weekly is kept longer, but a monthly hangs around and is picked up to beguile leisure moments until the time when the next month's issue comes around. Frequently the numbers are kept and sent to the bindery for more permanent preservation.

The subscription price of the "Breeder and Sportsman" is reduced to $1 a year,—10 cents for single copies. All subscribers will be credited with their advance payments and the date of expiration of the terms of their subscription advanced accordingly.

It is intended to publish a larger and better paper with more illustrations, and to secure for the different departments contributions that will be of the greatest interest. The decline of the business of breeding and racing harness horses in California and consequent curtailment of the revenue from that source for advertising does not at the present time warrant the publication of a weekly paper devoting as much space to the harness horse interests as has been given it in this journal. Harness racing is growing in popularity throughout the east and it is bound to come back here again in time. One of the things that would bring about this greatly to be desired result would be if there were more wealthy breeders who were enthusiasts and not so wholly interested in horses as a money-making enterprise. Restricted and legalized betting within the enclosure would also do much towards making racing popular with the general public. With such betting harness racing would be a profitable instead of a losing game with the associations giving it.

Many of the subscribers to the Breeder and Sportsman have taken this paper for nearly its whole period of existence, and a very large percentage of them have been getting it for more than twenty years. We hope to retain the good will and patronage of all and will do our best to publish a paper that will be deserving of it.

TURF AND FIELD IN MILITARY ACTIVITIES.

WAR AND SPORT! There is a parallel between the two and the effect of war on the sports of the country, and of sports on the war, has been much the same. Wherever one found a leader in sports, turf or field, he now finds a leader in military affairs. It is not merely because history is again recording the fact that the best men in the field of sport make the most daring and efficient fighters, but because the same red blood that makes for efficiency in the games of the turf and field means courage among men in times of national stress and fits women for the second line of defense, and better prepares them to withstand the hardships and suffering brought on by war.

Men now in the Allied armies who are distinguishing themselves, it will be found, in most every instance were leading devotees of the field of which we speak. The parallel referred to above is now brought home to Americans by our followers of out-of-doors sports, who already are leading the way in France. In most every community the first to volunteer were those who have been prominently identified with that which makes one a natural fighter; the love of chance and daring courses through their veins, and as they won in the field, so are they winning in our armies.

At the same time, the women who have led in organization and Red Cross work, like their brothers, have been followers of all out-of-doors. The favorites of the polo field, the race track, the show ring, the links and the hunting grounds, are now the idols of the Army. At the declaration of war the first impulse of many hunt clubs, race associations and trapshooting clubs, was to cancel their events. However, the recommendation of army officers, including Major-General Leonard Wood, that athletic sports be not permitted to lag, particularly such sports as affected the breeding of horses, led to the decision of hunting clubs, racing associations and horse show managements in every section of America, and all similar organizations, to hold their meetings as usual.

The field of sports has supplied their most daring followers to the game of war. In the ranks of officers and privates will be found the daring rider and driver, noted for their deadly accuracy on the field, who have dropped their mallet, spur and fun, to take up arms.

A WAR TIME MEASURE.

The Kentucky State Board of Agriculture is giving the $10,000 saddle horse stake as a war time measure to stimulate the breeding of horses. In the truest sense, this is a war measure and should add the greatest stimulus to the industry ever given. The Kentucky State Board of Agriculture, repsenting one of the greatest horse breeding sections in the country, could not have made a more necessary or advanced step in helping prepare the people of the country for what is sure to follow this war, than what they have done by authorizing and giving this wonderful stake, which already has awakened the public as no other breed proponent has done. It is through the loyal and patriotic duty of the men who gave from $10 to $500 that the board was able to duplicate it and no one has made a more patriotic move.

In discussing this exhibit to the Associated Press, Commissioner of Agriculture Mat. S. Cohen said: "We all know and realize that America is facing the greatest horse famine the world has ever known and that when this cruel, unrelentless and unnecessary war is over, every nation engaged in war, which will virtually cover the entire face of the globe, will necessarily have to come to America for the replenishment of their foundation stock and the purchase of new blood, and, since our breeding operations have decreased to such an alarming extent within the past few years, the State Board of Agriculture believes that it would take something extraordinary, like this stake, to stimulate the breeding interest and help prepare ourselves to be able to supply the demand which is bound to be made upon us after the close of the war."

An Old-Time County Fair with modern program of attractions, a $10,000 premium and purse list and a big horse show is planned for Andrew County at Savannah, Missouri, the week of September 3 to 8, inclusive. This fair comes from a public demand of all classes for a place: Where the wonderful resources of Andrew County may be shown and advertised; to hold races and combine all kinds of modern entertainment; where stockmen can show their best horses, mules, cattle, hogs and sheep; where farmers can exhibit poultry, fruit, grain and vegetables.

The fair grounds will be open at 8 a. m. The morning hours will be taken up by the judging and inspection of stock. Races start at 1 o'clock in the afternoon and continue until 5 p. m. At 8:30 p. m. the horse show starts and it is worth coming miles to see. Free attractions from New York will consist of high jumping and running races each day of the week. The grounds at night will be electrically lighted.

Among the big features of the horse show will be Loula Long Combs, with her fine stable of show horses from the famous Longview Farm, Kansas City.

This is kind of a county fair we want to see started in California. It's the kind that always pays; advertises the county, creates interest in all kinds of improved agricultural development and better livestock, brings all classes of people and holds them. Savannah is a little town and the program of this fair will lay the programs of many state fairs in other sections of the country in the shade. E. A. Trowbridge, of Columbia, Mo., will be the judge. The work og the Dysart Bros., prominent breeds of saddle horses and stockmen, is the direct cause of this great fair. S. F. Dysart is president of the institution. The Dysarts also are the owners of some horses of championship class; their Nodaway Rex, it is said, is one of the best young stallions seen in Missouri in many years.

JUDGE E. A. BRIDGFORD NAMED.

Sacramento, Cal., July 24.—Judge E. A. Bridgford, of San Francisco, was named by the State Board of Agriculture to officiate as judge of the $10,000 saddle horse stake of the Kentucky State Fair at Louisville, Ky., September 10 to 15. This stake was originated by the Breeder and Sportsman.

Under the conditions of the stake, the award, which carries with it the title of world's champion saddle horse, will be made by three judges, selected by the state boards of Agriculture of Kentucky, Missouri and California, the leading saddle horse breeding states.

The event is of both national and international importance and selection of Judge Bridgford to act as California's representative was made only after painstaking consideration of the most eminent and best qualified men in this line in the state.

Saddle horse events likewise will be featured at the California State Fair here, opening September 8. Premiums totaling over $7,700 will be awarded, with a notable advance in the breeding of high grade stock, even since last year's fair, and with the generous premiums hung up, the fair directors confidently expect the horse show will prove to be one of the most attractive features of the fair, completely eclipsing anything of similar nature in the state's history.

"TOO MUCH TAX."

In charging fifty cents at the gate and an additional quarter to sit in the grand stand, the managements of the various fairs are being widely criticised. The public feels that after paying "two-bits" to ride out to the track and fifty cents to get in that they are entitled to the crude seats in the average grand stand, and we agree with them. Where there are boxes, it is well to make an additional charge, or where a stand has a reserved section the public will not kick. Those who want a box seat do not mind paying for it. But the idea of charging an extra quarter to seat the public, who we must remember make the game of racing possible, is a mistaken one and must be changed if the races are to come into popular favor with all classes of people. Chas. Silva, owner of the Woodland track, which is conducting their meeting this week, advised the writer while at Petaluma that he would not charge for the grand stand. His boxes, of course, will be reserved. Other associations should follow this example and advertise the fact.

William A. Prescott of the Black and White Record writes a flattering article on Tillie Alcartra, the famous, California Holstein cow, owned by A. W. Morris & Sons of Woodland, in which he sums up as follows:

1. She is the only cow to average over 30,000 lbs. milk for two years.
2. She is the only cow to average over 29,000 lbs. milk for three years.
3. She is the only cow to average over 27,000 lbs. milk for four years.
4. She is the only cow to average over 24,000 lbs. milk for five years.

As a butter producer:—

1. She is the only cow of the breed to make three 1,000-lb. records.
2. She is the only cow of the breed to make four records averaging over 1,000 lbs.
3. She is the only cow of any breed to make in her first five lactation periods five records averaging 963.82 lbs.
4. She is the only cow of any age to make five year records averaging over 900 lbs. each in less than 6¼ years, from the beginning of the first record to the end of the fifth.

On these eight counts, four for butter and four for milk, does Tilly Alcartra base her claim to greatness, as "the cow that couldn't quit."

♦ ♦ ♦

Entries from the Pacific to the Atlantic are being sent to Secretary Fount T. Kremer, for the Kentucky State Fair's World Championship saddle horse exhibition. The owners of these horses challenge the owners of My Major Dare, Astral King, Jack Barrymore, Maurine Fisher, Marshall Chief, Richelieu King and Cascade to meet them in this event. The owners of these horses certainly will not need any urging or challenging, however, to cause them to show; as just such a stake is what they have been asking for since 1915. It is to be hoped that this event will settle for all time the championship of present-day saddle horses, insofar as their performance is concerned.

Harness Horses and Horsemen

PETALUMA CONCLUDES PROGRAMME OF FAST EVENTS

Friday, July 20.

Petaluma, July 20.—C. J. Berry's famous White Sox, the bay mare which won the $20,000 stake at the Panama-Pacific International Exposition, driven by W. G. Durfee, went the fastest heat of the California sulky season in winning the free-for-all here today.

White Sox was the class in all the heats of the first race, and in the second broke the track record by traversing the mile in 2:04¼. She broke badly at the first turn in the third heat, but Durfee cleverly pulled her back and she won handily, taking the race and the money. White Sox finished the first heat in 2:05. Bondelin was a strong contender.

The first heat of the 2:16 trot brought out the smallest field of the meeting to date. The first heat was a pretty race, with all the horses well bunched and with Don de Lopez the winner. The second heat was won by Miss Frisco, which mare also came back strong in the third heat. Al Schwartz was the driver.

There were two running races again this afternoon and both were exciting. The summary:

First race—Free-for-All pace; purse $500:

White Sox.....(W. G. Durfee)	1	1	1
Bondelin .....(L. Daniels)	2	2	2
Mack Fitzsimmons .....(H. Helman)	3	3	3

Time—2:05, 2:04¼, 2:06¾.

Second race—2:16 trot; purse $500:

Miss Frisco .....(Al Schwartz)	2	1	1
Don de Lopez.....(F. E. Ward)	1	2	3
Future Tramp .....(H. Smith)	3	3	2

Time—2:10½, 2:11, 2:11¼.

Arista Ansel also started.

Third race, running, half mile—Tenderest (J. James, owner) won; Pajaroita II. (T. Gouding, owner) second; Envy (A. L. Valentine, owner) third. Time—0:48½. Tom Wood and Bonnie Tess also ran.

Fourth race, running, five and one-half furlongs—Von Dillon (T. F. Millerick, owner) won; Hands Off (S. Valentine, owner) second; Ida Pinack (J. Woodward, owner) third. Time—1:08 3-5. Alice Teresa and Cruzados also ran.

Saturday, July 21.

Petaluma, July 21.—Esperanza, the trotting mare that has long been a favorite on the California circuit, celebrated her return from the Grand Circuit today by winning the trotting race that closed the Petaluma meet. Billy Durfee experienced little trouble in winning the first two heats, but in the third was beaten by The Proof after a duel through the stretch.

The pacing feature was easily won by C. F. Silva's John Malcolm in straight heats. The Petaluma Derby, a mile running event, was won by Bonnie Tess, with Hands Off second.

Four time performances preceded the regular racing card and all four entries made good. Durfee drove the two-year-old Esmeralda and the three-year-old Eldridge to new marks. Helman sent the three-year-old Warren Dillon a mile in 2:08 on the pace, which was a very creditable performance. Sweet Bow trotted in 2:11¼. The summary:

To beat 2:30½, trotting:
Ermeralda .....(W. G. Durfee) Won
Time—2:26¼, 2:22¼.

To beat 2:30¼, trotting:
Eldridge .....(W. G. Durfee) Won
Time—2:19¾.

To beat 2:25¼, pacing:
Warren Dillon .....(Helman) Won
Time—2:08¼.

To beat 2:16¼, trotting:
Sweet Bow .....(William Ivey) Won
Time—2:11½.

2:14 pace, purse $500:

John Malcolm .....(Daniels)	1	1	1
Potreress ..... (Stewart)	2	3	2
R. W. ..... (Finley)	4	4	3

Time—2:07¾, 2:08½, 2:10¾.

Demonio Prince, W. J. K., King Pointer, Verna McKinney, Bradmont, and Irene D. also started.

2:08 trot, purse $500:

Esperanza .....(W. G. Durfee)	1	1	2
The Proof .....(C. A. Spencer)	2	2	1
Albaloma .....(Walter Tryon)	3	3	3

Zolock Zar also started.

Seventh race, Petaluma Derby, one mile—Bonnie Tess (J. T. Strite, owner) won; Hands Off (Valentine, owner) second; Pajarolta II (T. Goulding, owner), third. Time—1:43. Ida Pinack and Alice Teresa also ran.

ON THE GRAND CIRCUIT.

CLOSING DAY AT CLEVELAND.

Friday, July 20.

Cleveland, July 20.—A great race between Single G. and Hal Boy in the free-for-all pace featured getaway day at the North Randall Grand Circuit meeting today.

Single G. paced the fastest mile of the 1917 season when he traveled the course in 2:02½ and won the race.

The Pointer Queen, heavily backed, romped in a winner easily in the 2:14 pace. Jeanette Speed took the 2:16 trot.

The 2:07 trot was captured by Pittsburg, a rank outsider, after the favorite, Donna Clay, had won the first mile. The summary:

Free-for-all pace, purse $1500:

Single G., b h by Anderson Wilkes.....(Jamison)	1	1	
Hal Boy, b g by Hal B.....(McMahon)	2	3	
Ben Earl, b h by The Earl.....(Childs)	3	3	

Time—2:05¼, 2:02½.

2:14 pacing, purse $1000:

The Pointer Queen, b m by Sidney Pointer.... (McMahon)	1	1	1
Ben Billings, b g by Bingen.....(Jamison)	2	2	3
Sir Anthony Carter, br h by Sir Lightffoot (Geers)	7	4	2

Also started—Belle Wreath, Peggy C., Jay Mack, Wattie, McClucky, Daisy H., Sir O. and Belle McGregor.

Time—2:02¾, 2:04¼, 2:05¼.

2:07 class trotting, purse $1200:

Pittsburgh, ch g by Gen. Athol.....(Murphy)	9	1	1
Donna Clay, b m by Don Cale.....(Valentine)	1	5	7
Grand Chimes, by Kentucky Chimes....(Edman)	2	2	5

Also started—Lou Jennings, Joan, Axtien, Baby Doll, Harrods Creek. Scratched—Director Todd.

Time—2:05¾, 2:07¾, 2:07¼.

2:16 class trotting, purse $1000:

Jeanette Speed, blk m by Peter the Great (Cox)	3	1	2
Dell Jolla, blk m by Binjolla.....(Erskine)	2	2	1
Hollyrood King, ch h by Gen. Watts (Jamison)	1	4	8

Also started—Banker Bingen, Gay Patch, Top Notch, Floradora, Belle Parker. Scratched—Eclair Kurtz.

Time—2:09¼, 2:10¼, 2:10¾, 2:13¾.

DETROIT, MICH.

Monday, July 23.

Detroit, July 23.—For the first time in the history of Grand Circuit racing here a betless meeting was started today. Police Commissioner Couzens positively refused to allow speculation in any form, and sent out policemen to see that the mutuel machines were dismantled and the auctioneers properly gagged. It was understood around the old betting ring, however, that the betting methods of former meetings would be in operation just outside the grounds tomorrow.

The principal event, the Ponchartrain stake, for 2:14 trotters, proved the surprise of the day, going into five heats. Early Dreams won the first two heats comfortably, but was nosed out by Lu Princeton in the third. Cox landed Lu Princeton in front again in the fourth, with less effort. In the fifth, McDonald pushed Early Dreams out in front at the start and held the lead all the way around, though Lu Princeton failed only by inches to take the heat and the race.

The 2:10 pace also went into five heats.

Royal Mac was easily the class of the field in the 2:18 trot and was never in danger. The weather was ideal for racing and a record first-day crowd attended. The summary:

2:14 trot, the Ponchartrain stake, $2,000:

Early Dreams, b h by Richard Earl..... (McDonald)	1	1	2	4	1
Lu Princeton, b h.....(Cox)	8	5	1	1	2
Onward Allerton, b h.....(Edman)	4	6	4	2	3

Also started—Peter Chenault, Cora Davis, Winnatoma, Ira C., W. J. Leyburn.

Time—2:07¼, 2:07¼, 2:11½, 2:10.

2:10 pace, purse $1200:

Fern Hal, blk m by Gold Hal (McPherson)	10	3	1	1	1
Game of Chance .....(Cox)	2	2	3	7	4
Battle King, b h.....(V. Fleming)	9	2	2	2	2

Also started—Tommy Direct, Willow Hal, Budd Hale, Theda Bara, Toneko, Harvey K., Captain Heir-at-Law, Premier Witte, Mary Peter.

Time—2:05½, 2:05¾, 2:06¼, 2:08, 2:09.

2:18 trot, purse $1200:

Royal Mac, b h by Royal McKinney (Murphy)	1	1	1
Anne Cecil, br m.....(Lee)	4	2	4
Peter Schuyler, br h.....(Lyman)	5	5	2

Also started—Richard Hunter, June Red, Shanklin, Louis Winter, Maggie Bond, Balmacaan, Robinwood, Judge Jones, Mawitza, Letanna S.

Time—2:09¼, 2:08½, 2:10.

Tuesday, July 24.

Detroit, July 24.—The 1917 exhibition of the Board of Commerce stake, one of fthe classics of the Grand Circuit, was one of the hardest fought in its history, although the stake record was not equaled in today's contest. Six heats were required before the winner's share of the $5000 was captured by Ben Ali, driven by C. E. Pittman of Trenton, N. J. All three heat winners stepped very fast miles and the first four heats furnished exciting brushes at the finish.

Adioo Guy set the pace throughout the first mile and stepped the final quarter in :29½ seconds, to stall off The Savoy, by a few feet. The Savoy pushed into the lead after passing the half in the second heat and won the heat with quite a bit to spare. The Savoy also led to the home stretch in the third, but Ben Ali shot by him at the end, making the extension of the race to six heats certain, as three horses had each won a heat. Peter G. led almost all the way in the fourth heat, when Ben Ali broke slightly at the start, but The Savoy took the heat by a short distance. Ben Ali led all the way in the last two heats, showing more stamina than the others and jogging home in the last mile.

The 2:12 trot was easy for The Woodman. He came from behind in the first heat and showed the way in all the others.

Prince Rupert showed a lot of stretch speed in the 2:12 pace, in which fifteen entered, winning two heats in the last eight. Haley C. made the pace in the third and in a tight finish won by inches, but Prince Rupert came back and won the deciding heat. The summary:

Board of Commerce stake, 2:06 pace, $5000:

Ben Ali, b h by Wealth-Nellie Ely (Pitman)	9	2	1	6	1	1	
The Savoy, br h by Charley Hayt.....(Cox)	2	1	3	1	4	2	
Adioo Guy, ch h by Guy Dillon.....(Grain)	1	8	6	7	3	0	

Also started—Peter G., Oregon Hal, Hal B. Jr., Thomas Earl, Peter Look, Teaspring, General Todd, Dr. Burns Jr., Loyal W. and Peter Pointer.

Time—2:03½, 2:03¼, 2:03¼, 2:08, 2:06½, 2:08.

2:12 trot, purse $1200:

The Woodman, br h by Empire Expedition.... (Whitehead)	1	1	1
Alcy D., ch m.....(J. Fleming)	4	2	6
Lord Talbot, b h.....(Jamison)	2	4	7

Also started—Doris Watts, Bacelli, Mobel, Castess, Lizzie Worthy, Jack Mooney, Glenwood B.

Time—2:09, 2:09¼, 2:09½.

2:12 pace, purse $1200:

Prince Rupert, b h by Prince Dillard (Lindberg)	1	1	2
Haley C., b m by Northwest....(Crummer)	8	2	1
Baxter Lou, ch h.....(Childs)	6	3	3

Also started—Peggy C., Direct Bill, Eel Direct, Tramp a-bit, John R., Braden, Trampquick, Royal McKinley Brown Gentry, Sunburn Pointer, Baron Wood, Florence Peters.

Time—2:07¼, 2:04¼, 2:05¼, 2:07¼.

Wednesday, July 25.

Detroit, July 25.—Busy's Lassie won the annual renewal of the Merchants and Manufacturers' ten thousand dollar stake for 2:08 Grand Circuit trotters at the State Fair grounds today. The event went through five heats, the first two going to A. Mack. The results:

2:17 pace, purse $1200:

Ben Billings, b h by Bingen.....(Jamison)	10	1	1	1
J. E. C., b g.....(Potter)	3	3	2	2
Ardelle, ro. m.....(Whitehead)	5	5	3	3

Also started—Frank R., Pat H., Baymar, Darkey Todd, Sailor Redlac, Don F., Spy Direct, Abbe Bond, Olive R., Al McKinney.

Time—2:06¼, 2:05¼, 2:07½, 2:07½.

M. and M. stake, 2:08 trot, $10,000:

Busy's Lassie, b m by Peter the Great— Miss Busy, by Clay.....(Cox)	2	9	1	1	1
Al McK., bl h by McClintock....(Murray)	1	1	7	8	4
Ridgemarsh, b g.....(Traynor)	5	2	8	2	3

Also started—Miss Perfection, Spriggan, Lucile Spier, M. L. J., Wilkes Brewer, Royal Knight and Straight Sail.

Time—2:06¼, 2:07¼, 2:07¼, 2:07½, 2:07½.

2:08 pace, purse $1200:

Edward P., b h by The Northern Man..(Ray)	2	1	1	1
Mussel Shell, ch g by Boseman..(V. Fleming)	1	3	4	2
Chanute, b h .....(Lee)	3	2	3	3

Also started—Mary Rosaline-Parr, Cleo B. and Peter Greenwade.

Time—2:06¼, 2:07¼, 2:07¼, 2:07¼.

RECORD RACING AT WOODLAND.

Woodland, July 25.—Opening day in Woodland for the California racing circuit developed one new California record for a half-mile track, also a new pacing champion, Emmaline Dillon, a brown mare sired by Guy Dillon.

Virginia Barnette, from the Durfee stable, did the clock busting. She romped home in the second heat of the 2:14 trot in 2:10½.

A. F. Connor's Emmaline Dillon outclassed a good field in the 2:11 pace. She upset the calculations of the wise ones, who had figured Teddy Bear, Rico or Pope Hartford to win. Fast time featured every heat.

Although the new pacing champion and the Durfee trotting speedster each won its race rather handily, there was plenty of competition for the other positions. Pope Hartford and Rico changed positions like chariot racers in the pace. Teddy Bear hung to Emmaline Dillon's sulky in the first two heats; Silva's pacer then broke trying to force Emmaline in the third.

J. W. Campbell's Bon Cres, the Hemet Stock Farm's bay mare Allie Lou, and Albaloma from La Panza stable were in the trenches in the trot.

Emmaline Dillon's time performance, 2:07¼, 2:08¾ and 2:09¼, is creditable for a half-mile track. Although an Oregon horse with considerable reputation over the Intermountain Circuit, the brown mare had not shown much in her previous California starts. The summary:

First race—2:11 pace; purse $500:

Emmaline Dillon.....(G. D. Stewart)	1	1	6
Pope-Hartford .....(W. Finley)	3	6	1
Teddy Bear .....(L. Daniels)	2	2	3
Rico .....(W. G. Durfee)	4	3	2
Potreress .....(B. Kenny)	6	4	4
Mack Fitzsimmons .....(Helman)	5	5	5

Time—2:07¼, 2:08¾, 2:09¼.

Second race—2:14 trot; purse $400:

Virginia Barnette.....(W. G. Durfee)	1	1	1
Bon Cres .....(F. Chadbourne)	2	2	2
Allie Lou .....(F. Ward)	4	3	3
Albaloma .....(W. D. Tryon)	3	4	4
Zolock Zar .....(W. Thompson)	5	5	5

Time—2:11½, 2:10½, 2:11.

Third race, running, ½-mile—Tenderest (J. James, owner) won; Von Dillon (Millerick, owner) second; Alice Teresa (Mrs. Green, owner) third. Time—0:50. W. A. Saunders and Bert Getty also ran.

PACIFIC BREEDERS WILL GO TO BAKERSFIELD

A quorum of directors of the Pacific Coast Trotting Horse Breeders' Association met on Tuesday of this week and arranged a program for their annual race meeting, which will be held at Bakersfield this year. The purses offered are all $1000 for the different classes, besides the usual futurities for colts. The races will be contested over the mile track which will be put in shape for the harness events. This track has usually been used exclusively by automobiles and is the fastest dirt automobile track in the world; and very little work will be necessary to prepare it for the horses. The advertisement showing classes, conditions and date of closing will be found in another column of this week's issue.

An advertisement purporting to have been issued by the Kern County Fair Association, but which was not authorized by it, was distributed among the horsemen and received quite a large entry list, but inasmuch as it was unauthorized and also that the contract between the Kern County Fair Association and the Breeders' Association was drawn up before this advertisement appeared in print, it is hardly necessary to say that the meeting advertised therein will not take place, and any person desiring to start horses at Bakersfield will have to enter with the P. C. T. H. B. A.

In addition to the harness events there will be two running races each day.

Thoroughbred Matters

OMAR KHAYYAM LEADS THREE-YEAR-OLDS.

New York, July 11.—Omar Khayyam, winner of the 1917 running of the Kentucky Derby, took his place at the head of the three-year-old division in the East, when he defeated in decisive fashion a high-class band of racers of his age in the Brooklyn Derby, the mile and an eighth dash, which was the outstanding feature of the Aqueduct program this afternoon. Back of him at the finish came Rickety, L. S. Thompson's best three-year-old, Ticket and Hourless. The latter ruled a prohibitive public choice and met his first defeat of the season, being trounced soundly and finishing last.

Omar Khayyam raced as if much the best. He went away from the barrier with his accustomed slowness and, as usual, was outpaced in the early running. He closed up some ground while rounding the turn, but it was not until the head of the stretch was reached that he loomed up as a formidable contender. Once straightened away, he slowly wore Rickety, the early pacemaker, down, and, though hampered considerably when that colt swerved out, drew to the front in the final sixteenth to score decisively. It may be that the presence of Rickety in the race played a big part in the downfall of Hourless. The Thompson cold joined the favorite shortly after the start and apparently raced him into defeat in the first half mile. Then Rickety went on with a good lead, but maintained this advantage only until in the final sixteenth. The race was run over a sloppy and cuppy track, and the performance of Hourless raised the question of his ability to run in that sort of going.

Red Cross Day netted $3,107 for that cause, this amount being turned over by the Queens County Jockey Club. The greater portion of this sum was obtained through the liberality of the owners, trainers and jockeys, as the weather on Monday limited the attendance of the general public.

Several racing men have subscribed well to the Red Cross Fund and other funds. John E. Madden is one who did and who didn't have any three-sheet posters printed to announce his charity. Without solicitation some weeks ago he arranged to give 10 per cent of his stable winnings to the first of all charities and that will be a sum which will surely run high, for his is a stable which contains some of the best horses in training and horses which are engaged in some of the year's biggest stakes. For instance, on Saturday, Mr. Madden won a stake of $5,250 with his horse Gold Tassel, which meant that the Red Cross was benefited by that victory by over $500.

Other horsemen are arranging to do the same thing, so that it appears that racing's contribution to the Red Cross will far exceed $100,000 before Labor Day comes around.

MEETING AT GRAND RAPIDS DECLARED OFF.

Grand Rapids, Mich., July 11.—Racing at Comstock Park came to an abrupt termination when a notice was posted shortly after noon: "That for the present there would be no racing." The suspension was due to complaint of S. E. Dodson, who gave information to the Prosecuting Attorney of alleged law violations at the track, and had racing with the mutuel style of betting been in vogue this afternoon, it would have entailed the arrest of seven persons for whom the Sheriff had been given warrants to apprehend. The serving of the warrants was held in abeyance, on agreement that betting at the track would be discontinued. Without the betting feature the racing would have been a total fizzle, and the announcement to call the meeting off followed.

ENGLAND GETS RACING BACK.

London, July 9.—Thoroughbred racing will be resumed on July 17 at Newmarket and other race courses sanctioned by the Government and will continue, with meetings of three days' racing every fortnight ,until the end of November.

Powerful influence of noted members of the Jockey Club has at last persuaded the War Cabinet that racing is essential to the welfare of the thoroughbred industry and the sanction to arrange about forty days of the sport is greatly appreciated by all lovers of the turf.

There will be races corresponding to the New Derby and the New Oaks and two-year-old racing of a very high class.

Trainer Buxton claimed First Ballot out of the third race Friday. This three-year-old daughter of Ballot and Zephyr was entered by E. F. Whitney at $500, so that she cost Buxton about $950, but as she ran up to second place under little C. Kummer's pilotage, beating a lot of starters which were supposed to have a much better chance than she had, Buxton considered her good value for the money.

Dr. McCully, after looking over Mrs. Arlington's black three-year-old gelding, Hwfa, who was thought to have been badly cut down in his race Friday afternoon, found the injury not at all as severe as at first supposed. He expressed the opinion that Hwfa would be ready to go to the races again within a week or ten days.

✤ ✤ ✤

A. K. Macomber has sold to Harry Perkins at Latonia the fast brown gelding, Dick Williams (5) by Dick Finnell—Annie Williams.

✤ ✤ ✤

Dr. Lawson, United States Army veterinarian, who went to Lexington from Virginia last week, made it known that Octagon, one of the thoroughbred stallions presented by August Belmont, Chairman of the Jockey Club, to the United States Government, died week before last at the Front Royal Station. Octagon was 23 years old. He was by Rayon d'Or out of Ortegal by Bend Or. Octagon won the Brooklyn Derby, the Toboggan Handicap twice, and other races. Among the horses he sired was the famous Beldame.

✤ ✤ ✤

Bonnie Witch, Harry Payne Whitney's handsome three-year-old bay filly by Broomstick out of Bonnie Star, is not likely to be seen on the turf again. She has been bred to All Gold. This was a filly of more than ordinary promise in her early two-year-old form, but while she had an almost phenomenal turn of speed she developed into a non-stayer and was retired early this season. She is a filly of wonderfully good formation and coming as she does from Broomstick out of a daughter of Star Shoot it would not be easy to criticise her breeding adversely.

Henry McDaniel, who trains and manages the Kilmer horses, left this week for Mr. Kilmer's up-state farm at Binghamton for the purpose of looking over the stock, but his stay at the farm will be a short one.

TALK OF RACE MEETING FOR BUFFALO.

Buffalo, N. Y., July 18.—Inspired by the success of the Niagara Racing Association's recent meeting at Fort Erie, there is some talk of holding a race meeting in Buffalo or in one of the suburbs of this city next month. Buffalo loves racing, and there are a few local business men who would attempt to conduct racing in connection with one of the conventions or county fairs next month.

There has been talk of a meeting at Columbia Park, which is situated just at the outskirts of Buffalo, but this seems to have been abandoned, temporarily at least, and it is said that Grant Hugh Browne, who built the Devonshire track at Windsor, has a plan to build a course near Depew, about seven miles from this city, and hold a meeting. Mr. Browne was in Buffalo recently looking the ground over, but since that time nothing has been heard from him.

Another set of promoters, these from Buffalo, are trying to capitalize and run a meeting on another track already in existence only a few miles from Buffalo.

If any of the propositions materialize, the oral system of betting will be employed. This is the system in vogue on the New York tracks. It is said to be legal and has been successful.

It may be a long time before another meeting for the thoroughbreds is held at Fort Erie or any of the other Canadian tracks. The recent order-in-council, made by the Canadian Parliament, prohibits betting on races during the war and for six months following the close of it. Just how long the war will last is a question, but it seems unlikely, in view of the extra six months tacked on to the order-in-council, that there will be a meeting in Canada next year.

There has been some talk to the effect that the Canadian Parliament might modify the order and permit the tracks to hold one meeting each year, but nothing of an official or even semi-official nature has been given out. Canada needs the revenue from the race tracks, so it would not be surprising if a new law regulating racing and betting is passed next winter. It may take the form of cutting down the track association's profits and diverting more money to the government.

The Austrian Derby of 100,000 kronen which was run on Sunday, June 10th, ended in the victory of Mr. V. von Mautner's San Gennaro, which comfortably beat Baron Harkanyi's Fieldmarshal, while St. Emilius and Konstantinopel dead-heated for third place. The winner, which was trained by Frank Butters, and started at evens, is a son of Gomba from Celestine, a mare by Cyllene out of the American-bred Meta II., which was sold to a foreign buyer for 500 guineas at the December sales in 1908. Fieldmarschall and St. Emilius are both sons of the St. Leger winner Wool Winder.—[London Horse and Hound.

Meta II. is by Sensation (son of Leamington and Susan Beane, by Lexington), out of Magnetic, by The Ill-Used; 2d dam Magnetism, by Kingfisher (a son of Lexington).

✤ ✤ ✤

Covington, Ky., July 18.—Without a word of warning of approaching death Charles Bollinger, the noted bookmaker, racetrack owner and prince of good fellows, was attacked with heart disease at his home, No. 13 East Fourth street, early this morning, and died within an hour. He was fifty-two years of age and a native of Louisville. For over thirty years Mr. Bollinger was a leading figure on the Western tracks. He leaves a widow, two brothers and a sister. The funeral will be held in Louisville Friday morning from the home of Mrs. David McInteer, 1425 West Jefferson street.

STAKES ANNOUNCED FOR TIJUANA MEETING.

President James W. Coffroth on Monday of this week announced the stakes for the Tijuana meeting which opens Thanksgiving day and runs one hundred or more days. Several new events are added, including the Wingfield cup for two-year-olds. The Coffroth handicap has also been raised to $6,025. The list follows:

Coffroth handicap, one mile and a quarter, $6,025; San Diego Business Men's handicap, one mile and an eighth, $3000; Spreckels handicap, one mile, $2500; Dupee plate, one mile and a sixteenth, $1500; Baja California handicap, one mile and seventy yards, $1500; Clubhouse course, seven and one-half furlongs, $1500; Los Angeles High Weight handicap, six furlongs, $1500; Coronado selling stakes, one mile and a sixteenth, $1500; Tijuana selling stakes, six furlongs, $1500; Wingfield cup, six furlongs, two-year-olds, $1500.

Cheyenne, July 23.—Much interest was manifest here today over the prospects of a running race meet at Frontier Park, Cheyenne's mile track, folliwing an announcement in Denver by John O. Talbott, widely known sporting man, that arrangements are practically complete for conducting a meet here from August 18 to September 8. Talbott also said that the proposed meeting at Colorado Springs has been abandoned. The racing here will be under the auspices of the Cheyenne Thoroughbred Breeders' Association. W. W. Finn, well known promoter, will have charge of the track. It is planned to install pari-mutuel betting machines and work on the construction of 250 additional stalls has already begun.

✤ ✤ ✤

George Ryan, superintendent of R. J. MacKenzie's Pleasanton Stock Farm, has sold to A. G. Blakeley the two-year-old gelding Alf Vezina. This youngster is by Rey Hindoo out of Dolly and a full brother to Kalitan, winner of the Preakness Stake and owned by E. R. Bradley.

STATISTICS OF LATONIA RACING.

The highly successful summer meeting of the Latonia Jockey Club, which began June 11 and came to an end July 4, embraced twenty-one racing days, during which time one hundred and forty-seven races were decided and $156,360 distributed in stakes and purses. The daily average distribution amounted to $7,445. Nine valuable stake races were run during the meeting, not one of which was less than $2,000 in net value, the Latonia Derby topping the list with a net value of $9,550 to the winner. A. K. Macomber was the chief money-winning owner by virtue of Liberty Loan's victory in the Latonia Derby. Other owners who fared well were G. J. Long with $8,064 to his credit and T. C. McDowell with $7,335.

Buffalo, N. Y., July 11.—Skeptic, running in the colors of H. H. Hewitt and trained by John I. Smith, won the Canadian Derby, at Ft. Erie this afternoon, beating Bondage by six lengths, which in turn finished a neck in front of the odds-on favorite, Liberty Loan. There were six starters, and the race was run over a deep and heavy track. Skeptic, ridden by Crump, raced along with the rear division rounding the turn out of the backstretch, where he was taken to the outside and moved up with a rush. In the stretch run he raced into easy lead, and at the end won going away by six lengths. Bondage came fast through the home stretch, and in a driving finish managed to beat Liberty Loan a neck for second money. The 125 pounds proved a heavy impost for Liberty Loan over the deep track, and at no time during the running was he prominent. Fruit Cake shot her bolt after they had gone six furlongs, and when she weakened Estep used good judgment in not punishing her. It was the twentieth running of the stake, and the winner's portion was $4,120.

FIRST FLIER WINS THE IRISH DERBY.

Before an enormous assemblage, the Irish Derby was run at the Curragh course June 27. In the absence of racing in England, owners there took considerable interest in the big Irish race and several sent representatives across the channel to take part in the event. One of these, Sir W. J. Tatem's bay colt Argosy, by Bachelor's Double—Fragrant, was the post favorite at 2 to 1, but the best he could do was to finish second. Ten started and at the finish of a good race, the Irish owner J. J. Parkinson had the pleasure of seeing his bay colt First Flier, by Henry the First—Grey Flier, come home first by five lengths, with Argosy second and Mortimer Singer's bay colt Dresden, by Santoi—Betsy Jane, third. The mile and a half of the race was covered in 2:39 and the net value to the winner was $13,125. The winner was at 6 to 1 in the betting. The English colt Kingston Black, second choice at 2½ to 1, was left at the post.

First Flier is truly a bargain horse. He was bred by Mr. J. Musker in England and was bought by his present owner as a yearling at auction for the modest sum of 35 guineas, or $182.

Louisville will have two bone-dry race meets this fall if the Government enforces the requirements it has made in other cities of closing all saloons within a two-mile radius of the cantonment at Audubon Park.

SADDLE and SHOW HORSES

"You can bet your bottom dollar that we are going to have a horse show this year," writes Ernest G. Bylander, secretary of the Missouri State Fair. The Missouri State Fair horse show is one of the really important shows of America and annually draws more great stables and more visitors from distant states than any other show given in connection with a state fair. E. A. Trowbridge is to be superintendent again this year.

✤ ✤ ✤

R. E. Thomas, of Chicago, whose pilgrimages to Missouri this year have resulted in the purchase of some of the best horses ever bought by one man, last week purchased from Jas. Buford, Paris, Mo., an attractive ladies' mare. Buford also received from J. Frank Wray, the well known Boone, Iowa, hotel man and horse lover, a six-year-old saddle mare, for education. Mr. Wray bought this mare from the Iowa Agricultural College. She is by Allison King and out of Maggie McDonald. Buford says he never had a better pupil.

✤ ✤ ✤

Reports come from the San Vicente Rancho, the property of Mrs. Frederick McCormick and managed by H. C. Rollins, that the aged horses are in fine condition and that this year's showing of youngsters will equal any exhibit ever made any place by one farm. Their great young stallion, San Vicente, is said to be the most sensational horse ever seen in California . This horse was a winner last year, but those who have seen him recently declare he is improving more than any horse they have ever known. The stallions, Don Castano, Highland Monarch, and the other members of this very magnificently bred stable are getting lots of work and Mr. Rollins will, as usual, be "up yonder" in every class in which he shows.

✤ ✤ ✤

In his advertisement this week, Judge E. A. Bridgford, of San Francisco, offers for sale two young stallions by Le Grand McDonald. They are full brothers, being out of that great old show mare and producer, Black Belle, a descendant of old Montrose 106. This mare has the most remarkable show record of any individual in California and is proving equally as good in the matron ranks. The yearling foal won his class last year, and the weanling, in Judge Bridgford's opinion, is the better prospect of the two. Judge Bridgford wants these colts placed in different parts of the country, in that the blood of his great young stallion, LeGrand McDonald, will be well distributed and thusly advertised. Anyone desiring to own a future champion should arrange to see these splendid colts. "My placing them on the market is purely missionary," Judge Bridgford said last week. He wants them to go to some one who will give them a chance and become interested in saddle horses.

✤ ✤ ✤

An Event of National and International Interest.

Horses from California, Vermont, Missouri, Arkansas, Illinois, Indiana, Ohio, Virginia, West Virginia, Kentucky, Tennessee, Georgia, Alabama, Texas, New Mexico, New York, Massachusetts, Pennsylvania, and Iowa, and perhaps other States will contest at the Kentucky State Fair, Sept. 10 to 15, 1917, in the ten thousand dollar exhibit for best saddle stallion, mare or gelding, any age. Beginning Monday night, the stallions will show for $2500, divided $1000 to first, 625 to second, $375 to third, and $250 to fourth for the Championship of America. Besides, to the winner will be given a sterling silver cup valued at $250, known and inscribed as "Championship of America for Saddle Stallions." On Tuesday night, the same amount, same division and cup will be given for the Mares Any Age; while on Wednesday night, the same amount, same division and cup will be given for the Gelding Any Age; and on Saturday night, September 15, the four money winners in each sex class will compete for the Grand Championship of America for Five Gaited Saddle Horses, and for which $2500 is set aside, divided same as in sex classes, and a sterling silver trophy will be given to the winner known and inscribed as "Grand Championship of America for Five Gaited Saddle Horses."

Since this stake was gotten up by public subscription, there will be no entrance fee charged, and nothing deducted from money winners; and it is safe to predict that the greatest exhibition in the history of the world for five gaited saddle horses will be pulled off at the coming Kentucky State Fair. You cannot afford to miss this world's event. Not only will horses but people from nearly every state in the Union, if not from every state, will be on hand to contest and witness this world's event. Make your arrangements to attend.

✤ ✤ ✤

In a letter to the Breeder and Sportsman, Tom Jefferson, the capable manager of the saddle horse department of the Sierra Vista Farm, Chino, Cal., says: "I have been jogging Rex McDonald's good daughter, Helen Idlewood, until very recently, and this morning Mr. English came out, so I mounted the lady, just set down in her middle for a few minutes. She simply ate it up. She is much better than she has ever been for me, and whether I get to show her at the California State Fair or at the Kentucky State Fair, in the $10,000 stake, she will be troublesome for all comers. I also worked Tarma Denmark and she is fine. She acts more like a sure-enough show horse every time I get on her. This mare has filled out wonderfully since you saw her and is making a very handsome mare. I also rode the three-year-old gray colt, Tourist Peavine, and say—he can rack and trot for fair, has a good slow gait, and I guess by the eighth of September he will be able to canter. The remainder of my stable are 'doing their bit.' Have up ten head and am pleased with every one. Mr. English is arranging to take up some of his hunters, too, so it will begin to look like business around here very shortly."

✤ ✤ ✤

The breeders and owners of show horses in California are much alive to the possibility of having three good shows in this state this autumn instead of just one. Through the efforts of the Pacific Coast Saddle Horse Breeders' Association a show at Idora Park, Oakland, is proposed and the next week a show will be given in connection with the Fresno District Fair, one of the biggest fairs of the Pacific West. This will give exhibitors three weeks of showing, and perhaps, will awaken the fair officials of other towns to the possibilities of a decently arranged program, and eventually bring about a dozen shows here. It certainly takes enthusiasm, money and "pep" to breed horses and prepare them for the shows in California, which usually consist of the show at the State Fair, and with the number of interested people in the game under these conditions it seems that the possibilities are great, if more shows are assured. C. G. Eberhart, of the Fresno Fair, one of the livest secretaries in the country, plans to give about six classes each evening, offering about $50 for each class. This, of course, is an introductory offer, and if the horsemen rally to the game it will mean a much better card next year.

———o———

Perhaps no other individual, in the same position, gives quite so much of his valuable time to the show horse game as D. Schilling, of Chicago and Colorado. Mr. Schilling is one of the real big business men of the country and also one of America's most successful ranchers. On his J. O. D. Ranch at Aroya, Colo., which is conducted under his personal supervision, he feeds annually 3,000 hogs and a similar number of cattle. Of course, he uses only the best of breeding in his herds and uses Durocs and Herefords respectively. In the show horse game Mr. Schilling has distinguished himself as being the most versatile horseman of his age in America. He, perhaps, can show horses in more different ways and to better advantage than any other individual; and his judgment of a horse is best attested by the success he has in picking green ones and making champions out of them. Every season he comes out with a few very high class horses and wins with them, afterward selling them at big prices. He is one horse-lover in the game for the sportsmanship of it that makes money from his horses at the same time. In the Blades & Holeman stable, several years ago, Schilling had Vernon Castle and Joan Sawyer, the latter now the premier mare in the Longview stable, and when, at the Missouri State Fair, his horse won a class of some importance, Schilling told the judge, in the presence of a number of horsemen, this very unusual thing: "Judge, I thank you for the ribbon, but if that dog won it, I don't know a show horse. I certainly don't want you to buy any horses for me if my horse, in your opinion, won this class."

Mr. Schilling says what he thinks, no matter who the shoe fits, and while he perhaps would be more popular if he did not criticise quite so much, it is admitted by all that if there were more folks in the game, who know it, who would come out and tell the hard truth about a horse whenever their opinion was asked, there would be less dissatisfaction in the show rings of today. It has become, down in Missouri, the advice to all owners: "If you don't want to know the truth about your horse, don't ask Schilling."

Mr. Schilling can show a five-gaited horse as few professionals do; on a three-gaited animal he really is in his right place; on a hunter or jumper, he is in all his glory, and behind a high stepper, a pair, a roadster or a four-in-hand, he puts the average professional to shame, while he modestly admits that he got his "start" driving the trotters and pacers. Mr. Schilling is a big man, a booster for the show horse fraternity ,and has done as much as any other man to keep the interest at its present high pitch.

RUFUS JACKSON

When the fame of the Missouri saddle horse breeders became National and the breeders and exhibitors became prosperous, those who were in a position to know, conceded the prosperity and achievements to the efforts of Rufus Jackson. He, more than any other individual, brought the Missourians to an understanding, created a type, created horse shows and county fairs, and kept the game at its highest pitch. He founded the Missouri Saddle Horse Breeders and Exhibitors' Association, the Missouri Stockman, the Missouri Special Sales Co., and many other enterprises which have been prominent in bringing the Missouri saddle horse into the spot-light. With no expectation of financial return or benefit, Jackson has given freely of his valuable time, money and labor, in bringing results and glory out of dissatisfaction and chaos; he put the saddle horse in its highest state of development and made famous, back-woods horsemen, the majority of whom have repaid him with criticism and slander.

As in any other cause for which one receives no pay and expects no recompense, Jackson was repaid for his untiring efforts with ingratitude. However, the really big men of Missouri and of this country appreciate what he did, and now that he has retired from activities in the game, those who are most responsible for his retirement are coming to an understanding of what his work meant to them. Mr. Jackson is president of The Intelligencer Publishing Company, which publishes the daily and weekly Intelligencer, the best country newspaper in Missouri; is Postmaster of Mexico, Secretary of the Chamber of Commerce, president of the Savings and Loan Association, and as his esteemed friend, the Hon. Champ. Clark, put it recently, "One of the best men God ever created."

———o———

CONGRATULATIONS.

It is doubtful if any American bride has received more sincere congratulations and well-wishes than has Mrs. Pryor Combs, who, until her marriage to the popular Missourian recently, was Miss Loula Long, America's best known sportswoman. Readers of this column are familiar with the names of the heavy harness horses in Miss Long's stable, all of them ending with an "ation"; her great Revelation, Realization, Hesitation and scores of others bearing these names, having made their owner the most successful exhibitor of show horses living. Naturally, when the news came of her marriage, friends in every section of the country started wiring their congratulations, but we are sure, the following message sent her by D. Schilling, was one of the most appreciated as well as extraordinary messages she received. This is published by special permission to the editor of the Breeder and Sportsman. He wired:

"I hear, and that's a Revelation,
That after so much Hesitation
And with the least bit of a Flirtation
You've formed this glorious Combs-bination.
The most sincere Congratulations
From D. Schilling, friend of all the Ations."

———o———

Jump Cauthorn, of the Breeder and Sportsman, last week received an order from a wealthy business man of the West, who has become interested in show horses through the approaching $10,000 stake for saddle horses at the Kentucky State Fair, for a mare that has a chance to win that division of the big stake. "I will give $5,000 for my first saddle horse, but she must be the real thing. Any breed that will offer $10,000 for a show and not charge half of it for entrance fees and deduct nothing from the winners, is the game for me," he told me when he placed this order. The writer probably will go to Missouri and Kentucky within the next few weeks to look over several he has in mind.

———o———

The Secretary of Agriculture has secured the services, for a temporary period, of Prof. William F. Gephart of Washington University, and Prof. Chas. S. Potts of the University of Texas. They will assist the Bureau of Markets in attacking problems affecting the handling and distribution of agricultural food supplies.

Notes and News

Charles Guiou is training the good prospect, Starost 2:14½, chestnut stallion by The King Red, at North Yakima, Wash.

✤ ✤ ✤

H. L. Miller, superintendent of Brook Nook Ranch, Home Park, Montana, has a number of specially fine young horses in training on the big 3,000 acre farm. Mr. Miller is getting them ready for the approaching Montana State Fair.

✤ ✤ ✤

Friends of that popular San Francisco banker-sportsman, George J. Giannini, regretted very much when his good trotter, Ella M. R., daughter of Lord Alwin, was forced to withdraw at Petaluma last week. It was especially unfortunate in that the mare had shown her best form at this meeting and her popular owner was just about to reap a harvest of well deserved fun, only for which he races. The lameness does not belong to the mare and the trainer believes she "picked up" something after the first heat Thursday, and that she will round-to and be able to continue down the line and finish, as her friends believe she will, near the top of the summaries.

✤ ✤ ✤

GOOD RACING FOR HANFORD MEETING.

The Kings County Fair Association having joined the California Fair and Racing Circuit, greatly improved racing is being anticipated during fair week. There will be four days' racing—Sept. 19 to 22 inclusive—$3200 being the amount in purses. The following will be the program, according to present arrangements:

Sept. 19—2:25 pace, purse $400; 2:14 trot, purse $400. Sept. 20—2:15 pace, purse $400; 2:20 trot, purse $400. Sept. 21—A pace and a trot. Sept. 22—2:20 pace, purse $400; 2:11 trot, purse $400.

There will be running races each day, though the program has not been definitely settled yet.

Respectfully yours,

B. F. LAVIN.

SULKY MATINEE AT STADIUM ON SUNDAY.

After a layoff of several weeks, the sulky horses will return to the track at the Park Stadium on Sunday to provide amusement to the crowd. Three races are carded, with King Pointer, Bradmont, Emma M. and W. J. K. in the feature free-for-all pace. The entries are as follows:

First race, 2:25 pace—J. Ryan's Lilly R., R. Kehoe's Hello Girl, Joe McTigue's Darby Mac, L. A. Gielow's Petrina.

Second race, 2:15 mixed—J. M. Kidd's Pointer Belle, J. M. Kidd's Lymour, J. McNamara's Bodney Patchen, D. Keating's Victor Pointer, Ottinger & Welsh's Vallejo King.

Third race, free-for-all pace—H. Campodonico's King Pointer, R. P. Robert's Bradmont, William Malough's Emma M. and W. J. Kenney's W. J. K.

STATE FAIR RACING TO BE THE BEST EVER.

Sacramento, Cal., July 25.—"Pop" Durfee, veteran horseman who reconsidered his determination to retire this season in order to handle the ribbons on I. L. Borden's string over the California Fair and Racing Circuit, is authority for the statement that the meet at Sacramento, September 8 to 15—Fair Week—is sure to be the most successful in the state's history of the sulky game and that new speed records are virtually a certainty.

The sport has been under way nearly three weeks, with meets at Salinas, Petaluma and Woodland, during which several noteworthy heats have been stepped. Meets at Dixon, Ukiah and Ferndale, preceding the one here Fair Week, will afford further opportunity for the sulky stars to round to form.

A record number of entries is listed for the Sacramento meet and not since the Panama-Pacific Exposition has there been shown so much class. Such winners as White Sox, Virginia Barnette, and Teddy Bear—all of Exposition fame — Esperanza, Prince Zolock, Vera Hal, Leata J. and Rastus are only a few of the horses entered who have reputations to uphold.

Half a dozen or more of the biggest stables in the West were unable to participate last year, their strings being on the Grand Circuit in the East during Fair time, but this year all will be represented in the chief stakes here.

An unusually large number of green horses are also doing the circuit this year and several among them are likely candidates for honors.

Contrary to early report, the runners will also have their innings at the Fair meet. At least three running races will be programmed each day and during the meet two or more $500 handicaps will be hung up.

✤ ✤ ✤

Kelly De Forest and Clicola now divide the honors for the season's record for three-year-old trotters over the half-mile track, each having the same credit, 2:15¼.

FREE FOR ALL REVIVED AT HARTFORD.

By offering a $2500 free-for-all trot for its Grand Circuit meeting at Hartford, the Connecticut Fair Association which own owns Charter Oak Park has revived memories of the days when the famous old course made its debut in 1874. At that time Goldsmith Maid, American Girl, and the white-footed gelding Judge Fullerton were in their prime.

In those days Goldsmith Maid regularly made a trip down the line, meeting all comers, and few were fortunate enough to lower the colors of the flying daughter of Alexander's Abdallah. For eleven years this little wiry bay mare was the idol of the light harness racing world, and during that time she took the word on nearly all of the leading tracks in the United States, her last appearance being at Toledo, Ohio, Sept. 27, 1877, when she made a performance against time.

Three of her most memorable performances were made at Hartford. In 1874, at the Charter Oak Park inaugural, she met and defeated American Girl, Judge Fullerton, and Lula. The following year she came back and placed the track record at 2:14½. This was within half a second of the world's record which then stood to her credit.

Goldsmith Maid trotted her greatest race, however, at Hartford in 1876, during the first Grand Circuit meeting held at Charter Oak Park. That year she met Smuggler, who had defeated her at Cleveland after she won two heats, one of them being trotted in 2:15½, Bodine, and her old rival Judge Fullerton. The "Maid" was at that time nineteen years old, but age had not dulled her speed nor impaired her ability to fight out a split heat race. Smuggler was fortunate enough to win the first heat in this event in 2:15¼, a new mark for him and also the champion stallion record of the world, which remained unbeaten until 1884 when Phallas reduced it to 2:13¾ in Chicago. The second heat was trotted in 2:17 and was also placed to the credit of Smuggler. At the conclusion of the third heat, which was trotted in 2:16¾, the judges were unable to separate the pair and the time went on record as the fastest dead heat trotted up to that date. The next three heats were won by Goldsmith Maid in 2:17¼, 2:18 and 2:19¾, which made a new record for a six heat race. From that date this record was gradually reduced until finally it was placed to the credit of Charter Oak Park last September when St. Frisco defeated Mabel Trask in 2:07¾, 2:07¼, 2:07½, 2:06¾, 2:06½, 2:07¾, the first and third heats being won by the mare while the second was a dead heat and the fastest on record.

It is expected that the contest between this famous pair will be renewed in the free-for-all with Zomrect, Mary Putney, and two or three others to keep them company.

The Charter Oak purse this year is also for $2500, and like the free-for-all, is a late closing event. It is for the 2:12 trotters and is sure to prove a great contest as the "bear cats" that have of late years been making a mighty sweep in the early closing events in the Grand Circuit will, if they take the word at Hartford, be required to start in the fast classes where they belong and leave the contest for horses that are eligible by performance, which is the only way to insure a good race under a time handicap. That the Connecticut Fair Association has faith in it, is evidenced by the fact that it is offering $18,400 for its thirteen late closing events, six of which will be contested over the half-mile track and seven over the mile track.

WITH C. A. HARRISON.

Centralia, Wash., July 23, 1917.

The writer arrived at Centralia today in behalf of the Vancouver Exposition Association of Vancouver, B. C. The Vancouver Association has reopened their several closing events and changed the 2:15 to a 2:14 trot, purse $700. The program now reads:

2:15 pace, purse $1,000; 2:20 trot, purse $500; 2:25 trot, purse $1,000; 2:55 pace, purse $500; Free-for-All pace, purse $800.

In addition to above events there are several races for local horses. The above regular purse races close on August first and are open to all horses eligible, and it is hoped that horsemen who have horses ready to race will be liberal in their entries, on or before August 1, as the Association is going through the fire of war and self-deniel in order to give a good meeting this year.

At Centralia I met John Springer, former owner of Sonoma Girl 2:04¼. Mr. Springer is accompanied by William Tailor, the Boise, Idaho, trainer. Mr. Tailor is working Mr. Springer's war horse trotter, Mountain Boy 2:12¼; the bay gelding looks well, has his speed, and while he has been going sound all season he is at present laid up by a slight ailment in one of his hind ankles.

C. A. Cook of Tacoma is here with Duke, p. 2:25; this is a big handsome bay gelding owned by J. P. Meyers of Tacoma.

Roland Wilson is here with Cudahie & McCormack's black mare, Floradora Z. 2:11¼. This mare is eligible to 2:14 trots on half mile tracks. She looks good. Rol Wilson will race her.

H. Cox is here with Lady Hal 2:05¼, by Hal B. This beautiful mare went a mile last week in 2:17. She looks good. Mr. Cox has the black mare trotter Hazel Patchen 2:15, by The Patchen Boy 2:10¼. This mare was a mile in 2:17 last week and she is about as nice-going a trotter as any man owns.. Mr. Cox met with a bad accident yesterday by being pushed off the fence by a broncho connected with a Wild West outfit. Being 76 years of age, he sustained an injury and is in the local hospital, and is in a bad way.

Geo. Swisher and Mr. Tailor are looking after Mr. Cox's horses during his illness, which we all hope will be of short duration, for Mr. Cox is a well-liked man by everybody.

Mr. Stetson has been a mile in 2:23 with May Day Hal, sister to Hal Boy, and about the same notch with Duke, the good-looking bay destroyer by Hal B., owned by J. J. Kadderly of Portland.

Dolly McKinney has been a mile in 2:30 for Mr. Stetson. This big trotter has oodles of speed, but having been idle for two years, she made some only some slow miles under the careful preparation which she is getting.

Geo. Swisher has been in 2:19 on the trot with Cavalier Gale, roan son of Barongale; dam Nella J. by Jay Hawker.

Mr. Swisher also has the bay mare Hallie B. 2:16¼, by Hal B.; dam Zircon by Vice Regent. The mare has been several miles below 2:12 on the trot and don't know how to pace a step. I think she is the only trotter by Hal B. She is a nice mare and a good trotter.

H. A. Garrison, of Olympia, has Frederick Hal, two-year-old colt by Hal B., dam by Montana Director (dam of Capt. Mack 2:10¼, the war horse that Fred Woodcock owns. Mr. Garrison also has a most remarkable pacer in the very beautiful chestnut stallion Tamarack the Red 2:24, by Hambletonian Mambrino. This stallion has been raced nearly every year, been used as a business horse, and is 18 years of age, sound and game and a fast pacer.

Frank White is a classy-looking bay gelding by St. Whips, son of Whips. This is a good, game, sound young trotter and will be heard from later.

Dr. E. C. Truesdell has been a mile in 2:17 with Indian Hal, brown stallion, brother to Hal Boy 2:01¼. This is a beautiful and fast stallion.

Hemlock, by Hal B., has been a mile in 2:25 on the pace. This Hal B. horse is free-legged, fast and good looking.

Fred Woodcock is at Salem, Oregon, with Hal Paxton 2:09, Lottie Ansel (2) 2:14¼, and Capt. Mack 2:10¼.

John Kirkland is at Salem with two choice Hal B. mares and his own good pacer, McAlpin 2:13¼.

There is not such a scarcity of good horses up here as some people think for, and when the bell rings there will be many good ones respond to the call of Mr. Woods at Vancouver, and to the cheery call of Mr. McNair at Centralia.

C. A. HARRISON.

FREE-FOR-ALL IS WON BY BON GUY IN FAST TIME.

Burgoyne's Speedy Racer Drops First Heat Owing to Damaged Tire, But Takes Next Two Straight.

After dropping the first heat owing to a damaged tire, Bon Guy easily won the two remaining heats of the free-for-all race at the Hastings Park harness racing matinee at Vancouver, B. C., on Saturday afternoon. Bel Bar won the first heat and was second in the two remaining heats, but easily headed in the stretch by Bon Guy on both occasions. Nic-Nac, the only other contender in the free-for-all, was distanced in two of the three heats and never had a chance.

A keenly critical, if not very large, throng attended the harness matinee and showed the heartiest appreciation of the interesting program of races. Bon Guy made very creditable time in the second heat of the free-for-all, doing it in 2:18½. The first quarter was negotiated in 33 seconds and the half-mile in 1:06.

J. Nicholson's Fera Montana won from W. H. Mason's Susy G. in two straight heats in the special half mile trot. Following are the results:

Free-for-All pace:

Bon Guy	(Edward Burgoyne)	3	1	1
Bal Bar	(R. Dixon)	1	2	2
Nic-Nac	(C. Smith)	2	3	3

Time—2:21½, 2:18½, 2:24.

Special trot, half mile:

Fera Montana	(J. Nicholson)	1	1
Susy G.	(W. H. Mason)	2	2

Time—2:13½, 1:11¾.

2:40 trot, half mile:

Miss Ronan	(A. Ronan)	2	1	1
Emmeline Lou	(W. Steel)	1	2	2
Rose Lecco	(T. Hodgkins)	4	3	3
Sweet Nut	(A. Milloy)	3	4	4

Time—1:20, 1:15½.

2:40 trot, half mile:

Bland M.	(T. A. Morris)	1	1
Voltaire	(C. S. Westcott)	2	2
Johnny M.	(John Moore)	4	3
Miss Ross	(A. Ronan)	3	5
Hughie H.	(T. Hodgkins)	5	4

Time—1:30, 1:17.

The champion Directum I. 1:56¾ paced a public half in 1:01¾ over the double-lap at Monticello, N. Y., July 4.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

TRAPSHOOTING FIXTURES.

August20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; 4,000$ added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July 27, 28, 29—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 10, 11, 12—Del Monte, Cal., Del Monte Gun Club. J. F. Neville, Secretary.

August 19—Blaine, Wash.—Northwest Washington Trapshooters' League Tournament, under the auspices of the Blaine Gun Club. F. L. Cott, Secretary.

August 19—Kellogg, Idaho—Kellogg Gun Club. R. E. Thomas, Secretary.

August 27—Williams, Ariz.—Williams Gun Club. W. D. Finney, President.

September 9 — Seattle, Wash. — Northwest Washington Trapshooters' League Tournament, under the auspices of the Green Lake Gun Club. G. A. Conklin, Sec'ty.

September 17, 18—Los Angeles, Cal.—Los Angeles Gun Club. Fred H. Teeple, Secretary.

October 9, 10—Hillside, Ariz.—Three Mule Shoe Gun Club. "Old Policy." Thad. P. Mullen, Secretary.

October 13, 14—Phoenix, Ariz.—Arizona State Tournament, under the auspices of the Phoenix Gun Club. Dell E. Morrell, Secretary.

—o—

Los Angeles Club.—R. O. Pool smashed 98x100 targets at the Los Angeles Gun Club Sunday, and by doing so captured the William Kennedy trophy, which was up for competition. R. H. Bungay and Owen Evans, shooting from the 20-yard mark, tied for second position with a total of 97x100 breaks.

The 20-yard squad, made up of Bungay, Evans, Pfirrmann, Mitchell and Mohler, continued their stellar shooting by breaking 477x500 targets. Wilson, Hart, L. R. Mellus, W. A. Cornelius and R. O. Pool broke 477x500 from the 18-yard line. Kennedy, Whitcomb, Cowan, Rossbach and Cornett smashed 453x500 from 16 yards, thus making a grand total of 1408 x 1500 breaks for the three teams. This was a grand total of .9387 per cent, which is some shooting for a 15-man team.

Charles Yocum, who won the 1917 Pacific Coast handicap shooting tournament, held at San Jose recently, was a visitor at the Los Angeles Gun Club. While his score was nothing sensational, he had a good alibi, for he has been out of competition for about a month.

Tomorrow the Harry W. Cline trophy will be up for competition, as will four gold and four silver take-home trophies. Following are the scores:

R. O. Pool, 18 yards, 98x100; R. H. Bungay 20—97, O. A. Evans 20—97, S. H. Wilson 16—96, Seth Hart 16—96, H. Pfirrmann 20—95, Ed Mitchell 20—95, L. R. Mellus 18—95, E. K. Mohler 20—93, W. A. Cornelius 19—92, Wm. Kennedy 16—92, W. H. Whitcomb 21—91, J. A. Cowan 16—91, V. A. Rossbach 18—90, Wm. Cornett 16—89, Mrs. Pfirrmann 16—88, Chas. Yocum 19—87, J. F. Dodds 21—87, C. W. Fish 19—75, Jack Cudahy 16—75; F. H. Teeple 16—43x50; J. G. Griffith 16—42, L. Hartmann 16—41, E. B. Colton 16—36, M. Steel 16—31, C. Hartmann 16—30, G. M. Berry 16—27; Mrs. Fish 16—12x25, J. A. Meiling 12x25, C. H. Porter 7x25.

Barks on Kennel Row.—During the next two month no less than five kennel shows of importance will be held in California. None has been scheduled for San Francisco. The shows will take place at Stockton, San Mateo, San Jose, Oakland and Los Angeles.

Chris Shuttleworth, who was disqualified as a judge in the Los Angeles show, owing to the fact that be was employed by Mrs. Anita Baldwin, who is sponsor for the show, will be succeeded by Harry Hungerford. Hungerford was brought from the east to judge the southern meet. He has judged in Detroit, Canada and throughout eastern cities.

H. C. Ahlers, of trotting horse fame, has bought one of the best Boston terrier bitches in America. The bitch has been shown at many of the leading kennel shows in the world. Her sire is Eastern Champion, the dog that won the big eastern event.

Jack Bradshaw sold an English bull pup to William Elliott of Los Angeles. Elliott plans to send the dog east for competition.

Bull terriers are gradually coming into their own on the Pacific Coast again. White Heather, the English trophy winner, is believed to be on the coast. Her new owner is keeping her under cover but it expected to enter her in several of the big meets to be held in California.

Portland Club.—The Denny benefit shoot at the Portland Gun Club, on Sunday, July 15th, brought $11.40 into the fund.

Abner Blair and Mrs. Ada Schilling tied for high gun in the 25-bird event with scores of 24 each. Carl Schilling and H. R. Everding tied for second honors with 23 out of 25. In the shoot-off Abner Blair was first, H. R. Everding second.

In the 20-gauge shoot for the W. C. Bristol cup, H. B. Newland was the winner after tying with A. L. Zachrisson with 20 out of 25. The scores and handicaps were:

J. G. Clemson, 16 yards, broke 22; C. A. Ruscoe 16—18, Mrs. E. E. Young 16—14, Dr. E. C. McFarland 16—16, *E. B. Morris 21—19, Abner Blair 21—24, *C. J. Schilling 21—23, *P. J. Holohan 21—22, H. R. Everding 21—23, J. S. Crane 16—16, H. B. Newland 16—21, Lloyd Bates 16—15, W. J. Derthick 17—19, *J E. Reid 20—21, Ada Schilling 18—24, Gladys Reid 18—18, A. L. Zachrisson 19—15, A. W. Strowger 19—18, E. E. Young 19—19. (*Professionals.)

Bristol 20-gauge gun shoot—Dr. McFarland 10, *E. B. Morris 12, Lloyd Bates 18, W. J. Derthick 16, G. C. Haworth 11, Abner Blair 18, A. L. Zachrisson 20, A. W. Strowger 18, H. B. Newland 20, *P. J. Holohan 17, L. A. Spangler 8, *C. H. Knight 16, *H. H. Richlefson 12, H. R. Everding 18, J. S. Crane 12, C. A. Ruscoe 14.

Coyotes Kill Deer.—Yreka (Siskiyou Co.)—The residents of the Salmon River country are becoming alarmed at the rapid increase of coyotes in that section. They are killing off all the young deer and threaten in a short time to completely exterminate them unless some action is taken.

Up until a few years ago coyotes were very scarce in the Klamath and Salmon River mountains and very few deer were ever killed that way. The coyotes hunt in packs and understand the habits of the doe, which leaves her fawn hidden away in a clump of bushes while she goes away to feed. The minute the mother deer is out of sight the coyotes attack and kill the fawns.

Carcasses are to be seen strewn all along the trails throughout that section where the coyotes are thickest.

New Point Rating.—The new point rating which went into effect July 1st, is one that if carefully considered, will be a great improvement on the old method, says the Kennel Advocate. Hereafter each breed will maks its own rating, which is perfectly just, and will have a better effect upon the entries, although no doubt quality will be lacking, for take a fancier who has a really good specimen, he will probably enter a number of inferior ones as far as his means will allow, for no other purpose than to shell the entry in the effort to get the rating for the good specimen in the event it should win. Heretofore there has been an inclination to hold out dogs, whereas under the new ruling the exhibitor who holds back his dogs will be doing the dogs he shows an injury by his actions. Then in the breeds with only one or two entries it will mean that such a dog will have to go through fifteen shows, and if he completes this performance, and is given Winners by the many different judges who will pass upon his merits, he is certainly entitled to honor, for it will be no fault of his owner that he did not meet competitors in this number of shows. That the point rating is now universally equal is another point that should be agreeable to western exhibitors, for under the former rating when a Champion was made in the Western division, that Champion was looked upon as inferior to the one who won the title in the East, on account of his not having gained it under the same rating as was in vogue East of the Mississippi. How many times have we heard it remarked, "Oh, well, he is only a Coast Champion," when a dog who had won the title in the west was spoken of to an Eastern fancier. Under the new regime "A Coast Champion" will be even more valuable than the one who has made his in the East, for it will be far more difficult to attain, with the smaller and fewer shows.

It is certain that in a short time we shall not have so many champions, but when one does win the necessary points, he will be worthy of the name.

Templeton Brothers Star.—The three Templeton brothers are among the leading trapshooters on the Pacific Coast. They are all athletes who won their spurs on the football field.

Frank Templeton of Portland has been shooting for some time, and his win of the 1916 Pacific Coast Handicap was not unexpected. His twin brother, J. H. Templeton, was first at the Harbor Island grounds with 23-25, while Dr. Templeton took premier honors at the Green Lake traps with the same score.

Dr. Templeton landed fifth in the Pacific Coast Handicap in 1916 and seventh in the Pacific Coast Overture, while his brother J. H. was right with him in the events he shot. It is predicted that Dr. Templeton will be found among the topnotchers at the big tournaments he attends in the future.

In the annual trapshooting tournament of the Sportsman's Association of the Northwest in Portland, Ore., the Templeton Trio performed well all along the line, and to add to the family prestige Dr. Templeton was chosen as secretary of the association, which will cause him to bear the brunt of the work on the 1918 tournament.

COAST SHOTS GOING TO CHICAGO.

Stars Will Compete in the Grand American Handicap on August 20th to 25th.

Prospects are that the Pacific Coast will have a big representation at the Grand American Handicap, the blue ribbon trapshooting event of the season, at Chicago on August 20 to 25th, inclusive.

From around the bay it is likely that a half-dozen will take in the big event. Just whom they will be has not been definitely settled, but Andy Flickinger, A. G. and Mrs. Wilkes, Harry Lorenson, and several others are reported as making preparations for the trip.

The Northwest will as usual send a big delegation that will have Hi Everding of Portland and a number of others, including Frank Troeh, champion of 1916.

The Southland will have its usual delegation at the grand event. At the present time about five of the tarhawk smashers are making plans to attend the title affair. Frank Mellus, California-Nevada champion, will be the chief representative of Los Angeles. Mellus decided to go immediately after he captured the California-Nevada championship.

V. A. Rossbach, prominent member of the Los Angeles Gun Club, who has not missed a grand American shoot for a number of years, is also planning on traveling to Chicago the latter part of next month to shoot in the big affair. Harry Cline, vice-president of the Los Angeles Gun Club; George ("Tiny") Tuckett, well known the country over in tarhawk smashing circles, and E. K. Mohler, prominent Los Angeles Gun club member, are the men who have already laid plans for attending the Grand American shoot. By the time the event rolls around others may decide to travel to the Windy City and participate.

This year the shoot is to be held at the South Shore Country Club. This is the Windy City's new million-dollar club. Sixteen traps will be used, according to the present plans, and the targets will be thrown over the rustling waters of Lake Michigan. This will be something new in trapshooting, but according to those who have shot at the South Shore club the background is the greatest ever.

Expert trapshooters from every state in the Union are expected to take part in the grand event. At least 1000 entries are expected, to say nothing of the thousands who will be spectators only. In 1915 the grand American shoot was held at Grant Park in Chicago and during the tournament 50,000 people attended . This year's attendance is expected to beat the record.

Everett C. Brown, president of the South Shore club, is working hard on the plans for the tourney, according to Guy Holohan, who is in close touch with the happenings in the East. Grand entertainment is being planned for the shooters who attend. Athletic events will be the sideline exhibitions for the shooters and spectators. Some of the best known swimmers and track and field athletes will perform during the five days.

Frank Troeh of Vancouver is the present national champion. Troeh captured the title at the Grand American last year, which was held in St. Louis. A few months ago Troeh took part in the California-Nevada tournament and was then planning on traveling east to defend his honors. Other prominent northern shooters are also expected to attend.

Al lthe professionals will be on hand at the event and California should be heard from during the five-day shoot.

Green Lake Club.—In spite of the rain Sunday, July 15, three squads turned out at the Green Lake Gun Club grounds and some good scores were hung up. Sam Martin and L. S. Barnes tied for first place with a score of forty-eight out of fifty. George B. Baker and Dr. King tied for second place with forty-six hits. M. A. Rosenfield and Sam Martin tied for the DuPont trophy with their added bird handicap. Martin won in the shoot-off.

Dr. A. B. Kidd proved to be the best of a squad that shot at twenty-five double targets, with twenty-one birds to his credit. The scores:

Sam Martin 48, L. S. Barnes 48, George B. Baker 46, Dr. King 46, M. A. Rosenfield 43, C. B. Fitzgerald 44, E. Chantrell 43, Dr. A. B. Kidd 42, C. R. McConnell 40, Dr. S. W. Giffin 39, F. E. Bronson 38, C. W. Bandy 38, F. F. Greenhardt 35, L. K. Lear 20x30.

Fishing at Ocean Lake.—Dr. E. C. McFarland of Portland, a well-known angler and also president of the Oregon State Sportsmen's League, recently tried his luck at Ocean Lake (so called from its close proximity to the briny deep) which is within ten minutes' walk of Rockaway, on the Tillamook beach. Four years ago the state fish and game commission planted black bass in this lake, and they must have propagated wonderfully. The doctor found no trouble at all in hooking twenty in a short time the first night he fished, and he caught fifteen the next day in less than three hours of fishing. The majority of the fish were large, ranging from one and one-half to four and one-half pounds, which was the weight of the largest he caught. Dr. McFarland lives on Oswego Lake, where a great many black bass have been planted, along with fish of other varieties, but they are not large enough yet to amount to anything, and he expects to make another trip to Ocean Lake later in the summer. D. W. W.

Portland, Ore.

New Fish and Game Regulations

DEAR SEASON OPENS IN CALIFORNIA ON AUGUST 1st.

District No. 1—Counties of Siskiyou, Modoc, Shasta, Lassen, Plumas, Yuba, Amador, Alpine, Tuolumne, Calaveras, Mariposa, Madera, Tulare, Kings and portions of Del Norte, Humboldt, Trinity, Sierra, Nevada, Placer, El Dorado, Tehama, Sutter, Butte, Sacramento, San Joaquin, Stanislaus, Merced, Fresno and Kern.

District No. 2—Counties of Lake, Napa, and portions of Mendocino, Sonoma, Marin, Salona, Yolo, Glenn and Colusa.

District No. 3—Portions of counties of Contra Costa, Alameda, San Francisco, San Mateo, Santa Clara, Santa Cruz, Monterey, San Luis Obispo, Kern, Fresno, Merced, Stanislaus, San Joaquin, San Benito, Ventura, Santa Barbara.

District No. 4—Portions of counties of San Bernardino, Imperial, San Diego, Riverside, Orange, Los Angeles, Mono, Inyo.

Districts Nos. 5 to 22, inclusive, are fishing districts.

Districts 1a, 1b, 1c, 1d, 1e, 1f, 1g, 1h, 1i, 1j, 1k,, 1l, 2a, 3a, 3b, 3c, 3d, 4a, 4b, 4c, 4d, 4e, 4f, are game refuges. Hunting forbidden. Fishing in accordance with law relating to main district in which refuge is located.

OPEN SEASONS.

Deer—Districts 1, 23, 24, 25, 26—August 15 to Oct. 14. Dist. 2, 3—August 1 to Sept. 14. Dist. 4—September 1 to 30. No does, fawns or spike bucks. No sale of venison. Two bucks per season.

Rabbits (Cottontail and Brush)—All districts—Nov. 15 to Jan. 31. 15 per day; 30 per week.

Tree Squirrels—All districts—Sept. 1 to Dec. 31. 12 per season.

Elk, Antelope, Mountain Sheep—All districts—No open season. Killing of elk or possession of elk meat a felony.

Sea Otter—All districts—Closed. $1,000 fine for killing sea otter.

Bear (Black and Brown)—All districts—Open Nov. 1 to March 1.

Fur Bearing Mammals—All districts—Nov. 1 to March 1. Fur bearing mammals are bear, Kingtail cat, coon, pine marten, fisher, wolverine, mink, river otter and fox.

Ducks, Geese, Jacksnipe, Mudhens—All districts—Open October 16 to January 31. Ducks and geese, 25 per day, 50 per week. Honkers and black sea brant, 12 per day, 24 per week; Jacksnipe, 15 per day, 30 per week.

Shore Birds (except Jacksnipe), Rail, Wood Ducks, Wild Pigeon—No open season.

Quail (Valley and Desert)—All districts—Nov. 15 to January 31. 15 per day, 30 per week.

Mountain Quail—Dists. 1, 23, 24, 25, 26, Sept. 1 to Nov. 30. Dists 2, 3, 4—Nov. 15 to Jan. 31. 15 per day, 20 per week.

Sage Hen—All dists. except 4—August 15 to Sept. 30. Dist. 4—Closed. 4 per day, 8 per week.

Doves—All dists. except 1—Sept. 1 to Nov. 30. District 1—August 1 to Oct. 31. 15 per day.

Grouse—All districts—Sept. 15 to Oct. 14. 4 per day, 8 per week.

Trout (except Golden); White Fish, no limit.—Dist. 1— April 1 to Oct. 31; Dist. 2, 3, April 1 to Oct. 31 and Dec. 15 to February 31. Dist. 4—May 1 to Nov. 30. Dists. 23, 24, 25—May 30 to Oct. 31. 50 fish or 10 pounds and one fish, or one fish weighing 10 lbs. or over per day. In districts 2 and 3 during the winter season, 5 fish per day.

Golden Trout—All districts—June 30 to Oct. 1. 20 per day. None under 5 inches.

Black Bass—All districts—May 1 to Nov. 30. Clear Lake open all year. 25 per day, none under 7 inches. No sale. Hook and line only.

Sacramento Perch, Sunfish, and Crappie—All districts—May 1 to Nov. 30. 25 per day. Hook and line.

Striped Bass—All districts—Open all year. No closed season for hook and line; 5 per day from June 6 to August 1, and Sept. 25 to Nov. 14.

Salmon—All except 15—No closed season; Dist. 15, April 15 to August 31. Hook and line and spear may be used in districts 1 and 2; hook and line only in 3 and 4. 3 per day June 6 to Aug. 1 and Sept. 25 to Nov. 14; in Dist. 12a only 3 per day can be taken between May 15 and Dec. 31.

Catfish—All districts—August 15 to May 14. Closed season for commercial fishing.

Crabs—All districts—July 30 to Nov. 15. Must measure 7 inches across back; no females.

Abalones—All districts—March 1 to January 31. Must measure in diam.: Red, 7 in.; Green, 6½ in.; Pink, 6 in.; Black, 5 in. In Dist. 4 and 19 daily limit 10; dist. 17, 20 per week. For food only. No spears, no diving in dists. 17, 19, 20.

Pismo Clams—District 17—Sept. 1 to April 30. 50 per day; 4¾ in. in diameter.

IT IS ALWAYS UNLAWFUL

To hunt, take, kill or have in possession any wild bird or wild animal, excepting predatory birds or predatory animals under written permit from the Fish and Game Commission, within the boundaries of fish and game districts 1a, 1b, 1c, 1d, 1e, 1f, 1g, 1h, 1i, 1k, 1l, 2a, 3a, 3b, 3c, 3d, 4a, 4b, 4c, 4d, 4e, 4f (water fowl only can be killed in 4a).

To hunt birds or mammals, except predatory species, without first having procured a hunting license. Predatory mammals are moles, shrews, wolves, coyotes, foxes, ringtail cats, raccoons, martens, fishers, wolverines, weasels, minks, skunks, badgers, cougars, wild cats, rats, mice gophers and black tailed jack rabbits.

To net, trap or hold any protected game or birds of any kind or their nests or eggs without having procured written authority from the Fish and Game Commission.

To take or kill non-game birds except blue jay, butcher bird, English sparrow, sharp-shinned hawk, Cooper's hawk, duck hawk, great horned owl or California linnet and blackbirds in districts 1, 2, 3.

To take or kill any wild pheasant, swan, bobwhite quail, imported quail, partridge or wild turkey.

To have in possession any doe or fawn skins, or any deer skins from which the evidence of sex is removed.

To fail to retain in possession during the open season, and for ten days after the close thereof, the skin and portion of the head bearing the horns of any deer killed, and to produce upon the demand of an authorized officer.

To transport a deer from an open district into a closed district, without attaching to the carcass an affidavit in which is stated the time and place and by whom killed. The original of this affidavit must be filed with the Fish and Game Commission in San Francisco and a copy left with the notary or justice of the peace before whom sworn.

To use more than one day to the hunting person in hunting deer, or to allow dogs to run deer, during the closed season.

To trap for profit any bear, ring-tailed cat, coon, pine marten, fisher, wolverine, mink, river otter or fox, or to kill any of these animals between March 1 and November 1, except when destroying property.

To interfere with the traps of any licensed trapper.

To use any animal other than a dog as a blind to approach any wild bird.

To shoot any water fowl from a power boat in motion, or in district 4a to shoot from any other than a sail or rowboat.

To shoot resident game between one-half hour after sunset and one-half hour before sunrise, or to shoot migratory game between sunset and sunrise.

To hunt or have guns in possession in the Mount Tamalpais Game Refuge in Marin County without first having secured written permission from the Fish and Game Commission.

To sell wild game, except ducks, geese, cottontail and bush rabbits.

To make a false statement in the application for any license.

To take game or fish from one district to another when the season is not open in both districts. (Special law for deer.)

To ship any wild birds or wild animals or fish by parcel post or in concealed packages or without a tag bearing the name and address of the consignee, the contents of the package and the name and address of the consignor, or to ship the game out of the state.

To fail to show any hunting, fishing, trapping or wholesale dealer's license, upon demand, to any duly authorized officer.

To sell game at wholesale without having first procured a dealer's license.

To buy, sell or ship striped bass less than three pounds in weight, or to sell striped bass or shad between June 5 and August 1, or September 24 and November 15, or to take or have in possession in any one day more than five of either species between the dates given.

To buy, sell or offer for sale any wild trout. (In effect November 1, 1917.)

To bring to shore any crabs or crawfish in such condition that the size can not be taken or to sell any crab or crawfish meat not in the shell.

To buy, sell or offer for sale, or ship any salt water perch between May 1 and July 15.

To take or have in possession in District 3 any salt water eels (Blenniidae) of less than twelve inches in length, or more than fifteen salt water eels per day.

To take, have in possession, ship or sell any cockles or shortneck clams measuring less than one and a half inches in greatest length, exclusive of curve.

To fish for profit without first having taken out a market fishing license.

To fish for any game fish without having first having procured an angling license.

To fish for trout between one hour after sunset and one hour before sunrise.

To fish with nets in Districts 1, 2, 3, 4, 15, 23, 24, 25 and 26, or in any game refuge.

To fish through the ice for any fish.

To take any species of fish in District 26.

To place, cause to be placed, discharge or deposit, or to pass or place where it can pass into the water of this state any petroleum, acid, coal or oil-tar, lamp-black, aniline, asphalt, bitumen or residuary product of petroleum or carbonaceous material or substance, or any refuse, liquid or solid, from any oil refinery, gas house, tannery, distillery, chemical works, mill or factory of any kind, or sawdust, slabs or factory refuse or any material or substance deleterious to fish or plant life.

To sell or have in possession for sale any egret, osprey, bird of paradise, gourga, or Numidae plumes or feathers. (In effect November 1, 1917.)

To take or have in possession any sturgeon.

To take trout in any lake within 300 feet of the mouth of any stream between October 31 and August 1.

To take trout in that portion of any stream flowing into any lake in District 23 within two miles from its mouth, measured up stream, between Oct. 31 and Aug. 1.

To bring any abalones ashore unless they are alive and in the shell.

INTEREST REVIVED IN FISHING.

Sport Is Getting Good Again; Bear Lake Attracts Thousands of Visitors.

Los Angeles, Cal.—After taking life rather easy, as is their rule during the light nights that follow the full moon, our silver-sided friends, the Bog Bear lake trout, resumed active warfare upon still and spinning bait with the settling of the mountain weather, and now that the wee sma' hours are dark, anglers generally are filling out their limits of these splendid sporting fish.

Rodsters returning from Bear Valley are amazed at the increase in angling interest now being shown despite a backward season and late start, to which were added the discouraging complication incidental to war. That Southern California is strong for such fishing as the repeated plantings of the fish and game commission have built up with the licensees' money is finding further proof in the new records attained by that board's sales of angling licenses in this end of the State, which now exceed by over 4,000 the total of last year, having reached 26,000 and still growing steadily.

Resorts are full and campers are congregating in Bear Valley until by night it suggests the bivouac of an army; by day, a tented city. Charges for camping privileges by the "I. S." and other land owners have discouraged but few, apparently.

The fishing is a harder game than last year owing to the great prevalence of the small trout from last season's plantings of 386,000 and the natural spawnings which were more nearly normal this spring. These little fellows are of the size that was busy around the edges in the new overflow of 1916, and the lowering of the lake this summer for irrigation has concentrated them, driving them into competition with their bigger ancestors out in the lake, where anglers have them to deal with continually. Voracious biters, they have reduced the average limit from the three or four big fish of 1916 to ten or a dozen needed to make up the legal "ten pounds and one fish" of the statutes.

Market fishermen, realizing that the sale of trout ends November 30, have taken up the business of guiding anglers instead, and now the man who goes to Bear Lake to learn the game can, at a very reasonable charge—considering the sport he gets by it—hire some of these stout and hard-working fellows to row him and hook him onto some fine, big fish. Nearly all the resorts have guides attached, and as they are all learning the trolling game, their patrons are being introduced to the best sport Bear Lake offers.

It has been demonstrated that the Bear Lake fish will fall for a flash all summer, so the trollers have increased phenomenally until nearly as many are dragging spinning gear now as still stick to the relatively simple business of bleaching salmon eggs.

Experts who have the best interests of Bear Lake at heart are releasing all the small fish they can let go uninjured. By giving them a little slack, most will speedily avail themselves of the opportunity to escape. It seems an economic waste to kill half-pounders that in a few more seasons would weigh five pounds, particularly as by a little more fishing one is apt to hook a big one. If necessary to touch fish to release them, the hand should be wet first. Predictions that the Bear Lake fish would be biting in all sizes this year were based on close study of the food conditions, and seems to be working out.

From 150 to 250 boats were fishing Bear Lake last week every day despite unusually warm and unfavorable weather and relatively hard work to make catches. This means from 300 to 500 fishermen were enjoying themselves daily. The food supply capacity of the lake has proved astonishing to students thereof, as well as the increase in sporting interest.

Plans of the fish and game commission to take all the eggs possible and hatch them, so as to stop the natural waste incidental to the lack of suitable natural facilities in the scanty Bear Valley creeks, have had the warm approval of sportsmen familiar with the conditions. In the early future the commissioners expect to look over the situation in person, and work is contemplated before snow flies so as to be ready for another season.

Already 250,000 trout have been planted in the lake thus far this season. Deputy Malone placed the first crop of the hatchery last week.

The Northwestern Pacific Railroad gives out the information that steelheads have started to run in Weymouth pool. Some catches have been reported on the spoon and with the fly. By the first of the month it is expected that the steelhead sport will be at its best.

Sportsmen's Row

Elmer E. Shaner, tournament manager of the Interstate Association, was in Chicago last week looking over the grounds of the South Shore Country Club, where the Grand American Handicap is to be held next month, and he expressed himself well pleased with all arrangements so far made by the club. Like every one else, he anticipates a large attendance at the tournament, and therefore is desirous of seeing every detail for the comfort of all shooters carried out in full. In this regard Mr. Shaner need have no fears, for there are men connected with the South Shore Country Club who have devoted many years to trapshooting and know what is needed for the successful handling of a large gathering of shooters, and they will see that everything is in the best shape before the opening day of the tournament.

✤ ✤ ✤

Dr. Henry Abrahm is making inquiries these days about fishing in France. The ardent devotee of the rod has been called into the service with the rank of first lieutenant and his fishing trips to local streams are over for a while. If he is ordered over to the other side it is almost a cinch that he will take along his rod to get in some sport if occasion presents itself. Dr. Abrahm holds the record of taking the biggest rainbow out of Lake Almanor. It weighed fourteen pounds, and the boys are still trying to beat that.

✤ ✤ ✤

The presence of main up in the Truckee country sort of put the damper on fly fishing last week. The water was rather muddy but anglers look for it to clear shortly.

✤ ✤ ✤

U. S. Webb, Attorney-General, took a fishing trip to the Feather River country last week and enjoyed some success at Belden.

✤ ✤ ✤

Ted Riley was missing from the trap shoot last week. He went fishing and brought in some beauties to show to his friends. He says he equaled Bill Price's high mark of forty-eight out of fifty.

✤ ✤ ✤

Dr. James A. Black, who has a ranch up near Montgomery creek, spends much time whipping the creek, and reports that fly fishing is now excellent. Limits have been caught daily.

✤ ✤ ✤

Jerome White tried Pitt river and pulled in many big ones on the spoon.

✤ ✤ ✤

George A. Kohn went up to Mill creek near Red Bluff and was agreeably surprised to find so many of the trout taking the fly so readily.

✤ ✤ ✤

John A. Barr got in some good licks at Boca before the recent rainstorms. He tried the fly with much success and told his friends that the game was very good.

✤ ✤ ✤

Due to the war conditions the National Association of Scientific Angling clubs have called off their annual gathering which was to have been held in Chicago the latter part of next month. J. Howard Smith, secretary of the Southern California Rod and Reel club, received notification of this postponement last week. The Coast organizations were planning to send a number of casters back to the national tourney. These casters were practicing for the event, but now that it has been called off, will rest up until next season.

✤ ✤ ✤

Up coast sporting attractions are likely to be exploited more fully this year than ever before, as a series of seasons favorable to hunting and angling licensees are made by the new law. Besides the deer opening in August, winter fishing is provided for those who like the steelhead game by permitting five fish per day to be taken from December 15 to March 1 during the usual time of athe big winter steelhead run. The steelhead are prime at spawning time, as indeed are all other fish.

✤ ✤ ✤

Deterioration takes place from the maturity of the eggs. So, with summer and winter sporting seasons thus attractive to hunters and anglers, Ventura and Santa Barbara counties bid fair to reap quite an increased share of the patronage of these classes henceforth, particularly as the coast highways are steadily being improved, and the Ventura roads are becoming equal to the rest of the boulevard system.

✤ ✤ ✤

Vina (Tehama Co.)—The Shasta hatchery at Sisson sent 10,000 trout to Vina. They were planted in Deer Creek by B. McCullum, Scott Pritchett and O. L. Mason.

✤ ✤ ✤

Marysville (Yuba Co.)—Salmon fishing by night is a favorite pastime since the fish have begun to run up stream to spawn. Many large ones are caught, weighing as high as twenty-four pounds and measuring over three feet in length.

✤ ✤ ✤

An employee of the Colgate power house, on the Yuba river, while fishing from one of the windows, hooked a two-pound trout. Fearing that the fish would escape, the man leaped head first from the window into the stream and succeeded in landing the fish.

✤ ✤ ✤

Vancouver, B. C.—Charles Bowers, 30 years old, secretary of the Vancouver Gun Club and a prominent British Columbia trap shot, was drowned last week at Deep Cove, a summer resort near here. With five others he was out boating when the craft capsized, throwing the entire party into the water. All were saved with the exception of Bowers.

✤ ✤ ✤

Santa Monica.—A 250-pound sea bass was caught by A. M. Scott, Santa Monica fisherman, after an exciting struggle of more than an hour, two miles off this shore. According to F. S. Volk, of the Ocean Park pier, who is exhibiting the monster, it measures six and a half feet long, an unusual length for a fish of its weight. Sea bass, he says, are generally more chunky.

✤ ✤ ✤

The English Setter Club of America is letting no grass grow under its feet. Evidently the setter men are not worrying over the possibility of a few Zeppelins coming over here, for they have already set the date of their eighteenth annual field day, which will be April 2, 1918. The location has not yet been selected, but it probably will be somewhere in southern New Jersey.

Peters Pointers.—At the Blue River Gun Club, Kansas City, Mo., June 23, Messrs, E. W. Varner of Adams, Neb., and C. L. Waggoner of Diller, Neb., tied for high amateur average with a score of 146 ex 150, both using the "P" brand shells.

At Rome, So. Dak., June 18, Mr. C. M. Buchanan of Sioux Falls, S. Dak., was high amateur, 136 ex 150, using Peters shells.

Messrs. Fred Plum and Lester German were the bright particular stars at the Eastern Handicap tournament, Hartford, Conn., June 19-22. Mr. Plum won the Hartford Special, 98 ex 100, and was high amateur on all targets including 15 pair and 200 singles from 22 yards, total score 541 ex 580. Mr. German won high amateur and high professional averages on 16 yard targets, 343 ex 350; was high professional on Handicap races, 192 ex 200 from 22 yards, and was either high gun or tied for high professional score in every race on the program, his total score being 634 ex 650.

The Preliminary Handicap was won by the well known Philadelphia shooter, Mr. F. A. Johnson, who broke 96 ex 100, shooting from 18 yards. Messrs. Plum, Johnson and German all used the "P" brand factory loaded shells.

At Sapulpa, Okla., June 24-25, Mr. W. H. Heer of Guthrie, Okla., won high amateur and high general averages, 292 ex 300, using Peters Ideal factory loaded shells, and Mr. A. V. Cocke of Wellington, Texas, was second amateur, 285 ex 300, using Peters Target Shells. Mr. K. L. Eagan was high professional, 289 ex 300, and Mr. J. R. Hinkle was second professional, 282, both gentlemen using Peters shells.

Mr. C. L. Waggoner of Diller, Neb., at the Park Gun Club, Kansas City, Mo., June 24, won high general average and high amateur averages, 147 ex 150, and Mr. D. W. Bovee was high professional, 144, both using Peters shells.

Dog Shows Announced.—The fifth annual show of the Bayside Kennel Club of Southern California will be held at Long Beach, August 23-24-25. The venue is the same as last year, the magnificent Municipal Auditorium, undoubtedly the finest building on the Pacific Coast for such an event, as it is a large, well-ventilated hall with every convenience, and is located right upon the beach, which gives unlimited facilities for the exercising of dogs attending the show. Every effort is being made to make the show this year a huge success as all of the net proceeds are to be given over to the Red Star Animal Relief Fund.

War conditions are not causing the cancellation of any of the regular fixtures here on the Coast, for no sooner was the announcement of the Los Angeles show made when Secretary Charlie Hker of the Garden City K. C. wrote that this club will hold its annual event October 10 to 13. Following the example of other clubs the San Jose officials have concluded to give a portion of the net receipts of their show to the Red Cross or American Red Star Animal Relief Fund. Mr. W. M. Coats, the popular all-rounder of Vancouver, B. C., has been engaged to judge all breeds.

Record Swordfish Caught.—Fishermen around Catalina and San Clemente islands have been having some rare sport during the past week. It seems that last week the deep-sea fish have started to flock into Southland waters, and from now on angling should be at its best. Nearly every kind of large fish was landed around Catalina last week.

The biggest catch of the week was the world's record swordfish which was landed by A. C. Parsons of San Francisco. The huge fish weighed 422 pounds, and it took more than six hours to land it. The former record catch was held by Hugo R. Johnstone, but his fish weighed only about 370 pounds.

Another monster fish was landed by Herbert Earlscliffe. This fish was a blue fin tuna and weighed 136¼ pounds. It was over 100 pounds. It was also the largest caught since 1915.

FISH AND GAME INSPECTION.

Commissioners Meet in South to Discuss Enforcing New Laws on August 1st.

President Frank M. Newbert and Executive Secretary Carl Westerfield of the Fish and Game Commission are in Los Angeles, Commissioner Bosqui having gone on to San Diego. The entire state board is now in the south, together with N. B. Schofield and Will H. Shebley, heads of commercial fisheries and fish cultural departments, respectively. They will visit Catalina, Bear Valley, Mount Whitney hatchery, and look over the situations personally, making provision for the handling of the new laws which become effective this week.

A conference was held in Commissioner Connell's office, at which were present beside the board members State Senator Harry Chamberlain and President Joe Coxe of the Tuna club, who took the commissioners to Catalina where they met with the islanders and "talked fish."

President Newbert stated the Catalina situation in detail, saying:

"After next Friday a new law is effective which will make the Catalina district enforceable, and this commission proposes to put an end to the bluffing of officers by alien fishermen henceforth.

"Now that the old law with its fatal weakness is about to give way to a new law that can be enforced up to the hilt, this commission can state the facts without exposing that weakness prematurely to such few market fishermen as may not already know it.

"The present law requires in order to convict at Catalina that the actual offense of extending the net and taking the fish in it be proved up in court. The new law, which is the same this commission advocated four years ago, makes the possession of any net but a specified small bait net a misdemeanor within the closed district. In other words, the arresting officer no longer need linger around keeping watch until he catches the fishermen right in the act; instead he may arrest them whenever they enter the three miles from shore with forbidden nets aboard.

"Four years ago, after agreement with John Schumacher representing the Catalina interests, and with others who spoke for the various cannery and other commercial interests claiming to wish nothing but bait privileges at Catalina, the law which goes into effect late this month was passed by the senate and would have been signed by the governor but for an eleventh hour objection by Prof. Holder, representing the Tuna club, which feared it would afford a loophole to the net fishermen by permitting the use of a bait net. Therefore they prevailed upon the governor to approve instead the present weak and inefficient law, which leaves out the vital word 'possession'—so the existing law is theirs, not ours. Within a few weeks after its passage this commission was waited on by delegations requesting that we allow the taking of bait for sporting purposes contrary to the provisions of the very law upon which these same sportsmen were so insistent; but this we could not legally do.

"This commission, during the present emergency, exists primarily to increase California's food supply. It represents no narrow or local or selfish interest. It is now maintaining four men constantly upon commercial fisheries work in Southern California, at an expense absorbing the income from market fishermen's or salt water licenses. It proposes to enforce such laws as are entrusted to it; but the existing Catalina law requires a constant surveillance to catch boats in the actual use of nets, which has been utterly beyond the power of this board with its present handicap of having to rely upon slow rented boats.

"Already the board has appointed such help as has been asked to enforce the netting laws at Catalina. It has made an exception to all its rules by appointing a special deputy resident at Avalon, and this man has experienced the shortcomings of the present law. Besides him, several deputy sheriffs have been unable to handle the situation.

"The fish and game commission is now constructing a first-class boat for fisheries patrol between San Diego and Santa Barbara. This will give the needed equipment; the new law will be enforceable, and we predict that there will be no more defiance of state officers around Catalina island after August 1."

Eating Frogs Jolly Good.—We wonder that fish-farmers have never combined edible frog rearing with the production of fish. In France and the United States frogs are served at all the high-class restaurants, and, judging by the price they command, they must be considered choice delicacies and profitable viands. We have eaten them fried, stewed, and grilled, both on the Continent and in the U. S. A., and thought them jolly good, particularly when fried. The prejudice against them would soon be overcome if they were shown all dressed for cooking, as in France, at poulterers' and fishmongers' shops. They are especially suitable for cooking in chafing dishes. We believe the cultivation of frogs is quite simple, and from what we have been told, frogs' flesh should be most excellent fare, as the frogs are fed on the best of food and kept in the purest water. We should say that frogs' meat would be most digestible and make a most grateful and comforting palliative for a stomach that has been worried by Devonport bread. —British Sportsman.

BETTER LIVE STOCK
and Agricultural Topics

J. M. Roberts, a recent graduate of the University Farm at Davis, and later field man for the American Jersey Cattle Club in California, has accepted a position on a large ranch near Lovelock, Nevada.

✤ ✤ ✤

Prof. J. I. Thompson, of the Animal Husbandry department of the Agricultural College, University of California, was called to his old home in Iowa the first of this month, on account of the serious illness of his father. Prof. Thompson plans to be absent for some time but expects to be "on the job" as usual at Sacramento, during the State Fair.

✤ ✤ ✤

Keep the spring pigs growing all through the summer. It is the pig's business during this time to develop a good frame, to grow bone, muscle, and vital organs, and to lay on fat. Plenty of pasture, some grain, exercise, and good sanitary quarters are all necessary if the spring pig is to be thrifty and profitable.

✤ ✤ ✤

The Tagus Ranch Co., of Tulare, are fitting a number of Percherons for the fall fairs of California. It is their intention to make a very extensive show campaign and they have added a number of real high class horses to their string. Harry Clark, formerly with Henry Wheatley, the well known Napa breeder, is in charge of this department for this big ranch.

✤ ✤ ✤

Prof. R. F. Miller, of the University Farm, Davis, Cal., has just returned from an extensive visit through the stock growing countries of Utah, Wyoming, Idaho and Northern California, where he investigated the conditions in the sheep and wool industry. Prof. Miller was particularly interested in the construction and plans for lambing sheds and the Australian shearing sheds, now used extensively.

✤ ✤ ✤

The Black Hawk Ranch is now permanently located in their new stables at Diablo, Cal., and visitors and buyers will be welcome to inspect the new establishment, which is the most elaborate stable and equipment on the Pacific Coast. Manager Lovell is fitting an unusually brilliant array of youngsters to show this fall with the veterans of this very famous stable of Shire horses.

✤ ✤ ✤

Wayne Dinsmore, secretary of the Percheron Society of America, Stock Yards, Chicago, is in the Canadian northwest in the interests of his breed. He will be present at the Calgary and Edmonton shows and expects to visit George Lane and other breeders in company with Dean C. F. Curtiss of the Iowa Agricultural College, who judged the drafters at Calgary, and Dean W. L. Carlyle of the Oklahoma Agricultural College, who distributes the rosettes at Edmonton.

✤ ✤ ✤

IF THERE was ever any doubt as to whether farmers would make use of the new Federal Farm Loan Banks, that doubt has disappeared ,say officials of the St. Louis Bank which serves the states of Missouri, Illinois and Arkansas. This bank alone received applications for more than $12,000,000 during the first four months of its existence, though as yet the working the law and the great help that it will be to farmers is by no means generally well understood.

✤ ✤ ✤

R. P. Royce, of the Animal Husbandry Department of the University Farm, last week bought for the institution, four grade Shire mares, two and three-year-olds, from Chas. Kimble, the well known Hanford breeder. Mr. Kimble has maintained a stud of draft horses of very high standard for many years, having used a former Grand Champion of the International at its head, and has produced some exceptionally good horses. However, his increasing growth in the sheep industry has about forced him out of the horse business and he is closing out. He also owns one of the best bands of geldings in the country.

✤ ✤ ✤

The first outing by members of the recently organized Chicago Shorthorn Club was on July 3. Ten members of the club journeyed to Lake Forest and Prairie View as the guests of Thos. E. Wilson and B. F. Hales. Those in attendance were James Brown, P. M. Chappell, Wm. Grace, Finley Barrell, F. W. Harding, C. M. Jones, Thos. E. Wilson, B. F. Hales, R. M. Donnelly and Geo. E. Martin. At the Edellyn Farm of Mr. Wilson there was much interest taken in the equipment recently added to this establishment to house the Shorthorns and Clydesdales. The herd of Shorthorns, made up of imported and native stock, was inspected. From Edellyn Farm the party joruenyed to the farm owned by B. F. Hales, where Field Marshall and the matrons came in for inspection. The herd has been assembled in a little more than a year. The next visit will be to Anoka Farms, Waukesha, Wis., as guests of F. W. Harding, the club's secretary.

Says the Rocky Mountain Husbandman, an old-established farm paper which yields a bushel of truth with every week's issue: "There are two classes of farmers in Montana. One prays for rain for his crops and the other builds a reservoir, and digs an irrigation ditch. The reader will understand which will succeed."

✤ ✤ ✤

Make $700,000 on Sheep.

Reno (Nev.), July 21.—The Humphrey-Moffat Cattle, Sheep & Wool Co. last winter purchased the unclipped wool and the unborn lambs of the Pacific Coast states. The company has just announced it made a profit on the transaction of about $700,000.

The wool was sold on the eve of the announcement that the wool crop of Australia had been released to American users by the British Government.

On 2,000,000 pounds of wool the profit taken was $300,000, while the profit on the lambs amounted to $400,000.

✤ ✤ ✤

The prominence of the men interested in the production of "better live stock," perhaps more than any other reason, is responsible for Missouri's high standing in the production of pure-bred stock and the continual record-smashing sales and shows made there. The men connected with the breeding industry are the "flower of the flock" and very recently there joined this chosen and select flock a man who, if he becomes sufficiently interested, will make one more name in the rapidly filling hall of fame. This is Col. Fred A. Morris, of Mexico, who is going into this business as he has gone into banking, business and politics. Col. Morris has started a splendid foundation of Angus, and the breeding fraternity of "big blacks" surely are to be congratulated on his decision. It means that one of Missouri's really big business men is in the game; a man who will raise a little racket and get results, not only for his own herd but for the entire breed. We are sure that many seasons will not have passed until, when reading of the big annual sales in Missouri, Col. Morris' dates will be among those announced.

SUCCESS IN BREEDING HOGS.

Farmers at this time are especially interested in the hog breeding proposition. This being the case, we believe they will find a number of helpful ideas in the following article, written by N. H. Gentry, Sedalia, Mo.:

To become a successful breeder of livestock, to be recognized as the improver of any breed, is a task of no small means even to him upon whom nature has bestowed the necessary talent. And as to our fitness for any undertaking in life, men's talents are as diversified, possibly, as there are professions.

Nature deals most generously with some in the bestowing of talents, while there are others who go through life's long journey without ever successfully fitting into any undertaking; in other words, prove failures at whatever they undertake. And possibly there are as many failures to be found among livestock breeders as in any other profession.

Many Start but Few Endure to the End.

The most important step in every man's life, possibly, is in deciding upon the calling he is to follow. It is not always the most gifted that succeed best. There is much in application, for it has been ordained that man should live by the sweat of his brow. Unless a breeder is in love with his work, even above or beyond any expectation of pecuniary reward, he is not apt to endure the losses, accidents and disappointments that are sure to follow. Without this love for the work, discouragement is sure to overtake us before the end is reached. Many there are who start in the race, but few there be who can endure to the end of a life's career the competition and disappointments that must cross one's pathway. I believe I have never known anyone to undertake the breeding of livestock on a very large scale to start with that endured very long. It seems to be a trait most common to Americans to want to do things impatiently, and it is my experience that he who lacks patience in starting is sure to be found lacking the patience necessary to a successful finish. The breeder who throws the biggest flashlight on the horizon in starting is almost sure to prove the one whose light goes out the quickest. There may be some exceptions to this rule, but it will prove an almost infallible one.

My advice to a beginner has always been, not to buy many animals to begin with, but good ones. Be content to commence in a moderate way, learning as your business grows in proportion. Then, as a rule, too much promiscuous buying is not as apt to attain to uniformity in the herd as starting from fewer animals. It has been said that one of the greatest of American Shorthorn breeders that ever lived built up a herd that was known the world over, all descending from one cow. I refer to the late Mr. Abram Renick of Kentucky. His extraordinary patience was surely rewarded in the end. I do not mean to infer from this example cited that a breeder should never buy from his fellow breeder, but rather to advise against too promiscuous buying in laying a foundation to start with.

Good Developer and Liberal Feeder.

To prove a success, a breeder must also be a good developer; in other words, a liberal feeder and a good salesman as well. Failing in either will very much curtail his success. The successful mating of animals is a deep study, as proven by the few who make a success of breeding better animals than they buy, or who are known as improvers of their chosen breed. Then the feeding problem—the understanding of what constitutes a balanced ration, the best ration to be fed to animals at different stages of development—is a complex problem that few, if any, ever really master. In this our experiment stations have rendered great aid to the breeders; but even with their help, at a cost of many thousand dollars, there is still much to be learned in the art of feeding.

Too much stress, in my opinion, cannot be placed upon the proper development of animals, for it is only by development we prove what is in the animal—its possibilities. Until then there is much guessing as to what the animal is capable of. In the proper development of the younger animals of the herd, from time to time many surprises, as well as disappointments, will be encountered, all of which will prove a most fascinating study as to the causes in each case. There is no phase of the game that furnishes as much interesting study, where one can learn as much as in watching the development of the younger members of the herd towards maturity. In this connection I will say that I have often thought that our annual shows are worth all they cost, and much more, in that they stimulate and encourage the proper development of our herds as nothing else does. Then the showing at these annual fairs will prove the most practical way of advertising ourselves and showing our fellow breeders what we are doing. In this way, if we have succeeded in producing a worthy product, a buyer for what we have for sale will be found, and the selling ability of the breeder will be brought into practice and his acquaintance extended.

Win and Hold Friendship of Customers.

Nothing will prove of more worth, lasting worth, than the making of friends out of one's customers and by a fair and generous treatment holding them as friends. Nothing counts for more, even in business, than friendship; and the breeder who fails to gather around him friends as he goes through life will realize later, if not now, that the fault is his and that he has robbed himself of the most lasting, as well as the most valuable, asset possible to his business. Life would be barren, indeed—in my estimation, not worth the living—if it were not for our friendships formed along the pathway; and I know of no profession which affords the opportunity of a more extended acquaintance than falls to the lot of a successful breeder of livestock; an acquaintance that is worth while from every standpoint, for the profession of the livestock breeder is one that is elevating. Men grow broader minded, more liberal and generous from the influence that surrounds them. The man who harbors a spirit of suspicion, envy, jealousy or unfairness of any kind seldom enters the ranks of livestock breeders; and if he does, he is not apt to endure long, because he will not find the atmosphere surrounding him congenial; either he will become a better man or he will disappear from the ranks and will be lost sight of.

True Breeder Withstands Competition.

Further back, in the beginning of this paper, I mentioned competition as sure to cross the pathway of the breeder of livestock. Yes, competition is sure to come, and unless the would-be breeder can endure it, he would far better never make the start. No matter how good animals he may be able to produce, he will find others producing as good, or better, in some instances at least. Competition, nor even defeat, will not drive a true breeder out of the game, but only spur him on to still greater effort in the future. It is the true breeder who endures competition, whose heart harbors up no feelings of envy or jealousy for a brother breeder, who is ever ready to lend a helping hand to a struggling brother, encouraging on every hand that good fellowship and brotherly love so necessary between breeders to push their chosen breed to the notice of the public.

—[Swine World.

SHEEP NEGLECTED AT LOCAL FAIRS.

Sheep are usually neglected at most local fairs. They make one of the most attractive features of live stock exhibits where exhibitors and fair managers co-operate.

1. Keep fleeces as clean as possible. All dung tags should be washed out or trimmed off.

2. All foreign material such as straw and burs, should be picked out of the fleece.

3. The fleeces of the medium wool breeds of sheep should be thoroughly carded out and the stringly ends of wool trimmed so as to present a smooth and attractive fleece.

4. The feet should be kept trimmed so the animal can stand naturally. Long "sled runner" toes are unnatural and frequently develop foot trouble.

5. Sheep that are to be exhibited should be taught to stand by frequent and patient handling at home for a few weeks so that when the judge undertakes to examine them they will not be continually twisting and pulling away.

THE FARM

FARMER OF TODAY A BUSINESS MAN.

(By F. B. Robinson.)

In a recent issue of a city paper a paragraph appeared in which the writer said: "The expression of 'the horny-handed son of toil,' in homespun and boots of cowhide, who was listening to her, was really deliciously expressive of surprise and amusement and contempt."

Some writers and cartoonists on city newspapers and magazines take delight in preparing diatribes against the farmer. In their perverted conception of the idea they attempt to portray, pictureing the farmer as uncouth and ignorant is a reflection of their own lack of intelligence.

No farmer objects to being represented truthfully, but he is opposed to caricature and ridicule when there is no foundation for them. The majority of persons in small cities and a larger proportion in larger cities are country born or bred, and none would hesitate to defend his birthright. Many city-born people may be excused, for their impressions have been formed by observation of the public prints, which puts a double burden on the authors.

Riding in Touring Cars.

In marked contrast is the prosperous farmer today and his prototype of a decade or two ago. This dissimilarity may be shown to best advantage by using an illustration that is not timely, perhaps, yet it is pertinent. At any fair, whether it be state, county or local, there is evidence that the automobile is forcing its way to general recognition. As the saddle horse with its pillion and saddle bags, and the rumbling oxcart gave way to jolting wagons, so the easier carriages of succeeding years are being displaced by touring cars.

Not many years ago places for hitching horses were at a premium at the fair ground—within the fence, along the road on both sides, and in adjacent fields. At the present day fairs more than half of the conveyances are automobiles, compactly parked. But horses and machines combined do not equal the number of "rigs" of former days, for the electric roads carry many farmers, permitting greater freedom in relief from concern for their "team."

In Close Touch With the City.

With the extension of trolley systems, the increasing use of the motor car, and other modern devices that may be installed on the farm, the farmer of yesterday is the suburbanite of today. He is in close touch with the city and enjoys all its privileges; but he has infinitely more. His vision is not limited by brick buildings and his rest is not disturbed by unseemly noises. He can breathe air unpolluted by odors peculiar to metropolitan districts. He may go and come unhampered by a thousand and one restricting regulations. In short, the life of the ruralist, as compared with that of the urbanite, is one of delightful freedom and independence, although there is plenty of hard work attached.

The day of the tallow dip has long since been forgotten and the kerosene oil (or coal oil, as it is better known in some sections) has been superseded in many homes by the electric bulb. Proximity to transmission lines is not a necessity, for the small stream that flows through the pasture has been made to afford power sufficient to light all the farm buildings, drive the machinery—the cream separator, the fanning mill, and the old churn that produced more than one aching back—while a pump, electrically driven, forces the water to an elevated reservoir, whence it falls for the convenience of the household. A motor truck is not an uncommon sight.

Farmer is Intelligent and Thrifty.

It would be well for the city writer and cartoonist to visit the home of a prosperous farmer of today. They would find him intelligent, cultured and well dressed. Farming today is a science. The farmer conducts his work along lines that demand hard study, close attention to details and a clear perspective. He may mingle in the best class of society and defy the social expert to distinguish him in the metropolitan circle.

The farmer of today and the traditions of the farmer of yesterday should command respect, for he is the most important factor in the industrial world, for he produces the materials that feed and clothe, and in a measure, house the nation. He is the foundation of society, for it is on his vocation that the prosperity of the country is established and it is to him that the people are indebted for their living.

To Sell Seed Wheat.

The Missouri wheat crop is reported to be very good in quality. The demand for Missouri wheat for seed this fall is likely to be great. The College of Agriculture has endeavored to list those fields from which good seed may be obtained. The local organizations will facilitate the distribution of this wheat when the demand comes from other states and from other localities for seed. Without organization, distribution of this wheat would be hindered.

These are a few of the results that have evolved from the state-wide organization of Missouri farmers. The work has just begun. Very few of the farmers' clubs have really got down to work, but those few have proved conclusively the benefits which may be derived from this form of co-operation and these benefits are not only local and state-wide in character, but they are national. Organization of farmers is necessary for efficient production and distribution in this crisis.

The organization plan of the College of Agriculture has been sanctioned by the government officials. The college is supported by the state and by the nation and consequently the campaign is really a national emergency measure. Missouri farmers have responded wonderfully and unless unforseen weather conditions prevent the results of their labor will be told in the harvest but they will not stop with the gathering of the crops. They will see that they are properly distributed and directed to the dominions of hungry soldiers and civilians in America and Europe.

Every Poland China breeder owes it to the breed, to the country and to himself to do some extraordinary boosting for Poland Chinas now. This is the time wheen boosting will count. A few dollars expended in some form of advertising will bring big returns. It is the duty of every breeder to help by advertising his herd. This is no time for any breeder to sit back and figure that he will get the benefit of the publicity given to the breed by other breeders, and save a few dollars. It is the breeder who gets the attention of the prospective buyer who gets his business. A breeder may save a few dollars by not advertising. The one who advertises will make several times what the other one saves, and he will have established a reputation that will be worth many times what it cost him in future sales.

Horse trade has been crippled all over the United States by the suspension of the French inspection. The suspension, which is attributed solely to the lack of ocean transportation, caught the horse collectors with a large lot of horses on their hands, and the losses which have resulted have been very serious. The English are still buying at a few points, but a danger signal has been hoisted since the French traders have no assurance that they will have a market for what they have gathered.

When alfalfa is two or more years old it should be thoroughly disked or harrowed after the first cutting, says an experienced grower. Fields which are absolutely weedless do not need much disking or harrowing, but the ordinary field, where foxtail, redtop or similar grasses have come in should be given a thorough disking or harrowing. On the average ranch the disk is the best available implement which can be used, or the spring-tooth harrow will do. The object is to tear out the grass. For a long time there was a theory that the disk was a bad thing to use on the alfalfa field, because of splitting the crowns and letting germs in. It has never been shown that alfalfa which has been cultivated with the disk is any more diseased than that which has been cultivated with the spring-tooth harrow or not been cultivated at all.

The calf crop could be increased from twenty to thirty-five per cent a year, writes an authority on breeding, by taking the bulls from the range in the fall and putting them back on the grass again in June or July, depending upon the section of the country and at the time when the stockman wishes his calves to be dropped. This would also give a more thorough distribution of the bulls over the range. They would be in better breeding condition, would not be so inclined to remain up the canyon, a higher grade of bulls could be kept and the death rate greatly decreased both in calves and cows. Under the present system calves are dropped every month of the year, which in many cases causes the death of both cow and calf, due to scarcity of feed at the time of inclement weather. By controlling the time at which these calves came this loss might be overcome.

Whatever may be the cause or the causes of the heavy increase in the general cost of living during the past decade, there is no mystery at all as to why beef is now selling on a much higher scale. In the first place, population has increased twenty per cent in the last ten years, while cattle have decreased in the same proportion. Since the war broke out our imports have been very light from both Canada and Mexico, while our exports have been enormous and the call is for still more. These facts explain why steers are selling from $11 to $15 per cwt. in the beef market against $6 four or five years ago, and dressed beef is quoted at wholesale at eighteen cents or more a pound instead of eight cents as formerly.

See that the shelves in your preserving closet sag just a little this year.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

RACE HORSES FOR SALE.
All eligible to the three minute class. On account of nervous breakdown and heart trouble the doctors forbid me to drive or race horses. I am compelled to sell the following horses which I will offer at bargains:
KING LILLY POINTER 52223, the best bred son of Star Pointer 1:59¼, dam Lilly S. (dam of Zomrect 2:03¾, the greatest trotting stallion ever produced in the State of California) by Direct 2:05½. King Lilly, with less chance, has shown that he is as good a horse as Zomrect. On the Los Angeles track he stepped quarters in 28 seconds, halves in 1:01, third position, and miles in 2:08. Has stepped equal to 2:05½ in his racing. At Trenton, Mo., he went two quarters in 30 seconds, half in 1:02, third position, caught at the judges' stand, the fastest mile of the meet for position.
HAPPY CLAY, high-class gelding and game race horse. Raced six times in Missouri and always in the money. Distanced the field at the seven-eighths pole and jogged in. At the last meeting he raced three races in three days, taking second position in each race with ease. He has been matineed with the best horses, mostly the get of Zombro, in Los Angeles and Pasadena, and won the greatest prize of the season. He is a two gaited horse, can trot and pace the same day. Has shown quarters in 30 seconds, halves in 1:04, and miles in 2:13 at the pacing gait, and is a 2:10 horse this season.
EMBRO CLAY, five years old, by Zombro, dam Bedelia, producing dam and full sister to Happy Clay, by Clay Edwin. He is a high-class young stallion, started in three races and always in the money. Has worked eighths in 16 seconds on a poor half mile track, quarters in 33 seconds, halves in 1:07, and miles in 2:18. Is a great prospect and attractive trotter and will be a bargain for whoever gets him.
QUEEN POINTER by King Lilly Pointer has shown exhibition halves in 1:07, eighths in 15½ seconds, at 14 months old.
I must sell or ship these horses back to California where I have fifteen head of good green ones. Now is your chance to get some good ones cheap. Write for particulars.

SAVE-THE-HORSE

(Trade Mark Registered.)

Made in America.

In Demand Throughout The World

FROM ENGLAND

Mr. W. H. Saunders, Place Farm, Doddinghurst, Essex, England, writing to our branch, the Troy Chemical Company, Manesty's Lane, Liverpool, says: "My mare, lame with spavin, is indeed saved. I wish I had sent for it sooner, instead of the Vet. I used half the bottle. She has no sign of limp, travels her old pace and is full of play."

CANADA MAN WITH ONE BOTTLE CURES TWO

Mr. Armour Thompson, Box No. 36, Elmvale, Ont., writes:—Troy Chemical Company, Toronto: Concerning Save-The-Horse, it cured two curbs instead of only one, as guaranteed. Enclosed check for another bottle. Send instructions for windpuff.

FROM TEXAS

E. A. CANDLE, Weston, Texas, writes: "Troy Chemical Company, Binghamton, N. Y.: I want to praise Save-The-Horse above any remedy I ever used. I cured my horse of bog spavin; sound and well. It is nearly two years and he has never been lame since. Last spring I bought another bottle for my driving mare, which had a bad ring bone; today she is sound and well."

BOOK, Sample of Contract and Advice ALL FREE

Every Bottle Sold with signed Contract-Bond to return money if remedy fails on ringbone, thoropin, SPAVIN or ANY shoulder, knee, ankle, hoof or tendon disease. No blistering or loss of hair. Horse works as usual, any season.

$5 at Druggists, selling Save-the-Horse WITH CONTRACT, or we will send by Parcel Post or Express paid.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Two Running Races Each Day --- $100 Each Race

* * * * *

Guaranteed Stakes Nos. 2, 3, 5, 6, 8, 9, 11, and 12, $1,000 each, three heats, money divided $300 to the first heat, $300 to the second heat, $300 to the third heat, and $100 to the horse standing best in the summary. Money in each division divided 50, 25, 15 and 10 per cent. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

Nominators have the right of entering two horses in one ownership in any race by the payment of two per cent. additional, but only one of the two horses so entered to be started in the race, and the starter is to be named by 5 o'clock p. m. the day before the race is to take place.

Entrance fee five per cent. Usual five per cent. additional from all moneys won in each division of the purse in all races except Futurity Stakes.

Horses are to be named and eligible when entries close to the classes in which they are entered. Nominators required to claim time allowance in writing when making entries.

The Association reserves the right to change the hour and day of any race, except when it becomes necessary to antedate a race, in which instance the nominators will receive three days' notice by mail to address of entry.

The right reserved to reject any or all entries and declare off or postpone any or all races on account of weather or other sufficient cause.

Entries not declared out by 5 o'clock p. m. the day preceding the race shall be required to start and declarations must be in writing and made at the office of the Secretary at the track.

Racing colors must be named by 5 o'clock p. m. the day preceding the race, and must be worn upon the track, in all races. Colors will be registered in the order in which they are received, and when not named or when said colors conflict, drivers will be required to wear colors designated by the Association.

The Association reserves the right to start any heat after the fourth score, regardless of the position of the horses.

All Stakes are guaranteed for the amount offered and are for the amount offered only.

MEMBERS.

Under the By-Laws of this Association, none but horses belonging to members of the Association are allowed to start in the regular races at its meetings. Membership fee $25, which includes annual dues for the first year and entitles members to all privileges. Those who are not members of the Association should send membership fee at the time of making entries.

Member of the National Trotting Association.

ENTRIES FOR P. C. T. H. B. A. MEETING CLOSE MONDAY, AUG. 20.

In 1889, just twenty-eight years ago, the first race meeting given under the Pacific Coast Trotting Horse Breeders' Association took place at the Bay District Track in San Francisco. It was a great meeting and the success achieved at that time has been continued during all these years by this, the oldest and strongest organization of its kind in the world. Its efforts in behalf of the light harness horse industry are recognized wherever trotters and pacers are known.

The people of Bakersfield, Kern Co., will hold their second annual county fair and race meeting in their grounds at Bakersfield the first week in October. Committees have been appointed to see that every kind of a display which will instruct, please and educate the people will be on exhibition. In all the adjacent towns and villages publicity men are working hard to keep the fair prominent and assure the unqualified success it met with last year. Nothing else is talked of, and when to these attractions is added the best program of races ever offered in this State, which is to be given by the Pacific Coast Trotting Horse Breeders' Association, there is every indication that the daily attendance will be exceeded only by that of the State Fair.

Attention is called to the program of races published in our business columns, entries to which will close next Monday, August 20. The conditions under which these events will take place are very liberal; in fact, no other organization has had the courage to offer greater inducements to horsemen and trainers; hence it is to the interest of everyone interested to read it carefully and make entries in this meeting, which will be the only harness meeting given in connection with the Bakersfield Fair. Over $15,000 will be distributed during the four days of this meeting, which takes place Oct. 3d, 4th, 5th and 6th, the week following Fresno. The mile track at Bakersfield will be prepared especially for this meeting and all the races will be contested on it. In addition to the harness races two or more purses will be offered each day for the runners.

✤ ✤ ✤

Bruce G. Eaton, of Eaton, Colo., owner of one of the most celebrated and valuable bands of saddle horses in the United States, according to a rumor received by Jump Cauthorn, is arranging to disperse the entire stable at auction. It is said the horses will be shipped to Mexico, Mo., where they were assembled when Mr. Eaton first went into the business, and sold some time in October. The Eaton horses are unquestionably the equal of any one stable of stallions, brood mares, show animals, youngsters and colts ever seen in one stable. The dispersion will be regretted by horsemen everywhere; however, it will present an opportunity, the like of which has never been suggested, for lovers of saddle horses to secure the very cream of the breed at their own price.

ACHIEVEMENTS IN AGRICULTURE.

In a nation where agriculture is the most fundamental and most important of all industries and the primal source of national welfare, it is natural and inevitable that the state university should become the teacher of that great pursuit. Among the most noted and generally beneficial results of those teachings of the agricultural colleges is the spread of dairying as an integral part of the farm life. In 1890 Professor S. M. Babcock, of the University of Wisconsin, invented the "Babcock test" by which the farmer or dairyman, in a simple and accurate manner can determine the amount of butter fat in the milk of each cow in his herd and thus determine definitely its richness and its commercial value. Prior to this invention, the value of milk was based on quantity rather than quality and thus temptation to dishonesty, in the shape of watering the milk, made co-operative cremeries impracticable.

The immediate effect of this invention was to stimulate the breeding of productive herds, to promote factory efficiency, and to raise dairying to the plane of a scientific pursuit, worthy of the participation of intelligent trained men. The effect upon the economic life of the state of Wisconsin is equally marked. The production of cheese there grew from eighty million pounds in 1899 to two hundred and forty-four million pounds in 1916, while the total value of dairy products is approximately $110,000,000. It is said Wisconsin manufactures about one-half of all the cheese made in the United States.

Testing seed as a general practice is a comparatively recent thing, according to the committee report, and even now far from being universal. Yet the Iowa State Agriculeural College, by its teaching in this regard, has added about $2,000,000 annually to the incomes of the farmers of that state in the matter of corn production alone. The Agricultural College of the University of Illinois is conducting a state-wide soil survey. One of the most definite additions by the agricultural college to the wealth of the country is found in the almost complete suppression of hog cholera by campaigns of sanitation and by the use of hog-cholera serum as a preventive measure.

There is maintained at the University of Missouri in Columbia an experiment farm, and also similar ones in different parts of the state. Carrying the university to those people who cannot come to the university is the aim and purpose of extension work. This phase is well illustrated by the State Agricultural College of Kansas, in its desire to take education to the homes of the citizens.

"The great city has ever been the problem of every civilization from Babylon, Nineveh and Rome to our own times. The cry of 'back to the land' is mostly theoretical sentimentality, because it is entirely impracticable," the National Chamber report concludes. "The real answer to the portentous menace of the great congested center is to make life on the farm attractive and worth while, for the problem is even more social than economic. In Kansas, as elsewhere, all the forces and resources of the College of Letters and Science and of Agriculture are invoked in the aid of the farmer."

✤ ✤ ✤

COHEN IS PLEASED WITH BRIDGFORD'S SELECTION.

The selection of Judge E. A. Bridgford, of San Francisco, by the California State Board of Agriculture, to represent this state and officiate in the World's Championship Saddle Horse Stake at the Kentucky State Fair, has met with the approval of all exhibitors. Judge Bridgford is the pioneer breeder of California, and while a native of Missouri, he has lived in the West long enough to be a genuine Californian and his selection is an acknowledgment of his services in this state. In his letter to Secretary Paine, Commissioner of Agriculture Mat Cohen congratulates him and shows his appreciation of the selection:

"Mr. Chas. W. Paine,
"Sec'y State Board of Agriculture,
"Sacramento, Cal.

"My dear Sir:

I have your wire dated July 26th, reading as follows:

"This Board selected Judge E. A. Bridgford of California. Letter forwarded on 24th."

"I beg to both thank and congratulate you, first for your promptness and next for the wisdom displayed in selecting Judge Bridgford, as it is my good fortune to have known him for many years, and I say without fear of contradiction that the State Board of Agriculture of California could not have placed their label upon a more worthy, more deserving, more competent and better fitted man to pass upon the merits of the horses in the $10,000 saddle horse stake. Yours very truly,

"MAT S. COHEN,
"Commissioner of Agriculture."

Jas. L. Smith of Oakland, who has been an invalid for the last nine years, passed away at his home in Oakland last week. Mr. Smith, up to within three years of his death always had a few horses in training and was well known at the various race tracks throughout the State. He was a good and kind friend to both men and horses.

ARIZONA STATE FAIR.

The Arizona State Fair management has issued a program of races for its meeting, Nov. 12 to 17 this fall; full particulars of which will be found in our business columns. There will be $27,000 distributed for the different events, with no purse less than $1,000. There will be a purse of $5,000 for the 2:16 class trotters and also a $5,000 purse for the 2:12 class pacers; $2,500 purses will be offered for the 2:12 trotters and the 2:07 pacers, and the free-for-all-ers will receive $1,000 each for their races. In addition to these purses, $3,000 will be divided for the different classes of Arizona bred horses. The entrance fee is only three per cent, with seven additional from money winners. Records taken after entries are made will not be regarded in determining eligibility and entries will close Oct. 1st, after which there will be no bar on horses entered there. The very liberal purses offered and the extremely easy conditions which prevail should assure a large entry list and make the closing meeting of racing for 1917 in the Far West the most successful and attractive one ever held in the State of Arizona.

WORLD'S CHAMPION SADDLE HORSE STAKE.

[Show Horse Chronicle.]

Hon. Mat. S. Cohen has done it! All credit to whom credit is due. The proposed stake for saddle horses having a guaranteed value of ten thousand dollars is a reality, and this reality is due to the sublime optimism, unfaltering effort and tireless energy of Hon. Mat. S. Cohen, Commissioner of Agriculture of Kentucky. Conceived as a thing far greater than anything of which saddle horse history takes account, projected upon a plan of equal magnitude and surrounded by conditions that are entirely without precedent, the Ten Thousand Dollar Stake for Saddle Horses to be staged at the Kentucky State Fair during the second week in September this year is a reality that makes the most visionary dream of the wildest saddle horse enthusiast pale into insignificance . It is a project so great that all of its wonderful inclusions cannot be realized at first thought, and the more the subject is contemplated the more wonderful do its possibilities appear to be; and the greater the credit deserved for its being made a verity impresses itself upon the thoughtful student of saddle horse affairs.

The significance of this event is not solely on account of its representing the largest money prize that has ever been arranged for distribution for saddle horses. It is not alone because it will attract a list of entries that has never before been equaled in a saddle horse event. It is not alone because the series of contests which it will create will be without any example by which to compare it. Great as all these aspects of this event are and unfolding as its possibilities will unfold the more it is regarded, still the great and wonderful thing about this event is not the money nor the arrangement nor the contest, but the tremendous impetus that it will give to saddle horse affairs—the stimulus that it will give to the breeding of saddle horses and the fact that for the first time in history the eyes of the world will be drawn to the existence of and the facts about saddle horses. This is an event that takes on an aspect of national importance . It becomes a matter of consequence to every person to whom horses are in the slightest degree a subject of interest . It means that the live stock publications of the country will take cognizance of the saddle horse as an important factor in the live stock breeding operations of this country as they have never before done. It means that the daily press throughout the land will carry the news to the remotest sections and that the great informants of the public such as the Associated Press will have its countless operators in every city and village editing the news of the greatest saddle horse event in history for the millions of readers of the daily papers throughout this country. The saddle horse becomes something more than merely a recreation animal, than merely a fad of a relatively small number of enthusiasts, and from this time on partakes of the nature of an entity of business, commercial and financial importance. Saddle horses will be discussed, will be talked about, will be read about as they have never before, and the answer and logical outcome of this throwing of the spotlight upon saddle horses and the attention to them of the great general public means that thousands of people will become interested in and attracted to saddle horses that could never have been reached by any other means nor through any other medium. It is this that gives to the saddle horse championship stake at Louisville its wonderful significance and tremendous effect.

Every saddle horse lover from coast to coast should join in a concerted movement to show its appreciation to Hon. Mat. S. Cohen, to Curtis P. Cauthorn of the Breeder and Sportsman of San Francisco, and especially to the Kentucky State Board of Agriculture, for having made a reality of an event that marks the farthermost advance saddle horse affairs have ever as yet reached.

It was characteristic of Mr. Billings to do what he did with the proceeds of the sale of his trotters—namely, to donate them to the Red Cross. He is now in California, where he is erecting a stately winter home on his new property at Santa Barbara.

Thoroughbred Matters

MARYLAND FALL RACING DATES.

New York, July 24.—At a meeting of the Jockey Club this morning, the fall racing dates for the Maryland tracks were allotted and a number of jockeys and trainers' licenses granted. Havre de Grace will start the Maryland season on September 15, this conflicting with the last day at Belmont Park. All told the fall season will run sixty-six days. The schedule of racing dates is:

Havre de Grace—Saturday, Sept. 15 to Saturday, Sept. 29; thirteen days and three Saturdays.

Laurel—Monday, Oct. 1 to Wednesday, Oct. 31; twenty-seven days.

Pimlico—Thursday, Nov. 1 to Tuesday, Nov. 13; eleven days and two Saturdays.

Bowie—Wednesday, Nov. 14, to Friday, Nov. 30; fifteen days and two Saturdays.

The following jockeys and trainers were granted licenses:

Trainers—J. D. Adkins, George Denny, C. W. Gasser, H. Oots, B. T. Littlefield, M. Goldblatt, James Healy, J. O. Keene, Harry Perkins, Robt. A. Smith, Chas. L. Snyder, W. J. Speirs, W. H. Travers, W. M. Wallace, John O. Whitlow, W. J. Young, William U. Loney.

Jockeys—Lawrence Allen, Newton Barrett, D. Dudley Davenport, Chas. Hansen, John Hanover, Eddie Martin, Joseph Pierce, Samuel Pelser, F. P. Reece, Hugh S. Shilling, G. Walls, Julius Wessler.

O. A. Bianchi has recently purchased Lady Kathern, bay mare (3) by Marathon out of Aimee C., by Watercolor, from John Paul; and from Frank Brown, Bell Cow, chestnut mare (3), by Cunard out of Eonic by Eon. Both mares will be bred to Jim Gaffney next year.

✤ ✤ ✤

August Belmont has expressed a willingness to enter his good three-year-old Hourless in a sweepstakes against Wilfrid Viau's Omar Khayyam, winner of the Kentucky Derby and a victor over Mr. Belmont's colt in the running of the Brooklyn Derby at Aqueduct.

Mr. Belmont would slightly amend the conditions suggested by Mr. Viau for such a race. His proposition is that he would gladly enter the son of Nefogol and Hour Glass II., in a sweepstakes at a mile and a quarter or a mile and a half with the winner's share to go to the Red Cross Fund. The race naturally to be framed under the rules of The Jockey Club.

It is a known fact that Mr. Belmont is not a betting man and it is natural that he would not be a party to a match race, which is contrary to the rules of racing, but Mr. Belmont is a sportsman and he is still of the opinion that Hourless is a better colt than Omar Khayyam. The sweepstakes proposition would answer every purpose to test the relative merits of the two colts and they should be surely brought together in the test.

In his expressed willingness to run his colt against Omar Khayyam, Mr. Belmont did not mention any wager on the result. His idea is a sweepstakes and as such other colts could be entered in the running, but naturally, it would be primarily a test of the two named.

Something new in Western turf circles will be tried at the Tijuana meeting, which opens on Thanksgiving day. James W. Coffroth announced last week that steeplechase and hurdle races will be put on the weekly program. Work of constructing a track in the infield with the finish on the straightaway, has been ordered, and will be in readiness for the opening.

In the East the jumpers are coming back into popular favor, and the New York tracks have been staging events. Coffroth, accompanied by Leon Wing, left for the East several days ago to attract horses for the new events as well as for the stakes and regular purse races. He is counting on attracting some of the biggest stables across the Rockies to Lower California this winter.

✤ ✤ ✤

Reno (Nev.), Aug. 8.—Much interest is being displayed in the horse meet scheduled by the general arrangement committee for Labor Day, at Recreation Park, September 1 and 3.

Stuart Polk, one of the best known race horsemen, from Montreal, Canada, arrived in Reno yesterday with a string of sixteen horses, several of which he intends to enter in the Reno Labor Day horse races.

Ed. Goodburn is another race horseman who arrived in Reno recently. He brought with him Ethel Simpson, J. T. Wade and Dr. Smoot, three of the horses which made records in the Colorado meets.

There are a large number of horses at the local track held over from the July 4th meet and there are a large number of horses which have arrived during the past three weeks from Colorado and Canada. These horses will be largely represented in the Labor Day meet.

KENTUCKY RACING DATES.

Kentucky Association—Lexington, Wednesday, September 11, to Saturday, September 21, inclusive, ten days.

Douglas Park Jockey Club—Wednesday, September 25, to Wednesday, October 2, inclusive; seven days.

New Louisville Jockey Club—Louisville, Thursday, October 3, to Thursday, October 10, inclusive; seven days.

Latonia Jockey Club—Covington, Ky., Saturday, October 12, to Saturday, November 9, inclusive; twenty-five days.

Among the American buyers at the dispersal sale of Mr. Musker's stud at Newmarket, England, was Mr. G. Guilliams acting for the Nevada Stock Farm, owned by Mr. Geo. Wingfield of Reno, Nev. Mr. Guilliams made some rare good purchases, notably Lota (1911) by Sundridge out of Gourd, by Persimmon out of Canterbury Pilgrim, for 700 guineas. This mare has been bred to William Rufus and should be a great acquisition to Mr. Wingfield's collection of stud matrons.

✤ ✤ ✤

Walter Miller, famous as the leading jockey of the country for a couple of seasons, is expected to arrive in San Francisco within a couple of days. Word comes from New York, where Miller conducts a string of haberdashery stores, that he has mapped out a trip to Australia and will take a steamer from a Pacific Coast port.

Miller has long since laid aside the silks, but he will be remembered for some time to come. "Marvelous Miller" they used to call him over in Emeryville, when he was beating the barrier and booting over winners around 1908 and 1909. He was one of the few wise stars of the saddle who saved his money, and when increasing weight forced his retirement he had something to fall back on to live in luxury.

The star rider has developed into a devotee of billiards and is rated as a three-cushion player of no mean ability. He contemplates, according to the Eastern information, on making a billiard tour of the Antipodes, and will also visit the tracks, as Australia is today one of the greatest racing centers in the world.

✤ ✤ ✤

Another of the famous riders who sported silks at Emeryville has been heard from. George Archibald, the Oakland boy, has been campaigning on the German tracks for several seasons past. The fact that he is an American has naturally led to some complications. He was recently refused permission to ride an entry of Baron Oppenheim in one of the German turf classics. He has been released from the contract held by the Baron and has moved on to Austria, where he has been granted a license. He will pilot the horses of Prince Hohenlohe Oehenringen.

HONOLULU NOTES.

John F. Haley, collector of internal revenue, has received a letter from George Wingfield, the well-known Nevada owner and breeder of thoroughbreds, in which Mr. Wingfield says he is considering sending some of his fine horses here. The portion of his letter bearing upon this is:

"I am thinking of shipping to the Islands eight or ten thoroughbred brood mares with weanlings, and was also thinking of shipping four or five yearlings there also.

"I want to know what chances you think there would be in selling them there, as I understand that they hold race meets there occasionally and that Island-bred horses bring good prices.

"Of course, next year's crop from these mares would be Island-bred and would be eligible for all races for thorough home-bred horses."

There will be no racing here in September, which might make this an unfavorable time for Mr. Wingfield, but on the other hand, horses are being received now, and a market probably would be had.

It is understood here that Harry Baldwin of Maui will send Jockey Rollins to the States to buy a mile and one-quarter horse to show his heels to Walter Dillingham's Umpqua, which won from Mr. Baldwin's Mohawk Boy in the Maui mile and one-quarter. In this race Frances B. was sent in to make the pace, which she did, but Umpqua refused to be killed off, and won handily from Mohawk Boy. It is axiomatic of the Baldwins that they never quit trying, whether in polo or racing, and there may be something interesting at the next June meet. Mohawk Boy had been counted upon to do something in the Maui race and he may do better when he has had more of a chance, as he was used by Capt. E. M. Whiting, who sold him to Mr. Baldwin, as a personal mount.

It is stated that Col. A. W. Carter of the Parker ranch has made a price of $750 to Honolulu men for a yearling colt by Frolic out of Sumptuary, the dam of Gaiety and Sumere. Frolic was purchased and brought to the Islands by the late Prince David, but never raced because of breaking down, and he has been in the stud since. The yearling is one of the most promising on the Islands, it is stated. The deal probably will go through.

WANT MORE RACING IN NEW YORK.

New York, July 16.—With the racing season for New York now in the middle of its schedule horsemen are making a strong plea for the extension of the sport on Long Island after the close of the Belmont Park fall meeting.

There is particular reason for anxiety over more racing dates, because of the fact that Canada will be without the sport after August 1, and even during the month of August there will be racing nowhere but Saratoga, aside from the short meet that will be given the first week of the month on the half-mile track at Dongan Hills, Staten Island.

Since England has lifted the ban that was on during the spring, and the regular meets are now on there, hope has been expressed that the Canadian order canceling the fall dates might be rescinded, but this is a hope by no means easy of realization. Without the fall dates to be run off across the border, there will be hundreds of horses without a place to race, for there will be accommodations for but about half of those who will want to go to the Maryland tracks.

While nothing definite has been decided, there has been quite a little talk of a fall meeting at Aqueduct, with a possibility of a few days of the sport at Jamaica. And for that matter, there is no known reason why Empire City might not have at least another week of running.

It is well remembered that the finest weather of last spring, summer and fall came along in September and October and words of regret were heard on every hand that the nearest place where a race could be seen was down in Maryland. It is a certainty that there would be no dearth of horses to provide the sport around New York, in spite of the fact that larger purses will be offered at Havre de Grace, Laurel, Bowie and Pimlico. Racing here will not make a noticeable detraction from the Maryland courses which in the main are supported by Baltimore, Philadelphia and Washington, with but few New Yorkers in regular attendance.

It is believed that James Shevlin, the new president who succeeded the late Philip Dwyer as head of the Queens County Jockey Club, would be in favor of fall dates at Aqueduct provided he was given assurance of the support of a sufficient number of horsemen.

PREMIER FULFILLS PROMISE TO JOCKEY CLUB

[London Sporting Life.]

After more than two months of anxious suspense, the relief with which many hundreds of sorely-afflicted stud and stable employes will receive the news of the Government's decision to permit the resumption of racing forthwith will prove a most agreeable experience. Although the Prime Minister has not deemed it necessary to call upon the deputation appointed by the Jockey Club to meet him again, it is clear that he has not been out of touch with the issues involved, and that in the midst of his multifarious duties he has taken steps to ensure that his promise to Lord Rosebery and his colleagues would be fulfilled. In the "Sporting Life" of June 28 it was foreshadowed that the Prime Minister's decision would be satisfactory to all interested, and last night the Press Bureau issued the following statement, which fully bears out our forecast:

"July 4, 1917.

"Dear Sir John Thursby:

"Referring to the deputation of representatives of the Jockey Club to the Prime Minister on the subject of the resumption of horse racing to a limited extent, I have been requested to acquaint you, for the information of the Stewards of the Jockey Club, that the War Cabinet have now decided that, in view of the national importance of horse racing, a limited amount of racing may be allowed in England from the middle of this month to the close of the flat-racing season.

The Government are of opinion that the Stewards of the Jockey Club might arrange for approximately forty days' racing during this period, but the places at which the race meetings are sanctioned should be limited to Newmarket and such other places, and on such days, as they may agree with the War Office, the Ministry of Munitions, and the Board of Trade.

"It should, however, be understood that railway companies will not provide special trains for the conveyance of racegoers and race horses, and that owing to the shortage of petrol suitable steps must be taken to prevent the running of motor cars and taxi-cabs to race meetings.

"I am to add that should it be found that in spite of the steps which the Jockey Club may be able to take motor vehicles are still used in connection with race meetings, steps will be taken to withdraw the licenses of any such cars.

"It may be added that it has also been decided that the allowance of oats for horses in training may be increased to fifteen pounds a day, but that this increased allowance will be limited to a maximum of twelve hundred horses.

"Very faithfully,

"A. H. STANLEY."

Trevor Moore, of Truesdale Farm, Speed, Mo., recently sold some good saddle horses and mules to Dr. E. B. Powers, of Vancluse, Va. Mr. Moore, the breeder of Missouri King, has some of the best young horses in Missouri.

Running, three furlongs—Menlo (Powers) won; Negro (Harris) second; Shellville (Scovell) third. Time—0:39¼.

SAN FRANCISCO-CALIFORNIA DRIVING CLUB.

July 29.—Despite the fog and cold wind quite a large crowd saw the races run off at the Stadium. J. J. Ryan's pacing mare Lilly R. had no difficulty in winning the 2:25 pace and King Pointer paced to his best form in the free-for-all pace, winning in straight heats. There were no particular features of the day's racing but Pointer Belle and Rodney Patchen both showed improvement. Rodney Patchen winning the 2:15 pace and Pointer Belle showing enough speed to warrant the prediction that she will be soon returned a winner. The summary follows:

First Race, 2:25 Pace.

Lilly R. .....(J. J. Ryan) 1 1 1
Hello Girl .....(R. Kehoe) 2 2 2
Time—1:50, 1:52¾, 1:47¼.

Second Race, 2:15 Pace.

Rodney Patchen .....(J. McNamara) 1 3 1 1
Pointer Belle .....(J. M. Kidd) 4 1 4 dr
Vallejo King .....(Ottinger & Welch) 2 4 2 2
Little Jack .....(Geo. Conlan) 3 2 3 3
Lynmor .....(Joe Kidd) 5 5 5 dr
Time—1:39½, 1:40¾, 1:40, 1:40¾.

Third Race—Free-for-All Pace.

King Pointer .....(H. Campodonico) 1 1 1
Emma M. .....(W. Malough) 3 2 2
Bradmont .....(R. P. Roberts) 2 4 3
W. J. K. .....(W. J. Kenney) 4 3 4
Time—1:38½, 1:37½, 1:37½.

Aug. 6.—The feature free-for-all pace at the Stadium matinee yesterday saw Billy Malough score another victory with his popular mare, Emma M. It was a tight squeeze, with "South Americano" Roberts furnishing the competition with Bradmont. Little Braddie had one of his good days and copped the first heat in 2:11, the fastest of the race. Then Emma M. got going and took the next three in a row.

King Pointer, winner of the pace last Sunday, evidently did not care for the mile heats.

Joe Kidd celebrated his first victory of the season when his mare, Pointer Belle, paced consistently to beat Lilly R. in straight heats in the first race. Rodney Patchen was also a straight-heat winner over Little Jack and the trotter Vallejo King.

Jimmy Ryan, as usual, got off the fields to good starts. The summary:

First Race—2:25 Pace.

Pointer Belle .....(J. M. Kidd) 1 1 1
Lilly R. .....(J. J. Ryan) 2 2 2
Lynmour .....(D. D. Hanks) 3 3 2
Time—1:45, 1:45¾, 1:45.

Second Race—2:15 Mixed.

Rodney Patchen .....(J. McNamara) 1 1 1
Little Jack .....(George Conlan) 2 3 3
Vallejo King .....(Ottinger & Welch) 3 3 2
Time—1:38, 1:40½, 1:39¾.

Third Race—Free-for-All Pace.

Emma M. .....(William Malough) 3 1 1 1
Bradmont .....(R. P. Roberts) 1 2 2 2
King Pointer .....(H. Campodonico) 2 3 3 3
W. J. K. .....(W. J. Kenney) 4 4 4 dr
Time—2:11, 2:12, 2:12¾, 2:13½.

SADDLE and SHOW HORSES

Mrs. Thos. L. Johnson, of Mendocino county, has sold through the Breeder and Sportsman, the three-year-old gelding, Prince Denmark, by Lord Denmark, to C. E. Jones, of San Francisco. She has sent Hazle Dazzle, Noyo Boy and several other of her good horses down to San Francisco to be sold. Mrs. Johnson has decided to sell her entire stable and offers her horses at exceptionally tempting prices.

✤ ✤ ✤

The Eastern States Exposition and Dairy Show, Springfield, Mass., announces the Second Annual Horse Show to be held in the magnificent coliseum building on the exposition grounds. It is significant that this will be the sixty-fourth anniversary of the "First National Horse Show" held in Springfield in October, 1853. Those who participated in the show there in October, 1916, no doubt remember how the Coliseum (seating 6,000) was filled with from 7,000 to 10,000 horse-loving folks each of the six nights. It is an inspiration and worth while to show horses before such a large enthusiastic crowd. The booklet containing the classification will soon be ready for mailing. If interested, ask John C. Simpson, General Manager, for a copy.

✤ ✤ ✤

Judge G. T. Thurman, of Springfield, last week sold some splendid youngsters by Rex Monroe, to Robt. E. Moreland, of Lexington.

✤ ✤ ✤

That the $10,000 stake for five-gaited saddle horses at the Kentucky State Fair, next month, is attracting the desired attention of the public, is evidenced by the following message received the first of August by Jump Cauthorn:

"Chicago, Ill., August 1, 1917.

"Mr. Jump Cauthorn,
"San Francisco, California:

"How can I secure two of the best seats for the night horse show at the Kentucky State Fair. Want to see big stake sure.

(Signed) "R. E. THOMAS."

Mr. Thomas is one of the most enthusiastic horse lovers of Chicago's well known business men.

HOUCHIN GIVES REASONS.

Mr. Jump Cauthorn,
The Breeder and Sportsman,
San Francisco, Cal.

Dear Jump:

I note the answer to my letter referring to the Tulsa shows and I read the same with great pleasure and a great deal of interest. The only part of the letter I desire to answer is that part in which the gentleman suggests that I enter Astral King in the Championship stake at Louisville.
